# 2014 Opinions of the Property Tax Administrator for Sioux County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	94	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	75	Does not meet generally accepted mass appraisal practices.	MrktArea:1; Irrigated; +51%

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2014.

# 2014 Residential Correlation Section for Sioux County

#### **County Overview**

Sioux County is located in the very northwest corner of Nebraska's Panhandle. The reported 2012 population is 1,315 and therefore there is not a typical, viable and competitive residential market. Sioux County shares two borders with other states—the northern border is shared with the State of South Dakota and the western border is shared with the State of Wyoming. Eastern neighbors include Dawes and Box Butte Counties. The southern border is adjacent to Scotts Bluff County. The County seat is in the village of Harrison, and there are no incorporated municipalities within the County—thus, all residential activity is either in the village of Harrison or in the Rural residential sector. Agriculture, education and limited services are the majority occupations within the County. The Assessor has developed two valuation groupings (based entirely on Assessor Location): 10 Harrison and 80 Rural.

#### **Description of Analysis**

The two-year period of the current sales study provided twenty-four sales. Of these, eighteen occurred within valuation group 10 (Harrison) and the remaining six were within valuation group 80 (Rural). Two of the three overall measures of central tendency are within acceptable range, and this is also true for the eighteen sales in valuation group 10. Although the six sales in valuation group 80 indicate a median of 77%, an overall increase to land and improvements of 25% to bring the median to the midpoint would merely do just that—none of the six sales would fall within acceptable range.

#### **Sales Qualification**

The Department conducted a review of the sales deemed non-qualified as well as Sioux County's sales verification documentation. Review of the qualification process utilized by the County indicated that no bias existed in the qualification of sales and the Assessor was utilizing all information available from the sales file to assist in developing valuations for all the residential property class.

#### **Equalization and Quality of Assessment**

The Department utilizes a yearly analysis of one-third of the counties within the state to systematically review assessment practices. Sioux County was selected for review in 2011. It has been confirmed that the assessment actions are reliable and applied consistently. It is believed that residential property is treated in a uniform and proportionate manner.

Further, the County had completed the physical review of all improvements (residential, commercial and agricultural residences and outbuildings) within the County in assessment year 2011, and re-valued these using a 2010 cost index and a market-derived depreciation.

# 2014 Residential Correlation Section for Sioux County

#### **Level of Value**

Based on analysis of all available information, the level of value for residential property in Sioux County is determined to be 94% of market value. No non-binding recommendations for adjustment to a subclass will be made.

## **2014** Commercial Assessment Actions for Sioux County

For assessment year 2014, the Sioux County Assessor completed any commercial pick-up work.

# 2014 Commercial Correlation Section for Sioux County

#### **County Overview**

Sioux County, located on the very northwestern border of Nebraska's Panhandle, as of 2012 exhibited a population of 1,315. The County seat is the village of Harrison, and there are no incorporated municipalities within the County. Approximately seventy properties are identified as improved commercial, with about thirty-six existing in the village of Harrison and the remainder found in the rural area (many of these are commercial cattle feeding operations). The main economic activity of the County is agricultural in nature—both farming and ranching operations. Therefore, it is highly improbable that there is a viable, competitive commercial market in Sioux County.

#### **Description of Analysis**

Only seven commercial sales occurred during the three-year period of the sales study. Of these, six occurred in valuation group 10 (Harrison) and only one occurred within the valuation group 80 (Rural). There are nineteen occupancy codes that comprise the commercial property class in Sioux County, with storage warehouse (406) constituting 63% of the total occupancy codes. However, there is only one storage warehouse that sold during the timeframe of the sales study, and is therefore not representative of the commercial population as a whole. Therefore, the statistics are not meaningful.

#### **Sales Qualification**

The Department conducted a review of each county's sales qualification process. This included a review of all sales deemed non-qualified as well as Sioux County's sales verification documentation. Review of the qualification process utilized by the County indicated that no bias existed in the qualification of sales and the Assessor was utilizing all information available from the sales file to assist in developing valuations for the commercial property class.

#### **Equalization and Quality of Assessment**

The Department utilizes a yearly analysis of one-third of the counties within the state to systematically review assessment practices. Sioux County was selected for review in 2011. It has been confirmed that the assessment actions are reliable and applied consistently. It is believed that commercial property is treated in a uniform and proportionate manner.

The County had completed the physical review of all improvements within the County in assessment year 2011, and re-valued these using a 2010 cost index. A market-derived depreciation schedule was also developed and implemented at this time.

#### Level of Value

There is no information available to indicate that Sioux County has not met an acceptable level of value. Based on the consideration of all information available and the County's assessment

### **2014** Agricultural Assessment Actions for Sioux County

For assessment year 2014, Sioux County Assessor matched the GIS mapping to the PC Admin (CAMA) program for majority land use. She also removed the "burned timber" class. The following land classes were addressed overall: irrigated land was increased by about 26%, the dry class was increased by 40% and the grass land class was increased by 22%.

## **2014** Agricultural Assessment Survey for Sioux County

	201171gffediturar Assessment Survey for Sloux County
1.	Valuation data collection done by:
	The Assessor and her staff.
2.	List each market area, and describe the location and the specific characteristics that make each unique.
	Market     Description of unique characteristics       Area     Description of unique characteristics
	This agricultural market area consists of the largest portion of the County and is comprised mostly of ranching operations.
	Market area two is located in the extreme southwest corner of the County and primarily consists of about 34% irrigated or crop-producing parcels and about 64% grass land.
3.	Describe the process used to determine and monitor market areas.
	Land use in each market area is monitored via GIS and personal inspection (and this matching of GIS mapping to existing data was done this assessment year).
4.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.
	Primary land use is the major consideration used to identify and value both rural residential and recreational land apart from agricultural land within Sioux County. Recreational value is applied by the County to accessory land in parcels where a huntiing lodge or cabin is located and/or parcels in which the primary purpose of ownership is to provide recreational opportunities.
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?
	Yes.
6.	Describe the process used to identify and monitor the influence of non-agricultural characteristics.
	GIS maps were updated in the fall of 2012 as well as FSA maps provided by the taxpayers to monitor any possible non-agricultural influence.
7.	Have special valuation applications been filed in the county? If a value difference is recognized describe the process used to develop the uninfluenced value.
	No.
8.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.
	The Sioux County Assessor is not aware of any land currently enrolled in the Wetland Reserve Program within her County.

Source: 2014 Abstract of Assessment, Form 45, Schedule IX

#### **County Overview**

Sioux County encompasses 2067 square miles of land. Agricultural land use consists approximately of 90% grass, 3% dry land and about 4% irrigated. The remaining three percent is classified as waste. The County has two clearly defined agricultural market areas based on topography, soil type and availability of water. Market Area One is the largest area in the County and consists mostly of grass land. Market Area Two on the southwestern end of the County has irrigated farm ground and borders Scotts Bluff County on the south and the State of Wyoming to the west. Other counties contiguous to Sioux are Dawes and Box Butte to the east.

Sioux County has the distinction of lying within two Natural Resource Districts. Market Area One lies within the Upper Niobrara White NRD (UNWNRD). Market Area Two lies within the North Platte NRD and since the southern portion of the County contains 66% of all irrigated land in Sioux County, the availability of water and its regulation are extremely important.

#### **Description of Analysis**

Analysis of the dry crop land and grass land values indicates assessment levels are within the acceptable range and values are relatively similar to adjoining counties (in both areas one and two). For the class of irrigated land in Sioux County Market Area 1 however, analysis has indicated that historical changes in assessed values have not increased proportionate to the general irrigated land market in the Panhandle region.

Across Nebraska, agricultural land values began increasing annually at significant rates in 2008. In Sioux County Area 1, the 2008 to 2014 Abstract of Assessment, Form 45 reflects an average annual increase to irrigated land values of only 10% per year, with the majority of those changes occurring for this assessment year (2014). During that same time period, the 2013 Real Estate Market Development publication by the University of Nebraska indicates that the market value of irrigated land increased an average of 40% per year in the Panhandle region. As shown in the chart below, in 2008 Sioux Market Area 2 and Scotts Bluff County had the highest irrigated values in the Panhandle region; below market annual adjustments for these two areas since 2008 still maintained appropriate levels of value. Conversely, 2008 irrigated values in Sioux Area 1 and Dawes Area 1 were very similar to the rest of the Panhandle region, and below market annual adjustments have not been sufficient to maintain appropriate levels of value.

	Abstra Irrigated	_	% Change Calculation					
	2008	2014	Total	Avg Yearly				
Sioux 1	432	746	73%	10%				
Dawes 1	438	731	67%	10%				
Sioux 2	1000	1828	83%	12%				
Dawes 4	440	1325	201%	34%				
Scottsbluff	873	2044	134%	19%				
Box Butte	512	1836	259%	37%				

Irrigated land in Sioux Market Area 1 makes up approximately 1% of the total agricultural acres in the market area, which has consistently led to insufficient samples of irrigated sales being used by both the county assessor for establishing irrigated values and the Property Assessment Division for measuring irrigated values.

While these samples have traditionally been considered too small to warrant further review, the only sale occurring in the market area for the past seven years occurred in October, 2011 and supports that irrigated assessments have not kept up with the market.

To measure the irrigated land in Sioux Market Area 1, the neighboring counties with similar land features were studied. The scarcity of sales however, prohibited the creation of a representative sample of irrigated sales.

Agricultural land in the Panhandle region of the state is predominantly pasture used for cattle grazing with occasional meadows used for haying. Cropland in the area is primarily used for the production of supplemental feed, rather than commercial farming. Consequently, all land types are subject to the influence of the ranching industry and the market for crop land is generally assumed to move proportionate to grass land. Since grassland sales are abundant in the area, an analysis was produced comparing the market value of grass to irrigated sale prices per acre from the same time period. The results suggested that generally, irrigated sells at 500% of the sale price for grass land. Using the grass land average sale price per acre for the current study period, application of the factor of 500% indicates the irrigated market is approximately \$1,568 per acre. The weighted average assessed value currently would suggest the level of value for irrigated in Sioux County Area 1 is 48% of market value.

Additional analysis based on a dry land to irrigated comparison in the Panhandle was done. Analyzing the sales indicates that dry crop land commands a selling price of approximately 30% of the irrigated market value based on a regional analysis of sales. Considering that dry land values in Sioux Market Area 1 have been increasing proportionate to the general market in the past few years, the dry land assessed value of \$377 per acre divided by the 30% factor produces a market indication of irrigated at \$1,257 per acre. Comparing this value to the current weighted irrigated average assessed value suggests the level of value for irrigated land is 59% of market value.

Avg Dry Assessed Value	377
Irrigated Value (Dry / 0.3)	1257
rrent Weighted Avg Irr Value	746
Irrigated Median	59%

These irrigated indicators are predicated on relationships to known values demonstrated by sales, and do not produce exact results. However, both analyses confirm the irrigated values in Market Area 1 are lagging behind the market.

#### **Sales Qualification**

Sioux County has consistent procedures that are utilized for sales verification. A Department review of the non-qualified sales demonstrates a sufficient explanation in the County comments

section to substantiate the reason for the exclusion from the qualified sales sample. All qualified agricultural sales are available for analysis and review. There is no evidence of excessive trimming in the file.

#### **Equalization and Quality of Assessment**

Based on a correlation of all available information the level of value for grass and dry land is acceptable (as well as irrigated land in Market Area Two). It may appear that the grass level of value is between 77-86% in Market Area One but the current overall grass value is equalized within the County and compared to its neighbors, thus reflecting the grass market in the region. It should be noted that the median for grass in Area One is skewed by eight first year sales with high A/S ratios and two of the 95% MLU grass sales indicate a timber value. A review of the average abstract per acre value for Sioux Area One grass and its neighboring counties provides the following: Sioux Area One \$261; Sioux Area Two \$252; Dawes overall \$285; Box Butte overall \$301; Scotts Bluff Area Three \$252. Further analysis indicates that if the grass classification of land were decreased to the midpoint of range, the following overall statistics for Market Area One would be obtained:

Median	63.02%	AAD	15.12%
Mean	62.01%	PRD	101.64%
W/ Mean	61.01%	COD	23.99%

It would also seem that irrigated land in Market Area Two is at the 81% level. Again, it should be noted that the Area Two values established by the Sioux Assessor are similar to those in neighboring counties: Sioux Area 2 \$1,828; Box Butte 1 \$1,913; Box Butte 3 \$ \$1,897 and Scotts Bluff 3 \$2,044. Additional analysis indicates that if irrigated land in Market Area Two were lowered to the midpoint of the 80-95% MLU range, the following overall statistics for Area Two would be obtained:

Median	67.56%	AAD	18.32%
Mean	69.83%	PRD	134.16%
W/ Mean	52.05%	COD	27.12%

However, the level of value for irrigated land in Market Area One is not acceptable. Since the tax burden is essentially shifted to the other sectors as a result of the Assessor's failure to increase irrigated land in Area One, assessment practices are not in compliance with accepted mass appraisal standards.

#### **Level of Value**

Based on a correlation of all available information, the level of value for the Sioux Market Area 1 irrigated land class is determined to be at 48% of market value. The recommendation of the Property Tax Administrator is to increase irrigated land 51% in Market Area 1 to bring the class level of value to the midpoint of the acceptable range.

The values expected from a 51% increase would result in assessed values that are within the acceptable range and reasonably similar to comparable markets in adjoining counties. Since the tax burden is essentially shifted to the other sectors of agricultural land as a result of the failure to increase irrigated land, assessment practices are not in compliance with professionally accepted mass appraisal standards.

#### 2014 Plan of Assessment for Sioux County Nebraska Assessment years 2014, 2015 and 2016 July 15, 2013

To: Sioux County Board of Equalization

Ruth Sorensen, Nebraska Property Tax Administrator

FROM: Michelle Zimmerman, Sioux County Clerk/Ex-Officio Assessor

Pursuant to Neb. Laws 2005, LB 263, Section 9, Sioux County Assessor Michelle Zimmerman hereby presents a Three-year Assessment Plan as follows:

Assessment levels for 2013 are: Agricultural -72%, Residential -92% and Commercial -100%.

For the 2013 County Abstract, Sioux County consists of the following real property types:

	Parcels	% of Total Parcels	% of Taxable Value Base
Residential	314	7	4
Commercial	70	2	2
Recreational	29	1	.005
Agricultural	3896	90	94
Mineral	2	.005	
TOTAL	4311		

90% of Sioux County is agricultural land. There are 273 tax exempt parcels. Sioux County had 371 personal property schedules filed on May 1, 2013. There were 40 Homestead exemption applications filed for 2013. For the year 2013, 4 new homes were added to the Sioux County valuation. For more information see 2013 Reports & Opinions, Abstract and Assessor Survey.

I have one staff member who handled all of the personal property returns, she required depreciation schedules be filed with every return and also mailed notices to new property owners in the event that they were not aware of the personal property filing requirement. Staffing has remained the same for 2013, with a full-time deputy, one full-time and one part-time employee. As Sioux County Clerk/Ex-Officio Assessor, Ex-Officio Clerk of District Court, Election Commissioner, Zoning Coordinator, and Budget Authority, I cross-train employees to perform other duties that I am also responsible for.

The budget for FY 2012-2013 for Sioux County Assessor was \$136,527.70. Of this budget, \$30,000 was included for contract for reappraisal, which was not used in this budget cycle.

I have completed IAAO Courses 300 and 101, as required by statute. I attend as many Panhandle District Assessor's meetings as possible, as I believe that the networking with other assessors in the area is invaluable. I also have been able to attend the summer

workshops offered by NACO in order to gain knowledge and education credits. As stated previously, I do now have a deputy assessor on staff. I will continue to take courses offered through IAAO, NACO and PAD.

Sioux County contracts with GIS Workshop for a web based GIS system. The images are from the fall of 2012. I and my staff are currently reviewing those photos and comparing them to land classifications in the MIPS PCAdmin program. Four townships were reviewed in 2012. In 2013 we have completed review of six additional townships and plan to finish the final two townships so all parcels are reviewed by 2014. We also maintain a cadastral plat map showing ownership. MIPS PCAdmin and MIPSCAMA programs are used for assessment purposes. Property record cards are maintained by me and my staff. The record owner name and mailing addresses are updated from 521's. Pictures are taken when properties are updated and electronically attached to parcels. Current sketches are also attached electronically.

Ownership on all parcels is updated upon review of 521's filed. Sales data questionnaires are mailed to all purchasers of property listed on 521's on a quarterly basis. I utilize data collected, and am also able to use my personal knowledge on sold properties. Sioux County has county-wide zoning in place and requires building permits for residential construction and improvement information forms for ag construction. The Village of Harrison also requires building permits and I receive a copy of those from the village clerk annually. Property inspections and listing are done by the assessor and staff. I also work very closely with Mark Loose, Field Liaison to prepare and review sales ratio studies.

Market approach to value is used on all properties. Sales comparisons are used to compare similar properties.

Cost approach to value is used on residential and commercial properties. For 2013, Marshall & Swift costing dated 2010 was used for RCN.

Income approach was used in Stanard's reappraisal of commercial properties in 2010.

"Notice of Valuation Changes" are sent out prior to June 1. Levels of Value are published in the local newspaper and in the office.

Level of Value, Quality and Uniformity for assessment year 2013:

	Median	COD	PRD
Residential	92	26.90	107.07
Commercial	100	57.87	92.99
Agricultural	72	26.40	121.32

### Assessment actions planned for assessment year 2014:

Residential: Monitor costing index to ensure current values are keeping up with market trends. Continue to physically review parcels for changes and monitor building permits issued by the village.

Commercial: Monitor building permits issued by the village. Study sales to ensure that no changes should be made in commercial properties.

Agricultural: Compare GIS mapping, reviewing Townships 30, 31 and 32. Perform market analysis by market areas. Physically inspect those properties on which improvement sheets or building permits have been filed.

#### Assessment actions planned for assessment year 2015:

Residential: Monitor costing index to ensure current values are keeping up with market trends. Continue to physically review parcels for changes and monitor building permits issued by the village.

Commercial: Monitor building permits issued by the village. Study sales to ensure that no changes should be made in commercial properties.

Agricultural: Physically inspect properties on which improvement sheets or building permits have been filed.

#### Assessment actions planned for assessment year 2016:

Residential: Monitor costing index to ensure current values are keeping up with market trends. Continue to physically review parcels for changes and monitor building permits issued by the village.

Commercial: Monitor building permits issued by the village. Study sales to ensure that no changes should be made in commercial properties.

Agricultural: Physically inspect properties on which improvement sheets or building permits have been filed. Review all improvements.

I, as Sioux County Assessor, will continue to maintain acceptable levels and quality of assessment throughout the county.

## **2014** Assessment Survey for Sioux County

## A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	One
2.	Appraiser(s) on staff:
	None
3.	Other full-time employees:
	None
4.	Other part-time employees:
	None
5.	Number of shared employees:
	One
6.	Assessor's requested budget for current fiscal year:
	\$149,500.15
7.	Adopted budget, or granted budget if different from above:
	Same
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$30,000
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	N/A
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$12,000
11.	Amount of the assessor's budget set aside for education/workshops:
	\$4,800
12.	Other miscellaneous funds:
	None
13.	Amount of last year's assessor's budget not used:
	\$48,122 (part of this is the yearly \$30,000 set aside for the next reappraisal).

## **B.** Computer, Automation Information and GIS

1.	Administrative software:
	MIPS/PC Admin
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	The Assessor
5.	Does the county have GIS software?
	IYes
6.	Is GIS available to the public? If so, what is the web address?
	Yes, GIS is available to the public. The web address is http://sioux.assessor.gisworkshop.com
7.	Who maintains the GIS software and maps?
	GIS Workshop
8.	Personal Property software:
	MIPS

## C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes
3.	What municipalities in the county are zoned?
	Harrison
4.	When was zoning implemented?
	2001

## **D. Contracted Services**

1.	Appraisal Services:
	Pritchard & Abbott for mineral interests appraisal.
2.	GIS Services:
	GIS Workshop
3.	Other services:
	MIPS/PC Admin

## E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Only Pritchard & Abbott.
2.	If so, is the appraisal or listing service performed under contract?
	Yes
3.	What appraisal certifications or qualifications does the County require?
	Certification in the appraisal of oil, gas and mineral interests.
4.	Have the existing contracts been approved by the PTA?
	Not sure.
5.	Does the appraisal or listing service providers establish assessed values for the county?
	Yes, for mineral interestsl.

# **2014 Certification for Sioux County**

This is to certify that the 2014 Reports and Opinions of the Property Tax Administrator have been sent to the following:

One copy by electronic transmission to the Tax Equalization and Review Commission.

One copy by electronic transmission to the Sioux County Assessor.

Dated this 7th day of April, 2014.

PROPERTY TAX ADMINISTRATOR ASSESSMEN

Ruth A. Sorensen Property Tax Administrator

Ruch a. Sovensen
