

2018 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTATOR

BANNER COUNTY

April 6, 2018

Pete Ricketts, Governor

Commissioner Keetle:

The Property Tax Administrator has compiled the 2018 Reports and Opinions of the Property Tax Administrator for Banner County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Banner County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

Ruth a. Sorensen

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices. After analyzing all available information to determine that the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist.

Pursuant to <u>Section 77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	Jurisdiction Size/Profile/Market Activity	COD Range
Residential improved (single family	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
dwellings, condominiums, manuf.	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
housing, 2-4 family units)	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
Income-producing properties (commercial,	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
industrial, apartments,)	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
Residential vacant land	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity.

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used in the county assessor's effort to establish uniform and proportionate valuations. The review of assessment practices is based on information filed from county assessors in the form of the Assessment Practices Survey, and in observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Section 77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales

file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the groupings and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

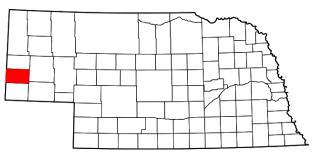

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for the end users, and highlight potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and practices are reviewed to ensure taxpayers are served with such transparency.

The comprehensive review of assessment practices is conducted throughout the year. When practical, potential issues identified are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

*Further information may be found in Exhibit 94

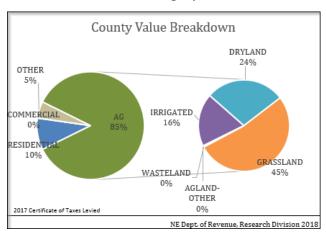

County Overview

With a total area of 746 miles, Banner County has 798 residents, per the Census Bureau Quick Facts for 2016, reflecting 1% growth on the preceding year and an overall population increase over the 2010 US Census of almost 16%. Reports indicate that 66% of county residents are homeowners and 86% of residents

occupy the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Banner County are evenly disbursed in rural locations around the county. According to the latest information available from the U.S. Census Bureau, there are nine employer establishments with total employment of 36 people

Agricultural land contributes the majority of value to the county, with grassland making up the majority of the land in the county. Banner County is included in the North Platte Natural Resources District (NRD). When compared against the top crops of the other counties in Nebraska, Banner County ranks sixth in both wheat for grain and winter wheat for grain, seventh in dry edible beans, and ninth in bison (USDA AgCensus).

2018 Residential Correlation for Banner County

Assessment Actions

The Banner County assessor addressed the residential property class by conducting a physical review of all residential improvements in Range 58W (valuation grouping 80) of the county, as well as implementing a 2017 cost index and CAMA-derived depreciation. The county assessor also unified additional acre values for rural residential (other than the home site or farm site) to \$500 per additional acre.

Description of Analysis

Two valuation groupings have been established, based solely on assessor location, and these are described in the table below:

Valuation Grouping	Description
10	Residential parcels within the village of Harrisburg.
80	All Rural residential parcels—that is all parcels outside of the
	village proper of Harrisburg.

The residential market within Banner County is neither active nor viable, as evidenced by the low number of sales that occur during the two-year period coupled with the fact that the county's real property value consists of approximately 98% agricultural, about 2% residential and the remaining fractional part of less than 1% commercial. Only eight qualified residential sales took place during the study period. Five occurred during the first year of the study and the remaining three occurred during the second year. The sales are however, distributed evenly between the two Valuation Groups.

The sample is quite small and is highly weighted by the first year sales. Eight sales do not constitute a reliable sample for an accurate point estimate of the residential population. This is further illustrated by the extremely wide range of assessment to sale price ratios (70.93% to 125.51%). The statistical profile appears to indicate a disparity between the ratios for the four Harrisburg sales (Valuation Group 10) that appear to be above range compared to the Rural sales (Valuation Group 80) that show that they are in range. Again, the small sample cannot be relied upon, and an examination of the assessment practices is necessary to ensure assessment equity and uniformity.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county, and this is used to determine compliance for all actions that ultimately affect the uniform and proportionate valuation of all property classes.

2018 Residential Correlation for Banner County

One area addressed is sales qualification and verification. Banner County's sales verification process consists of a questionnaire mailed to both the seller and buyer of all residential, commercial and agricultural property in which the recorded transactions contain documentary tax stamps. The response rate is approximately one-third of those mailed, and for those who do not respond a second questionnaire is sent. The county assessor utilizes information collected from the questionnaires, conversations with taxpayers, as well as her personal knowledge of the county to enhance the qualification process.

Non-qualified sales were also reviewed to ensure that the basis for disqualifying sales are supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. All of the non-qualified sales were supported and documented. Therefore, there does not appear to be any apparent bias in the qualification determination.

Another important part of the review was the examination of the six-year inspection cycle. The county assessor conducts the physical inspections while her staff member remains in the office to help taxpayers. Usually, at least one Range (and at times two) are reviewed per assessment year. The county assessor will be on schedule for the current six-year inspection and review cycle with next year's review of Harrisburg.

Valuation groups are another area reviewed to determine if they are established using unique, value-driven characteristics. With only two possible geographic locations—either the village of Harrisburg or Rural—this delineation is realistic.

Equalization and Quality of Assessment

Lot values in Harrisburg were analyzed for consistency. Since there is no sewer system in Harrisburg, all improved lots have their own well and septic system, and are therefore valued the same as the first acre of the rural home site—due to the initial cost and upkeep of a well and septic system.

A review of the last two columns under the "Valuation Grouping" heading show that the average adjusted assessed value compared to the average adjusted sale price is quite reasonable for both groups. The above two facts coupled with the new uniform value applied to all additional acres (above the home and farm site acres) is another assessment practice that indicates a consistency applied to all residential property.

2018 Residential Correlation for Banner County

VALUATION GROUPING										Avg. Adj.	Avg.
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD	MIN	MAX	95%_Median_C.I.	Sale Price	Assd. Val
10	4	117.38	107.79	97.21	14.29	110.88	70.93	125.51	N/A	75,875	73,762
80	4	92.16	94.19	92.12	08.73	102.25	80.52	111.91	N/A	127,000	116,995
ALL	8	101.84	100.99	94.03	16.74	107.40	70.93	125.51	70.93 to 125.51	101,438	95,378

Level of Value

Based on analysis of all available information, Banner County has achieved the statutory level of value of 100% for the residential property class.

2018 Commercial Correlation for Banner County

Assessment Actions

For the current assessment year, Stanard Appraisal reviewed and revalued the commercial feedlots in the county. The county assessor also updated the cost index and CAMA-derived depreciation to 2017.

Description of Analysis

The county assessor uses two valuation groupings to value commercial property within the county and these are based solely on assessor location.

Valuation Grouping	Description					
10	Commercial parcels within the village of Harrisburg.					
80	Rural—all remaining commercial parcels not within the village of Harrisburg.					

There are only eight commercial parcels within Banner County. Only two have occupancy codes (the bank and the re-opened café). The remaining six consist of a closed wrecking yard, Wyrulec sites and a communications tower. With commercial constituting less than a fraction of 1% of county value, the last time commercial value had a positive change (see Commercial & Industrial Value Change Chart Vs Net Taxable Sales) was when the 2014-cost index was implemented in assessment year 2015.

The statistical profile indicates no qualified commercial sales occurring during the three-year timeframe of the sales study.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county, and this is used to determine compliance for all actions that ultimately affect the uniform and proportionate valuation of all property classes.

One area addressed is sales qualification and verification. Banner County's sales verification process consists of a questionnaire mailed to both the seller and buyer of all residential, commercial and agricultural property in which the recorded transactions contain documentary tax stamps. The response rate is approximately one-third of those mailed, and for those who do not respond a second questionnaire is sent. The county assessor utilizes information collected from the questionnaires, conversations with taxpayers, as well as her personal knowledge of the county to enhance the qualification process.

2018 Commercial Correlation for Banner County

Non-qualified sales were also reviewed to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. There were no non-qualified commercial sales. Therefore, the Division does not believe that any apparent bias existed in the qualification determination.

The timeliness and accuracy of sales data submitted was also reviewed and it was determined that the sales are currently timely submitted and sales transactions are reported accurately.

Another important part of the review was the examination of the six-year inspection cycle. The county assessor conducts the physical inspections while her staff member remains in the office to help taxpayers. Usually, at least one Range (and at times two) are reviewed per assessment year. The county assessor should be on schedule for the current six-year inspection and review cycle with next year's review of the open businesses (since commercial feedlots were completed this year).

Valuation groupings are another area reviewed to determine if they are established using unique, value-driven characteristics. With so few commercial parcels and almost non-existent commercial activity, the county's division of commercial property into two valuation groupings (based on location) is reasonable.

Equalization and Quality of Assessment

For measurement purposes, there are no commercial sales available. The assessment practices indicate nothing that would suggest commercial property is not in compliance with generally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of the commercial class in Banner County is determined to be at the statutory level of 100% of market value.

2018 Agricultural Correlation for Banner County

Assessment Actions

Assessment actions taken by the Banner County assessor to address agricultural land for assessment year 2018 included a review of the qualified sales data and the general agricultural market that includes neighboring counties. This resulted in decreased dry values by slightly over 1%, increased grass values approximately 2.4%; increased land enrolled that resulted in CRP by 6%, and line 16 "Other Agland" as shown in the 2018 County Abstract of Assessment, Form 45 Compared with the 2017 CTL has an increase of 12%. This is the additional land associated with feedlots.

Description of Analysis

Banner County has determined that there is only one countywide market area used to value agricultural land. The three neighboring counties have more than one market area (Scotts Bluff to the north, Morrill to the east and Kimball to the south). Agricultural land within the county is comprised of about 66% grass (of which, about 12.5% of CRP is included), approximately 27% dry and only 5% irrigated. The remaining consists mostly of waste and other agricultural land.

Analysis of the sample reveals forty-five qualified sales, with all three overall measures of central tendency within range. The sample generally reflects the percentage of the agricultural population for each land classification. Further, the median is not significantly affected by the removal of the lowest and highest outliers. The sample is considered adequate for measurement purposes.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county, and this is used to determine compliance for all actions that ultimately affect the uniform and proportionate valuation of all property classes.

One area addressed is sales qualification and verification. Banner County's sales verification process consists of a questionnaire mailed to both the seller and buyer of all residential, commercial and agricultural property in which the recorded transactions contain documentary tax stamps. The response rate is approximately one-third of those mailed, and for those who do not respond a second questionnaire is sent. The county assessor utilizes information collected from the questionnaires, conversations with taxpayers, as well as her personal knowledge of the county to enhance the qualification process.

Non-qualified sales were also reviewed to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. All of the non-qualified sales were supported and documented. Therefore, the Division does not believe that any apparent bias existed in the qualification determination.

2018 Agricultural Correlation for Banner County

The Division also examined the county's inspection and review cycle for agricultural land and improvements. The last complete land use was completed this year, and the last review of agricultural improvements occurred during assessment year 2013.

Another assessment practice review examines the current use or non-use of agricultural market areas to ensure that the area defined is subject to a set of economic forces that affect the value of land within the described area. After discussion with the county assessor and a review of market activity within the county, the use of only one countywide market area is deemed appropriate.

Equalization

Dwellings and outbuildings on agricultural land are valued using the same cost index as those for the rural residential acreages. Farm home sites carry the same value as rural residential home sites, determined by the quality of amenities on the site (such as well, septic, and electricity).

The 80% majority land use (MLU) by Market Area statistical heading indicates that dry and grass classifications have medians within acceptable range that are supported by their respective COD. It needs to be noted that the grass sample includes land enrolled in CRP that is similar to Banner's immediate neighbor to the south (Kimball).

It is believed that the quality of assessment of agricultural land within Banner County is compliant with generally accepted mass appraisal standards.

80%MLU By Market Area RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
Irrigated						
County	1	128.11	128.11	128.11	00.00	100.00

ALL	48	73.25	75.47	70.45	22.57	107.13

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Banner County is 73%.

2018 Opinions of the Property Tax Administrator for Banner County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Cum. Supp. 2016). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	73	Meets generally accepted mass appraisal practices.	No recommendation.

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 6th day of April, 2018.

Legend

County Lines Market Areas

Geo Codes

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

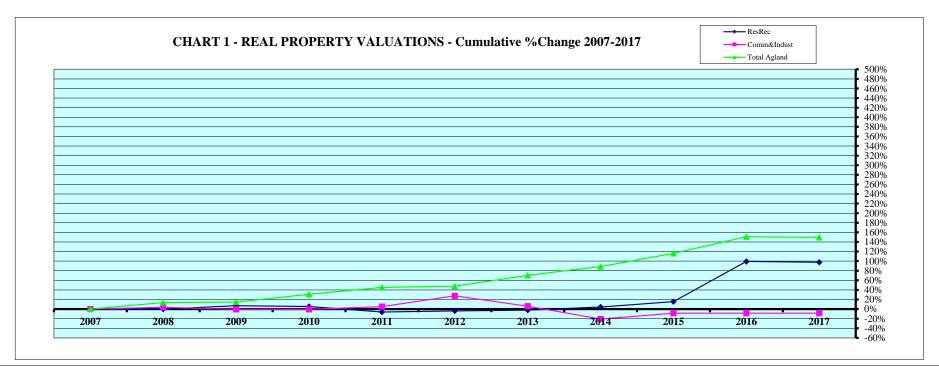

Somewhat poorly drained soils formed in alluvium on bottom lands

2018 Assessment Survey for Banner County

A. Staffing and Funding Information

and
uded
the
the
_

B. Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	No.
4.	If so, who maintains the Cadastral Maps?
	N/A
5.	Does the county have GIS software?
	Yes.
6.	Is GIS available to the public? If so, what is the web address?
	Yes. The web address is http://banner.gisworkshop.com
7.	Who maintains the GIS software and maps?
	GIS Workshop and staff.
8.	Personal Property software:
	MIPS

C. Zoning Information

1.	Does the county have zoning?
	No
2.	If so, is the zoning countywide?
	N/A
3.	What municipalities in the county are zoned?
	N/A
4.	When was zoning implemented?
	N/A

D. Contracted Services

1.	Appraisal Services:		
	Pritchard & Abbott for oil and gas; Stanard Appraisal for feedlots.		
2.	GIS Services:		
	GIS Workshop		
3.	Other services:		
	MIPS/PC Admin for CAMA, administrative and personal property software.		

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?		
	Pritchard & Abbott; Stanard Appraisal only for feedlots for 2018.		
2.	If so, is the appraisal or listing service performed under contract?		
	Yescontract for 2017.		
3.	What appraisal certifications or qualifications does the County require?		
	Pritchard & Abbott is a certified appraisal firm for oil and gas. Stanard Appraisal has a certified general appraiser.		
4.	Have the existing contracts been approved by the PTA?		
	Yes.		
5.	Does the appraisal or listing service providers establish assessed values for the county?		
	Only for oil, gas and feedlots.		

2018 Residential Assessment Survey for Banner County

1.	Valuation data collection done by:						
	The Assessor and her staff member.						
2.	List the valuation groupings recognized by the County and describe the unique characteristics of each:						
	<u>Valuation</u> <u>Grouping</u>	Description of unique cl	haracteristics				
	10	Harrisburgall residential	lential parcels within the Village of Harrisburg.				
	80	Ruralall remaining resid	ential parcels within Bar	nner County.			
	AG	Agricultural homes and or	utbuildings.				
3.	List and describe the approach(es) used to estimate the market value of resident properties.				value of residential		
	The cost approach.						
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?						
		ses the tables provided by	•				
5.	Are individua	al depreciation tables de	veloped for each valu	ation grouping?			
	No.						
6.	Describe the methodology used to determine the residential lot values?						
	Qualified sales are used to develop market value and then the square foot method is applied to each of the three lot sizes found in the village of Harrisburg.						
7.	Describe the methodology used to determine value for vacant lots being held for sale or resale?			eing held for sale or			
	At present, the	ere are no vacant lots bein	g held for sale or resal	e within Banner County	<i>'</i> .

	1 .						

2018 Commercial Assessment Survey for Banner County

1.	Valuation data collection done by:				
	The Assessor and her staff member.				
2.	List the valuation groupings recognized in the County and describe the unique characteristics of each:				
	Valuation Description of unique characteristics Grouping Description of unique characteristics				
	10 All commercial parcels within the village of Harrisburg.				
	80 Ruralall remaining commercial parcels not within the village of Harrisburg.				
3.	List and describe the approach(es) used to estimate the market value of commercial properties.				
	The cost approach.				
3a.	Describe the process used to determine the value of unique commercial properties.				
	There are no unique commercial properties in Banner County.				
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?				
	The Assessor relies upon the tables provided by the CAMA vendor (for the bank).				
5.	Are individual depreciation tables developed for each valuation grouping?				
	No, since there is no viable commercial market in Banner County. As listed above, none of the existing commercial properties would fit in a unique valuation grouping.				
6.	Describe the	methodology used to det	termine the commerci	ial lot values.	
	Since there are only eight commercial parcels in the County, commercial lots carry a "site" value.				
7.	Valuation Grouping	Date of Depreciation Tables	Date of Costing	Date of Lot Value Study	Date of Last Inspection
	10	2017	2017	2010	2013
	80	2017	2017	2010	2013
	The eight commercial parcels consist of one closed business (a wrecking yard), two open businessesthe café re-opened and the bank; one cellular phone tower, and four rural electric sites. The Assessor believes that they would be better analyzed by occupancy code rather than classified as a valuation grouping.				

2018 Agricultural Assessment Survey for Banner County

1.	Valuation data collection done by:				
	The Assessor and her staff member.				
2.	List each market area, and describe the location and the specific characteristics that make each unique.				
	Market Area Description of unique characteristics	Year Land Use Completed			
	Banner County has not identified unique agricultural market areas.	2018			
	Land use is confirmed by GIS aerials and questionnaires sent to taxpayers.				
3.	Describe the process used to determine and monitor market areas.				
	If the Assessor notices a significant difference in the market activity in a particular area, compared to the remainder of the County, she monitors this to determine if the difference was not only significant, but on-going in order to establish a separate market area.				
4.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.				
	A small parcel of land is considered rural residential, unless it adjoins an active agricultural operation, and this is usually determined by the taxpayer's response to a mailed questionnaire. Recreational land must have recreation as its primary use to be classified as such. Land leased during hunting season for a limited period of time is not seen as a primary recreational use. Hunting preserves are classified as recreational land if hunting is the primary use.				
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?				
	Yes.				
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.				
	There are currently no parcels enrolled in the Wetland Reserve Program.				
	If your county has special value applications, please answer the following				
7a.	How many special valuation applications are on file?				
	N/A				
7b.	What process was used to determine if non-agricultural influences exist in the county?				
	N/A				
	If your county recognizes a special value, please answer the following				
7c.	Describe the non-agricultural influences recognized within the county.				
	N/A				
7d.	Where is the influenced area located within the county?				
	N/A				

7e.	Describe in detail how the special values were arrived at in the influenced area(s).
	N/A

2018 Plan of Assessment for Banner County, Nebraska Assessment Years 2018, 2019, and 2020

Date: May 22, 2017

Plan of Assessment Requirements:

Pursuant to Neb. Laws 2005, LB 263, Section 9, on or before June 15 each year, the assessor shall prepare a plan of assessment (herein after referred to as the "plan") which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Department of Property Assessment and Taxation on or before October 31 each year.

Real Property Assessment Requirements:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade." Neb. Rev. Stat. 77-112 (Reissue 2003)

Assessment levels required for real property for 2017 are as follows:

- (1) 100% of actual value for all classes of real property excluding agricultural and horticultural land
- (2) 75% of actual value for agricultural land and horticultural land (as amended by LB 968); and
- (3) 75% of special value for agricultural and horticultural land which meets the qualifications for special valuation under 77-1344 and 80% of its recapture value as defined in 77-1343 when the land is disqualified for special valuation under 77-1347.

Reference, Neb Rev Stat 77-201 (R S Supp 2004)

General Description of Real Property in Banner County

Per the 2017 County Abstract, Banner County consists of the following real property types:

	Parcels	% of Total Parcels	Value	% of Taxable Value Base
Residential	93	4.98%	5,582,416	2.15%
Commercial	8	0.41%	176,394	0.07%
Recreational				
Agricultural	1565	80.59%	247,452,516	95.22%

Mineral Interest- Non-Producing	109	5.61%	58,460	0.02%
Game & Parks	15	.77%	1,114,286	.43%
	1942		259,879,402	

Agricultural land - taxable acres

The county is predominately agricultural consisting of the following sub classes:

Acres	Value
24,090.66	41,775,509
123,471.14	62,172,998
306,886.55	116,605,684
8,095.29	323,806
3,689.60	766,358
	24,090.66 123,471.14 306,886.55 8,095.29

Total of 466,233.24 acres with a value of \$2221,644,355

New property: For assessment year 2017, an estimated 3 information statement was filed for new property construction within the county.

For more information see 2017 Reports & Opinions, Abstract and Assessor Survey

Current Resources

A. Staff/Budget/Training

Presently have 1 employee who works an average of 32 hours per week. This employee has passed the assessor's exam and will be promoted to deputy assessor in August 2017.

The 2016-17 budget for the assessor's office was \$62,650 plus \$6000 included in Miscellaneous General for Appraisal (which includes pickup work and oil and gas appraisal) The assessor's office was split from the ex-officio office as of January 2011

Training -

B Cadastral Maps accuracy/condition, other land use maps, aerial photos

Cadastral maps are in a large book and have been discontinued. Aerial photos with individual mylar overlays containing ownership information, land use, and soil types are approximately 20 years old. The ownership on aerial photos is updated as deeds are filed

C Property Record Cards – new cards were prepared for the 2017 year.

For strictly ag land parcels, the land valuation sheets are printed on the MIPS program and placed behind the property record card in a plastic page protector.

Property Records Cards for parcels with improvements are a manila folder with the property record card imprinted on the front. A listing of each individual building with values for each year is permanently attached to the back of the manila folder. Each building is numbered on the site photo. A small snapshot in a photo sleeve has a corresponding number . This number is also noted on the MIPS improvement printouts and the yearly listing as mentioned.

House sketches, house photos, and farm site sketches have been updated in the MIPS CAMA

D We received a grant for an ESRI software and instructions in August of 2005. The GIS program now contains the ownership, soil conversion, and land use. We have networked the GIS program with the MIPS real estate administrative program. Our office will be working with the road department to prepare a layer showing roads locations, legal proceedings establishing roads, and the location of bridges, culverts, and all traffic signage.

E Web based – property record information access – The MIPS records have been online since June 2013. The GIS records were placed on line in 2013

<u>Current Assessment Procedures for Real Property</u>

A. Discover, List & Inventory all property.

Copies of the deeds and Form 521's filed with the Register of Deeds are processed as they are received. A copy of the 521 is filed in a notebook with a copy of the deed and agland inventory sheets if applicable. At the time the 521's are processed a form letter is sent to the seller and the buyer requesting information concerning the sale.

Information statements are not filed on a regular basis – discovery of new improvements is usually through personal observation of county officials or other reports

B Data Collection

One sixth of the improvements were physically reviewed for 2017. Photos were taken for all improvements

Market data is obtained from the Form 521 and the questionnaire mailed to buyers and sellers.

C Review assessment sales ratio studies

Market data is entered on an Excel spreadsheet with formulas which figure average selling price, median, COD, and PRD for irrigated, dry crop, grass, CRP, shelterbelts, waste, and sites. All sales (improved sales are used with the value of improvements being subtracted from the assessed value and also the selling price) are used in these computations. With time permitting the above studies are also computed with the unimproved sales only.

D Approaches to Value

- Market approach; sales comparison Used for agland sales. Have had an increasing number of sales in recent years so that sales comparison approach is more accurate than previous years. Strictly residential sales are still limited. Usually the agland sales where purchaser is actually occupying home are also included in the residential sales for computations.
- 2 Cost approach; cost manual used and date of manual and latest depreciation study- The Marshall Swift costing manual for 2014available in conjunction with the MIPS CAMA program were used for 2016. Depreciation was figured

- on the qualified sales and the current depreciation schedules were checked with these figures.
- 3 Income Approach, income and expense data collection Because of the wide variety of rental and lease arrangements on agland, this method is not an accurate measure of value. Banner County also has few rental houses available for any kind of an income study.
- 4. Land valuation studies, establish market areas, special value sales are plotted on a large map using different colors for each years sales. This is used to determine if market areas would be appropriate. Banner County does not have zoning at the present time so special value is not a consideration
- E Reconciliation of Final Value and documentation statements are attached to the property record card explaining the method used for final valuations
- F Review assessment sales ratio studies after assessment actions New values for the current year are reported on the Assessed Value Update
- G Notices and Public Relations. Change of value notices are sent to every landowner in Banner County regardless if the value changed or not. With the 2017 COV notices we once again included a printout of the land valuation groups and acres, value, etc. A letter is sent with the COV notices that reminds landowners to report change of use, etc.

Level of Value, Quality and Uniformity for assessment year 2017:

Property Class Median COD PRD

Residential Insufficient sales
Commercial Insufficient sales
Agricultural Land 71% 18.83 109.61

Assessment Actions Planned for Assessment Year 2018

^{*}COD means coefficient of dispersion and PRD means price related differential For more information regarding statistical measures see 2017 Reports & Opinions

Residential – The improvements located in Range 58 will be reviewed. Review will be conducted by the assessor and employee with possible part time help. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial - Commercial properties that are located in Range 58 will be reviewed at the same time as the residential and farm buildings.

Agricultural Land – We are using the GIS program to check land use and acreages.

Special Value - Agland - no special value anticipated

Assessment Actions Planned for Assessment Year 2019

Residential – The improvements in Range 57 will be reviewed. The same data collectors as the previous year. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial – Commercial property in Range 57 will be reviewed at the same time as the rural residential and farm outbuildings

Agricultural Land- We are using the GIS program to check land use and acreages

Special Value – Agland – no special value anticipated. Land use will continue to be check by using the GIS and FSA maps for questionable acreages.

Assessment Actions Planned for Assessment Year 2020

Residential – The improvements in Range 56 will be reviewed. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial – Commercial property in Range 56 will be reviewed at the same time as the rural residential and farm outbuildings

Agricultural Land- We are using the GIS program to check land use and acreages

Special Value – Agland – no special value anticipated

Other Functions performed by the assessor's office, but not limited to:

- 1. Record Maintenance, mapping updates, and ownership changes
- 2. Annually prepare and file Assessor Administrative Reports required by law/regulation:
 - a. Abstracts
 - b. Assessor Survey
 - c. Sales information to PA&T rosters and annual Assessed Value Update w/Abstract
 - d. Certification of Value to Political Subdivisions
 - e. School District Taxable Value Report
 - f. Homestead Exemption Tax Loss Report (in conjunction with Treasurer)
 - g. Certificate of Taxes Levied Report
 - Report of current values for properties owned by Board of Educational Lands & Funds
 - i. Report of all Exempt Property and Taxable Government Owned Property
 - j. Annual Plan of Assessment Report
- 3 Personal Property; administer annual filing of 170 schedules with a value of \$10,726,955; prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required
- 4 Permissive Exemptions: administer 4 annual filings of applications for new or continued exempt use, review and make recommendations to county board.
- 5 Taxable Government Owned Property annual review of government owned property not used for public purpose, send notices of intent to tax, etc
- 6. Homestead Exemptions: administer 25 annual filings of applications, approval/denial process, taxpayer notifications, and taxpayer assistance.
- 7 Centrally Assessed review of valuations as certified by PA&T for railroads and public service entities, establish assessment records and tax billing for tax list.
- 8 Tax Districts and Tax Rates management of school district and other tax entity boundary changes necessary for correct assessment and tax information; input/review of tax rates used for tax billing process
- 9. Tax Lists; prepare and certify tax lists to county treasurer for real property, personal property, and centrally assessed.
- 10 Tax List Corrections prepare tax list correction documents for county board approval
- 11 County Board of Equalization attend county board of equalization meetings for valuation protests assemble and provide information.

- 12 TERC appeals prepare information and attend taxpayer appeal hearings before TERC, defend valuation
- 13 TERC State wide Equalization attend hearings if applicable to county, defend values, and/or implement orders of the TERC
- 14 Education: Assessor and or Appraisal Education attend meetings, workshops, and educational classes to obtain required hours of continuing education to maintain assessor certification.

Conclusion:	
The 2017-2018 budget request will be approximate	ely the same as the previous year.
Respectfully submitted:
