

Good Life. Great Service.

DEPARTMENT OF REVENUE

# 2022 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

**KEITH COUNTY** 

April 7, 2022

Commissioner Keetle :

The Property Tax Administrator has compiled the 2022 Reports and Opinions of the Property Tax Administrator for Keith County pursuant to <u>Neb. Rev. Stat. § 77-5027</u>. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Keith County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to <u>Neb. Rev. Stat. § 77-1514</u>.

For the Tax Commissioner

Sincerely,

Kuth a. Sorensen

Ruth A. Sorensen Property Tax Administrator 402-471-5962

### Introduction

Pursuant to <u>Neb. Rev. Stat. § 77-5027</u>, annually, the Property Tax Administrator (PTA) shall prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments for consideration by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by <u>Neb. Rev. Stat. § 77-1327</u>. From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level – however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

#### Statistical Analysis:

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division staff must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to <u>Neb. Rev.</u> <u>Stat. §77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

| General Property Class  | Jurisdiction Size/Profile/Market Activity                                     | COD Range   |
|---|---|-------------|
| Residential improved (single family   | Very large jurisdictions/densely populated/newer properties/active markets    | 5.0 to 10.0 |
| dwellings, condominiums, manuf.   | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 15.0 |
| housing, 2-4 family units)  | Rural or small jurisdictions/older properties/depressed market areas          | 5.0 to 20.0 |
|   | Very large jurisdictions/densely populated/newer properties/active markets    | 5.0 to 15.0 |
| Income-producing properties (commercial,  | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 20.0 |
| industrial, apartments,)  | Rural or small jurisdictions/older properties/depressed market areas          | 5.0 to 25.0 |
|   | Very large jurisdictions/rapid development/active markets                     | 5.0 to 15.0 |
| Residential vacant land   | Large to mid-sized jurisdictions/slower development/less active markets       | 5.0 to 20.0 |
|   | Rural or small jurisdictions/little development/depressed markets             | 5.0 to 25.0 |
|   | Very large jurisdictions/rapid development/active markets                     | 5.0 to 20.0 |
| Other (non-agricultural) vacant land  | Large to mid-sized jurisdictions/slower development/less active markets       | 5.0 to 25.0 |
| Contraction of the second s | Rural or small jurisdictions/little development/depressed markets             | 5.0 to 30.0 |

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

#### Analysis of Assessment Practices:

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to <u>Neb. Rev. Stat. §77-1327</u>, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with <u>Neb. Rev. Stat. § 77-1311.03</u> and also to confirm that all property is being uniformly listed and described for valuation purposes.

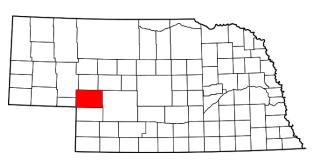

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area. Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the review done by Division staff, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

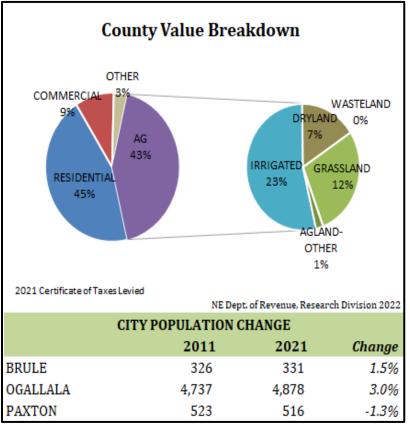

\*Further information may be found in Exhibit 94

### **County Overview**

With a total area of 1,062 square miles, Keith County has 8,335 residents, per the Census Bureau Quick Facts for 2020, a slight population decline from the 2010 U.S. Census. Reports indicate that 69% of county residents are homeowners and 89% of residents occupy the same residence as in the prior year (Census Quick Facts). The average home value is \$132,854 (2021 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Keith County are located in and around the county seat of Ogallala. According to the latest information available from the U.S. Census Bureau, there are 330 employer establishments with total employment of 2,426, for an 8% decline in employment.

Agricultural land contributes to approximately 53% of the county's overall valuation base. Grassland makes up the majority of the land in the county. Keith County is included in the Twin Platte Natural Resources District.

Lake **McConaughy** is а recreational attraction in Keith County. It is Nebraska's largest lake and the largest reservoir in a three-state region. The Lake is 20 miles long, 4 miles wide and 142 feet deep at the dam. It is located on the edge of the Nebraska Sand Hills and offers natural white sand beaches. excellent fishing, boating, camping and all types of outdoor recreation.

#### **Assessment Actions**

Paxton, Brule, and Keystone, Roscoe, Sarben assessor locations all had a reappraisal. All locations except Ogallala Residential and Ogallala Mobile Home Park (MHP) had new land tables implemented. Costing tables were updated, and the local factor changed from .90 to 1.4 for all locations. New depreciation tables were applied to Paxton, Brule, and Keystone, Roscoe, Sarben assessor locations.

Approximately half of the neighborhoods of Lake Residential South and Lake Residential North had new land tables implemented. Costing tables were updated with a local factor of 1.4.

The leasehold values were changed for approximately half of the Lake MHP's neighborhoods, and costing tables were updated with a local factor of 1.3.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

The sales usability rate is slightly lower than the statewide average for the residential class but the sales qualification and verification practices of the county assessor indicates that all arm's-length transactions are being used for measurement. Part of the verification process of the county assessor includes questionnaires and when necessary follow up phone calls to be able to provide thorough explanations for all non-qualified sales.

Six valuation groups are currently used for analysis of the residential market. The largest community and county seat comprises Valuation Group 1. Brule and Paxton make up Valuation Groups 2 and 3 respectively. Valuation Group 4 consists of parcels outside the city limits and the boundaries of Lake McConaughy. The parcels around Lake McConaughy make up Valuation Group 5. Valuation Group 8 encompasses the villages of Keystone, Roscoe and Sarben.

The office staff is responsible for all of the residential class physical inspections. The county assessor's office staff is current with keeping within the six-year inspection cycle. Costing and depreciation tables are current as well as lot models. The county assessor maintains a written valuation methodology in the office.

#### Description of Analysis

Keith County uses six valuation groups for analysis of the sales. The current study period has 344 qualified sales.

| Valuation Group | Description              |
|-----------------|--------------------------|
| 1               | Ogallala                 |
| 2               | Paxton                   |
| 3               | Brule                    |
| 4               | Rural                    |
| 5               | Lake McConaughy          |
| 8               | Keystone, Roscoe, Sarben |

The measures of central tendency for the entire class are either 93% or 94% with a COD and PRD within the IAAO recommended range at 19% and 101% respectively. Most of the sales are in Valuation Group 1 with 204, Valuation Group 4 has 30 sales, and Valuation Group 5 has 86 sales. All three of these value groups have acceptable medians and COD ratios. Only Valuation Group 4's PRD is slightly high at 104%. An array of Valuation Group 4 sales does not show any pattern of regressivity. A substat of Valuation Group 4 may be found in the appendices. The removal of the two high ratios is enough to bring the PRD into acceptable range.

Valuation Groups 2 and 4 have 11 and 12 sales respectively. Both valuation groups have statistics within the acceptable ranges. Valuation Group 8 has only one sale.

The comparison of the assessor location sample changes to the assessor location changes in the abstract showed changes in line with the assessment actions of the assessor. All assessor location abstract changes showed a positive valuation change of 7% to 24%. The 2022 County Abstract of Assessment for Real Property, Form 45 Compared with the 2021 Certificate of Taxes Levied Report (CTL) shows the residential class increased 14% approximately the same as the sales file sampling.

#### Equalization and Quality of Assessment

The review of the assessment practices of the county combined with the analysis of the statistics indicate that the residential class are equalized.

The assessment of the residential class of real property complies with generally accepted mass appraisal techniques.

| VALUATION GROUP |       |        | 2000 B 400 | 0.0110700.011 |       |        |
|-----------------|-------|--------|------------|---------------|-------|--------|
| RANGE           | COUNT | MEDIAN | MEAN       | WGT.MEAN      | COD   | PRD    |
| 1               | 199   | 92.66  | 91.84      | 89.35         | 17.69 | 102.79 |
| 2               | 11    | 99.16  | 101.00     | 97.97         | 08.08 | 103.09 |
| 3               | 12    | 99.52  | 101.76     | 102.42        | 06.68 | 99.36  |
| 4               | 30    | 95.94  | 103.72     | 99.29         | 21.57 | 104.46 |
| 5               | 85    | 92.25  | 94.27      | 93.86         | 24.85 | 100.44 |
| 8               | 1     | 82.97  | 82.97      | 82.97         | 00.00 | 100.00 |
| ALL             | 338   | 94.24  | 94.13      | 93.00         | 19.12 | 101.22 |

# 2022 Residential Correlation for Keith County

### Level of Value

Based on analysis of all available information, the level of value for the residential property in Keith County is 94%.

#### Assessment Actions

Pick-up work was completed as needed. New land tables were implemented in all locations except Paxton. Costing was updated to June 2021 in all locations. Individual locations had local factors applied that ranged from 1.10 to 1.70.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

A review of the sales roster and the usability rate of commercial sales indicates that while the commercial usability is considerably below the state-wide average, the county assessor is detailed in the collection of sales questionnaires and provides adequate documentation for excluding sales. The review process indicates that all arm's-length transactions were made available for measurement purposes.

Six valuation groups based on differing economic patterns are used in analyzing the commercial market. The market groups consist of the city of Ogallala, the village of Paxton, the village of Brule, Lake McConaughy, the rural parcels, and the smaller villages of Keystone, Roscoe and Sarben. The cost approach is used to estimate the market value of commercial properties.

The commercial class of real property in Keith County is in compliance with the six-year inspection and review cycle. The depreciation tables being used are from 2017, and the costing tables are from 2020. The lot study is also from 2020.

#### Description of Analysis

Six valuation groups are used by the Keith County Assessor for the commercial class.

| Valuation Group | Description                  |
|-----------------|------------------------------|
| 1               | Ogallala                     |
| 2               | Paxton                       |
| 3               | Brule                        |
| 4               | Rural                        |
| 5               | Lake McConaughy              |
| 8               | Keystone, Roscoe, and Sarben |

Keith County had a total of 27 qualified commercial sales during the study period. All the measures of central tendency were in range. The qualitative statistics were also in range. When examined by valuation groups only Valuation Group 1 with 17 sales had enough sales for reliable measurement. Valuation Group 1 had a median in range at 93% with the mean and weighted mean at 104% and

## **2022** Commercial Correlation for Keith County

103% respectively. Valuation Group 5 had six sales with a median of 87%, a mean of 103% and a weighted mean of 97%. The lake properties that comprise Valuation Group 5 had a 40% increase in the abstract to move the values closer to range. Valuation Groups 3 & 4 with only one sale each likewise had substantial increases. Valuation Group 2 had only two sales and no increases this year. The low number of sales in these three valuation groups renders the statistics of minimal value.

The review of the 2022 County Abstract of Assessment for Real Property, Form 45 Compared with the 2021 Certificate of Taxes Levied Report (CTL) shows an increase to the population and the sales in a manner consistent with the assessment actions of the county assessor.

#### Equalization and Quality of Assessment

The review of the assessment practices of the county assessor and the statistical analysis indicates that commercial properties within the county are assessed within expected parameters and therefore are equalized. The quality of assessment of the commercial class of property complies with generally accepted mass appraisal techniques.

| VALUATION GROUP |       |        |        |          |       |        |
|-----------------|-------|--------|--------|----------|-------|--------|
| RANGE           | COUNT | MEDIAN | MEAN   | WGT.MEAN | COD   | PRD    |
| 1               | 17    | 92.56  | 104.12 | 102.85   | 24.76 | 101.23 |
| 2               | 2     | 111.59 | 111.59 | 102.62   | 15.53 | 108.74 |
| 3               | 1     | 44.01  | 44.01  | 44.01    | 00.00 | 100.00 |
| 4               | 1     | 44.64  | 44.64  | 44.64    | 00.00 | 100.00 |
| 5               | 6     | 87.14  | 103.42 | 96.94    | 24.52 | 106.68 |
| ALL             | 27    | 92.01  | 100.09 | 97.00    | 26.48 | 103.19 |

#### Level of Value

Based on analysis of all available information, the level of value for the commercial property in Keith County is 92%.

#### Assessment Actions

Dryland in Market Area 2 was increased 6%, in Market Area 3 it was increased 7-8%. Grassland in Market Area 1 had increases to the Land Capability Groups (LCGs) ranging between 6 to 17%. All the grassland in Market Area 3 was increased 5%. Updated 2020 costing was applied improvements with a local factor of 1.25.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

The Keith County Assessor uses sales verification forms to collect information needed for the proper qualification of sales. The usability rate is lower than the statewide average; however, sufficient information is provided in the comments on the sales roster to justify disqualification of the sales. All arm's-length sales have been made available for measurement purposes.

Three market areas are used in Keith County. Market Area 1 is located in the northern portion of the county and is associated with the Sandhills ecosystem. The soil is largely sandy and used primarily for grazing purposes. Market Area 2 lies between the North Platte and South Platte Rivers. It is comprised of grassland, dryland and a small amount of irrigated land. Market Area 3 lies on the southside of the county. Cropland is the Majority Land Use (MLU). Only 20% of Market Area 3 is used as grassland.

The six-year inspection cycle is current. Depreciation and costing are from 2018. The appraisal methods used for rural residential parcels are used for agricultural homes and outbuildings. Aerial imagery and Farm Credit Services (FSA) maps are used for determining land use. Feedlots have been identified as intensive use parcels. The county has 283 special value parcels.

#### **Description of Analysis**

Three market areas comprise the analysis of the agricultural market in Keith County. There was a total of 54 qualified sales during the three-year study period with all the measures of central tendency falling within the range. The COD is also within the range. Analyzing the sales by market area shows that the medians for all three market areas are in range although Market Area 1 with only seven sales does not have enough sales for statistical reliability.

When examined by 80% MLU, all areas are in range using the median although only Irrigated land Market Area 3 and Dryland Market Area 2 have sufficient sales for reliable analysis.

| AREA (MARKET) |       |        |       |          |       |        |
|---------------|-------|--------|-------|----------|-------|--------|
| RANGE         | COUNT | MEDIAN | MEAN  | WGT.MEAN | COD   | PRD    |
| 1             | 7     | 70.18  | 65.54 | 69.91    | 14.42 | 93.75  |
| 2             | 20    | 71.96  | 77.69 | 71.28    | 17.72 | 108.99 |
| 3             | 27    | 74.61  | 75.08 | 73.11    | 13.86 | 102.69 |
| ALL           | 54    | 73.07  | 74.81 | 71.41    | 15.53 | 104.76 |

Review of agricultural land values with the surrounding counties supports that an uniform values have been established in the agricultural class.

#### Equalization and Quality of Assessment

While not all the sample sizes are sufficient enough to determine a level of value, the overall statistics when combined with the assessment practice review indicates that values set for the agricultural class are equalized. The same appraisal practices are used to value the rural residential and agricultural markets and are at a sufficient level of market value. With consideration of the available information, the quality of assessment for the agricultural class is deemed in compliance with generally accepted mass appraisal techniques.

#### Level of Value

Based on analysis of all available information, the level of value of agricultural land in Keith County is 73%.

#### Special Valuation

A review of agricultural land value in Keith County in areas that have influences indicates that the assessed values used are similar to the assessed values in the areas of the county that do not have non-agricultural influences. Therefore, it is the opinion of the Property Tax Administrator that the level of value for Special Valuation of agricultural land is 73%.

### 2022 Opinions of the Property Tax Administrator for Keith County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class  | Level of Value | Quality of Assessment                               | Non-binding recommendation |

#### Soils

CLASS

Excesssive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

Moderately well drained silty soils on uplands and in depressions formed in loess

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Somewhat poorly drained soils formed in alluvium on bottom lands

Moderately well drained silty soils with clay subsoils on uplands

# 2022 Assessment Survey for Keith County

# A. Staffing and Funding Information

| 1.  | Deputy(ies) on staff:  |
|-----|--|
|     | 1  |
| 2.  | Appraiser(s) on staff:   |
|     | 2 appraisal clerks.  |
| 3.  | Other full-time employees:   |
|     | 1 assessment clerk.  |
| 4.  | Other part-time employees:   |
|     | 1 summer student.  |
| 5.  | Number of shared employees:  |
|     | 0  |
| 6.  | Assessor's requested budget for current fiscal year:   |
|     | 423,235  |
| 7.  | Adopted budget, or granted budget if different from above:   |
|     | 364,500  |
| 8.  | Amount of the total assessor's budget set aside for appraisal work:  |
|     | 5,000  |
| 9.  | If appraisal/reappraisal budget is a separate levied fund, what is that amount:                                  |
|     | N/A  |
| 10. | Part of the assessor's budget that is dedicated to the computer system:  |
|     | The data processing expenses are within a county data processing budget in County General. \$5,350 GIS contract. |
| 11. | Amount of the assessor's budget set aside for education/workshops:   |
|     | \$3,500: this amount includes appraisal classes, workshops and TERC hearing expenses.                            |
| 12. | Amount of last year's assessor's budget not used:  |
|     | \$50,043.64  |

# B. Computer, Automation Information and GIS

| 1.  | Administrative software:  |
|-----|---|
|     | MIPS  |
| 2.  | CAMA software:  |
|     | MIPS  |
| 3.  | Personal Property software:   |
|     | MIPS  |
| 4.  | Are cadastral maps currently being used?                                  |
|     | Yes, as historic research work.   |
| 5.  | If so, who maintains the Cadastral Maps?                                  |
|     | These were maintained through December 31, 2012.                          |
| 6.  | Does the county have GIS software?  |
|     | Yes   |
| 7.  | Is GIS available to the public? If so, what is the web address?           |
|     | Yes. www.keith.gWorks.com   |
| 8.  | Who maintains the GIS software and maps?                                  |
|     | gWorks  |
| 9.  | What type of aerial imagery is used in the cyclical review of properties? |
|     | gworks imagery  |
| 10. | When was the aerial imagery last updated?                                 |
|     | when was the actual imagery last aparteur                                 |

# C. Zoning Information

| 1. | Does the county have zoning?     |
|----|----------------------------------|
|    | Yes, for both city and county.   |
| 2. |                                  |
| 2. | If so, is the zoning countywide? |
| 2. | Yes                              |

| 3. | What municipalities in the county are zoned? |  |
|----|--|--|
|    | Ogallala, Brule, and Paxton are zoned.       |  |
| 4. | When was zoning implemented?                 |  |
|    | 1975   |  |

# **D.** Contracted Services

| 1. | Appraisal Services:          |
|----|------------------------------|
|    | None.                        |
| 2. | GIS Services:                |
|    | gWorks (f.k.a. GIS Workshop) |
| 3. | Other services:              |
|    | None.                        |

# E. Appraisal /Listing Services

| 1. | List any outside appraisal or listing services employed by the county for the current assessment year |
|----|---|
|    | None at present.  |
| 2. | If so, is the appraisal or listing service performed under contract?                                  |
|    | N/A   |
| 3. | What appraisal certifications or qualifications does the County require?                              |
|    | The county requires a credentialed real property appraiser.   |
| 4. | Have the existing contracts been approved by the PTA?   |
|    | N/A   |
| 5. | Does the appraisal or listing service providers establish assessed values for the county?             |
|    | N/A   |

# 2022 Residential Assessment Survey for Keith County

|    | <u>Market</u><br><u>Area</u>   | Description of unique characteristics  | Year Land Use<br>Completed |  |  |
|    | 1  | Market Area 01 is in the northern part of Keith County; north of the North<br>Platte River and Lake McConaughy. It is part of the Nebraska Sand Hill<br>region that consists primarily of native grasses suitable for grazing. There<br>is a limited amount of cropland in this area. Travel is by county roads,<br>Highway 92 that runs along the north side of Lake McConaugy and<br>Highway 61 that runs north to south across the county. The Union Pacific<br>Railroad maintains two lines that run east to west along the north side of<br>the lake. | 2017-2021                  |  |  |
|    | 2  | Market Area 02 is south of the North Platte River and Lake McConuaghy<br>but, north of the South Platte River. This land begins as a plateau that<br>descends southerly down into the Platte River Valley. The area comprises<br>approximately two-thirds hard grass, one-third dry land and a small<br>percent of irrigation. Highway 26 goes northwest out of Ogallala and a<br>small portion of Highway 61 goes across it.  | 2017-2018                  |  |  |
|    | 3  | Market Area 03 includes the South Platte River and goes to the southern<br>boundary of the county. Highway 30 and Interstate 80 run east to west<br>through this area, along with the Union Pacific Railroad. The area is<br>approximately 43% irrigated, dry and grass making up about 29% and<br>24% respectively.   | 2017-2018                  |  |  |

|    | Yes  |  |                            |  |  |
| 6. | What separate market analysis has been conducted where intensive use is identified in the county?                              |  |                            |  |  |
|    | out in the   | I feedlots were updated during the rural review. Buildings and structus same manner as ag and rural residential outbuildings. The assessor cond left the feedlot acres at the prior value of \$1,375.  | -                          |  |  |

| 7.  | If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.                      |  |  |  |  |
|-----|---|--|--|--|--|
|     | An analysis is done of the sales and if available, the contracts will be examined as well, to try and establish a value for the WRP acres.    |  |  |  |  |
| 7a. | Are any other agricultural subclasses used? If yes, please explain.   |  |  |  |  |
|     | NA  |  |  |  |  |
|     | If your county has special value applications, please answer the following  |  |  |  |  |
| 8a. | How many parcels have a special valuation application on file?  |  |  |  |  |
|     | 346   |  |  |  |  |
| 8b. | What process was used to determine if non-agricultural influences exist in the county?  |  |  |  |  |
|     | Market data of sales with similar influences are analyzed.  |  |  |  |  |
|     | If your county recognizes a special value, please answer the following  |  |  |  |  |
| 8c. | Describe the non-agricultural influences recognized within the county.  |  |  |  |  |
|     | Recreational, primarily used for hunting.   |  |  |  |  |
| 8d. | Where is the influenced area located within the county?   |  |  |  |  |
|     | Primarily along the North and South Platte Rivers,  |  |  |  |  |
| 8e. | Describe in detail how the special values were arrived at in the influenced area(s).  |  |  |  |  |
|     | It is a sales comparison approach, the sales are verified and the market data is analyzed to arrive at a market value in the influenced area. |  |  |  |  |

# 2021 PLAN OF ASSESSMENT FOR KEITH COUNTY

#### **Plan of Assessment Requirements**

Pursuant to Neb. Rev. Stat. §77-1311.02, on or before June 15 of each year, the Assessor shall prepare a plan of Assessment, (herein after referred to as the "plan"), which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the County Assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 of each year, the Assessor shall present the plan to the County Board of Equalization and the Assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Department of Revenue, Property Assessment Division, on or before October 31 of each year.

#### **Real Property Assessment Requirements**

All property in the State of Nebraska is subject to property tax unless expressly exempt by the Nebraska Constitution, Article VIII, or permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is called actual value, which is defined by law as "the market value of real property in the ordinary course of trade." Neb. Rev. Stat. §77-112 (2003).

Assessment levels required for real property are as follows:

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land;
- 2) 75% of actual value for agricultural land and horticultural land; and
- 3) 75% of special value for agricultural and horticultural land which meets the qualifications for special valuation under §77-1344.

See Neb. Rev. Stat. §77-201 (2009).

#### General Description of Real Property in Keith County

Per the 2021 Abstract, Keith County consists of the following real property types:

|              |       |                    |                    | % of   |
|--------------|-------|--------------------|--------------------|--------|
|              | •     | % of Total Parcels | Taxable Value Base | Value  |
| Residential  | 5,211 | 56.69%             | 614,311,765        | 38.81% |
| Commercial   | 697   | 7.58%              | 140,775,770        | 8.89%  |
| Industrial   | 15    | 0.16%              | 8,129,350          | 0.51%  |
| Recreational | 754   | 8.20%              | 28,875,740         | 1.82%  |
| Agricultural | 2,451 | 26.66%             | 790,668,440        | 49.95% |

#### Agricultural Land

| Use                          | Acres      | Value          |
|------------------------------|------------|----------------|
| Irrigated                    | 109,283.34 | 359,030,005    |
| Dry                          | 107,235.29 | 107,357,610    |
| Grass                        | 400,069.60 | 190,468,450    |
| Waste                        | 954.48     | 314,850        |
| Other (primarily Accretion)  | 17,008.55  | 14,017,075     |
| Sub-Total Land Only          | 634,551.26 | 671,187,990    |
| Ag Home Sites                | 359.07     | 59,625,315     |
| Ag Farm Sites                | 1,968.94   | 59,797,485     |
| Improvements                 |            | 103,413,390    |
| Public Road/Ditches          | 5,250.17   | 57,650         |
| Sub-Total Sites + IMPS       | 7,578.18   | 222,893,840.00 |
| Total Agricultural Valuation | 642,129.44 | 894,081,830    |

All of this and more information can be found in the 2021 County Abstract of Assessment for Real Property, Form 45

While the Agricultural parcel count consists of less than half of the Residential parcel count, the Agricultural total valuations are only 11% higher in taxable value. This is showing that Residential sales in the county are increasing and Agricultural land sales are decreasing. The majority of Agricultural land use consists of Grassland. The majority of the Grassland lies in the northern region of Keith County, which is north of Lake McConaughy and the North Platte River in Area 1 and subclass market area 4. The Irrigated acres consist of approximately a fourth of the Grassland total acres. Irrigated Land Market total valuation are approximately 50% higher than the total Grassland valuation for 2021. However, we were able to lower some agricultural values this year due to the market. Dry land consists of slightly less acres than Irrigated and it comprises the least amount of valuation per use. Dryland Acres were historically more than the Irrigated Acres. This change is due to the Well Moratorium and in 2011, there was a shift when Irrigated Acres exceeded the Dryland Acres. Despite the Moratorium, producers are still able, with the approval of the Twin Platte NRD, to convert their Dryland or Grassland Acres to Irrigated. With the grain prices, Irrigated Acres were quite desirable, therefore, property owners requested transfer of acres from one location to another location so they are able to utilize their "right to irrigate" in a more

productive way. In some cases they transfer acres into a bank with the NRD and wait until they have banked enough acres to drop a new pivot in another location. Some property owners are also buying the Certified Irrigated Acres (CIA), without the land attached, from the land owner; which allows them to move the Certified Irrigated Acres to former Dry or Grass land. All transfers and new wells must be approved by the NRD. The NRD works well with the Keith County Assessor Office on all transfers to ensure accuracy of acre counts on correct parcels.

The first year that market value on Accretion was implemented in Keith County was in 2007. This was when all of the county was reviewed and then again in 2011. For 2021 all accretion land was reviewed and while using GWORKS (A Web based GIS service) acres use were sketched per data imagery and land use was corrected. We currently review properties with accretion and use the Special Value Methodology when reviewing accretion properties. The Special Valuation Methodology was rewritten for Assessment Year 2021 according to changes in the method that is being used at this time.

**New Property:** For the assessment year of 2021, there were approximately 1006 building permits; 495 building permits for new property/construction/additions, 473 parcels to be rechecked from the year before, 11 parcels to demolish, 25 listed as N/A, and 2 remodels. The re-checks could be from new homes not being finished at the first of the year the prior year, discovery, and interior inspections from property owners. Additional parcels were reviewed for new property construction/additions in Keith County due to other forms of discovery than building permit reporting. Keith County now does requires notification for new construction for Agricultural zoned parcels to be completed and filed with the zoning department. In the fall of 2017, GIS Workshop flew Keith County for oblique imagery to assist us with identification and a remedy to this issue of new construction in the rural areas.

#### Current Resources

A. **Staff/Budget/Training:** 1 Assessor, 1 Deputy, 2 Appraisal Clerks, 1 Summer Fulltime & school year part-time Student Appraisal Clerk, 1 Assessment Clerk/office manager,

The current Assessor has her Appraiser license and Assessor Certificate. She is current with continuing education on both. The assessor and deputy attend workshops, classes, and meetings to further their knowledge of the assessment field and complete continuing education requirements. Our high school student just graduated this year and is returning for a second summer as a fulltime summer help appraisal clerk assistant. She will move in to a part-time employee for the school season and work 2 days a week. We have 2 full time Appraisal clerks with 1 year experience so far. Our office also has an Assessment Clerk/office manager whom stays busy with Homestead, 521's and sales letters and anything else needed done in the office.

The adopted budget for 2020-2021 was \$364,535. The actual budget used was as \$358,677.04. Proposed budget for 2021-2022 is \$443,351. The Accepted Budget for 2021-2022 is \$420,761.

- **B. Property Record Cards:** Our property record files are electronically generated. We haven't updated hard cards for years.
- C. Software for CAMA, Assessment Administration, and GIS: Keith County is on the MIPS CAMA system package. GWORKS provides the software for the web based GIS system.
- D. **Pursuant to Neb. Rev. Stat. §77-1329 the Assessor shall maintain tax maps.** We are contracted with GWORKS and they help us to maintain our maps and mapping systems. We are in the process of implementing the annotations layer on our GWORKS website that will replace the use of cadastral maps in our office and all of that information will be available online. This project will be completed by the end of July 2021.

#### E. Web based – property record information access: www.keith.gworks.com and nebraskaassessorsonline.us

# **Current Assessment Procedures for Real Property**

- A. Discover, list & inventory all property.
- B. Data collection.
- C. Review assessment sales ratio studies before assessment actions.
- D. All approaches to value are looked at. However, the Cost Approach bears the most weight.
- E. Land valuation studies, establish market areas, special value for agricultural land: Reconciliation of final value and documentation.
- F. Review assessment sales ratio studies after assessment actions.
- G. Notices and public relations are completed by the County Assessor.

# Level of Value, Quality, and Uniformity for Assessment Year 2021

| PROPERTY CLASS             | MEDIAN RATIO | COD*   | PRD*    |
|----------------------------|--------------|--------|---------|
| Residential                | 95%          | 11.95% | 102.15% |
| Commercial                 | 99%          | 18.32% | 122.86% |
| Agricultural               | 75%          | 13.10% | 101.03% |
| Special Value Agricultural | 71%          |        |         |

\*COD means Coefficient of Dispersion and PRD means Price Related Differential. For more information regarding statistical measures see 2021 Reports & Opinions.

# Assessment Actions Planned for Assessment Year 2022

# **Residential** (and/or subclasses):

For Assessment year 2022, Paxton (Residential subclass 02), Brule (Residential subclass 03), Keystone, Roscoe, and Sarben (all Residential subclass 08) will be reviewed. Included in this review will be reviewing quality, condition, re-measuring all improvements, and taking new photos. Every property will be re-sketched into the CAMA system and new land and depreciation tables will be built derived from current sales. This review will involve approximately 633 parcels. All other residential ratio studies will be reviewed by neighborhoods,

market area and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or land tables depending on the ratio study results.

#### Commercial (and/or subclasses):

For the Assessment year of 2022 we will continue ratio studies of all county commercial neighborhoods and sales. Possible percentage adjustments will be applied if needed.

### Agricultural Land (and/or subclasses):

We will continue the analysis of Ag Land Market Areas and sales. Any adjustments will be made in price per acre if needed. Sales will determine if they need adjusted. We will continue to process all Irrigation Transfers of Certified Base Areas approved by the NRD, map all new splits and subdivisions, process all NRD transfer of irrigated acres, utilize NRD maps to identify irrigated land use, request FSA Maps for use verification to all new Agland owners per Sales File, identify and remap agricultural land use changes. If we have not completed the new home site and farm site layer this will continue for this year. All other market area ratio studies will be reviewed by neighborhoods, market area and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or land tables depending on the ratio study results.

#### Special Value – Agland:

We will continue analysis of Special Valuation properties and any Agland influences for other than agriculture-horticulture use. All sales will be reviewed and valued accordingly. We will process and send disqualification letters to all owners not meeting qualifications per our special valuation methodology. All other area ratio studies will be reviewed by neighborhoods, market area and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or land tables depending on the ratio study results.

#### **Exempt Properties**

For assessment year 2022 we are also measuring and taking new photographs of all exempt properties in the county. These will be entered into the CAMA system for the use that they are and an estimated value will be available if they were to sell to a non-exempt entity.

#### New Construction/Building Permits:

We will complete all pickup work and help value any new construction or existing building construction that wasn't completed the previous year. Any changes made to properties will be entered into MIPS, and updated in GIS. An analysis of sales will be reviewed for all sold properties dated October 1, 2019 to September 30, 2021, Commercial and Ag from October 1, 2018 to September 30, 2021, and sales reviews will be sent to both buyer and seller. Any changes will be edited in the Property Assessment Divisions Sales File to insure it is identical to the Assessor's CAMA sales file. We will work to complete all pickup work from all forms of Discovery by March 1.

#### Assessment Actions Planned for Assessment Year 2023

#### Residential (Land/or subclasses):

For Assessment year 2023, all residential ratio studies will be reviewed by neighborhoods, market area and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or land tables depending on the ratio study results.

# Commercial (and/or subclasses):

For Assessment year 2023, Keith County Commercial neighborhoods will be reviewed. We might create a questionnaire for commercial property owners to fill out during our field work and hand back or mail back to us. Ogallala Commercial was last reviewed in 2017. Included in this review will be reviewing quality, condition, re-measuring all improvements, and taking new photos. Every property will be updated into the CAMA system and new land and depreciation tables will be built and derived from current sales. This review will involve approximately 694 parcels.

# Agricultural Land (and/or subclasses):

Each year we will continue the analysis of Ag Land Market Areas and sales. Any needed adjustments will be made in the price per acre. Sales will determine if they need adjusted. We will continue to process all irrigation transfers of Certified Base Areas approved by the NRD, map all new splits and subdivisions, process all NRD transfer of irrigated acres, utilize NRD maps to identify irrigated land use, request FSA Maps for use verification to all new Agland owners per Sales File and identify and remap agricultural land use changes. FSA maps will again be requested for this year. All other subclasses will continue being reviewed by ratio studies of all county residential neighborhoods and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or lane tables depending on the ratio study results.

# Special Value – Agland:

We will continue analysis of Special Valuation properties and any Agland influences for other than agriculture-horticulture use. New photographs will be taken for new agricultural/horticultural use and any changes will be documented. All sales will be reviewed and valued accordingly. We will process and send disqualification letters to all owners not meeting qualifications per our special valuation methodology.

# New Construction/Building Permits:

We will complete all pickup work and help value any new construction or existing building construction that wasn't completed last year. Any changes made to properties will be entered into MIPS, and updated in GIS. An analysis of sales will be reviewed for all sold properties dated October 1, 2020 to September 30, 2022, Commercial and Ag from October 1, 2019 to September 30, 2022, and sales reviews will be sent to both buyer and seller. Any changes will be edited in the Property Assessment Divisions Sales File to ensure it is identical to the Assessor's CAMA sales file. We will work to complete all pickup work from all forms of Discovery by March 1.

# Assessment Actions Planned for Assessment Year 2024-2025

# Residential (Land/or subclasses):

For Assessment year 2024-2025, Rural Residential 04), Ogallala Suburban, Agricultural/horticultural properties will be reviewed. Included in this review will be reviewing quality, condition, re-measuring all improvements, and taking new photos. Every property will be re-sketched into the CAMA system and new land and depreciation tables will be built derived from current sales. This review will involve approximately 2,477 parcels in market areas 1 through 6, 202 for Ogallala Suburban, 136 for Lake Rural Residential, 324 for Rural Residential, for a total of 3,139 parcels. This is usually a two year process and will continue for Assessment year 2025. All other subclasses will continue to be studied by ratio studies of all county residential neighborhoods and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or lane tables depending on the ratio study results.

#### Commercial (and/or subclasses):

For the assessment year of 2024 we will continue ratio studies of all county commercial neighborhoods and sales. Possible percentage adjustments will be applied if needed.

### Agricultural Land (and/or subclasses):

Each year we will continue the analysis of Ag Land Market Areas and sales. Any needed adjustments will be made in the price per acre. Sales will determine if they need adjusted. We will continue to process all irrigation transfers of Certified Base Areas approved by the NRD, map all new splits and subdivisions, process all NRD transfer of irrigated acres, utilize NRD maps to identify irrigated land use, request FSA Maps for use verification to all new Agland owners per Sales File and identify and remap agricultural land use changes. FSA maps will again be requested for this year. All other subclasses will continue to be studied by ratio studies of all county residential neighborhoods and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or lane tables depending on the ratio study results.

### **Special Value – Agland:**

We will continue analysis of Special Valuation properties and any Agland influences for other than agriculture-horticulture use. New photographs will be taken for new agricultural/horticultural use and any changes will be documented. All sales will be reviewed and valued accordingly. We will process and send disqualification letters to all owners not meeting qualifications per our special valuation methodology. All other subclasses will continue to be studied by ratio studies of all county residential neighborhoods and sales. Adjustments may be applied to the costing tables, depreciation tables, and/or lane tables depending on the ratio study results.

# New Construction/Building Permits:

We will complete all pickup work and help value any new construction or existing building construction that wasn't completed last year. Any changes made to properties will be entered into MIPS, and updated in GIS. An analysis of sales will be reviewed for all sold properties dated October 1, 2021 to September 30, 2023, Commercial and Ag from October 1, 2020 to September 30, 2023, and sales reviews will be sent to both buyer and seller. Any changes will be edited in the Property Assessment Divisions Sales File to ensure it is identical to the Assessor's CAMA sales file. We will work to complete all pickup work from all forms of Discovery by March 1.

# Other functions performed by the assessor's office, but not limited to

Pursuant to Neb. Rev. Stat. §77-1303 and §77-1331. Record maintenance has been kept current on computerized forms with reliance solely on computer generated cards since 2007. All of our property record cards had appraisal information that supported the values of the property and are

completely generated by the computer system. The real estate and residential appraisal file balanced and were generated on all parcels in our CAMA system. With the reliance on computerized record maintenance we need to be assured that our CAMA system stores all the annual property record cards. Property Record Cards contain the information as set forth in Regulation 10-004.04 and 10-001.10 including ownership, legal description, cadastral map reference data, parcel I.D., property classification codes, taxing district, land information, building characteristics and annual value postings.

In 2020 we were finally able to add the last area to the MIPS CAMA system to be all table driven while using costing and depreciation tables derived from the market. All information within the Appraisal File will continue to be verified for accuracy.

All agricultural sales and land values were reviewed for all market areas. There are now 6 market areas: 3 market areas and 3 sub market areas. Market area 1 also contains Sub market area 4. Market Area 2 contains sub market area 5 and Market Area 3 contains sub market area 6. Sub market areas 4, 5, and 6 are all parcels that are along the North and South Platte Rivers and involve accretion ground or in other terms our special valuation area. New land values were set by soil type if changes were needed. We continue to process any irrigation transfers of certified base acres approved by the Twin Platte Natural Resource District.

For Assessment year 2021 we did a complete desktop review of our Agland Areas. We used our web based GIS aerial imaging from GWORKS dated 2018 and 2020 to review use and acres for all agland properties in Keith County. Home and Farm sites were reviewed and re-sketched for accuracy, shelter belts were added, and also all parcels that were along the North and South Platte Rivers that involved accretion acres were corrected per our findings. If an FSA map was given to us that information was used first per what they are certifying and then we work with GWORKS for updating the land use or anything else on the property. The overall acres of the property didn't change, however, some legal descriptions may have changed from the data.

Currently we use the GIS website GWORKS for our acre counts per soil and use. Cadastral maps are used as a histrionic use. Beginning this summer 2021 we will have all Cadastral map capabilities on our GIS web service called GWORKS. Included in this will be the aerial picture and the ownership boundary lines, subdivision, lot, block, lot measurements, etc.

#### **Conclusion**

With all the entities of county government that utilize the assessor's records in their operation, it is important for us to maintain the most accurate data as possible.

With the continual review of all properties and implementation of GIS, records will become more accurate and values will be assessed more equitable and uniformly across the county. With a well-developed plan in place, this process can flow more smoothly. A sales review will continue to be important in order to adjust for market areas in the county.

# 2021 Special Valuation Methodology For Keith County

# **Identification of the Recreation Influenced Area**

The Special Valuation Areas in Keith County are the accretion land along the North & South Platte Rivers and Lake McConaughy and also any parcel that is less than 80 acres. These areas were first recognized in Assessment year 2007. The properties that are less than 80 acres consist of property in market areas 1, 2, and 3. For 2021 properties that have some form of accretion are now in market areas 4, 5, and 6. Area 4 has the same boundary lines as area 1, 5 the same as area 2, and 6 the same as area 3 the only difference is accretion.

# The highest and best use of Properties in the Accretion Influenced Area

The highest and best use of the accretion market area is for recreational use. The Special Valuation Area was determined by market trends as the majority of all the agricultural properties that have sold along either river have been purchased for residential living and/or recreational use. The highest and best use is legally permitted, physically possible, economically feasible, and the most profitable. Every parcel with accretion was reviewed for 2021. If the parcel contained more accretion acres than deeded acres we then looked at adjoining parcels to identify adjoining parcels with the same ownership as the parcel with accretion. If the total acres of adjoining parcels contained more deeded acres used for agricultural *purpose*, than accretion areas; these parcels were determined to be primarily agricultural purpose and therefore, are allowed Special Valuation. If the total deeded acres used for agricultural purpose, is a small difference than the accretion acres, these parcels were determined to be primarily agricultural purpose and therefore, are allowed Special Valuation. If the Accretion Acres contain some acres used for agricultural purpose, then these acres are valued as all other land of similar use and considered agricultural purpose and added to the deeded acres to determine whether a parcel is primarily agricultural purpose. Parcels with slivers or small tracts of deeded land lying adjacent to larger accretion acres are not typical agricultural land in Keith County and are considered food plots or wildlife forage. Also, putting a few head of horses or cattle for a few months a year on these parcels with more accretion acres, does not qualify the parcel as being used primarily for agricultural purpose. After inspection, it was determined that the primary use of parcels with slivers or small tracts lying adjacent to larger accretion acres on the same parcel; or a few head of livestock for a few months annually, is not considered agricultural production in Keith County. Parcels determined as not being primarily used for agricultural purposes were sent Disqualification Letters and were valued at 100% of market value.

# The highest and best use of smaller rural Properties in the Influenced Area

The highest and best use of smaller rural tracts in the Keith County market area is mostly for residential use. The Special Valuation Area was determined by market trends as the majority of all the agricultural properties that have sold in Keith County and have been purchased for residential living instead of agricultural/horticultural use. The highest and best use is legally permitted, physically possible, economically feasible, and the most profitable. For 2021 we started the study of working with gworks, gathering new FSA maps from property owners who certify their acres, and imagery to identify land use, and features within the parcel. These features are adding shelter belts, correcting the size of Home and

farm sites and any other use that if different from our MIPS CAMA system. Other documentation from the property owners were used also to determine the use of the parcel. Once these changes were sent in to gworks to correct, we then used their base tool to calculated acres from them on soil types and amounts. Parcels determined as not being **primarily used** for agricultural purposes were sent Disqualification Letters and were valued as rural residential properties.

### Valuation Models Used for Value Estimates

The valuation models used in these areas are unit comparison or value per acre. The models were created by using sold properties with accretion acres that were influenced by other than agricultural use. This Special Valuation Area was selected because the sold properties were not reflecting the true agricultural market. This Special Valuation Area was developed to define a market trend for agricultural parcels being used for residential or recreational use within Keith County. This same study was used for the smaller rural tracts as well.

### Market areas Analyzed-In County and out of County

All seven market areas within Keith County area analyzed on an annual basis. Market trends are analyzed and sales within the Special Valuation area are used to determine the areas and market value. When necessary we have also reviewed adjoining counties, Garden and Lincoln, Special Valuation Areas and their Valuation Methodology.

### Adjustments made to Sales to reflect current cash equivalency of typical market conditions

We have not adjusted the sales. Typically the most recent sales reflect current cash equivalency. We rely on the most recent sales in determining value.

#### **Estimates of Economic Rent or Net Operating Income**

We have not studied rents for these properties. Typically actual income information is not readily available to our office.

#### **Typical Expenses Allowed in Income Capitalization Approach**

We have not studied the income approach for these properties. Typically actual income information is not readily available to our office.

# **Overall Capitalization Rate used in Income Capitalization Approach**

We have not studied the income approach for these properties. Typically actual income information is not readily available to our office.

#### **Other Supporting Information for the estimate of Special Value**

Market trends for agricultural land in Keith County have been highly influenced by residential and recreational uses due to the close proximity of Lake McConaughy, the North Platte River and the South

Platte River. This area is primarily agricultural parcels. The Special Valuation Market Area is determined by current sales within Keith County. The Special Value Methodologies are used to value agricultural land that is influenced by market factors other than purely agricultural or horticultural purposes. The Keith County Assessment office maintains a file of all data used for determining the special and actual valuation. This file shall be available for inspection at the Keith County Assessor Office by any interested person. Our Special Valuation area is currently being reviewed. Special valuation properties as well as all vacant agland in the county is included in a three year project. In 2019, we physically took pictures of all of the vacant land and special valuation land in the county. In 2020, we started reviewing each parcel with our GIS website and are sketching out shelterbelts, trees, home sites, farm sites, and reviewing the acres by soil type. These are being compared with FSA maps that have been provided from the property owners or lessee's of the property. We are currently still working on this project and are hoping to be completed for Assessment Yrear2022half way through and this study will be finished for assessment year for 2021.

Submitted by Renae Zink Keith County Assessor
