**2025 REPORTS AND OPINIONS  
OF THE PROPERTY TAX ADMINISTRATOR**

---

**HARLAN COUNTY**

April 7, 2025

Jim Pillen, Governor

Commissioner Hotz :

The 2025 Reports and Opinions of the Property Tax Administrator have been compiled for Harlan County pursuant to [Neb. Rev. Stat. § 77-5027](#). This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Harlan County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to [Neb. Rev. Stat. § 77-1514](#).

For the Tax Commissioner

Sincerely,

A handwritten signature in black ink that reads "Sarah Scott".

Sarah Scott  
Property Tax Administrator  
402-471-5962

cc: Kim Fouts, Harlan County Assessor

## **2025 Reports and Opinions of the Property Tax Administrator:**

- Certification to the Commission
- Introduction
- County Overview
- Residential Correlation
- Commercial Correlation
- Agricultural Land Correlation
- Property Tax Administrator's Opinion

## **Appendices:**

- Commission Summary

### ***Statistical Reports and Displays:***

- Residential Statistics
- Commercial Statistics
- Chart of Net Sales Compared to Commercial Assessed Value
- Agricultural Land Statistics
- Table-Average Value of Land Capability Groups
- Special Valuation Statistics (if applicable)
  
- Market Area Map
- Valuation History Charts

### ***County Reports:***

- County Abstract of Assessment for Real Property, Form 45
- County Abstract of Assessment for Real Property Compared to the Prior Year
- Certificate of Taxes Levied (CTL)
- Assessor Survey
- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

## Introduction

---

Pursuant to [Neb. Rev. Stat. § 77-5027](#) the Property Tax Administrator (PTA) shall annually prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments to be considered by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by [Neb. Rev. Stat. § 77-1327](#). From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level; however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

### **Statistical Analysis:**

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division teammates must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties. The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is the recognition by IAAO of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	Jurisdiction Size/Profile/Market Activity	COD Range
Residential improved (single family dwellings, condominiums, manuf. housing, 2-4 family units)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
Income-producing properties (commercial, industrial, apartments,)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
Residential vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
Other (non-agricultural) vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to [Neb. Rev. Stat. §77-5023](#), the acceptable range is 69% to 75% of actual value for agricultural land, except for taxes levied to pay school bonds passed after January 12, 2022 for which the acceptable range is 44% to 50% of actual value. For all other classes of real property, the acceptable range is 92% to 100% of actual value.

### **Analysis of Assessment Practices:**

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to [Neb. Rev. Stat. §77-1327](#), a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with [Neb. Rev. Stat. § 77-1311.03](#) and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the Division, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

*\*Further information may be found in Exhibit 94*

## County Overview

With a total area of 553 square miles, Harlan County has 3,045 residents, per the Census Bureau Quick Facts for 2023, a 1% population decrease from the 2020 U.S. Census. Reports indicate that 85% of county residents are homeowners and 94% of residents occupy the same residence as in the prior year (Census Quick Facts). The average home value is \$132,781 (2024 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Harlan County are located in and around Alma; a number of commercial businesses cater to recreational opportunities at the Harlan County Reservoir. According to the U.S. Census Bureau, there are 93 employer establishments with total employment of 585, a 3% decrease.

Agricultural land contributes the largest portion to the county's valuation base by a large margin. Agricultural land in the county is a mix of all three primary land uses: irrigated, dryland, and grassland. Harlan County is included in the Upper Lower Republican Natural Resources District (NRD). Some of the primary crops grown within the county include corn, soybeans, sorghum, winter wheat, oats, and alfalfa.

## 2025 Residential Correlation for Harlan County

### *Assessment Practices & Actions*

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

A review of the sales verification and qualification process supports that the Harlan County Assessor qualified sales below the statewide average usability rate. However, a review of the sales qualifications shows no bias and that all arm's-length transactions have been made available for measurement.

There are six valuation groups in Harlan County, Valuation Group 1 is the largest town, Valuation Group 5 is the mid-size communities, Valuation Group 6 is the small villages, Valuation Group 2 is the rural parcels except those around the reservoir and Valuation Groups 3 and 4 are influenced by the lake and are stratified by year round homes with generally better quality versus mobile homes of lesser quality and mostly seasonal homes.

The county assessor reviews the residential parcels and has a schedule of review to ensure that the six-year inspection and review cycle is in compliance. The County Assessor does have a written methodology on file.

2025 Residential Assessment Details for Harlan County						
Valuation Group	Assessor Locations within Valuation Group	Depreciation Table Year	Costing Year	Lot Value Study Year	Last Inspection Year(s)	Description of Assessment Actions for Current Year
1	Alma	2022	2020	2022	2020	
2	Acreages	2022	2020	2024*	2022	
3	Lake Homes	2023	2020	2020-2023	2020-2023	30% Map area adjustment
4	Republican City and Taylor Manor	2023	2020	2023/2024*	2021-2023	Taylor Manor- 25% map area adjustment
5	Oxford and Orleans	2023	2020	2023	2020-2023	
6	Huntley, Ragan, Stamford	2022	2020	2023	2023	7% Map area adjustment
Additional comments: Pick-up work and routine maintenance was completed for the residential class.						
* = assessment action for current year						

### *Description of Analysis*

The statistical sample for the residential class consists of 102 qualified sales. All three measures of central tendency are within the acceptable range, while both qualitative statistics are high. The PRD does not demonstrate a clear pattern of regressivity but does display outliers at various prices levels.

## 2025 Residential Correlation for Harlan County

The valuation groups all have medians within the acceptable range with the exception of Valuation Group 3 which is below the acceptable range, with four sales and ratios ranging from 59% to 93%; there is too much variability to rely on the median. The county assessor increased this valuation group 30% and actively works on adjusting the valuation group with the market.

A review of the sold parcels compared to the change in the 2025 County Abstract of Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) supports that the values were uniformly applied to the residential class of property and reflect the reported assessment actions.

### *Equalization and Quality of Assessment*

A review of the statistics and the assessment practices suggests that assessments within the county are valued within the acceptable range and are equalized. The quality of assessment of the residential property in Harlan County complies with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	42	93.97	92.07	91.37	17.68	100.77
2	5	96.76	116.21	107.89	28.61	107.71
3	4	78.03	77.31	74.72	14.02	103.47
4	17	94.68	105.42	104.56	24.13	100.82
5	26	95.00	102.19	87.29	33.81	117.07
6	8	94.81	107.14	99.58	30.70	107.59
____ALL____	102	93.51	98.66	92.63	24.76	106.51

### *Level of Value*

Based on analysis of all available information, the level of value for the residential property in Harlan County is 94%.

## 2025 Commercial Correlation for Harlan County

### *Assessment Practices & Actions*

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

The sales verification and qualification process was reviewed showing that the Harlan County Assessor qualifies sales at a rate above the statewide average rate. A review of the sales roster reveals an adequate reason for non-qualified sales and that all arm's-length transactions were made available for measurement.

There is only one valuation group for Harlan County as occupancy codes are the major factor in determining values with land values accounting for locational differences. A contract appraiser is hired to review the commercial parcels all in one year. The assessor is in compliance with the six-year inspection and review cycle.

2025 Commercial Assessment Details for Harlan County						
Valuation Group	Assessor Locations within Valuation Group	Depreciation Table Year	Costing Year	Lot Value Study Year	Last Inspection Year(s)	Description of Assessment Actions for Current Year
1	Entire County	2018	2020	2023	2023	
Additional comments: Pick-up work and routine maintenance was completed for the commercial class.						
* = assessment action for current year						

### *Description of Analysis*

The statistical sample for the commercial class consists of 15 qualified sales. The median is within the acceptable range while the weighted mean is low and the mean is slightly high. Looking at the qualitative statistics the COD is within the recommended range while the PRD is high. There is one high dollar sale that is affecting the PRD and weighted mean, overall there is not a regressive pattern to assessments.

Comparison of the 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) supports that the values were uniformly applied to the commercial class of property and reflect the reported assessment actions. There is a 4% increase in the sample, but this is a result of a TIF project being terminated.

### *Equalization and Quality of Assessment*

A review of the statistics along with all other information available and the assessment practices suggest that assessments within the county are valued within the acceptable range and are

## **2025 Commercial Correlation for Harlan County**

---

equalized. The quality of assessment in Harlan County complies with generally accepted mass appraisal techniques.

### ***Level of Value***

Based on analysis of all available information, the level of value for the commercial property in Harlan County is 99%.

## 2025 Agricultural Correlation for Harlan County

### *Assessment Practices & Actions*

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

The sales verification and qualification process was reviewed showing that Harlan County qualifies sales near the statewide average rate. A review of the sales roster reveals an adequate reason for non-qualified sales and that all arm's-length transactions were made available for measurement.

The county assessor collects the data and reviews the agricultural parcels and is in compliance with the six-year inspection and review cycle. Intensive use has been identified, and a contract appraiser helps establish values based on market analysis.

2025 Agricultural Assessment Details for Harlan County						
		Depreciation Tables Year	Costing Year	Lot Value Study Year	Last Inspection Year(s)	Description of Assessment Actions for Current Year
AG OB	Agricultural outbuildings	2022*	2020*	2024*	2024*	
AB DW	Agricultural dwellings	2022*	2020*	2024*	2024*	
<u>Additional comments:</u>						
* = assessment action for current year						

Market Area	Description of Unique Characteristics	Land Use Reviewed Year	Description of Assessment Actions for Current Year
1	Northeast Part of County - Best farmland	2021	Irrigated and dry increased 12%, grass increased 5%
2	Rolling Hills with poorer soil types	2021	Irrigated land, dryland and grass increased 5%
3	South of Republican River - Rough, poor soil	2021	Dry increased 6%, grass increased 5%
<u>Additional comments:</u>			

### *Description of Analysis*

The statistical sample for the agricultural class consists of 34 qualified sales. The overall statistics show all three measures of central tendency and the COD within the acceptable range. There are three market areas in Harlan County, and all have medians within the acceptable range. There are very few sales when stratified by 80% Majority Land Use (MLU) only Market Area 2 has sales in all three subclasses.

Market Area 2 irrigated subclass had 5 sales and is high, however the county assessor made no adjustment to irrigated values, dryland with three sales is low but when looking at the average acre

## 2025 Agricultural Correlation for Harlan County

comparison they are equal to or higher than all adjacent counties with the exception of Franklin County Market Area 2 which is only 1% higher, and grass is higher than most adjacent counties.

Review of the 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) reflect the reported assessment actions.

### *Equalization and Quality of Assessment*

Agricultural homes and outbuildings have been valued using the same valuation process as rural residential improvements and are equalized at the statutorily required level. Agricultural land values are equalized at uniform portions of market value; all values have been determined to be acceptable and are comparable to adjoining counties. The quality of assessment of agricultural land in Harlan County complies with generally accepted mass appraisal techniques.

80%MLU By Market Area						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
<u>Irrigated</u>						
County	6	75.21	82.11	77.08	14.17	106.53
1	1	68.80	68.80	68.80	00.00	100.00
2	5	76.83	84.77	78.46	14.55	108.04
<u>Dry</u>						
County	8	62.00	65.02	60.82	12.89	106.91
1	3	62.00	70.26	71.51	13.32	98.25
2	3	60.62	62.23	53.08	18.97	117.24
3	2	61.37	61.37	61.39	02.64	99.97

3	1	120.52	120.52	120.52	00.00	100.00
<u>ALL</u>	34	69.31	73.50	68.90	23.55	106.68

### *Level of Value*

Based on analysis of all available information, the level of value for the agricultural land in Harlan County is 69%.

## 2025 Opinions of the Property Tax Administrator for Harlan County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	94	Meets generally accepted mass appraisal techniques.	No recommendation.
Commercial Real Property	99	Meets generally accepted mass appraisal techniques.	No recommendation.
Agricultural Land	69	Meets generally accepted mass appraisal techniques.	No recommendation.

*\*\*A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 7th day of April, 2025.

## Legend

- Market\_Area
- County
- Registered\_WellsDNR
- geocode
- Federal Roads

## Soils CLASS

- Excessive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Moderately well drained silty soils with clay subsoils on uplands
- Lakes

## 2025 Assessment Survey for Harlan County

### A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	0
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	1
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$240,819
7.	Adopted budget, or granted budget if different from above:
	Same
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$40,000
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	Yes- \$20,000
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$40,000
11.	Amount of the assessor's budget set aside for education/workshops:
	\$1,500
12.	Amount of last year's assessor's budget not used:
	\$24,528

## B. Computer, Automation Information and GIS

1.	<b>Administrative software:</b>
	Vanguard
2.	<b>CAMA software:</b>
	Vanguard
3.	<b>Personal Property software:</b>
	Vanguard
4.	<b>Are cadastral maps currently being used?</b>
	Yes
5.	<b>If so, who maintains the Cadastral Maps?</b>
	The assessor and staff
6.	<b>Does the county have GIS software?</b>
	Yes
7.	<b>Is GIS available to the public? If so, what is the web address?</b>
	Yes, harlan.gworks.com
8.	<b>Who maintains the GIS software and maps?</b>
	The assessor and staff send information to GIS (splits, combined parcels, etc)
9.	<b>What type of aerial imagery is used in the cyclical review of properties?</b>
	Agridata and GIS
10.	<b>When was the aerial imagery last updated?</b>
	Agridata 2024, GIS 2024

## C. Zoning Information

1.	<b>Does the county have zoning?</b>
	Yes
2.	<b>If so, is the zoning countywide?</b>
	Yes

<b>3.</b>	<b>What municipalities in the county are zoned?</b>
	Alma
<b>4.</b>	<b>When was zoning implemented?</b>
	2002

#### **D. Contracted Services**

<b>1.</b>	<b>Appraisal Services:</b>
	Pritchard & Abbott, Cardinal Appraisal Group
<b>2.</b>	<b>GIS Services:</b>
	gWorks
<b>3.</b>	<b>Other services:</b>
	N/A

#### **E. Appraisal /Listing Services**

<b>1.</b>	<b>List any outside appraisal or listing services employed by the county for the current assessment year</b>
	Pritchard & Abbott, Cardinal Appraisal Group
<b>2.</b>	<b>If so, is the appraisal or listing service performed under contract?</b>
	Yes
<b>3.</b>	<b>What appraisal certifications or qualifications does the County require?</b>
	The contract does not specify requirements; however, the appraisal firms employ qualified professionals.
<b>4.</b>	<b>Have the existing contracts been approved by the PTA?</b>
	Yes
<b>5.</b>	<b>Does the appraisal or listing service providers establish assessed values for the county?</b>
	It is a combined effort between the assessor and the appraisal company

## 2025 Residential Assessment Survey for Harlan County

1.	<b>Valuation data collection done by:</b>
	The assessor
2.	<b>List and describe the approach(es) used to estimate the market value of residential properties.</b>
	Only the cost approach is used.
3.	<b>For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>
	Depreciation tables are developed using local market information in Vanguard
4.	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>
	Depreciation table is set for Alma. Studies are completed for other valuation groups to determine if they need to be adjusted with a map factor.
5.	<b>Describe the methodology used to determine the residential lot values?</b>
	Residential lot values are valued using a sales price per square foot analysis.
6.	<b>How are rural residential site values developed?</b>
	The rural residential first acre value is developed based on vacant land sales plus additional rates for amenities like well, sewer, and electricity.
7.	<b>Are there form 191 applications on file?</b>
	No
8.	<b>Describe the methodology used to determine value for vacant lots being held for sale or resale?</b>
	No applications were received to combine lots being held for resale; lots held for sale are valued the same as all other lots within the neighborhood. Assessor uses sales price comparison and location to determine value.

## 2025 Commercial Assessment Survey for Harlan County

<b>1.</b>	<b>Valuation data collection done by:</b>
	A hired contracting firm
<b>2.</b>	<b>List and describe the approach(es) used to estimate the market value of commercial properties.</b>
	All three approaches to value are developed for commercial property.
<b>2a.</b>	<b>Describe the process used to determine the value of unique commercial properties.</b>
	A county wide reappraisal was completed by Stanard Appraisal in 2023; the appraisal service established values on the unique properties using a database of sales information that they have developed from across the state.
<b>3.</b>	<b>For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>
	Depreciation is developed using local market information.
<b>4.</b>	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>
	N/A
<b>5.</b>	<b>Describe the methodology used to determine the commercial lot values.</b>
	Commercial lots are valued by the square foot.

## 2025 Agricultural Assessment Survey for Harlan County

1.	<b>Valuation data collection done by:</b>
	The assessor
2.	<b>Describe the process used to determine and monitor market areas.</b>
	The market areas were developed based on soil types and topographic characteristics. Annually, a sales study is completed to monitor the market areas.
3.	<b>Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.</b>
	Land is classified based on the findings of the periodic land use studies. Generally, parcels of less than 20 acres will be examined more carefully for alternative uses. Sales verification questionnaires and normal discovery also help to identify non-agricultural uses. Recreational land is only found near the lake; there is no designated hunting land in the county.
4.	<b>Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value?</b>
	Yes, farm home sites and rural residential home sites 1st acres are valued the same.
5.	<b>What separate market analysis has been conducted where intensive use is identified in the county?</b>
	Intensive use is reviewed at the same time as commercial. A hired contract appraiser helps establish values for these parcels based on market analysis.
6.	<b>If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.</b>
	N/A
6a.	<b>Are any other agricultural subclasses used? If yes, please explain.</b>
	CREP, CRP, EQIP
	<u><i>If your county has special value applications, please answer the following</i></u>
7a.	<b>How many parcels have a special valuation application on file?</b>
	N/A
7b.	<b>What process was used to determine if non-agricultural influences exist in the county?</b>
	Sales analysis
	<u><i>If your county recognizes a special value, please answer the following</i></u>
7c.	<b>Describe the non-agricultural influences recognized within the county.</b>
	N/A
7d.	<b>Where is the influenced area located within the county?</b>

	N/A
<b>7e.</b>	<b>Describe in detail how the special values were arrived at in the influenced area(s).</b>
	N/A

**2024 PLAN OF ASSESSMENT  
FOR  
HARLAN COUNTY**

Plan of Assessment Requirements:

Pursuant to Neb. Rev. Stat. §77-1311.02 (2007), on or before June 15 each year, the assessor shall prepare a plan of assessment, (herein after referred to as the “plan”), which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the County Assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 each year, the Assessor shall present the plan to the County Board of Equalization and the Assessor may amend the plan, if necessary, after the budget is approved by the County Board. A copy of the plan and any amendments thereto shall be mailed to the Department of Revenue, Property Assessment Division on or before October 31 each year.

Real Property Assessment Requirements:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as “the market value of real property in the ordinary course of trade.” Neb. Rev. Stat. §77-112 (2003).

Assessment levels required for real property are as follows:

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land;
- 2) 70% of actual value for agricultural land and horticultural land; and
- 3) 70% of special value for agricultural and horticultural land which meets the qualifications for special valuation under §77-1344.

See Neb. Rev. Stat. §77-201 (2009).

General Description of Real Property in Harlan County:

Per the 2024 County Abstract, Harlan County consists of the following real property types:

	Parcels	% of Total Parcels	% of Taxable Value Base
Residential	1964	39%	21%
Commercial	288	6%	3%
Recreational	332	9%	4%
Agricultural	2449	46%	72%
Mineral	19	0	0
Exempt	214	0	0

Agricultural land - taxable acres 321,495

Other pertinent facts: For agland 12% of county is grass, 41% is irrigated, 12% is dry.

For more information see 2024 Reports & Opinion, Abstract and Assessor Survey.

Current Resources:

A. Staff/Budget/Training

1 Assessor

1 Clerk

Harlan County budget \$187,584 for 2023-2024.

The Assessor and Deputy are required to obtain 60 hours of continuing education every 4 years. These hours are currently being obtained. The Assessor also attends other workshops and meetings to further their knowledge of the assessment field.

B. Mapping & GIS

The Harlan County cadastral maps were purchased in 1982. The assessment staff maintains the maps. All new subdivisions and parcel splits are kept up to date, as well as ownership transfers. At the present time, the cadastral maps are in dire need of updating and repair work as the 42 years of use have taken its toll. We have received a \$23,742 grant through the NE Records Board and GIS was implemented in August 2012. New County photos were taken by GIS and available for use in 2022.

C. Property Record Cards

We utilize the property record cards from the old Orion system & the new Vanguard System. We use the GIS program, Agridata program and Google Earth to review parcels. We add new information as we gather it in review and pick-up work to further enhance our records. These records are in good condition. We implemented our new Vanguard CAMA system on June 2018 and have been working through all the transfer challenges.

D. Software for CAMA, Assessment Administration, GIS

Harlan County became a State assumed county in July 1998 and then went back to the County after 14 years on July 1, 2012. On June 14, 2018 we changed to the new CAMA system Vanguard. We are currently working on setting depreciation tables for residential parcels.

E. Web based – property record information access is provided by GIS Workshop at <http://harlan.gisworkshop.com>

Current Assessment Procedures for Real Property:

A. Discover, List & Inventory all property.

B. Data Collection.

- C. Review assessment sales ratio studies before assessment actions.
- D. Approaches to Value;
  - 1) Market Approach; sales comparisons,
  - 2) Cost Approach; cost manual used & date of manual and latest depreciation study,
  - 3) Income Approach; income and expense data collection/analysis from the market,
  - 4) Land valuation studies, establish market areas, special value for agricultural land
- E. Reconciliation of Final Value and documentation
- F. Review assessment sales ratio studies after assessment actions.
- G. Notices and Public Relations

**Level of Value, Quality, and Uniformity for assessment year 2024:**

<u>Property Class</u>	<u>Median</u>	<u>COD*</u>	<u>PRD*</u>
Residential	93.14	24.41	105.79
Commercial	N/A	N/A	N/A
Agricultural Land	73.09	20.71	110.14
Special Value Agland	N/A	<u>N/A</u>	N/A

\*COD means coefficient of dispersion and PRD means price related differential.  
For more information regarding statistical measures see 2024 Reports & Opinions.

**Assessment Actions Planned for Assessment Year 2025:**

Continue with the new CAMA system Vanguard, that was implemented on June 2018 and GIS implemented in August 2012. We will review statistics from previous year to find any hot spots to be corrected. Continue to track acres enrolled in CRP, CREP, EQIP & AWEPP. Update ag land acre values with new sales data. Do normal pick-up work and sales reviews. Our new CAMA system does not use Marshall & Swift pricing we will be changing over to Vanguards appraisal as properties are reviewed. Review B & R Trailer Park and Farms. Review market areas and any new TIF projects that develop. Do regular pick-up work and sale reviews. Verify accuracy of depreciation tables and site improvements tables with information from the market data. Review statistics to determine if any major or minor adjustments need to be made.

**Assessment Actions Planned for Assessment Year 2026:**

We will review Alma, Hunters & Haskins Hill. Review statistics to see if any new data has appeared that would change any of our tables that are developed from the market. Do regular pick-up work based on building permits and information from the zoning director. Continue use of GIS.

**Assessment Actions Planned for Assessment Year 2027:**

Review Taylor Manor & Agland. Review statistics to see if any new data has appeared that would change any of our tables that are developed from the market. Do regular pick-up work based on building permits and information from the zoning director. Continue use of GIS.

Other functions performed by the assessor's office, but not limited to:

1. Record Maintenance, Mapping updates, & Ownership changes
2. Annually prepare and file Assessor Administrative Reports required by law/regulation:
  - a. Abstract - Real Property
  - b. Assessor Survey
  - c. Sales information to PAD rosters & annual Assessed Value Update w/Abstract
  - d. Certification of Value to Political Subdivisions
  - e. School District Taxable Value Report
  - f. Homestead Exemption Tax Loss Report (in conjunction with Treasurer)
  - g. Certificate of Taxes Levied Report
  - h. Report of current values for properties owned by Board of Education Lands & Funds
  - i. Report of all Exempt Property and Taxable Government Owned Property
  - j. Annual Plan of Assessment Report
3. Personal Property; administer annual filing of 537 schedules; prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required.
4. Permissive Exemptions: administer annual filings of applications for new or continued exempt use, review and make recommendations to county board.
5. Taxable Government Owned Property – annual review of government owned property not used for public purpose, send notices of intent to tax, etc.
6. Homestead Exemptions; administer 170 annual filings of applications, approval/denial process, taxpayer notifications, and taxpayer assistance.
7. Centrally Assessed – review of valuations as certified by PAD for railroads and public service entities, establish assessment records and tax billing for tax list.
8. Tax Increment Financing – management of record/valuation information for properties in community redevelopment projects for proper reporting on administrative reports and allocation of ad valorem tax.
9. Tax Districts and Tax Rates – management of school district and other tax entity boundary changes necessary for correct assessment and tax information; input/review of tax rates used for tax billing process.
10. Tax Lists; prepare and certify tax lists to county treasurer for real property, personal property, and centrally assessed.
11. Tax List Corrections – prepare tax list correction documents for county board approval.
12. County Board of Equalization - attend county board of equalization meetings for valuation protests – assemble and provide information

13. TERC Appeals - prepare information and attend taxpayer appeal hearings before TERC, defend valuation.
14. TERC Statewide Equalization – attend hearings if applicable to county, defend values, and/or implement orders of the TERC.
15. Education: Assessor Education – attend meetings, workshops, and educational classes to obtain required hours of continuing education to maintain assessor certification.

Conclusion:

With all the entities of county government that utilize the assessor records in their operation, it is paramount for this office to constantly work toward perfection in record keeping.

With the continual review of all properties, records will become more accurate, and values will be assessed more equally and fairly across the county. With a well-developed plan in place, this process can flow more smoothly. Sales review will continue to be important in order to adjust for market areas in the county.

Respectfully submitted:

Date: 7-16-24

Assessor Jim Fouts
