**2022 REPORTS AND OPINIONS  
OF THE PROPERTY TAX ADMINISTRATOR**

---

**LOUP COUNTY**

Pete Ricketts, Governor

April 7, 2022

Commissioner Keetle :

The Property Tax Administrator has compiled the 2022 Reports and Opinions of the Property Tax Administrator for Loup County pursuant to [Neb. Rev. Stat. § 77-5027](#). This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Loup County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to [Neb. Rev. Stat. § 77-1514](#).

For the Tax Commissioner

Sincerely,

A handwritten signature in black ink that reads "Ruth A. Sorensen".

Ruth A. Sorensen  
Property Tax Administrator

- Agricultural Land Statistics
- Table-Average Value of Land Capability Groups
- Special Valuation Statistics (if applicable)

- Market Area Map
- Valuation History Charts

### ***County Reports:***

- County Abstract of Assessment for Real Property, Form 45
- County Abstract of Assessment for Real Property Compared to the Prior Year
- Certificate of Taxes Levied (CTL)
- Assessor Survey
- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

## Introduction

---

Pursuant to [Neb. Rev. Stat. § 77-5027](#), annually, the Property Tax Administrator (PTA) shall prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments for consideration by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by [Neb. Rev. Stat. § 77-1327](#). From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level – however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

### **Statistical Analysis:**

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division staff must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to [Neb. Rev. Stat. §77-5023](#), the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	Jurisdiction Size/Profile/Market Activity	COD Range
Residential improved (single family dwellings, condominiums, manuf. housing, 2-4 family units)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
Income-producing properties (commercial, industrial, apartments,)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
Residential vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
Other (non-agricultural) vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

### **Analysis of Assessment Practices:**

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to [Neb. Rev. Stat. §77-1327](#), a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with [Neb. Rev. Stat. § 77-1311.03](#) and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the review done by Division staff, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

*\*Further information may be found in Exhibit 94*

## County Overview

With a total area of 568 square miles, Loup County has 607 residents, per the Census Bureau Quick Facts for 2020, a 4% increase in population from the 2010 U.S. Census. Reports indicate that 77% of county residents are homeowners and 95% of residents occupy the same residence as in the prior year (Census Quick Facts). The average home value is \$98,251 (2021 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

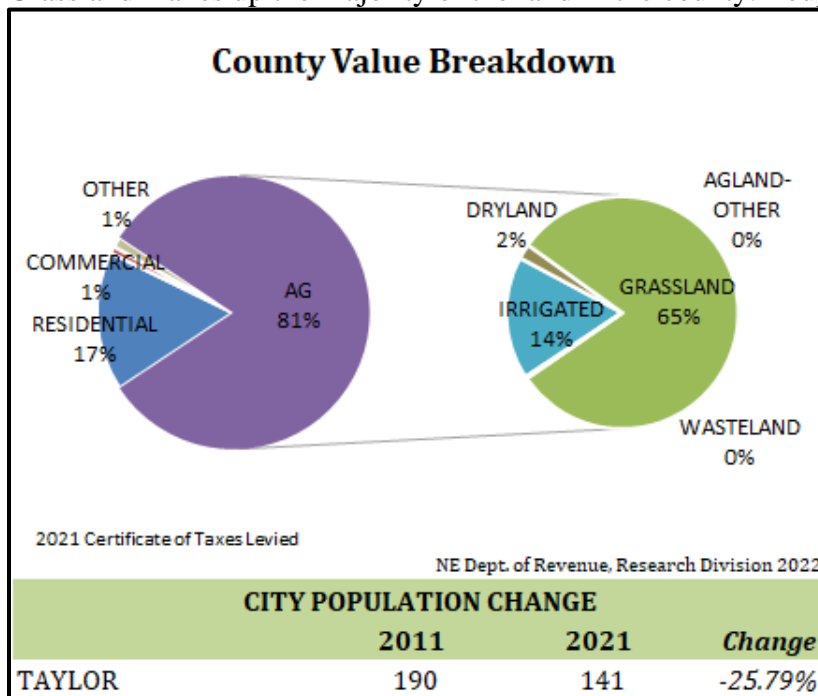

The majority of the commercial properties in Loup County are located in and around the county seat of Taylor. According to the latest information from the U.S. Census Bureau, there are 16 employer establishments with total employment of 43, no change in employment from 2019.

Agricultural land is the largest contributor to the county’s valuation base by a significant margin. Grassland makes up the majority of the land in the county. Loup County is included in the Lower

Loup Natural Resources District (NRD).

Loup County is also home to Calamus Reservoir. The lake is located on the eastern side of the county and is shared with neighboring Garfield County. Calamus Lake offers some of the state’s finest recreational opportunities including camping, fishing, boating, and hunting.

## 2022 Residential Correlation for Loup County

---

### *Assessment Actions*

For the residential class, depreciation tables were updated for all homes. Costing and lot values for the entire residential class were also updated. Pick-up work and routine maintenance was completed.

### *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

The counties sales usability rate is like other counties across the state. This, along with the acceptable verification practices indicate that all arm's-length transactions have been made available for measurement.

The county assessor recognizes four separate valuation groups. Valuation Groups 1 and 2 are areas around the Calamus Lake. These two groups have a strong residential market due to the recreational influences that are absent from the rest of the county. Valuation Group 5 includes parcels outside village boundaries and away from the lake. The rural parcels are separated to analyze if a recreational influence exists on the river. Valuation Group 6 is the village of Taylor, the county seat and only incorporated town in Loup County.

The county meets the six-year inspection and review requirement as all residential parcels were physically inspected in 2021.

The county assessor has a written valuation methodology which details the assessment practices.

### *Description of Analysis*

Residential sales are stratified into four valuation groups.

<b>Valuation Group</b>	<b>Description</b>
1	Calamus Lake-Mobile Homes
2	Calamus Lake-Stick Built Homes
5	Rural
6	Taylor

Review of qualified residential sales show the three measures of central tendency are within the acceptable range. All valuation groups except for Valuation Groups 1 and 5 have a sufficient

## 2022 Residential Correlation for Loup County

---

number of sales for measurement and the median is within the acceptable range for all valuation groups with the exception of Valuation Group 5. The qualitative statistics are slightly above the IAAO recommended parameters but typical for small rural counties.

Comparison of the 2022 County Abstract of Assessment for Real Property, Form 45 Compared with the 2021 Certificate of Taxes Levied Report (CTL) support that the values were uniformly applied to the commercial class and accurately reflect the assessment actions reported by the County Assessor.

### *Equalization and Quality of Assessment*

Review of the statistics, along with all other information available, and the assessment practices suggest that assessments within the county are valued within acceptable parameters, and therefore considered equalized. The quality of assessment of the residential property in Loup County complies with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	1	84.59	84.59	84.59	00.00	100.00
2	11	96.45	94.84	92.54	08.76	102.49
5	1	54.81	54.81	54.81	00.00	100.00
6	13	95.04	96.73	85.83	32.91	112.70
____ALL____	26	92.98	93.85	90.09	22.82	104.17

### *Level of Value*

Based on analysis of all available information, the level of value for the residential property in Loup County is 93%.

## 2022 Commercial Correlation for Loup County

---

### *Assessment Actions*

The commercial assessment for Loup County included pick-up work this year.

### *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

In the role of ex-officio, the county assessor does not use verification forms. Deeds are filed directly with the office allowing the county assessor and staff to make inquiries when sales come in. Due to the small number of sales for the commercial class, review of the usability rate is not a reliable measure for sales qualification. Sales rosters were reviewed and sales that were not available for measurement had adequate reasons for exclusion. This along with the office practices suggest that all arm's-length sales have been made available for measurement.

The date of costing is 2019 and depreciation table is 2020. A lot value study and date of last inspection was 2020.

The Loup County Assessor recognizes one valuation group for the commercial class. Taylor includes all commercial properties within the Village of Taylor and within a one-mile radius. Businesses include a bar and grill as well as a bank. There is an elementary through high school, post office, and Region #26 dispatch center as well. Calamus Lake Area includes all commercial properties located at or near the lake.

The Loup County Assessor follows the six-year review and inspection policy and has a written methodology on file.

### *Description of Analysis*

For the commercial class there were 5 qualified sales. All three measures of central tendency are out of acceptable range as well as the qualitative statistics. Further analysis shows there is no correlation between low or high dollar sales and no visible trends within the occupancy codes.

Comparison of the 2022 County Abstract of Assessment for Real Property, Form 45 Compared with the 2021 Certificate of Taxes Levied Report (CTL) support that the values were uniformly applied to the commercial class and accurately reflect the assessment actions reported by the Loup County Assessor.

## 2022 Commercial Correlation for Loup County

---

### *Equalization and Quality of Assessment*

With only 5 total qualified sales and the variation in the measures of central tendency, the sample is not a representative indicator of the overall level of value. However, a review of the statistics along with all the other information available, and the assessment practices suggest that assessments within the county are valued within the acceptable parameters and are therefore considered equalized. The quality of assessment of the commercial property in Loup County complies with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	5	58.29	73.50	57.16	37.83	128.59
____ALL____	5	58.29	73.50	57.16	37.83	128.59

### *Level of Value*

Based on analysis of all available information, the level of value for the commercial property in Loup County is 100%.

# 2022 Agricultural Correlation for Loup County

---

## *Assessment Actions*

Routine maintenance and pick-up work was completed in Loup County for the 2022 assessment year. No agricultural land values were changed.

## *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

Compliance with the six-year inspection was reviewed. The county physically reviews agricultural homes and improvements simultaneously with the residential class. Land use changes are also tracked through the local Natural Resource District as well.

Loup County has one market area due to the relatively homogenous nature of the land. Mainly of rolling, native grass covered sand dunes. The fragile make-up of the soil makes cropping difficult. A small area in the southeastern corner of the county has flat ground more suitable for growing crops.

The county assessor values intensive use parcels the same as agricultural parcels. For government programs, the county has less than 300 acres of Conservation Reserve Program (CRP). All CRP acres have been identified and are valued the same as dryland.

Analysis of the 2022 County Abstract of Assessment for Real Property, Form 45 Compared to the 2021 Certificate of Taxes Levied Report (CTL) indicates no significant change in value of the agricultural class.

## *Description of Analysis*

Review of the statistical profile show six qualified sales. All six sales are 80% Majority Lane Use (MLU) in grassland and are slightly below the acceptable range. Review of the study year substrata does not indicate a normal market trend, half of the sales occurred in the most recent year ranging from 69% to 84%, the other half of sales are entirely low and occurred in study period years one and two.

<u>Study Yrs</u>	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01-OCT-18 To 30-SEP-19	1	48.34	48.34	48.34	00.00	100.00
01-OCT-19 To 30-SEP-20	2	61.91	61.91	64.89	07.45	95.41
01-OCT-20 To 30-SEP-21	3	84.00	78.99	71.15	05.99	111.02

The sample is insufficient to determine an accurate level of value. Agricultural land values appear to be equalized at uniform portions of market value; all values have been determined to be acceptable and are comparable to adjoining counties.

## 2022 Agricultural Correlation for Loup County

---

### *Equalization and Quality of Assessment*

The review of agricultural improvements and site acres indicate that these parcels are inspected and valued by using the same processes that are used for rural residential and other similar properties across the county. Agricultural improvements are believed to be equalized and assessed at the statutory level.

The quality of assessment of the agricultural land in Loup County complies with the generally accepted mass appraisal techniques.

80%MLU By Market Area						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
____Grass____						
County	6	67.73	68.19	65.48	15.95	104.14
1	6	67.73	68.19	65.48	15.95	104.14
____ALL____	6	67.73	68.19	65.48	15.95	104.14

### *Level of Value*

Based on analysis of all available information, the level of value of agricultural land in Loup County is determined to be at the statutory level of 75% of market value.

## 2022 Opinions of the Property Tax Administrator for Loup County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
<b>Residential Real Property</b>	93	Meets generally accepted mass appraisal techniques.	No recommendation.
<b>Commercial Real Property</b>	100	Meets generally accepted mass appraisal techniques.	No recommendation.
<b>Agricultural Land</b>	75	Meets generally accepted mass appraisal techniques.	No recommendation.

*\*\*A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 7th day of April, 2022.

**Soils  
CLASS**

- Excessive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Moderately well drained silty soils with clay subsoils on uplands
- Lakes

## 2022 Assessment Survey for Loup County

### A. Staffing and Funding Information

<b>1.</b>	<b>Deputy(ies) on staff:</b>
	1
<b>2.</b>	<b>Appraiser(s) on staff:</b>
	None
<b>3.</b>	<b>Other full-time employees:</b>
	0
<b>4.</b>	<b>Other part-time employees:</b>
	0
<b>5.</b>	<b>Number of shared employees:</b>
	None
<b>6.</b>	<b>Assessor's requested budget for current fiscal year:</b>
	\$12,595
<b>7.</b>	<b>Adopted budget, or granted budget if different from above:</b>
	Same as above.
<b>8.</b>	<b>Amount of the total assessor's budget set aside for appraisal work:</b>
	The assessor's budget does not cover appraisal work. Appraisal is a function under the General Fund and \$320,000 is set aside for a complete countywide reappraisal for residential, commercial and agricultural improvements next year.
<b>9.</b>	<b>If appraisal/reappraisal budget is a separate levied fund, what is that amount:</b>
	See question #8 above.
<b>10.</b>	<b>Part of the assessor's budget that is dedicated to the computer system:</b>
	\$4,500
<b>11.</b>	<b>Amount of the assessor's budget set aside for education/workshops:</b>
<b>12.</b>	<b>Amount of last year's assessor's budget not used:</b>
	\$3,767

## B. Computer, Automation Information and GIS

1.	<b>Administrative software:</b>
	MIPS
2.	<b>CAMA software:</b>
	MIPS CAMA
3.	<b>Personal Property software:</b>
	MIPS
4.	<b>Are cadastral maps currently being used?</b>
	no
5.	<b>If so, who maintains the Cadastral Maps?</b>
	n/a
6.	<b>Does the county have GIS software?</b>
	Yes
7.	<b>Is GIS available to the public? If so, what is the web address?</b>
	<a href="https://loup.gworks.com">https://loup.gworks.com</a>
8.	<b>Who maintains the GIS software and maps?</b>
	gWorks
9.	<b>What type of aerial imagery is used in the cyclical review of properties?</b>
	gWorks
10.	<b>When was the aerial imagery last updated?</b>
	2020

## C. Zoning Information

1.	<b>Does the county have zoning?</b>
	Yes
2.	<b>If so, is the zoning countywide?</b>
	Yes

<b>3.</b>	<b>What municipalities in the county are zoned?</b>
	The Village of Taylor is zoned, it being the only incorporated municipality within Loup County.
<b>4.</b>	<b>When was zoning implemented?</b>
	October 10, 2001.

**D. Contracted Services**

<b>1.</b>	<b>Appraisal Services:</b>
	Kaiser Appraisal and Consulting Service and Jeff Quist
<b>2.</b>	<b>GIS Services:</b>
	gWorks
<b>3.</b>	<b>Other services:</b>

**E. Appraisal /Listing Services**

<b>1.</b>	<b>List any outside appraisal or listing services employed by the county for the current assessment year</b>
	Yes, Kaiser Appraisal and Consulting Service
<b>2.</b>	<b>If so, is the appraisal or listing service performed under contract?</b>
	Yes
<b>3.</b>	<b>What appraisal certifications or qualifications does the County require?</b>
	The county would require any appraisal certifications and/or qualifications as established by statute and the Nebraska Appraisal Board.
<b>4.</b>	<b>Have the existing contracts been approved by the PTA?</b>
	Yes
<b>5.</b>	<b>Does the appraisal or listing service providers establish assessed values for the county?</b>
	Yes, with the help of the assessor

## 2022 Residential Assessment Survey for Loup County

<b>1.</b>	<b>Valuation data collection done by:</b>														
	County assessor and contracted appraiser														
<b>2.</b>	<b>List the valuation group recognized by the County and describe the unique characteristics of each:</b>														
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;"><u>Valuation Group</u></th> <th><u>Description of unique characteristics</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>Calamus Lake Area MH - This includes the three mobile home subdivisions (Mike's Meadows #1, #2 and #3) within in view of the Calamus Lake. It also includes any rural residential sites with mobile homes located within the Calamus Lake area.</td> </tr> <tr> <td style="text-align: center;">2</td> <td>Calamus Lake Area SB - This valuation group includes all "stick built" homes located within the following Calamus Lake subdivisions (Aggie's Acres #1, #2, #3, #4, #5, #6, and #7, Glenridge, Quail Ridge, Moses Shoals, and Goodenow). <u>Valuation Group</u>	<u>Description of unique characteristics</u>														
1	Calamus Lake Area MH - This includes the three mobile home subdivisions (Mike's Meadows #1, #2 and #3) within in view of the Calamus Lake. It also includes any rural residential sites with mobile homes located within the Calamus Lake area.														
2	Calamus Lake Area SB - This valuation group includes all "stick built" homes located within the following Calamus Lake subdivisions (Aggie's Acres #1, #2, #3, #4, #5, #6, and #7, Glenridge, Quail Ridge, Moses Shoals, and Goodenow). Any rural residential sites with stick built homes located in this area are included in this valuation grouping.														
5	Rural - This grouping includes all improved and unimproved properties located in rural areas of the county which are not associated with agricultural land/farm/farm home/farm sites. Sales within the unincorporated Village of Almeria are included in this group.														
6	Taylor - All improved and unimproved properties within the Village of Taylor are included in this grouping. Said village is located along Highway 183 and Highway 91 and while small, boasts the following businesses and/or government properties: Loup County Public Schools (K-12), post office, bank, bar/grill, city park, county courthouse, Region #26 dispatch center, and a recently opened gift shop.														
AG DW	Agricultural dwellings														
AG OB	Agricultural outbuildings														
<b>3.</b>	<b>List and describe the approach(es) used to estimate the market value of residential properties.</b>														
	The cost approached is used with Marshall & Swift costing and depreciation. An effective age for all residential properties is established based on a market study of sold properties and life expectancy. Local market data is also used to develop an economic depreciation as needed. While said information is not located within the property record cards, due to lack of space in the fire proof file cabinet, it can be accessed by interested individuals desiring to obtain the data.														
<b>4.</b>	<b>For the cost approach does the County develop the deprecation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>														
	Depreciation studies were developed based on local market information.														
<b>5.</b>	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>														
	Yes														
<b>6.</b>	<b>Describe the methodology used to determine the residential lot values?</b>														

	Lot values are \$1000 now. For 2022, will be adding \$3,000 to improved parcels for water/sewer																																							
<b>7.</b>	<b>How are rural residential site values developed?</b>																																							
	The home site was raised to \$8,000 and the farm site to \$1,000 for 2019. This was based on studying the surrounding counties values.																																							
<b>8.</b>	<b>Are there form 191 applications on file?</b>																																							
	No																																							
<b>9.</b>	<b>Describe the methodology used to determine value for vacant lots being held for sale or resale?</b>																																							
	Unsold vacant lots within the Calamus Lake Area being held for sale receive a “developer discount”. The “developer discount” is arrived at by using a discounted cash flow method with the appraiser ascertaining the selling price the developer would realize for the entire remaining unsold development as a whole. The number of unsold lots is then divided into this price to determine the “developer discount” per said lot. Once sold, the lots go to full value and once improved, \$5,000 is added to the lot value for water/sewer.																																							
<b>10.</b>	<table border="1"> <thead> <tr> <th><u>Valuation Group</u></th> <th><u>Date of Depreciation Tables</u></th> <th><u>Date of Costing</u></th> <th><u>Date of Lot Value Study</u></th> <th><u>Date of Last Inspection</u></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>2021</td> <td>6/2021</td> <td>2021</td> <td>2021</td> </tr> <tr> <td>2</td> <td>2021</td> <td>6/2021</td> <td>2021</td> <td>2021</td> </tr> <tr> <td>5</td> <td>2021</td> <td>6/2021</td> <td>2021</td> <td>2021</td> </tr> <tr> <td>6</td> <td>2020</td> <td>6/2019</td> <td>2020</td> <td>2020</td> </tr> <tr> <td>AG DW</td> <td>2021</td> <td>2021</td> <td>2021</td> <td>2021</td> </tr> <tr> <td>AG OB</td> <td>2021</td> <td>2021</td> <td>2021</td> <td>2021</td> </tr> </tbody> </table>					<u>Valuation Group</u>	<u>Date of Depreciation Tables</u>	<u>Date of Costing</u>	<u>Date of Lot Value Study</u>	<u>Date of Last Inspection</u>	1	2021	6/2021	2021	2021	2	2021	6/2021	2021	2021	5	2021	6/2021	2021	2021	6	2020	6/2019	2020	2020	AG DW	2021	2021	2021	2021	AG OB	2021	2021	2021	2021

	<p>The county has started a reappraisal of the residential class for the 2021 assessment year. The village of Taylor was reappraised while the Calamus Lake and Rural parcels will be reviewed and revalued for the 2022 assessment year.</p> <p>Calamus Lake is complete. Rural is not and will go on next year 2023.</p>																																							

## 2022 Commercial Assessment Survey for Loup County

<b>1.</b>	<b>Valuation data collection done by:</b>			
	County Assessor, contracted appraiser			
<b>2.</b>	<b>List the valuation group recognized in the County and describe the unique characteristics of each:</b>			
	<u>Valuation Group</u>	<u>Description of unique characteristics</u>		
	1	<p>Taylor - This includes all commercial properties within the Village of Taylor and within a one mile radius. The 2010 census assesses the population of the village at 190 (up from the 186 noted in the 2000 census). Highways 183 and 91 divide the town. Businesses include a bar/grill and the bank. The K-12 school is located on the southwest edge of town. A post office (whose hours will be cut in 2014) and the Region #26 dispatch center which serves eight counties is located around the town square (city park).</p> <p>Calamus Lake Area - This includes all commercial properties located at or near the proximity of the Calamus Lake, whether located in a subdivision or within the immediate lake area.</p>		
<b>3.</b>	<b>List and describe the approach(es) used to estimate the market value of commercial properties.</b>			
	The cost approach is used with Marshall & Swift costing and depreciation. An effective age for all residential properties is established based on a market study of sold properties and life expectancy. Local market data is also used to develop an economic depreciation as needed. Lack of sales continues to be a problem.			
<b>3a.</b>	<b>Describe the process used to determine the value of unique commercial properties.</b>			
	Loup County has no properties which I would describe as unique.			
<b>4.</b>	<b>For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>			
	Depreciation studies are based on local market information.			
<b>5.</b>	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>			
	Yes, individual depreciation tables are developed for each valuation grouping.			
<b>6.</b>	<b>Describe the methodology used to determine the commercial lot values.</b>			
	The market and sales comparison approach to value is used by separating each sale of unimproved commercial lots (extremely limited number) into comparable groups to further analyze sales of similar sold properties within the current study period.			
<b>7.</b>	<u>Valuation Group</u>	<u>Date of Depreciation</u>	<u>Date of Costing</u>	<u>Date of Lot Value Study</u>
	1	2020	6/2019	2020
		<u>Date of Last Inspection</u>		2020

	A complete reappraisal was completed for the 2021 assessment year

## 2022 Agricultural Assessment Survey for Loup County

<b>1.</b>	<b>Valuation data collection done by:</b>							
	County Assessor and contracted appraiser							
<b>2.</b>	<b>List each market area, and describe the location and the specific characteristics that make each unique.</b>							
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><u>Market Area</u></th> <th style="text-align: center;"><u>Description of unique characteristics</u></th> <th style="text-align: center;"><u>Year Land Use Completed</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>Loup County has only one market area at the current time for agricultural properties. With the limited number of sales I have, I cannot detect a definite pattern that would indicate any additional market areas are needed. Sales around the lake, if purchased for agricultural purposes, are not selling substantially higher than the other areas in the county. I don't feel establishing market areas would be defensible to my agricultural producers or in a court of law. While the use of sales from adjoining counties may aid in determining market value, it would not be helpful in establishing market areas.</td> <td style="text-align: center;">2021</td> </tr> </tbody> </table>	<u>Market Area</u>	<u>Description of unique characteristics</u>	<u>Year Land Use Completed</u>	1	Loup County has only one market area at the current time for agricultural properties. With the limited number of sales I have, I cannot detect a definite pattern that would indicate any additional market areas are needed. Sales around the lake, if purchased for agricultural purposes, are not selling substantially higher than the other areas in the county. I don't feel establishing market areas would be defensible to my agricultural producers or in a court of law. While the use of sales from adjoining counties may aid in determining market value, it would not be helpful in establishing market areas.	2021	
<u>Market Area</u>	<u>Description of unique characteristics</u>	<u>Year Land Use Completed</u>						
1	Loup County has only one market area at the current time for agricultural properties. With the limited number of sales I have, I cannot detect a definite pattern that would indicate any additional market areas are needed. Sales around the lake, if purchased for agricultural purposes, are not selling substantially higher than the other areas in the county. I don't feel establishing market areas would be defensible to my agricultural producers or in a court of law. While the use of sales from adjoining counties may aid in determining market value, it would not be helpful in establishing market areas.	2021						
<b>3.</b>	<b>Describe the process used to determine and monitor market areas.</b>							
	Class or subclass includes, but not limited to, the classifications of agricultural land listed in Neb. Rev. Statutes 77-1363, parcel use, parcel type, location, geographic characteristics, zoning, city size, parcel size and market characteristics.							
<b>4.</b>	<b>Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.</b>							
	The Loup County Board of Equalization adopted a resolution on July 15, 2010, defining non-agricultural/non-horticultural land in Loup County. Rural residential land and recreational land (of which Loup County has none) shall mean any land classified as rural and not used for the commercial production of agricultural or horticultural products in an economically viable amount to sustain the amount of income to support the area of parcel. A parcel must be smaller than forty (40) acres, not zoned for uses other than agricultural, agricultural residential or rural conservation. Parcels of land that are contiguous to agricultural properties, under the same ownership, less than 40 acres, and not directly accessible from a county or state road will be classified as agricultural or horticultural.							
<b>5.</b>	<b>Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value?</b>							
	Farm home sites carry the same value as rural residential home sites. One acre is valued at \$8,000 on both the farm home sites and rural residential home sites. A different home site value was created for an area surrounding the lake as defined by the lake zoning boundaries for rural residential and farm home sites outside the subdivisions of the lake.							
<b>6.</b>	<b>What separate market analysis has been conducted where intensive use is identified in the county?</b>							
	No separate market analysis has been conducted where intensive use is identified. Loup County does have feedlots which are valued based on LCG's.							
<b>7.</b>	<b>If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.</b>							

	N/A
<b>7a.</b>	<b>Are any other agricultural subclasses used? If yes, please explain.</b>
	No
	<b><u>If your county has special value applications, please answer the following</u></b>
<b>8a.</b>	<b>How many parcels have a special valuation application on file?</b>
	N/A
<b>8b.</b>	<b>What process was used to determine if non-agricultural influences exist in the county?</b>
	N/A
	<b><u>If your county recognizes a special value, please answer the following</u></b>
<b>8c.</b>	<b>Describe the non-agricultural influences recognized within the county.</b>
	N/A
<b>8d.</b>	<b>Where is the influenced area located within the county?</b>
	N/A
<b>8e.</b>	<b>Describe in detail how the special values were arrived at in the influenced area(s).</b>
	N/A

**2021 PLAN OF ASSESSMENT  
for  
LOUP COUNTY  
Assessment Years 2022, 2023, and 2024  
Date: June 15, 2021**

**INTRODUCTION**

Pursuant to Neb. Laws 2005, LB 263, Section 9, on or before June 15<sup>th</sup> of each year, the assessor shall prepare a plan of assessment, (herein after referred to as the "plan"), which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31<sup>st</sup> each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Department of Revenue, Property Assessment Division on or before October 31<sup>st</sup> each year.

**REAL PROPERTY ASSESSMENT REQUIREMENTS**

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling

legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as “the market value of real property in the ordinary course of trade.” Neb. Rev. Stat. §77-112 (Reissue 2003).

Assessment levels required for real property are as follows:

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land;
- 2) 75% of actual value for agricultural land and horticultural land for 2021; and
- 3) 75% of special value for agricultural and horticultural land which meets the qualifications for special valuation under §77-1344 and 75% of its recapture value as defined in §77-1343 when the land is disqualified for special valuation under §77-1347.

**GENERAL DESCRIPTION of REAL PROPERTY in LOUP COUNTY**

Per the 2021 County Abstract, Loup County consists of the following real property types:

<i>Parcels</i>	<i>% Of Total Parcels</i>	<i>% Of Taxable Value Base</i>
----------------	---------------------------	------------------------------------

---

<i>Residential</i>	568	32.12	12.53
<i>Commercial</i>	50	2.82	.83
<i>Industrial</i>	0	0	0
<i>Recreational</i>	0	0	0
<i>Agricultural</i>	1150	65.04	86.64
<i>Special Value</i>	0	0	0
<b>TOTAL</b>	<b>1768</b>	<b>100%</b>	<b>100%</b>

	<i>Acres</i>	<i>% Of Agland Total</i>
<i>Agricultural taxable acres:</i>	<b>349,781.40</b>	<b>100%</b>
<i>Grass</i>	322,415.68	92.18
<i>Irrigated</i>	15,351.26	4.39
<i>Dryland</i>	6,801.76	1.94
<i>Waste</i>	2,890.72	.83
<i>Shelterbelts</i>	1,377.54	.39
<i>Ag Home Sites</i>	195.06	.06
<i>Ag Farm Site</i>	746.10	.21

Loup County is mainly an agricultural county. However, the construction of the Calamus Dam and subsequent Calamus Lake resulted in the loss of close to 8,000 acres of farm and ranch land. This has been replaced with fifteen rural residential developments and numerous small rural residential sites, with the possibility of the subdividing and creation of several more developments. A new subdivision was platted in 2016 and vacated the same year, however, they are selling off the surveyed lots without it being a development. These subdivisions have more than replaced the agricultural valuation lost to the lake. The northern half of the county consists of mainly large cattle operations containing many acres of grassland with some acres of cropland. The southern half of the county is a mix of smaller owned operations combining livestock and farming, with a mix of grassland, dry and irrigated cropland. The Village of Taylor, the only incorporated village in the county, lies in the southeast portion of the county and serves as the county seat.

### **New Property**

The County had an estimated seventeen (17) zoning permits for new construction/additions for 2021. While new construction was county-wide, most of the growth continued to be attributable to the lake area. New construction was up compared to last year with 7 more zoning applications.

## **CURRENT RESOURCES**

### **STAFFING, BUDGET AND TRAINING**

#### **Staffing**

The office is staffed by one full-time office clerk and the County Clerk, who also serves in the ex-officio positions of Register of Deeds, Clerk of the District Court, Assessor and Election Commissioner. In preparation for the retirement of the County Clerk ex-officio Assessor (Clerk/Assessor) in January of 2022, a newly added part-time staff member became full-time beginning July 1, 2019. This resulted in the office having two full-time persons in addition to the Clerk/Assessor for the first time. The newly added staff member passed the test and now has her Assessor's Certificate, Loup County has a Deputy Assessor for the first time since the current Clerk/Assessor assumed office in July of 1980. The assessor and/or her deputy performs ALL the Assessor duties (even if this document refers only to the Assessor) with regards to real estate records, maintenance and valuations, personal property filings, administrative reports and processing of Homestead Exemption Applications.

## **Training**

The assessor is required to obtain sixty hours of continuing education within a four-year period. Her current certificate will expire on December 31, 2022. To date she has not acquired any applicable hours of continuing education but does have plans to send the Deputy Assessor to meetings/workshops since she has her certificate.

## **Budget**

As she serves as ex-officio Assessor, most of the budget is contained within the County Clerk budget. The County Clerk did not receive compensation for the ex-officio Assessor position until 2007. She worked twenty-seven years with no additional compensation for the ex-officio position. The Board set the additional compensation for the Assessor position beginning with the year 2019 at \$6,000.00 with an annual 2% increase. The County Clerk's 2019-2020 budget is \$110,250.00 and her clerk salary plus the ex-officio salary is covered in this budget. Her one full-time clerk's salary and her deputy also comes from the County Clerk budget. However, she does maintain a small Assessor office budget in the amount of \$12,595.00. This budget covers education and travel expense, supplies and postage required by the Assessor's office. No salaries are taken from the Assessor budget. The appraisal budget for 2020-2021 was set at \$320,000.00.

This budget is used to pay for the annual pickup work and will be used to pay for a full reappraisal of all improved properties by Kaiser Appraisal Service. The reappraisal was originally scheduled to be complete in 2020. However, due the COVID 19 pandemic, said reappraisal could not be started until June 2020, so payments will be made out of the 2020-2021 budget. Due to the implementation of GIS Workshop, a GIS Workshop Fund was established for the 2016-17 budget year and the 2019-20 budget was set at \$10,075.00.

### **CADASTRAL AND AERIAL MAPS**

The cadastral maps are kept current by the assessor with new ownership lines, acres, and property owner's names being done as changes occur. If only an ownership change has occurred the office clerk makes that change. However, the maps are from 1969 and new maps are desperately needed due to the many changes over the years to keep them up to date. With the addition of GIS Workshop, she has been advised that a cadastral can be created from the information contained in this program. The assessor will look into the possibility of creating a cadastral system through GIS Workshop, if it can be done at no additional cost to the county, possibly after January, 2010. In the meantime, she continues to maintain the old cadastral records.

With the implementation of GIS Workshop aka gWorks, the land use on the aerial maps has not been kept up to date as that information is readily available and accessible on that website. The assessor or her deputy does all the record maintenance of the aerial maps including but not limited to mapping, ownership changes, land splits, etc. The assessor is working with 1999 aerial maps. The assessor draws in ownership lines when irregular tracts have sold. She first enters the description into Deed Plotter+ for Windows, and then prints the resulting map to any scale desired and transfers the resulting information onto the cadastral and aerial maps. While the addition of gWorks allows land splits to be handled by gWorks staff, the Assessor continues to use the DeedPlotter+ program to map the split prior to submitting it to gWorks. The assessor continues to draw and plot the splits on the aerial maps and in the cadastral book.

### **Property Record Cards**

The assessor maintains the record cards with ownership and splits kept up to date. We use folder type color coded record cards, using green folders for agricultural, white for village and commercial, blue for exempt and yellow for rural subdivisions. Said cards contain current pictures of the house and any other major improvements, ownership and mailing addresses, physical addresses, classification, school and tax district codes, as well as land classifications and values for improvements and land. The county does maintain

E911 addresses (physical) on all properties. New residences are assigned an E911 address by the communication director and updates are emailed to the assessor on a regular basis.

All properties with more than one improvement contain a ground sketch for the locations of each improvement. Scale drawings of all houses can be found on the cards. Pricing information is contained within the folder for ease in identifying how the value was established. Value information for at least the previous five years can be found on the front of each property record card. All of the foregoing information can also be found on gWorks as it is pulled from the MIPS website.

## **SOFTWARE**

For the first time, beginning in April 2015, the assessor started using MIPS for all record keeping including all notices, tax receipts, pricing and administrative reports, etc. Beginning in May 2016, the Board authorized the Assessor's use of the MIPS CAMA program. All improvement information, pictures, drawings, etc. have been entered into that system and it will be available to everyone through a link to MIPS on the county website and gWorks also captures this information.

## CURRENT ASSESSMENT PROCEDURES for REAL PROPERTY

### **Discovery, Listing and Inventory of All Property**

As the County Clerk is also the ex-officio Assessor, the Real Estate Transfer Statement starts and stops in her office. She uses the information obtained from the Form 521 to ascertain the selling price of the property, whether any personal property was included in the sale, and characteristics of the sale based on the information at hand. From this information, it is determined if further investigation of the sale need occur. If deemed so, the assessor will talk with the buyer and/or seller, the real estate agent, or if this is not possible, will resort to the sending of questionnaires. Loup County has a new zoning administrator who is only in the office for 3 1/2 hours per week but she willingly shares all zoning permit applications with the assessor, which is of great benefit in tracking new construction.

### **Data Collection**

Data collection is done by a local person who has done extensive work with a Nebraska appraisal company in the listing of properties for reappraisal. She lists the necessary data to price all new improvements, measures the improvement and shows the improvement location on the current ground sketch. All market and income data are

collected and processed by Kaiser Appraisal Service of Omaha, Nebraska. The assessor then prices all new improvements with computer programs using Marshall Swift data. She also enters all information concerning the new improvement on the appropriate record card including but not limited to sketches, reasons for change, etc.

Loup County completed reappraisals of all town and commercial lots through Kaiser Appraisal services in 2020 and these values were placed on the tax rolls for 2021. Work on Rural properties also began in 2020 and will be completed in 2021 to be placed on tax rolls in 2022.

Following is the breakdown of the timeline for the next yearly review. All the below listed properties will be visited during the contracted reappraisal.

**Physical Reviews in conjunction with a full contract reappraisal:**

**Lake Subdivisions: 2021**

**Village of Taylor: Completed in 2020**

**All of T24N: 2021**

**All of T23N: 2021**

**All of T22N: 2021**

**All of T21N: 2021**

All houses were re-priced on a new Marshall Swift database with new depreciations applied. Kaiser Appraisal Service physically inspected all commercial properties in 2020 and assigned depreciations to each one. All data was entered in to MIPS and repriced using 7-2019 Marshall Swift database. All residential properties have been re-priced after the afore-noted physical inspections using a 6-2019 Marshall Swift database.

Once the reappraisal is complete all residential, agricultural and commercial improvements will be repriced on MIPS using the latest Marshall Swift database available.

### **Review assessment of sales ratio studies before assessment actions**

I do my own Assessment/Ratio studies beginning in January by removing the sales which will be out of the current study period and adding in the newest available year's sales for each study group, residential, commercial and agricultural as the sales become of record. I have spread sheets on my computer listing the sales and the necessary information so I can then process the data for P.R.D., C.O.D., median, etc., for each class of property. I share this information, which lists sales, buyer/seller, selling price, and value for assessment, as well as statistics, with my County Board prior to deciding on any action necessary to bring the statistics into compliance for the next assessment year. I also review all preliminary data provided by my field liaison and discuss necessary actions with

her. I also discuss what, if any, changes need to be made to residential and commercial with Referee Bill Kaiser.

### **Approaches to Value**

All three approaches to value were developed with the help of Referee Bill Kaiser.

- 1) He did a market approach using sales comparisons. If not enough sales were available for Loup County, he borrowed from other counties.
- 2) The cost approach is from the 2019 Marshall Swift program on MIPS is being used with the last depreciation study completed by Appraiser Bill Kaiser in 2020. Depreciation tables were changed according to the new study done by Appraiser Bill Kaiser.
- 3) Appraiser Bill Kaiser also completed an income and expense analysis at the time of the current reappraisal. He has all information and data used to compile this study in a computer format, available for inspection.
- 4) The ex-officio assessor conducts all land valuation studies by reviewing the current data available of sales which have occurred in Loup County. The Property Assessment Department as of the 2018 valuation no longer adds sales from neighboring counties. At this time no market areas have been established and Loup County has no special value on any agricultural land. Both market areas and special value may be established in the future if a need is shown.

## **Reconciliation of Final Value and Documentation**

Reconciliation of final value is done by the assessor using acceptable assessment practices. Documentation of pricing is contained in the Real Property card folders, while depreciation factors can be found in the reappraisal file available for public inspection.

### **Review assessment sales ratio studies after assessment actions**

Once the assessment process has been completed the assessor puts the new information into her sales file data and redoes the ratio statistics.

## **Notices and Public Relations**

Once the above assessment processes are complete, the assessor mails evaluation notices to all taxpayers whose value have changed. Such notices contain all information as prescribed by state statute, including but not limited to, prior and current year's values, ownership and legal description, date for filing protests, and dates during which the Board of Equalization will be in session. She also includes a review of assessment actions to each class of property for the current year. If agricultural land values are changed, she includes a numbered map indicating where sales have occurred. These numbers

correspond to a sheet detailing each sale as to name of buyer/seller, date of sale, number of acres, percentage of acres to each land class (irrigated, dry and grass), and the sale price per acre.

She publishes a notice in the county's legal newspaper, The Burwell Tribune, notifying the public that the annual revision of the assessment rolls is complete and on file, on or before June 1st. Said notice also contains the dates during which protests may be filed and the meeting dates of the Board of Equalization.

**LEVEL OF VALUE, QUALITY, AND UNIFORMITY FOR ASSESSMENT YEAR 2021**

<u>Property Class</u>	<u>Median</u>	<u>C.O.D.</u>	<u>P.R.D.</u>
<b>Residential</b>	93	*	*
<b>Commercial</b>	100	*	*
<b>Agricultural</b>	75	*	*

\*TERC did not publish statistical numbers for these measurements.

**RESIDENTIAL:** This class had a total of eighteen (18) improved sales. These sales had a median of 93, a C.O.D of 17.09 and a P.R.D. of 99.63. Two sales were Calamus Lake

Mobile Homes, eleven were Calamus Lake Stick Built, zero were rural home sites and five were in the Village of Taylor.

**COMMERCIAL:** The commercial statistics, based on one (1) sale, making the resulting stats very unreliable. Due to the lack of sales, the Tax Equalization and Review Commission certified 100% for this class. It is hard to establish or justify changes to value based on the small number of sales. Also, commercial sales in this county involve use changes as businesses close and the property is subsequently purchased for storage.

**AGRICULTURAL:** This class saw five (5) sales for the current study period for Loup County. The resulting stats on the five sales were a median of 67 (outside the acceptable range of 69% to 75%), a C.O.D. of 15.62 (within the acceptable range established by IAAO) and a P.R.D. of 102.82 (also within the acceptable range established by IAAO). Again, the Property Assessment Division chose not to add sales from adjoining counties and due to the low number of sales TERC certified the median at 75%. The assessor raised agricultural home sites to \$8000 per acre and agricultural farm sites to \$1000 per acre for 2019 and these values remain for 2021.

### **ASSESSMENT ACTIONS PLANNED FOR ASSESSMENT YEAR 2021**

***RESIDENTIAL:*** Annual pickup work will be done and new value added where necessary. Statistical studies will be done to determine any changes that may need to be made to depreciation and valuation. The assessor will continue adding all information, sketching and pictures to the MIPS CAMA system as new improvements are added to the tax rolls.

***RESIDENTIAL/Lake Properties and Subdivisions:*** Annual pickup work will be done and statistics reviewed for any needed changes in depreciation factors and valuations. All improved residential properties within the Calamus Lake subdivisions and around the Calamus Lake area will be physically inspected pursuant to the scheduled reappraisal during 2021. All properties will be repriced using the most current Marshall Swift data available on the MIPS site and appropriate depreciations applied as established by Kaiser Appraisal Service and these new values will be placed on the 2022 tax rolls.

***COMMERCIAL:*** Annual pickup work completed and priced by Kaiser Appraisal Service as needed. Properties will be repriced as needed using the most current Marshall Swift data available on the MIPS site and appropriate depreciations applied as established by Kaiser Appraisal Service and these new values will be placed on the 2022 tax rolls.

***AGRICULTURAL:*** Land use changes made as discovered. On agricultural home sites and farm sites, pickup work will be done and new value added. As many pivots have been

placed on previously gravity irrigated land, through use of the local Farm Service Agency (F.S.A.) information and drawings, changes have been made to correct the type of irrigation and the resulting changes in irrigated acres. Sales ratio and statistical studies are done annually to discover necessary changes in land values.

All improvements on agricultural properties will be physically inspected pursuant to the scheduled reappraisal during 2021. All agricultural improvements will be repriced using the most current Marshall Swift data available on the MIPS site and appropriate depreciations applied as established by Kaiser Appraisal Service and these new values will be placed on the 2022 tax rolls.

The assessor has added any new irrigated acres that were found through the N.R.D. required review with irrigators. She has copied the FSA maps provided by the irrigators for her records as she has been unable to obtain these herself from the local F.S.A. office. Irrigated acres continue to change as the N.R.D. processes applications for increased irrigated acres which are subsequently reported to the assessor.

### **ASSESSMENT ACTIONS PLANNED FOR ASSESSMENT YEAR 2022**

*RESIDENTIAL:* Annual pickup work will be done and new value added where necessary. Statistical studies will be done to determine any changes that may need to be made to

depreciation and valuation. The assessor will continue adding all information, sketching and pictures to the MIPS CAMA system as new improvements are added to the tax rolls.

***RESIDENTIAL/Lake Properties and Subdivisions:*** Any new subdivisions will be added with a study done by Kaiser Appraisal Service to determine value of the lots. Annual pickup work will be done and statistics reviewed for any needed changes in depreciation factors and valuations. The sales data from this area will be watched closely and data analyzed by Kaiser Appraisal as more improved sales occur in the area. The assessor will continue adding all information, sketching and pictures to the MIPS CAMA system as new improvements are added to the tax rolls.

***COMMERCIAL:*** Annual pickup work completed and priced by Kaiser Appraisal Service as needed. If more sales begin to occur in this class, a new study may need to be done by said appraisal company to determine if current depreciations and values are acceptable.

***AGRICULTURAL:*** Land use changes made as discovered. On agricultural home sites and farm sites, pickup work will be done and new value added. Sales ratio and statistical studies are done annually to discover necessary changes in land values. The assessor will be adding all information, sketching and pictures to the MIPS CAMA system and gWorks will then pull said information from that site.

## ASSESSMENT ACTIONS PLANNED FOR ASSESSMENT YEAR 2023

***RESIDENTIAL:*** Annual pickup work will be done and new value added where necessary. Statistical studies will be done to determine any changes that may need to be made to depreciation and valuation.

***RESIDENTIAL/Lake Properties and Subdivisions:*** Any new subdivisions will be added with a study done by Kaiser Appraisal Service to determine value of the lots. Annual pickup work will be done and statistics reviewed for any needed changes in depreciation factors and valuations. The sales data from this area will be watched closely and data analyzed by Kaiser Appraisal as more improved sales occur in the area.

***COMMERCIAL:*** Annual pickup work completed and priced by Kaiser Appraisal Service as needed. If more sales begin to occur in this class, a new study may need to be done by said appraisal company to determine if current depreciations and values are acceptable.

***AGRICULTURAL:*** Land use changes made as discovered. On agricultural home sites and farm sites, pickup work will be done and new value added. Sales ratio and statistical studies are done annually to discover necessary changes in land values.

#### **OTHER FUNCTIONS PERFORMED BY THE ASSESSOR'S OFFICE**

***RECORD MAINTENANCE, MAPPING UPDATES, OWNERSHIP CHANGES:*** The assessor does the records maintenance with regards to ownership changes, mapping updates required and record maintenance as needed. All changes are updated regularly and generally within two weeks of the change.

***ADMINISTRATIVE REPORTS:*** The assessor completes all reports including but not limited to the following and files same on a timely basis with the appropriate officials: the ***Abstract of Real Property***, ***Assessor Survey***, and ***Assessed Value Update*** on or before March 19<sup>th</sup>, the ***County Personal Property Abstract Report*** on or before July 20<sup>th</sup>, the ***Certification of Values*** on or before August 20<sup>th</sup>, the ***School District Taxable Value***

*Report* on or before August 20<sup>th</sup>, the *Average Assessed Value of Single-Family Residential Property* on or before September 1<sup>st</sup>, the *Annual Plan of Assessment* with the Board of Equalization on or before July 31<sup>st</sup> and PAD on or before October 31<sup>st</sup>, the *Annual Tax Roll* on or before November 22<sup>nd</sup>, the *Homestead Exemption Summary Certificate Form 458S* on or before November 30<sup>th</sup>, the *Personal Property Tax Exemption Summary Certificate Form 259P* on or before November 30<sup>th</sup>, the *Certificate of Taxes Levied* on or before December 1<sup>st</sup>, the *Legal Description and Owner of all property owned by the State or governmental subdivisions of the State* on or before December 1, 2004 and every fourth December thereafter, and the *Report of current values of properties owned by the Board of Educational Lands and Funds*.

**PERSONAL PROPERTY:** The assessor administers the timely filing of approximately one hundred fifty (150) personal property schedules each year. As a courtesy reminder, in the middle of February, she mails postcards to everyone who filed the previous year and those who will be new filers for the current year. Another reminder is sent the middle of April to those who haven't yet filed. Any filings after May 1<sup>st</sup> are penalized according to statute.

**PERMISSIVE EXEMPTIONS:** The assessor completes the basic information on the appropriate permissive exemption forms and mails those forms to the filers in November. Once the filings are returned, she makes determinations as to their new and/or continued

exempt use and advises the Board of Equalization of her recommendations. In 451 application years, notices are sent to all filers ten days prior to the exemption hearing. Notices are also sent in the case of a continuation of exemption being denied.

***TAXABLE GOVERNMENT OWNED PROPERTY:*** An annual review is made of government owned property not used for public purposes. At this time, Loup County has no such government property but reviews government owned property each year to find any that may qualify and be taxed.

***HOMESTEAD EXEMPTIONS:*** The Nebraska Department of Revenue (DOR) sends pre-printed Homestead Exemption (HSE) Application Forms to the assessor. The assessor then prepares mailings to all those still qualifying, consisting of a brief letter from the office explaining the contents of the mailing and instructions, DOR instructions, pre-printed HSE Forms 458, Nebraska Schedule I (Income Statement) and instructions and the United States Citizenship Attestation. The assessor also fills out the necessary information on HSE Form 458 for those persons requesting applications for the current year who were not eligible for exemption in prior years and sends them all necessary information. Approximately thirty applications are processed each year. The assessor assists all applicants who need help with completing the forms.

***TAX DISTRICTS, TAX RATES, TAX LISTS, TAX LIST CORRECTIONS:*** The assessor checks that all tax districts and valuations are correct and balanced. As she also serves as the County Clerk, she sets the tax rates and verifies that they are correct. The assessor prepares and certifies the annual tax roll to the treasurer for all real, centrally assessed, personal property and in-lieu of taxes. She also prepares all necessary tax list corrections and presents them to the County Board for action and to the Treasurer for collection or refund as the case may be.

***COUNTY BOARD OF EQUALIZATION, TERC APPEALS:*** The county assessor provides copies to the Board of Equalization members of all protests with her recommendation noted thereon and copies of all information she has concerning valuation of the protested property prior to the protest hearings. If necessary, she defends values before the TERC board with written testimony.

***EDUCATION:*** Please see *Training*, page 4 of this document.

## **2021 LOUP COUNTY REAL PROPERTY VALUATION METHODOLOGY**

The Loup County assessor (hereafter referred to as county assessor) is required by state statutes, in particular Neb. Rev. Stat. §77-1303 to prepare an annual assessment roll

of all taxable property on or before March 19<sup>th</sup> of each year. The following valuation methods described in this document, and hereby made a part of the annual Three-Year Plan of Assessment, will describe the processes for setting valuations for ad valorem tax purposes. Much of the information contained in this document can also be found in the annual Three-Year Plan of Assessment.

The county assessor establishes and maintains data on approximately 1,750 real property parcels located within the boundaries of Loup County which covers a total of 576 square miles. The parcel count is down due to the combining of many agricultural parcels. This data includes but is not limited to property characteristics, descriptions and ownership/address information. New construction is updated annually using zoning permits with attached blue prints. Subsequent physical inspections then verify and/or correct that information.

Acceptable statistical ranges for the median have been established by statute for all property classes and said ranges can be found in Neb. Rev. Statute §77-5023 (92%-100% for all classes except agricultural whose range is 69%-75%). While the median is used to measure the existing appraisal value level, the coefficient of dispersion (COD) measures the uniformity of that value. The recommended COD for residential is less than 15 while less than 20 is acceptable for commercial and agricultural. An additional uniformity measure is the price related differential (PRD) which should ideally fall somewhere between .98 and 1.03. The Property Assessment Division (PAD), closely watches and monitors whether the county is falling within statutory/suggested ranges for all three of

the foregoing measurement statistics, with the most emphasis being placed upon the median measurement. When a county like Loup County has a such a low number of sales in all property classes, it's much more difficult to achieve all statistical measures OR to place much reliance on the resultant statistics,

**A. CLIENT AND INTENDED USERS:**

County government (namely the county assessor) has the often times difficult task of assigning assessment values for taxation based upon mass appraisal techniques. All political subdivisions located within the boundaries of Loup County, who receive property taxes, in addition to the State of Nebraska, become the intended users of the applied mass appraisal. Identification of the use and users of our valuations (opinions of value) is done in order to better develop and report in a responsible and cohesive manner.

**B. INTENDED USE:**

Loup County's real property assessments are used by the Loup County Assessor for the purpose of property taxation and said resultant values meet the principles as established and set out in Nebraska Administrative Code, Title 350, and Chapter 50. If said opinions of value are used for other goals and/or objectives, they may be rendered invalid as they would be used for a purpose other than that for which they were originally established and intended.

**C. EFFECTIVE DATE OF VALUATION:**

The effective date of valuation for all real property located within the boundaries of Loup County is January 1, 2021.

**D. DATE OF THE REPORTED VALUES:**

All assessments of value were completed before March 19, 2021 and Valuation Notices were mailed to all property owners as of May 20th, to their last known address, by first class mail on or before June 1, 2021. Such notices were generated and mailed directly from the Loup County Assessor's office.

**E. TYPE AND DEFINITION OF VALUE:**

The definition of real property is located in Neb. Rev. Stat. §77-103. The terms "actual" and "market" value are viewed as one and the same in the State of Nebraska. The definition of "actual" value has been established in Neb. Rev. Stat. §77-112 as follows in a direct excerpt from said statute ..... Actual value of real property for purposes of taxation means the market value of real property in the ordinary course of trade. Actual value may be determined using professionally accepted mass appraisal methods, including, but not limited to, the (1) sales comparison approach using the guidelines in section 77-1371, (2) income approach, and (3) cost approach. Actual value is the most probable price expressed in terms of money that a property will bring if exposed for sale in the open market, or in an arm's length transaction, between a willing buyer and willing seller, both of whom are knowledgeable concerning all the uses to which the real property is adapted and for which the real property is capable of being used. In analyzing the uses and restrictions applicable to real property, the analysis shall include a consideration of the full description of the physical characteristics of the real property and an identification of the property rights being valued.

The definition of agricultural and horticultural land can be found in Neb. Rev. Stat. §77-1359 and as the reader of this missive is quite capable of locating this statute, no further column space will be expended disclosing the actual wording of said statute.

**F. DISCLOSURE OF ALL ASSUMPTIONS, LIMITING CONDITIONS AND JURISDICTIONAL EXCEPTIONS:**

1) Fee simple estate assumes irrefutable ownership of the property which is not encumbered by any other interest or estate and is subject only to such limitations as may be imposed upon same by certain governmental powers, namely, police power, eminent domain, escheat and/or taxation. Properties within Loup County have been assessed and will continue to be assessed as fee simple and unfettered of liens and encumbrances and under accountable ownership and/or knowledgeable management.

2) The county relies on the maintained property ownership map(s), deeds and any and all available materials to establish the dimensions/acreage attributable to all subject properties. As a result, surveys of assessed properties will not be provided, unless such survey has been recorded into the county's records and is requested.

3) If any unfavorable conditions exist for any given parcel, same shall be annotated in the record file and upon the associated record card. The land use and any improvements located within the confines of the described property are depicted on the assessment record card.

4) Loup County has used computer imagery including but not limited to those

found on the following sites: gWorks, Google Earth, NRCS/United States Department of Agriculture, and United States Geological Survey in the past to complete the required six-year inspection cycle. They have also established an ongoing physical inspection of all improved properties on a six-year rotation basis.

5) While every attempt has been made to physically inspect all improved properties on a continual six-year rotation, all such inspections may or may not have been recorded on the record card. In some instances, the property may have been inspected two or more years in a row, if zoning applications were filed indicating a change to the property, immediately following the mandatory six-year inspection. In an attempt to save the county tax dollars, if a physical inspection of the property occurred in a year prior to the scheduled six-year inspection, the property was not revisited.

6) Unless hidden or imperceptible conditions are found, it is presumed that none exist that would cause the property to be more or less desirable with regards to its resultant valuation.

7) It is expected that properties/landowners remain in compliance with all relevant governmental regulations/laws whether federal, state or local.

8) It is believed that all zoning and use requirements are being met unless information exists to the contrary.

9) Value opinions contained within this report have been based upon the assumption any and all necessary licenses, occupancy certificates, etc., have been or could be attained from the appropriate government agency.

10) Land values are based upon highest and best use of said land as though vacant at the time the value is established.

11) While no warrant is given or implied with regards to the information contained herein, every reasonable effort has been taken to ensure that any information, whether an estimate or opinion, is dependable and verifiable.

12) Valuation groupings in Loup County are as follows:

*Calamus Lake Area MH #1* – This includes the three mobile home subdivisions (Mike’s Meadows Subdivisions #1, #2 and #3) within in view of the Calamus Lake. It also includes any rural residential sites with mobile homes located within the Calamus Lake area.

*Calamus Lake Area SB #2* – This valuation group includes all “stick built” homes located within the following Calamus Lake subdivisions (Aggie’s Acres #1, #2, #3, #4, #5, #6 and #7, Glenridge, Quail Ridge, Moses Shoals and Goodenow). Any rural residential sites with stick-built homes located in this area are included in this valuation grouping.

*Loup River #4* – This grouping is no longer being utilized due to a lack of sales over a number of years. If sales begin to occur within this grouping it may be brought back into use.

*Rural #5* – This grouping includes all improved and unimproved properties located in rural areas of the county which are not associated with agricultural land/farm/farm home/farm sites. Sales within the unincorporated Village of Almeria are included with this grouping.

Taylor #6- All improved and unimproved properties within the Village of Taylor are included with this grouping. Said village is located along Highway 183 and Highway 91 and while small, boasts the following businesses and/or government properties: Loup County Public Schools (K-12), post office, bank, bar/grill, city park, county courthouse, Region #26 dispatch center, and a unique gift shop.

#### **REPLACEMENT COST IS UTILIZED BY LOUP COUNTY:**

Loup County uses replacement cost versus reproduction cost. Replacement cost constitutes building a substitute of equal quality without any function obsolescence (see explanation below).

Using the Marshall Swift Costing Tables in the MIPS CAMA System (which will be used to price all improvements in Loup County in 2020-2021) calculates the TOTAL cost of construction including but not limited to materials, labor, subcontractors, builder's overhead and profit, architectural and engineering fees, consulting fees, survey and permit fees, legal fees, taxes, insurance and cost of interim financing. There are also separate cost tables for residential components which include attached garages and other additions, heating and cooling systems, plumbing, building and yard improvements, commercial buildings, and agricultural buildings.

#### **DEFINITIONS OF TYPES OF DEPRECIATIONS:**

**Physical Deterioration:** the effects of ordinary wear and tear and the action of elements on an improvement.

**Functional Obsolescence:** the absence or inadequacy of features in the design, layout, or construction of the building that are currently desired by purchasers, or the presence of features that have become unfashionable or unnecessary. Fixtures such as bathtubs or vanities, and kitchens with outdated cabinets.

**External Obsolescence:** the loss of value from forces outside the building or property, such as changes in optimum land use, legislative enactments that restrict or impair property rights, and/or changes in supply/demand relationships.

**Economic Obsolescence:** this type of depreciation results from external factors affecting the property such as economic forces or environmental changes which can affect the supply/demand relationships in the market.

## **DEPRECIATION:**

Kaiser Appraisal Service has in the past and will again, pursuant to the 2020 contracted appraisal extended for 2021 of Loup County, develop depreciation schedules and tables using all legally accepted and established procedures to accomplish same. Said depreciation tables will be built with the local market data (and possibly market data from comparable adjoining counties due to the low number of sales in Loup County) to establish depreciation factors that will fit the majority of parcels assessed in each

neighborhood. However, Kaiser Appraisal Service does have the discretion to override depreciation schedules or assign additional depreciation to qualifying individual parcels that do not fit within the majority being assessed. In those instances, Kaiser Appraisal Service shall utilize his knowledge and experience with the local market

Depreciation will be estimated using foregoing established depreciation schedules which will show the typical loss in value at various ages or effective ages. As these tables will typically identify physical deterioration, additional adjustments may be required for functional or economic obsolescence (definitions found above). As different properties depreciate at different rates, depreciation schedules will be adapted to different types of properties.

Depreciation tables in Loup County are built from the market utilizing all legal and acceptable practices normally used in the establishment of same.

## **2021 LOUP COUNTY APPRAISAL PROCESS**

Loup County began using MIPS for all record keeping including notices, tax receipts, pricing and administrative reports in April of 2015. May of 2016 ushered in the use of the MIPS CAMA program. GWorks is used for mapping, although the assessor also maps out the splits for the cadastral and aerial photos using Deed Plotter+ for Windows.

## **RESIDENTIAL PROPERTIES**

The six-year inspection has been completed on all residential properties located within the Village of Taylor, and all commercial properties. Resultant findings and changes to values were placed on the 2021 tax roll. See specific data below concerning the afore-referenced properties.

### **Changes for 2021:**

The sales study period for all valuation grouping listed below was 10/1/2018 to 9/30/2020. Property Assessment Division (PAD) and Tax Equalization and Review Commission (TERC) certified Loup County's overall residential value as 93%.

The below residential properties were all valued using the cost approach. All relevant data is entered into the 5/19 Marshall Swift pricing program for all improved properties located in the Village of Taylor.

### **VILLAGE OF TAYLOR #06**

A complete reappraisal was completed in 2020, all improvements were repriced in MIPS using Marshall and Swift 6/2019 costing tables. Based on sales data, lots are assessed at .1722¢ per square foot. There were five (5) sales in this valuation grouping for the aforementioned study period. This resulted in a 94.07 median after the properties were reappraised and new values entered for the 2021 tax rolls.

## **CALAMUS LAKE AREA SB #02**

This valuation grouping had eleven (11) sales in the current study period. The median was 91.96. All improvements in this class received a 1% increase in value. All improvements in this assessor location have been priced using the 6/15 Marshall Swift pricing on the MIPS CAMA program. These properties will be reappraised following the findings in 2021.

## **CALAMUS LAKE AREA MH #01**

Loup County only had two (2) sales of this type of property in the current sales file with a median of 84.37. It is hoped this location in particular will benefit from the reappraisal to be conducted in 2021 and placed on the 2022 tax rolls.

## **LOUP RIVER #04**

As mentioned above, this grouping is no longer be used.

## **RURAL #05**

No changes were made with the exception of the addition of any new improvements and the removal of any improvements that no longer exist. There were zero rural sales therefore no changes were made to this valuation grouping for 2021. This is another area which will be updated and brought into compliance with the 2021 reappraisal.

## **COMMERCIAL PROPERTIES**

All commercial properties were reviewed in 2020 by Bill Kaiser which puts Loup County in compliance with the six-year physical inspection program. Kaiser repriced all commercial properties using the most current available information obtained from the inspection. Properties were repriced using 7/19 Marshall Swift pricing.

## **AGRICULTURAL PROPERTIES**

This class saw five (5) sales for the current study period (10-1-17 to 9-30-20) for Loup County. Agricultural home sites continue to be valued at \$8000 per acre and agricultural farm sites continue to be valued at \$1000 per acre for 2021. These values were implemented in 2019.

The resulting stats on the five (5) sales were a median of 66.52 (not within the acceptable range of 69% to 75%), a C.O.D. of 15.61 (within the acceptable range established by IAAO) and a P.R.D. of 102.82 (within the acceptable range established by IAAO). Again, the Property Assessment Division chose not to add sales from adjoining counties and Loup County decreased from seven (7) sales from last year's file to five (5) in the current study period.

Loup County has only one market area. Updates are made annually to accommodate splits, changes in land use and/or ownership changes.

**This concludes the 2021 LOUP COUNTY REAL PROPERTY VALUATION METHODOLOGY and I respectfully submit same and remind readers that it is hereby made a part of the 2021 Three Year Plan of Assessment. Same has been written to the best of my knowledge and belief. Please witness my signature and date below.**

**CONCLUSION**

The budget requests aforementioned (see *Budget*, page 4 and 5 in this document) are sufficient to maintain the current assessment practices and cover the annual pickup work and annual physical inspection of one fifth of the county each year.

Respectfully submitted:

\_\_\_\_\_ Date: \_\_\_\_\_

Debbie Postany, Loup County Assessor
