# 2015 Opinions of the Property Tax Administrator for Logan County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	99	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100 practices.		No recommendation.
Agricultural Land	74	Meets generally accepted mass appraisal practices.	No recommendation.

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2015.

### 2015 Residential Correlation Section For Logan County

### **County Overview**

Logan County is located in west central Nebraska and has a population of 763 (2010 census). Two major influences in the settlement of this region occurred with the Kinkaid Act of 1904 and the arrival of the railroad in 1911. Stapleton is the county seat with a population of 305 (2010 census). The only other village is Gandy and it is located just three and a half miles from Stapleton.

Logan County along with McPherson County is part of the North Platte, NE Micro-Politian Statistical Area. Stapleton is located 25 miles away from North Platte, NE by way of the major highway 83. This makes Stapleton a desirable location for commuters that enjoy the small town environment, while still giving them access to a larger selection of amenities and job opportunities that exist in the North Plate community. This factor helps stabilize the residential market within Logan County; the economics of the county alone would not support a residential market.

### **Description of Analysis**

The statistical profile of twelve residential sales is considered to be a satisfactory and reliable sample for the measurement of the residential class of real property in Logan County. No unique characteristics have been defined in the market that would warrant more than one valuation grouping within the county. The residential market seems to be somewhat stable acknowledging the influences of the larger trade center to the south.

The assessment actions state that a complete reappraisal was done for the villages of Gandy and Stapleton and a new depreciation model was applied throughout the residential class using current sales. The coefficient of dispersion and the price-related differential are low, but so few sales available, almost every sale will have an impact on the depreciation model. The sales file and the county's abstract of assessment affirm the assessment actions. The assessor is staying on task completing the assessment actions laid out in the three year plan and the six year physical inspection.

### **Sales Qualification**

A Sales Qualification review is conducted annually by the department. The review involved analyzing the sale utilization rate and reviewing the non-qualified sales roster to ensure that the reasons for disqualifying sales were adequate and documented. No apparent bias existed in the qualification determinations and all arm's length sales were made available for the measurement of real property in the county.

### 2015 Residential Correlation Section For Logan County

### **Equalization and Quality of Assessment**

The Department utilizes a yearly review of the counties within the state to systematically review assessment practices. Logan County was selected for review in 2012. With the information available it was confirmed that the assessment practices are reliable and applied consistently. It is believed the residential properties are being treated in a uniform and proportionate manner.

### **Level of Value**

Based on the analysis of all available information, the level of value of residential property in Logan County is 99%

# **2015** Commercial Assessment Actions for Logan County

Only routine maintenance was completed in the commercial class for the assessment year 2015. Pick up work was completed in a timely manner.

# 2015 Commercial Correlation Section for Logan County

### **County Overview**

Logan County makes up a portion of the North Platte, NE Micro-Politian Statistical Area along with McPherson County. Stapleton is 25 miles from North Platte and residents within the county rely on the goods, services, and job opportunities offered in and around North Platte. The economics within the county do not support an organized commercial market.

### **Description of Analysis**

The commercial parcels within the county are found in 12 different occupancy codes. Most of the occupancy codes have only 1 or 2 parcels per code. Only four of the codes repeat more than once. They are 344-office buildings, 353-retail stores, 406- storage warehouses, and 470-equipment buildings. There are currently no qualified sales that fall within the study periods.

Logan County continues to complete the assessment actions within the three year plan. The county also is on time with the 6 year physical review cycle and completes all pick up work timely. The assessment actions state that only pickup work was completed for the 2015 year, the sales file and county's abstract of assessment verify this.

#### **Sales Qualification**

A Sales Qualification review is completed annually for all counties. This review included the analysis of the non-qualified sales roster to verify that the reason for the disqualification was adequate and documented. There appears to be no bias in the qualification determinations and all arm's length sales were made available for the measurement of real property in the county.

#### **Equalization and Quality of Assessment**

The Department conducts a review of assessment practices for counties within the state. Logan County was selected for review in 2012. With all the available information it is to be believed that the assessment practices are reliable and the Commercial class is being treated in a uniform and proportionate manner.

A commercial sample does not exist to utilize in the measurement of the commercial property.

#### Level of Value

Based on the consideration of all available information and assessment practices, the level of value is determined to be at the statutory level of 100% of market value for the commercial class.

# 2015 Agricultural Assessment Actions for Logan County

A market study was done for the agricultural class that clearly indicated that an increase was required in all three land classes.

The assessor has monitored changes in land use and has added irrigation to several parcels.

### 2015 Agricultural Correlation Section For Logan County

### **County Overview**

Logan County is located in the Nebraska Sand Hills and Loess Hills regions of Nebraska. The majority of the county is comprised of Sand Hill's soils. A branch of the South Loup River runs through the southernmost part of the county creating a transition between the Sand Hills to the north of the river and the Loess Hills to the south, which is better farming ground. Farming and cattle production both have an impact on the economics of the county, but the majority of the county is Sand Hills rangeland.

Logan County is in the Upper Loup Natural Resource District, which has moratoriums and restrictions. But the Upper Loup NRD also has a program for the expansion of irrigated acres, where annually they grant up to 2,500 additional acres to be irrigated if certain criteria are met.

### **Description of Analysis**

An initial review of the statistics revealed that the sales were not proportionate when stratified by sales date and the sample was too small containing only 7 sales between the three study periods. Although all additional sales possible were brought in from surrounding counties to equalize the sample, the sample still remains small. The overall median falls outside the acceptable range, upon further investigation, this median is being affected by two mixed use sales; with a smaller sample of sales these two sales are having an impact on the overall statistics. Therefore, this measure of central tendency should not be used to measure the level of value.

The assessor raised the value of the higher land class groupings of irrigated land at a larger percentage than the lower classes. The logic behind this was for the value of the lower LCG's to mirror surrounding Sand Hill's counties to the north, while the higher LCG's represent the better farm ground to the south. With a lack of market evidence, the assessor raised the value of dryland at a similar percentage as the irrigated lands. Both the 80% and 95% majority land use grass balance when stratified by sales date are both within the acceptable range. The assessor increased the grass by 22%. This increase is similar to increases taken by surrounding counties and the values relate well to the values set by the neighboring counties. Since the county is made up of 88% grass, the 95% majority land use median of grass land is considered to be the best indicator of the level of value for the county.

#### **Sales Qualification**

A sales qualification review is completed annually by the Department for all counties. This involved reviewing the non-qualified sales to ensure that the reasons for disqualifying sales were

### 2015 Agricultural Correlation Section For Logan County

sufficient and documented. No apparent bias existed in the qualification determinations and all arm's length sales were used.

### **Equalization and Quality of Assessment**

The evidence supports that agricultural values have been established at uniform portions of market value; the quality of assessment is in compliance with professionally accepted mass appraisal standards.

#### Level of Value

Based on all available information, the level of value of agricultural property in Logan County is 74%.

### **Logan County 3-Year Plan of Assessment**

### June 12, 2014

Logan County has 278 residential properties, 46 Commercial Properties and 1139 agricultural properties. There are an estimated 147 personal property filings each year and estimated 36 homestead exemptions.

Logan County has an official, one deputy and one part-time clerical that deal with listing of properties, determining values and filing personal property schedules. The county also will hire an appraiser as needed. The deputy handles most of the computer work such as data entry, sketching, record changes, and running necessary reports. The official has final responsibility of setting values for all classes of property.

The County assessor maintains the cadastral mapping system at the time of the recording of a deed. The records have current ownership and land depreciation.

Aerials were taken 2001-2002. Actions that were completed for 2014 are as follows:

Ag-land sales were studied and adjusted value according to sales for dry land, grass and irrigated classes. Added new irrigated acres. Reviewed a portion of North rural residential properties and took pictures and added to TerraScan System. Completed pickup work. We did a review of residential properties in Gandy Village. No change for Gandy Village lots for 2014. Gandy Commercial lot values for 2014 weren't changed from 2007. We did a review of residential properties in Stapleton Village. No change for Stapleton Village Lots for 2014. Stapleton Commercial land values and improvements were not changed in 2014. Rural Commercial land remained the same as 2007. 2009 Depreciation schedule was used for residential property rural, Stapleton Village and Gandy Village. 2008 Marshall Swift Pricing for Rural, Gandy Village and Stapleton was used for 2014. 2008 Marshall Swift pricing, with 2009 depreciation for rural outbuildings, for improvements that are not included on Marshall Swift Pricing. 2006 depreciation schedule for Mobile Homes located in rural and villages was used for 2014 may need to look at the depreciation for 2015, small number of mobile homes located in Logan County. Ag sites for 4000 were not changed. Rural Ag sites 4500 for 2009 were redefined and revalued same value that was used in 2009 for 2014.

We start our pickup work as time allows. We list all pickup work in a notebook. This work is completed timely according to statute. In 2013-2015 we plan to drive the County and review all property. Work on the assessor's record files. Study Ag-land and take pictures of rural improvements to insert in TerraScan system. Review quality and condition classifications for improved residential property. Plan to update Marshall Swift Pricing for Rural, Gandy Village and Stapleton Village and work with depreciation schedules for Rural, Gandy Village and Stapleton Village.

Assessor completes 521 data as soon as possible.

Reports of the Logan County Assessor are filed on time.

Homestead Exemption applications are filed on or before June 30. State Statute.

State Statutes, rules and regulations are followed in filing personal property schedules and abstracts are filed on time.

Pat Harvey Logan County Assessor

## 2015 Assessment Survey for Logan County

## A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	0
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	1
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$ 67,150
7.	Adopted budget, or granted budget if different from above:
	same
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$ 14,550
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	Not applicable.
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$6,500
11.	Amount of the assessor's budget set aside for education/workshops:
	\$ 4,000
12.	Other miscellaneous funds:
	N/A
13.	Amount of last year's assessor's budget not used:
	\$ 14,978.09

### **B.** Computer, Automation Information and GIS

1.	Administrative software:
	TerraScan (owned by Thomson Reuters)
2.	CAMA software:
	TerraScan (owned by Thomson Reuters)
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Assessor
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	www.logan.gisworkshop.com
7.	Who maintains the GIS software and maps?
	GIS Workshop
8.	Personal Property software:
	TerraScan (owned by Thomson Reuters)

### C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	No - only the rural area is zoned.
3.	What municipalities in the county are zoned?
	None
4.	When was zoning implemented?
	2003

### **D. Contracted Services**

1.	Appraisal Services:
	A contract appraiser will be hired when needed.
2.	GIS Services:
	GIS Workshop
3.	Other services:
	TerraScan (owned by Thomson Reuters)

### E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Not at this time
2.	If so, is the appraisal or listing service performed under contract?
	Not at this time.
3.	What appraisal certifications or qualifications does the County require?
	Credentialed and professional experience in the appraisal field.
4.	Have the existing contracts been approved by the PTA?
	Not applicable.
5.	Does the appraisal or listing service providers establish assessed values for the county?
	Not at this time.
