

2019 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

HOLT COUNTY

April 5, 2019

Pete Ricketts. Governor

Commissioner Keetle:

The Property Tax Administrator has compiled the 2019 Reports and Opinions of the Property Tax Administrator for Holt County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Holt County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

Kuth a. Sorensen

402-471-5962

cc: Timothy Wallinger, Holt County Assessor

- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by Neb. Rev. Stat. § 77-1327. From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices for arm's-length sales. After analyzing all available information to determine that the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist.

Pursuant to <u>Section 77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	eneral Property Class Jurisdiction Size/Profile/Market Activity	
Residential improved (single family	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
dwellings, condominiums, manuf.	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
housing, 2-4 family units)	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
professional and with the configuration of the conf	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
Income-producing properties (commercial,	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
industrial, apartments,)	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
Residential vacant land	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
j	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
Other (non-agricultural) vacant land	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity.

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used in the county assessor's effort to establish uniform and proportionate valuations. The review of assessment practices is based on information filed from county assessors in the form of the Assessment Practices Survey, and in observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Section 77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales

file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

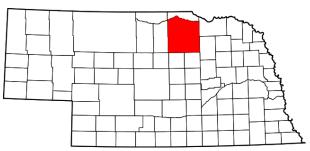

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for the end users, and highlight potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and practices are reviewed to ensure taxpayers are served with such transparency.

The comprehensive review of assessment practices is conducted throughout the year. When practical, potential issues identified are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

*Further information may be found in Exhibit 94

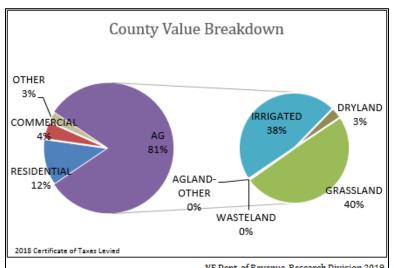

County Overview

With a total area of 2,412 square miles, Holt County had 10,202 residents, per the Census Bureau Quick Facts for 2017, a 2% population decline from the 2010 U.S. Census. Reports indicated that 72% of county residents were homeowners and 91% of residents occupied the same residence as in the prior year (Census

Quick Facts). The average home value is \$78,473 (2018 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Holt County are located in and around O'Neill and Atkinson. According to the latest information available from the U.S. Census Bureau, there were 427 employer establishments with total employment of 3,451.

NE Dept. of Revenue, Research Division 2019						
CITY POPULATION CHANGE						
	2008	2018	Change			
ATKINSON	1,244	1,245	0.1%			
CHAMBERS	333	268	-19.5%			
EMMET	77	48	-37.7%			
EWING	433	387	-10.6%			
INMAN	148	129	-12.8%			
O'NEILL	3,733	3,705	-0.8%			
PAGE	157	166	5.7%			
STUART	645	590	-8.5%			

Agricultural land is the single largest contributor to the county's valuation base by an overwhelming majority. Grassland makes up a majority of the land in the county. Holt County is included in both the Niobrara Lower and Upper Elkhorn Natural Resource Districts (NRD). When compared against the value of sales by commodity group of the other counties in Nebraska, Holt County ranks first in vegetables, melons, potatoes, and sweet potatoes. Additionally, in a comparison of top crops with the other counties, Holt County ranks first in popcorn. Holt County nationally ranks third for popcorn (USDA AgCensus).

An ethanol plant located in Atkinson also contributes to the local agricultural economy.

2019 Residential Correlation for Holt County

Assessment Actions

For 2019, Valuation Group 2, Atkinson was physically inspected and reviewed as part of the sixyear cycle. Updated Marshall &Swift costing and a new depreciation schedule was implemented on all improvements.

All pick-up work was also completed and placed on the assessment roll.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One area of review is the county assessor's sales qualification and verification processes. This is evaluated to determine if all arm's length sales are made available for measurement. Holt County continues to maintain acceptable sales qualification and verification practices. Even though the usability percentage is below the state average, an inspection of the non-qualified sales was undertaken to ensure that the county assessor has supported and documented the grounds for disqualification. No apparent bias exists in the qualification determination and all arm's-length sales were available for the measurement of real property.

The review also looked at the filing of Real Estate Transfer Statements (Form 521) as well as a check of the values reported on the Assessed Value Update (AVU). The County has done an acceptable job transmitting data timely and accurately. The AVU was also accurate when compared with the property record cards.

The frequency and completeness of the review cycle was also examined. Holt County is a large county with several villages and towns spread throughout. The county assessor has a very good plan in place that every parcel is physically reviewed and inspected within a six-year inspection and review cycle. As each valuation group is reviewed, a lot study is performed along with a depreciation study. Updated Marshall Swift costing is also updated.

Valuation groups were examined to ensure that the groups defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. Currently there are nine distinct valuation groups.

Lot values were reviewed by analyzing land to building ratios and vacant lot sales. The county assessor has a plan in place to do a lot study for each valuation group as that group is reviewed through the six-year inspection plan.

2019 Residential Correlation for Holt County

A comparison of the sold and unsold residential property in Holt County showed no signs of bias in the valuation process. Costing tables for residential are on Vanguard at 2008 with deprecation ranging from 2012-2018 depending on the valuation group. The Holt County Assessor does have a detailed valuation methodology on file describing practices used to set values in the county. The methodology produced by the county assessor not only demonstrates their commitment to transparency, but also describes the quality processes used to establish valuations in the county.

Description of Analysis

Residential sales are stratified into eight valuation groups. These groups represent the assessor locations in the county.

Valuation Group	Description
1	O'Neill
2	Atkinson
3	Stuart
4	Ewing
5	Page
6	Chambers
7	Inman and Emmet
9	Acreage

For the residential property class, a review of Holt County's statistical analysis profiles 225 residential sales, representing all the valuation groups. All groups with a sufficient number of sales are within the acceptable range. All three measures of central tendency for the residential class of properties are within the acceptable range and support one another. The PRD is over the acceptable range, but can be attributed to outlier sales. Removal of four sales brings this measure into compliance.

The statistical sample and the 2019 County Abstract of Assessment, Form 45 Compared with the 2018 Certificate of Taxes Levied Report (CTL) indicate that the population changed in a similar manner to the sales. Changes to the population and sample reflect the stated assessment actions.

Equalization and Quality of Assessment

A review of the statistics with sufficient sales, along with all other information available, and the assessment practices suggest that assessments within the county are valued within the acceptable

2019 Residential Correlation for Holt County

parameters, and therefore considered equalized. The quality of assessment of the residential property in Holt County complies with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	112	94.91	96.76	94.65	11.05	102.23
2	34	97.57	107.79	90.91	25.74	118.57
3	15	97.33	91.82	93.14	10.71	98.58
4	10	93.03	101.47	88.96	19.02	114.06
5	7	96.84	116.27	93.37	30.29	124.53
6	21	94.43	92.57	79.92	19.35	115.83
7	5	85.27	83.88	71.32	23.33	117.61
9	21	92.13	98.81	88.47	19.17	111.69
ALL	225	95.05	98.43	92.54	16.11	106.36

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Holt County is 95%.

2019 Commercial Correlation for Holt County

Assessment Actions

For the 2019 assessment year other than routine maintenance, only pick-up was done for the commercial class of property.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county assessor to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes, and any incongruities are noted and discussed with the county assessor for further action.

One aspect of the review is to examine the sales verification and qualification processes. In Holt County, all commercial sales are verified by sending a written sales questionnaire. Review of the documentation in the state sale files shows that the verification determinations are well documented and made without a bias. The review of sales data also included processes that ensured that sales information and assessed values were accurately and timely submitted to the Property Assessment Division (Division).

The review also looked at the filing of Real Estate Transfer Statements as well as a check of the values reported on the Assessed Value Update (AVU). The transfer statements are being filed monthly and the AVU was accurate when compared with the property record cards.

The county assessor's inspection and review cycle for all real property is up to date with the recent reappraisal that was put on the assessment rolls in 2017 and 2018.

Valuation groups were examined to ensure that the valuation groups defined were equally subject to a set of economic forces that impact the value of properties within that geographic area. Currently there are eight valuation groups. The county assessor is studying the valuation groups with the possibility of combining Ewing and Stuart into one valuation group and combining Page, Chambers and Inman as another valuation group.

With the commercial property recently reappraised the lot values were also reviewed along with new costing tables. The Holt County Assessor has a written valuation methodology in place describing practices used to set values in the county. The methodology produced by the county assessor not only demonstrates the commitment to transparency, but also describes the quality processes used to establish valuations in the county.

A comparison of the sold and unsold commercial property in Holt County showed no apparent signs of bias in the valuation process. Costing tables are 2008, through the Vanguard Computer Assisted Mass Appraisal (CAMA) system, with deprecation updated in 2018.

2019 Commercial Correlation for Holt County

Description of Analysis

Currently the eight valuation groups within the commercial class follow the assessor locations in the county.

Valuation Group	Description
1	O'Neill
2	Atkinson
3	Stuart
4	Ewing
5	Page
6	Chambers
7	Inman and Emmet
9	Rural

The commercial statistical profile reveals 36 qualified sales, comprised of six of the eight valuation groups. The median measure is within the range, the weighted mean can be attributed to three high dollar sales. Hypothetically removing those sales, the measure falls to 95%. With the removal of one outlier sale, the mean measure also falls into the acceptable range at 100%. The COD and PRD also improve when these sales are hypothetically removed.

The historical review of assessment practices and valuation changes supports that the county assessor has kept the costing and depreciation tables updated, inspects, and reviews the commercial class within the six-year inspection and review cycle. Most recently, a reappraisal was added to the assessment roll in 2017. When compared to the nearby communities of Neligh, Ainsworth, Burwell, Bloomfield and Creighton, it appears, the values have increased over the past decade at a similar rate.

Review of the 2019 County Abstract of Assessment for Real Property, Form 45 Compared with the 2018 Certificate of Taxes Levied Report (CTL) shows relatively flat valuation of the commercial class, which is expected based on the assessment actions of the county.

Another test performed for reliability is hypothetically removing the two lowest sales from the statistical profile, which in this case the median moves to 98.07%. If the two highest sales are hypothetically removed, the median moves to 97.06%. In all cases, the median remains within an acceptable range

2019 Commercial Correlation for Holt County

Equalization and Quality of Assessment

Valuation group substratum indicates that only Valuation Group 1 is within the acceptable range with sufficient sales. However, confidence in the assessment practices of the county assessor and evaluation of the general movement of assessed values relative to the market indicate that the values are uniform for the commercial class of property. The Holt County Assessor complies with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	19	98.79	104.13	89.05	15.24	116.93
2	9	96.69	145.94	71.92	72.80	202.92
3	2	91.35	91.35	91.89	05.35	99.41
4	2	98.86	98.86	98.74	00.22	100.12
6	3	95.64	90.29	84.05	15.85	107.42
9	1	97.20	97.20	97.20	00.00	100.00
ALL	36	97.49	112.24	86.36	28.15	129.97

Level of Value

Based on analysis of all available information, the level of value for the commercial class of real property in Holt County is 97%.

Assessor Actions

For 2019, the county assessor performed an agricultural market analysis on all qualified sales. Through the analysis, it was determined to decrease irrigated values approximately 2-6%. However, irrigated grassland was increased as well as waste land value. Dryland and Grassland stayed the same. Holt County also added several valentine soils to the sandy soil subclass of grassland.

All pick-up work was placed on the assessment roll.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One area of review is the county's sales qualification and verification processes. This is evaluated to determine if all arm's length sales are made available for measurement. Holt County continues to maintain acceptable sales qualification and verification practices. Even though the usability percentage is slightly below the state average, an inspection of the non-qualified sales was undertaken to ensure that the assessor has supported and documented the grounds for disqualification. No apparent bias exists in the qualification determination and all arm's-length sales were available for the measurement of real property.

The review also looked at the filing of real estate transfer statements as well as a check of the values reported on the Assessed Value Update (AVU). The transfer statements are being filed monthly and the AVU was accurate when compared with the property record cards.

Land use is conducted using aerial imagery when new imagery is available, usually every two years. The county also has aerial photos or Google Earth photos they import into Vanguard. They can take these on the tablet when doing physical review in the field. Land use inspection is ongoing. Holt County has mailed out letters to try to identify land enrolled in the Conservation Reserve Program (CRP), and has received a good response so far. Along with CRP, the county does have separate subclasses for sandy soils and irrigated grass.

All agricultural improvements were physically reviewed in 2016-17. The cost is dated 2008 and Computer Assisted Mass Appraisal (CAMA) derived depreciation is dated 2015. Farm homes and outbuildings are also set up on the six-year inspection and review cycle with different townships being reviewed each year.

There are multiple rural residential neighborhoods ranging from \$15,000 for the first acre in the majority of the county to \$25,000 and \$37,500 for the first acre near Atkinson and O'Neill. Farm sites are valued at \$3,000 per acre. This is consistent for all market areas and is the same for rural residential sites.

The county is current with the six-year inspection cycle.

Holt County has identified two unique agricultural market areas. The only difference being the ability to irrigate. The values for dryland and grassland are the same in both areas, but irrigated land carries a different value.

Another portion of the assessment practices relates to how rural residential land is identified apart from agricultural land within the county. Currently, a 15-acre test is used to determine primary use of a parcel. The county assessor does look at the entire parcel as well as whether there is any adjoining land under common ownership.

The county assessor has a written methodology put together that explains the agricultural processes.

Description of Analysis

The agricultural land acres in Holt County is divided between grassland at 73%, irrigated land at 20%, dryland at 3% and wasteland at 3%. Holt County is divided into two market areas. Market area 4001 consists of land on the north side of Hwy 20 and the Elkhorn River, except the two northern tiers of geo codes. A small portion of the southeast corner of the county is also included with this area. This market area contains the majority of irrigated land in the county. Market Area 4003 consists of land on the south side of Hwy 20 and the Elkhorn River as well as a small portion of the northwest corner of the county, and the two northern tiers of geo codes. The water table in this area is much higher than the other area making it harder to irrigate. Overall, dryland and grassland values countywide are valued the same; the only difference in value between the two market areas is irrigated land. Annually sales are reviewed and plotted to verify accuracy of the market area determinations. All counties adjoining Holt County are generally comparable where they adjoin, although comparability is defined using soil maps and not by an absolute extension of the county line as differences immerge at varying distances.

Analysis of the statistical profile show that all three levels of central tendency are within the acceptable range. Both qualitative measures are adequate for the agricultural class.

The Market Area 4001 median is slightly below the range; a substat of this market area has been included in the appendices of this report. Review of the statistics by study year indicates that the market value of agricultural land is dropping in this market area, making an increase of agricultural land values illogical.

Study Yrs	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
10/01/2015 To 09/30/2016	16	65.76	64.20	63.49	08.04	101.12
10/01/2016 To 09/30/2017	19	66.70	67.34	67.72	11.45	99.44
10/01/2017 To 09/30/2018	28	69.10	72.70	75.59	16.32	96.18

Additionally, Market Area 4001 has 36 irrigated sales with a median of 69%.

When examining 80% MLU grass, Market Area 4001 has a much lower median than Market Area 4003; however, the sample in Market Area 4003 is much larger. Additionally, when looking at minimum and maximum ratios, Market Area 4003 has more dispersion at both ends of the ratio array. This highlights that sample size is important when extreme ratios exist in the sample, and demonstrates why the statistics should not be utilized to increase value in Market Area 4001 differently than Market Area 4003. Since the county values all grassland with the same schedule, the countywide 80% Majority Land Use (MLU) grassland is the most useful statistic and has a median within the acceptable range, at 70%.

The statistics reflect general market conditions in this region of the state, and support that all agricultural land values within the county are within the acceptable range.

When comparing the counties schedule of values to the adjoining counties with similar markets it appears that Holt County's values are relatively similar and equalized.

Equalization and Quality of Assessment

Dwellings and outbuildings on agricultural land are valued using the same cost index as those for the rural residential acreages. Farm home sites carry the same value as rural residential home sites, within their respective market areas.

Review of the statistical sample, comparable counties and assessment practices show that Holt County has achieved equalization. The quality of assessment in the agricultural class of Holt County complies with generally accepted mass appraisal techniques.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Holt County is 69%.

2019 Opinions of the Property Tax Administrator for Holt County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Reissue 2018). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	95	Meets generally accepted mass appraisal techniques.	No recommendation.
Commercial Real Property	97	Meets generally accepted mass appraisal techniques.	No recommendation.
Agricultural Land	69	Meets generally accepted mass appraisal techniques.	No recommendation.

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 5th day of April, 2019.

Legend

County Lines

Market Areas

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

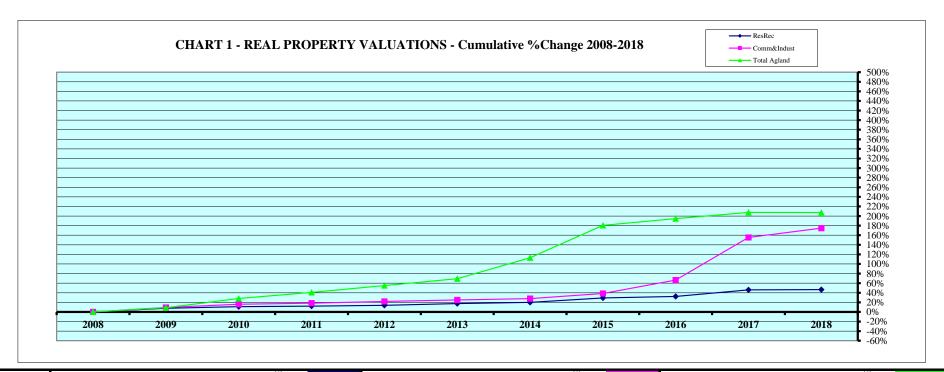

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

Somewhat poorly drained soils formed in alluvium on bottom lands

2019 Assessment Survey for Holt County

A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	One
2.	Appraiser(s) on staff:
	Assessor has Certified General Appraiser License
3.	Other full-time employees:
	Three
4.	Other part-time employees:
	none
5.	Number of shared employees:
	none
6.	Assessor's requested budget for current fiscal year:
	\$336,785
7.	Adopted budget, or granted budget if different from above:
	same as above
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$30,000
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	N/A
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$27,000 for Vanguard, \$13,000 for GIS, \$1,000 for repairs.
11.	Amount of the assessor's budget set aside for education/workshops:
	\$3,500
12.	Other miscellaneous funds:
	none
13.	Amount of last year's assessor's budget not used:
	\$6,487

B. Computer, Automation Information and GIS

1.	Administrative software:
	Vanguard
2.	CAMA software:
	Vanguard
3.	Are cadastral maps currently being used?
	yes
4.	If so, who maintains the Cadastral Maps?
	Deputy Assessor along with the assessor and a clerk.
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	Yes – http://holt.nebraskaassessors.com
7.	Who maintains the GIS software and maps?
	Vanguard and Sidwell
8.	Personal Property software:
	Vanguard

C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes
3.	What municipalities in the county are zoned?
	Atkinson, Ewing, O'Neill, Stuart, Chambers and Page are zoned.
4.	When was zoning implemented?
	1998

D. Contracted Services

1.	Appraisal Services:
	Yes, Vanguard Appraisal
2.	GIS Services:
	Sidwell
3.	Other services:
	None

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Not this year
2.	If so, is the appraisal or listing service performed under contract?
	N/A
3.	What appraisal certifications or qualifications does the County require?
	Recommendation of the assessor
4.	Have the existing contracts been approved by the PTA?
	Yes
5.	Does the appraisal or listing service providers establish assessed values for the county?
	Yes, just the parcels that they are contracted to reappraise.

The Cost A	describe the approach(es) used to estimate the market value of residenting approach is used as well as a market analysis of the qualified sales to estimate the of properties.		
	approach is used, does the County develop the depreciation study(ies) based of information or does the county use the tables provided by the CAMA vendor?		

	Parcels that are valued using Vanguard have local market driven depreciation tables. All market areas have a local market driven depreciation table. The majority of the residential values in the rural/ag parcels are not based on this table because they first have to be valued using the Vanguard CAMA system. This will not be complete until the current six year review is complete.					
5.	Are individual depreciation tables developed for each valuation group?

2019 Agricultural Assessment Survey for Holt County

	Valuation data collection done by: Entire assessment staff List each market area, and describe the location and the specific characteristics that make each unique.				
2.					
	Market Area	Description of unique characteristics	Year Land Use Completed		
	4001	This market area consists of land on the north side of Hwy 20 and the Elkhorn River, except the two northern tier of geo codes. A small portion of the southeast corner of the county is also included with this area. It contains a mix of excessively drained sandy soils, well drained silty soils formed in loess and alluvium on stream terraces, and well to somewhat excessively drained loamy soils. The market area contains the majority of irrigated land.	2013-2016		
	4003	This market area consists of land on the south side of Hwy 20 and the Elkhorn River, as well as a small portion of the northwest corner of the county. Also the two northern tier of geo codes. The water table in the southern area is much higher than the north area making crop failure a higher risk. It contains excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills. In the northern area it is harder to find water.	2013-2016

	N/A

PLAN OF ASSESSMENT HOLT COUNTY

Pursuant to section 77-1311 of the statutes of Nebraska, as amended, submitted herewith is the 3-year Plan of Assessment. Said plan is originally submitted to the county board of equalization on or before July 31 of each year and a copy sent to the Department of Property Assessment and Taxation on or before October 31 each year.

Staff for the office consists of the elected assessor, one deputy, and two full-time clerks. Maintenance of property record cards is performed by any staff member. Changes due to transfer are primarily completed by either the deputy assessor or one of the clerks. Personal property filings are managed by one of the clerks. Reports required are prepared by the assessor with assistance of all personnel.

The assessor and the deputy assessor plan to obtain additional hours toward renewal of their assessor certificates.

Cadastral maps are maintained by the clerk processing the transfer statements. Photo background of the cadastral maps is 1966. Ownership and descriptions are kept current by said clerk.

Reports are generated as follows:

- Real Estate Abstract is to be submitted on or before March 19.
- Personal property abstract is submitted by July 20th.
- A report on the review of ownership and use of all cemetery real property is to be presented to the county board of equalization on or before August 1.
- Certificates of value for taxing authorities are to be submitted on or before August 20.
- The Plan of Assessment is to be submitted on or before July 31.
- The report of the average assessed value of single-family residential properties is to be reported on or before September 1.
- The Tax Roll is to be delivered to the County Treasurer by November 22, along with tax bills.
- Homestead Exemption Tax Loss is to be certified on or before November 30.
- The Certificate of Taxes Levied is to be submitted on or before December 1.

Tax List Corrections are periodically submitted to the County Board of Equalization for approval, showing reasons for said corrections. Meetings of the County Board of Equalization are attended by the County Assessor, or his/her representative.

Notice is published in local newspapers that a list of the applications from organizations seeking tax exemption, descriptions of the property, and the recommendation of the county assessor is available in the county assessor's office. Said notice is published at least ten days prior to consideration of the applications by the county board of equalization.

By March 1, governmental subdivisions are notified of the intent to tax property if not used for a public purpose, and the entity does not pay an in-lieu-of tax.

Property record cards contain all information required by Reg. 10-004, including legal description, property owner, classification codes and supporting documentation.

Applications for Homestead Exemption are accepted February 1 through June 30, according to statute. Applications are mailed on or before April 1 to previous filers if applicants have not yet filed for that year. News releases and newspaper ads are prepared to alert property owners of the time period in which to file, and to summarize qualifications. Information guides prepared by the Department of Revenue are made available to the public. Approved Homestead Exemption applications are sent to the Department of Revenue by August 1.

Personal property schedules are to be filed by May 1 to be timely. In early April, ads are placed in the local newspapers and news releases given to the local radio to remind taxpayers of the filing deadline, the necessary documentation to submit, and of the penalties for not filing in a timely manner. Schedules filed after May 1 and before June 30th receive a 10% penalty. Filings after July 1 receive a 25% penalty. Starting in 2014 the personal property schedules will be placed on a county website. The property owners can adjust the schedules and electronically send them or print them and bring them to the office. Verification is achieved from depreciation worksheets and personal contacts with owners.

The personal property abstract will be filed by July 20, 2018.

Real property is up-dated annually through pick-up work and maintenance. Pick-up work is completed by the entire assessor staff; it involves physical inspection of properties flagged on computer records as having building permits or other information meriting attention. Lists of approved building permits are gathered from city clerks where permits are required. Improvement Information Statements are received where permits are not required. Personal observation by the staff also triggers flags for possible required changes.

On or before June 1, certification of the real estate assessment roll is made and published in the local newspapers. Also by that date, Notices of Valuation Change are mailed by first-class mail to owners of any real property that has changed in value from the previous year. By June 6, assessment/sales ratio statistics (as determined by the Tax Equalization and Review Commission) are mailed to media and posted in the Assessor's Office.

The median level of assessment for residential real property in Holt County for 2018 is 95%.

The median level of assessment of commercial/industrial properties for 2018 is 98%.

The median level of assessment of agricultural property for 2018 is 69%.

Holt County has made a change in CAMA systems. We will continue the process of switching data over to the Vanguard system.

Questionnaires will continue to be sent to buyers and sellers of real estate in Holt County. The questionnaires are used to determine if adjustments need to be made to either the sale price or the information about the parcel. If a questionnaire is not returned or there is a question about a sale, an attempt is made to contact the buyer and seller to ask questions about the sale.

During the fall of 2018 we will continue the second six year review process for Holt County. We plan to inspect six to eight townships. We will be re-grading rural buildings using the Vanguard Cama System as well as personally inspecting rural parcels that have buildings. Rural parcels that do not have buildings will be inspected for land use changes by looking at each parcel with the most current GIS Aerial imagery.

Residential parcels in Atkinson will be re-graded and reassessed using the Vanguard Cama System. A depreciation study from the community will be completed to determine how physical depreciation will be applied to residential parcels. Residential lot values will be applied by using a front foot lot value method.

A new hog facility owned by Christianson Farms will be appraised by Vanguard. A partial value will be completed for 2019.

In 2018, 2019 and 2020- the six year review process will continue. Sales will continue to be studied, adjustments to assessed values will be based on the market.

In 2019 the Residential parcels in Chambers and Ewing will be inspected for additions and condition of each house.

In 2019 Commercial parcels in Chambers and Ewing will be inspected.

Respectfully

Timothy L. Wallinger Holt County Assessor June 1, 2018
