2014 Opinions of the Property Tax Administrator for Dixon County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	96	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	72	Meets generally accepted mass appraisal practices.	No recommendation.

***A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 7th day of April, 2014.

Property Tax Administrator

2014 Residential Assessment Actions for Dixon County

All residential properties in Dixon County were updated only for new buildings, additions, remodeling or condition changes this year. We are in the process of updating all our photos for our GIS website. We are also in the process of redrawing all of our residential and rural properties. This process is extremely time consuming.

2014 Residential Correlation Section for Dixon County

County Overview

Dixon County is located in the northeastern region of the State of Nebraska. The community with the largest population (1,451 residents) in the county is the city of Wakefield (Valuation Group 10). The city of Wakefield is split between Dixon and Wayne Counties. The second largest community of Ponca has a population of 961 residents (Valuation Group 1). Ponca is located in the northern portion of the county and is the county seat. The village of Allen (Valuation Group 15) has a population of 377 residents and is located approximately ten miles north of Wakefield on Highway 9 and the village of Newcastle (Valuation Group 20) has a population of 325 and is located west of Ponca on Highway 12. Emerson (Valuation Group 10) is located in three counties with the largest portion of the county on the west side of Highway 9. There are five villages in Dixon County with a population less than 170. Those communities include Concord, Dixon, Maskell, Martinsburg and Waterbury (Valuation Group 25).

Description of Analysis

Residential parcels are valued utilizing seven valuation groupings that closely follow the assessor locations or towns in the county. The residential sales file for Dixon County consists of 99 qualified arm's length sales. Analysis of the statistical profile indicates that overall a residential level of value is at 96% and within the acceptable range. However, two valuation groups (5 and 10) are slightly above 100%.

The assessment actions of the county in the past indicate that Valuation Group 5 was recently reassessed in 2011. There are currently 17 sales in the valuation group. The median in the year after the reappraisal was 96.19%. The residential market has remained relatively flat in Dixon County, so a median rounded to 101% does not seem like a legitimate indicator of the level of value. A further inspection of these sales reveals an average assessed value of approximately \$68,000. Considering the effect of low dollars sales in the sample, the statistics of all sales with assessed value greater than \$30,000 produces a median of 97%. This variance in statistics suggests it is just as likely the valuation grouping is valued acceptably, as it is not. Aside from a median measure that rounds to 101%, other valid indicators suggest the level is near the middle of the acceptable range.

Discussion with the county assessor indicated that the last reappraisal/listing for Valuation Group 10 was completed in 2007. The county has this group scheduled for review during 2014 for the 2015 assessment year. The disparity in the sample suggested by the coefficient of dispersion also indicates the valuation group should be physically reviewed and revalued. The small sample size, statistical variance, and lack of physical inspections since 2007, all compromise the reliability of the sample statistics as an indicator of the level of value.

2014 Residential Correlation Section for Dixon County

Sales Qualification

Dixon County has a consistent process in place for the verification of sales of the residential class. The Division has implemented an expanded review of one-third of the counties to review the assessment practices of the county with Dixon County selected in 2012. A second review was also implemented concerning the verification of sales. The Division is confident that all available arm-length transactions were available when determining the level of value for the county.

Equalization and Quality of Assessment

The county maintains a systematic review and inspection and based on the assessment practices of the county it is believed that the residential property is treated in a uniform and proportionate manner.

Level of Value

Based on analysis of all available information, the level of value is 96% of market value for the residential class of property.

2014 Commercial Assessment Actions for Dixon County

For the 2014 valuations commercial properties were reappraised in the following communities: Concord Village, Dixon Village, Maskell Village and the City of Wakefield. The commercial properties in these communities all have a Marshall & Swift costing of 7/20/2013 and the depreciations were all redone for the current year. These properties have all been redrawn into the new Cama system.

3.	List and describe the approach(es) used to estimate the market value of commercial properties.														
	We currently use the cost approach. The majority of our commercial properties are owned and occupied by the same people, we have very little rental commercial properties. The only commercial properties which are rented are apartments.														
3a.	Describe the process used to determine the value of unique commercial properties.														
	We use Marshall and Swift costing and contact other counties and our field liaison for sales of like properties.														
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?														
	We develop our own economic and functional depreciations, and use vendor tables for physical depreciation.														
5.	Are individual depreciation tables developed for each valuation grouping?														
	Yes.														
6.	Describe the methodology used to determine the commercial lot values.														
	We currently use front foot for commercial property, we are trying to move to the square foot method as we have few commercial sales and in failing communities street front is not important as many of the buildings sell for storage.

2014 Commercial Correlation Section for Dixon County

County Overview

The commercial market in Dixon County is relatively flat. The commercial base in Dixon County is the strongest in the city of Wakefield (Valuation Group 5). The Michael's Food facility, an egg processing plant is the largest employer in the county and draws employees from several surrounding counties. The communities of Emerson (Valuation Group 10) and Ponca (Valuation Group 1) have commercial services of medical offices, grocery stores, banks, mini marts and other retail services. The communities of Allen (Valuation Group 15) and Newcastle (Valuation Group 20) tend to be declining in the available services to the communities and the remainder of the small towns (Valuation Group 25) is very limited in the commercial services available to the communities.

Description of Analysis

Dixon County utilized as many sales as possible to represent the commercial market in the county. There are 12 qualified sales in the statistical analysis. The sample is small and the occupancy codes represented are numerous and do not support any one type of property.

The county reported that the commercial parcels in Valuation Group 25 (Small villages under 100 population with the exception of Waterbury) and Valuation Group 5(Wakefield) were reappraised implementing the 7/2013 Marshall and Swift costing and updating depreciations.

Sales Qualification

The Department completed a sales verification review for all counties in 2012. All non-qualified sales were reviewed to ensure that the reasons for disqualification were sufficient and documented. The Department is confident that all available arm-length transactions were utilized and there was no bias in the sales verification.

Equalization and Quality of Assessment

With the information available it was confirmed that the county was in compliance with the statutory six year review and inspection requirement and that the assessment practices are reliable and being applied consistently. It is believed the commercial properties are being treated in a uniform and proportionate manner.

Level of Value

The sale information for the commercial class of property is unreliable to indicate a level of value. However, because the county's assessment practices have been investigated and determined to be acceptable, it is concluded that the statutory level of value of 100% has been met for the commercial class of property.

2014 Agricultural Assessment Actions for Dixon County

Area 1

Irrigated land in Area 1 was increased by 35%, dry land was increased by 40% and grass land was increased by 25%.

Area 2

Irrigated land in Area 2 was increased by 35%, dry land was increased by 35% and grass land was increased by 25%.

<u>Market Area</u>	<u>Description of unique characteristics</u>						
1	Generally more flat land, larger fields. Areas of hills are more rolling than steep, soil types are typically better. More irrigation is used in this area s topography makes irrigation easier.						
2	Hills are steep, tree cover in northern areas is becoming more dense in many hilly areas allong the river bluffs. Soils are of lesser quality and the northern area has more pasture land than the southern area. Field sizes are typically smaller in Area 2.						
3.	Describe the process used to determine and monitor market areas.						
	Monitor sales which occur in each area and review land uses in each area..						
4.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.						
	Our recreational land has consistently been along the river and is made up of small mobile home parks. Our rural residential has been classified as under 20 acres. Since the valuations continue to be the same for rural residential and home sites we do not have any issues with this method.						
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?						
	We currently use the same value for farm sites and rural residential sites.						
6.	Describe the process used to identify and monitor the influence of non-agricultural characteristics.						
	We use GIS, FSA and physical inspection to update our land use.						
7.	Have special valuation applications been filed in the county? If a value difference is recognized describe the process used to develop the uninfluenced value.						
	No						
8.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.						
	We have 2 parcels; sales fro surrounding counties were used to set value, as we have none.

Source: 2014 Abstract of Assessment, Form 45, Schedule IX

2014 Agricultural Correlation Section for Dixon County

County Overview

Dixon County is currently divided into two market areas. Market Area 1 is the southern portion of the county and the land use as reported on the county abstract indicated approximately 15% irrigated, 77% dry land and the remainder is grass and waste. The terrain in this portion of the county is not as hilly as the northern portion of the county. Market Area 2 is the northern portion of the county and is bordered on the north edge by the Missouri River. The land use as reported on the county abstract indicates approximately 8% irrigated, 63% dry land and the remainder is grass and waste. The market for the agricultural land is strong and it is getting difficult to recognize characteristics in the market to justify the independent market areas. Annually the county reviews the market information to verify the need to have the two areas. After the review it was determined that to combine them this year would not be reasonable.

Description of Analysis

The initial analysis of the agricultural sales sample revealed that the county was lacking sales to proportionately distribute sales by time. The sample was expanded with comparable sales from surrounding counties to ensure time proportionality while maintaining representativeness by Majority Land Use.

The county increased values in both market areas for the 2014 assessment year. The increase for Dixon County for the 2014 assessment year resulted in a 35.84% increase in the agricultural total value as reported on the County Abstract compared to the 2014 Certificate of Taxes Levied. This increase is considered reasonable in comparison to surrounding counties. It is believed that both market areas are equalized.

Sales Qualification

The Division conducted a review of each county's sales verification and documentation. This included a review of the sales deemed non-qualified as well as the County's sales verification documentation. Review of the qualification process utilized by the County indicated that no bias existed in the qualification of the sales.

Equalization and Quality of Assessment

The Division has conducted an expanded review in 2012 of Dixon County and confirmed the inspection and review process for the six year cycle is being completed. It has been confirmed that the assessment practices are reliable and applied consistently. Therefore, it is believed there is uniform and proportionate treatment of the agricultural land class.

Level of Value

Based on analysis of all available information, the level of value is 72% for the agricultural class of land in Dixon County.

DIXON COUNTY 2013

3 YEAR PLAN OF ASSESSMENT

Purpose – Submit plan to the County Board of Equalization and the Department Of Property Assessment & Taxation on or before October 31, 2013.

GENERAL DESCRIPTION OF THE COUNTY

In 2013 Dixon County has a total of 5,595 parcels, of that approximately 6% are commercial and approximately industrial, 9% are exempt, approximately 35% are residential and 50% are agricultural. 632 Personal property schedules(not including centrally assessed schedules) were filed in the county this year and 216 Homesteads Applications were accepted. Dixon County's total valuation for 2013 is 998,607,868.

BUDGET

2013 General Budget = \$103,551.61

(Salaries for one clerk, county deputy and the county assessor salary, office supplies, mileage, schooling, postage, misc.)

2013 Reappraisal Budget = 44,126.40

(One clerks salary, postage, computer expense, mileage, schooling, dues, and supplies, GIS)

RESPONSIBILITIES

The office currently has 3 employees besides me. I currently do not have a Deputy Assessor so those duties which include are divided up between all of the staff: assists with pickup work, enters information in the CAMA system, makes sales books for office and public use, prices out buildings using the Marshall & Swift pricing, she also prices out the commercial property and also assisting with personal property and homestead filings. The Deputy also works in the sales file. Currently, the Deputy position is open. Two clerks work 5 days a week. One of the clerks handles all transfer statements, land splits and keeps the cadastral maps current, as well as keeping the property record cards current. These duties are done as soon as the paperwork is received from the County Clerk's Office. This clerk is also responsible for the GIS system. She also assists with personal property and homesteads.

The other clerk handles the majority of the personal property and homestead filings. The clerk handles the majority of phone calls and faxes that come into the office.

As the Assessor I file all reports when they are due following the statutes, Assist with pickup work, enter information into the CAMA system, price out improvements, and calculate depreciation percentages for improvements. I and one of my staff do all the data collection and physically inspect property as needed. We perform sales ratio studies in-house as well as doing our own modeling for depreciation tables. We use the cost approach and get our depreciations from the market. I also calculate all valuation changes for agland, residential and commercial properties. We currently have our administrative and cama packages with MIPS. We do not have any other contracts for pickup work or appraisal services.

All the staff in the office is able to assist the taxpayer with any questions or concerns they may have. We have developed sales books, which are helpful to both the taxpayers and appraisers who come into our office. Along with the valuation notices that are sent out, we send a flyer for land sales and residential and rural homes and commercial properties which have sold. This seemed to be a very helpful tool for getting information to people who may not come in the office informed of what the market is in their town. We make an effort to make the public feel comfortable when they come into our office and are very honest with them about what is going on with them and their values. I believe this has helped a great deal during protest time. I also think this is the reason we have relatively few protest. We attempt to talk to every taxpayer requesting a protest form. We show them how there values were arrived at and many times they don't protest because we have shown them why their value changed and what the changes were based upon. Our hope is that they leave the office more informed about what this office does and why these things have to be done.

RESIDENTIAL

Dixon County has been through all the towns & villages now and updated the Marshall & Swift pricing in order to meet the changing trends in the market. We will continue to use the CAMA system to reappraise our towns as needed. Currently the median in our towns look pretty good, we will continue to monitor this and make the changes necessary to improve our assessment practices. We have valued lots using the square foot method at the same time we revalue the town so we can have a more accurate picture of the properties true market value. The CAMA pricing currently being used on all the houses is 9/2011. We are working very hard to get all the properties drawn, new pics & reviewed so we will be able to go online hopefully, by the middle of 2014. We received a GIS grant and we are waiting for them to complete our website. We did reappraisals in Allen, Waterbury, Newcastle, Concord, Dixon & Maskell this year, drawing them in the computer, repricing and updating photos for the computer.

2013 – Allen, Emerson, Waterbury, Newcastle

2014 – Ponca, Martinsburg

2015 – Wakefield, Concord, Dixon, Maskell

COMMERCIAL

A complete reappraisal of commercial properties was completed in 1999 by the Assessor's office staff. Industrial properties were reappraised in 2001. Pricing was done on the 1999 Marshall & Swift computer program. We will be reappraising using 7/2013 pricing. Several towns have had the commercial properties updated by occupancy code. Dixon County has so few commercial properties and even fewer sales, it can be very difficult to find market value. Final valuation is by the sales comparison approach. Income and expense data was gathered but there was insufficient rental information to utilize the income approach to value. Commercial properties will continue to be monitored and adjustments made when deemed necessary by the market.

2013 – Appraisal maintenance

2014 – Reappraisal of Concord, Dixon, Maskell & Wakefield

2015 - Reappraisal of Allen, Emerson, Waterbury, Newcastle

AGRICULTURAL

Rural residences were reappraised in 1997 and updated in 2005 using 2000 Marshall & Swift computer pricing. We are also studying the market to see how distance from pavement, towns etc. are impacting rural sales. Site values will continue to be studied.

Agricultural land will continue to be reviewed annually as will the current market areas, for changes in the market. We no longer go to the FSA office to review land use changes unless we have problems. We will begin getting their CD's and using the GIS to update each year of land use changes. Land use changes which we are made aware of or discover, will be treated as pick up work and revalued for the year the change occurred. The clerk who takes care of GIS is currently going parcel by parcel and reviewing land use, using FSA flights. We also will continue to study market area lines to ensure they are appropriate for current sales. We have also seen a lot of ground broken up, the majority of which was in CRP and already being valued as dry.

2013 – Monitor market by LCG

2014 - Monitor market by LCG

2015 - Monitor market by LCG

SALES REVIEW

Dixon County currently reviews all sales by sending a verification form to the buyer in a self-addressed stamp envelope. We have also contacted the seller, realtor, or physically inspected the property sold if we need more information than we were able to obtain from the buyer. We had been seeing approximately 75% return on our verification form, however, this last year we are only seeing about 55%. Several of the forms we received back have said it is none of our business or contact the buyers attorney they will not be answering any of our questions. We have always had these types of comments over the years; however, they are becoming more frequent.

CONCLUSION

We are currently working to get all properties drawn, new pictures & reviewed to be able to go online the middle of 2014. We have ordered new flights from GIS Workshop for 2014, so we can update our rural residence aerials. A GIS system for the county was purchased in late 2004. This has taken a majority of one of my Clerk's time. We feel this has made our office more efficient and accurate. Also, it will make it much easier to get the taxpayer current maps. Each year our office reviews all statistical information to ensure that our values are within the acceptable ranges. **We will also try to improve our PRD & COD on all types of property each year. We use a good deal of our sales throwing out only the sales we feel are not arms length transactions. This office does everything in-house with the number of employees that we have, we do all the TERC Appeal, County Board of Equalization Meetings, prepare tax lists, consolidate levies, etc.**

Sincerely,

Amy Watchorn
Dixon County Assessor

6 YEAR REVIEW CYCLE

**2012- WAKEFIELD, CONCORD, DIXON,
MASKELL**
