Information for Statewide Equalization 2012
Survey of County Assessors/Software Providers for Administrative Systems

1) Computer system limitation on decimal places for % change for equalization:

MIPS Inc. PC System: Limited to 2 places to the right of a decimal point, e.g., 9.99%.
Values are rounded to the nearest \$5.

MIPS Inc. PC System V2: Limited to 2 places to the right of a decimal point, e.g., 9.99%.
Values are rounded to the nearest \$5.

MIPS Inc. A/S 400 System: Limited to 2 places to the right of a decimal point, e.g., 9.99%.
Values are rounded to the nearest \$5.

TerraScan: No limit on decimal place % change. Values can be rounded to nearest \$1, \$5, \$10, etc., depending on county's individual choice on settings.

Tyler Technologies/Orion: No limit on decimal place percentage change. Values can be rounded to nearest \$1, \$5, \$10, etc.

Douglas County: Colorado CustomWare/RealWare is limited to 2 places to the right of a decimal point, e.g., 9.99%

2) Other than identifying correct class or subclass of property, are there any other computer system limitations or comments:

MIPS Inc. PC System or PC System V2: Only limit depends on information kept in the administrative system by each specific county.

MIPS Inc. A/S 400 System: Ability to adjust house value, improvements, and/or single lot value by percentage.

TerraScan: The land value, improvement value, and outbuilding value can all be adjusted separately, but anything beyond that is not easily achieved, e.g., increasing the residence only as opposed to the total residential improvement value.

Tyler Technologies/Orion: No other comments regarding computer system limitations.

Douglas County: No other comments regarding computer system limitations.
