

# 2017 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTATOR

**PAWNEE COUNTY** 

April 7, 2017

### Pete Ricketts, Governor

### Commissioner Salmon:

The Property Tax Administrator has compiled the 2017 Reports and Opinions of the Property Tax Administrator for Pawnee County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Pawnee County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

Kuth a. Sorensen

402-471-5962

cc: Jonathon Bailey, Pawnee County Assessor

### Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

### **Statistical Analysis:**

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

<b>Property Class</b>	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

### **Analysis of Assessment Practices:**

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds' records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

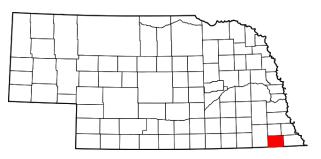

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

<sup>\*</sup>Further information may be found in Exhibit 94

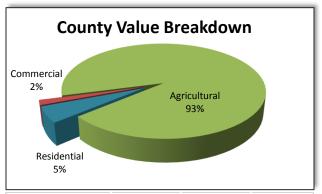

## **County Overview**

With a total area of 431 square miles, Pawnee had 2,659 residents, per the Census Bureau Quick Facts for 2015, a 4% population decline from the 2010 US Census. In a review of the past fifty-five years, Pawnee has seen a steady drop in population of 50% (Nebraska Department of Economic Development). Reports indicated that

78% of county residents were homeowners and 89% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Pawnee convene in and around Pawnee City. Per the latest information available from the U.S. Census Bureau, there were sixty-four employer

2017 Abstract of Assessment, Form 45

U.S. CENSUS POPULATION CHANGE							
	2006	2016	Change				
BURCHARD	103	82	-20%				
DUBOIS	166	147	-11%				
LEWISTON	86	68	-21%				
PAWNEE CITY	1,033	878	-15%

establishments in Pawnee, a 3% drop from the preceding year. County-wide employment was at 1,649, an 8% gain relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Pawnee that has fortified the local rural area economies. Pawnee is included in both the Lower Big Blue and Nemaha Natural Resources Districts (NRD). Grass land makes up the majority of the land in the county.

# 2017 Residential Correlation for Pawnee County

### **Assessment Actions**

For 2017, Pawnee County completed all residential pickup work. They verified, reviewed and analyzed the residential sales throughout the county. Verification is done by phone, followed by a drive by inspection. When the analysis was completed, the county adjusted Pawnee City using in house depreciation schedules, based on the study of sales rosters that will give a uniform level of assessment to all classes and subclasses of property. The county is on track to complete the six-year inspection and review cycle. The County has a consistent approach to valuing and reviewing the property in Pawnee County. The County is proactive in utilizing technology in the office and in having the information available to the public through their web site.

### Description of Analysis

Residential parcels are valued utilizing seven valuation groupings that are based on the county assessor locations or towns in the county. Five of the groupings comprise the residential parcels inside specific towns, and two groupings consist of rural residential parcels and a recreational area in the County.

VALUATION GROUPING	ASSESSOR LOCATION
01	Pawnee City
02	Burchard
03	Dubois
04	Fraziers Lake
05	Rural
06	Steinauer
07	Table Rock

For the residential property class, a review of Pawnee County statistical analysis profile indicates 63 residential sales, representing the valuation groupings. Valuation group 01(Pawnee) constitutes about 67% of the sales in the residential class of property and is the county seat and is the retail anchor of the county. Of the three measures of central tendency for the residential class of properties, only the median is within the acceptable range. The statistical median for the sales in the file is 98%.

# 2017 Residential Correlation for Pawnee County

### Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three-property classes. Any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Pawnee County Assessor has developed a consistent procedure for both sales qualification and verification. The county assessor has more than likely physically reviewed all of the residential parcels at one time and is very aware of the market in the county. The Division's review inspects the nonqualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Pawnee County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's six-year inspection and review cycle for all real property was discussed with the county assessor. The county is on schedule to comply with six-year inspection and review requirement as evidenced by the six-year inspection plan detailed in the reports and opinions. The county assessor has been aggressive in their approach to bring all the inspections up to date and also have incorporated technology to aid in the assessment of the residential class. Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that affect the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the residential property class. The county typically bases the assessment decisions and review based on the individual towns and will adjust those with a separate economic depreciation if needed. Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy.

The review of Pawnee County revealed that the data was transmitted accurately but only periodically. It is important that the county submit the sales data more frequently. The sale verification process and the usability decisions resulted in the use of all arm's length sales. There is no apparent bias in the measurement of real property. Review cycle of the residential property appears to be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the individual property record files.

# **2017 Residential Correlation for Pawnee County**

Based on all relevant information, the quality of assessment of the residential class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

### **Equalization**

A review of both the statistics and the assessment practices indicate the county is in compliance with professionally accepted mass appraisal standards, and are therefore considered equalized.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	42	96.07	115.25	88.41	41.30	130.36
02	3	165.38	186.69	131.12	44.10	142.38
03	4	184.17	171.27	111.93	28.72	153.02
04	4	96.50	96.89	87.62	28.99	110.58
06	2	90.03	90.03	91.28	13.03	98.63
07	6	97.33	109.58	86.33	27.57	126.93
09	2	133.80	133.80	105.34	26.61	127.02
ALL						
10/01/2014 To 09/30/2016	63	97.58	120.29	89.75	43.44	134.03

### Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Pawnee County is 98%.

# **2017** Commercial Correlation for Pawnee County

### Assessment Actions

For 2017, Pawnee County analyzed the sales within the commercial class of properties and determined that no adjustments were necessary for this year. The county verified all commercial sales in the county. The county completed the permit and pickup work for the year.

### Description of Analysis

Pawnee County has two valuation groupings for the commercial class, which are <u>defined</u> by assessor locations and towns within the county.

VALUATION GROUPING	ASSESSOR LOCATION
01	Pawnee City
03	Remainder of the County

For the commercial property class, a review of the Pawnee County statistical profile includes six commercial sales, representing the two valuation groupings. Four sales in grouping (01) and two sales in grouping (03). The sample is also a mixture of six different occupancy codes with one sale in each.

A review of the median measure will display three sales above the acceptable level of value and three within the range. Remarkably all three measures of central tendency calculate to an acceptable level of value and support one another. The qualitative measures are indicating some uniformity. Nevertheless, because of the diversity in the statistical sampling it will not be considered reliable for measurement purposes or representative of the population as a whole.

The change in value over ten years for Pawnee County has risen an annual percentage without growth of approximately 4%. However, this is higher than surrounding communities are and reflective of the commercial reappraisal that went on in 2016. A comparison of the net taxable sales will also show that commercial values had been stable until the reappraisal in 2015-16 while the sales have been flat to slightly declining. Pawnee County has kept up with the general market.

### Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three-property classes. The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. The Division reviews the verification

## **2017** Commercial Correlation for Pawnee County

the sales and usability decisions for each sale. The county's inspection and review cycle for all real property is annually reviewed with the county assessor.

One of the areas addressed included sales qualification and verification. The Pawnee County Assessor has developed a consistent procedure for both sales qualification and verification. The Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Pawnee County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The review of Pawnee County revealed that the data was transmitted accurately but only periodically. It is important that the county transmit the sales data more frequently. The sale verification process and the usability decisions resulted in the use of all arm's length sales. There is no apparent bias in the measurement of real property. Review cycle of the residential property appears to be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the individual property record files.

Based on all relevant information, the quality of assessment of the commercial class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

### Equalization

The sales file consists of six sales, thus the sample is inadequate for statistical measurement. Assessment practices are reliable and have been applied consistently.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	4	98.31	98.51	92.74	05.13	106.22
03	2	98.68	98.68	98.14	05.67	100.55
ALL						
10/01/2013 To 09/30/2016	6	98.31	98.56	93.13	05.31	105.83

The commercial class of property in Pawnee County is in compliance for equalization and quality of assessment and adheres to acceptable mass appraisal techniques.

### Level of Value

Based on analysis of all available information, the commercial property class in Pawnee County has attained the statutory level of 100%.

# **2017** Agricultural Correlation for Pawnee County

### **Assessment Actions**

For 2017, Pawnee County has completed all pickup work of new improvements on agricultural parcels. They also updated the land use on all parcels where changes were reported or observed. They have verified, reviewed, and analyzed the agricultural sales throughout the county. A sales analysis was completed; as a result, grassland values and cropland values increased approximately 5.5% for 2017.

### Description of Analysis

The majority of agricultural land in Pawnee County is grassland; the rest is dry cropland with hardly any irrigated. The entire county is considered as one market area. The county uses a schedule of values based generally on the LCG structure with some variations by soil type

There are 27 agricultural sales in the statistical profile. The calculated median of the sample is rounded to 71%. A review of the statistical profile for the 80% majority land use (MLU) by Market Area indicates that for all classes of land are within the acceptable range.

### Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three-property classes. Any incongruities are noted and discussed with the county assessor for further action. Pawnee County needs improvement in submitting sales information to the state sales file in a timely fashion. While the delay never interfered with a review of the assessment, practices the sales from the county were not always available to other users of the state sales file. The county has improved the submission of sales over the past year and is trying to submit sales on a monthly routine schedule.

One assessment practice reviewed is that of sales qualification and verification. Pawnee County's process consists of a mailed questionnaire sent to one or both parties of an agricultural transaction. The Division reviews the non-qualified sales to ensure that the reasons for disqualifying sales are supported and documented. The review also includes a dialogue with the county assessor and a consideration of verification documentation. It is the practice of the county assessor to consider all sales qualified unless shown to be non-arm's-length. The review of the county revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of agricultural land. The county's inspection and review cycle for all real property was also discussed with the county assessor. Within the agricultural class, rural dwellings and outbuildings are reviewed at the same time as the rural residential review. Land use was updated for this assessment year, via comparison of each record to the information supplied by aerial imagery. In addition, Conservation Reserve Program acres are confirmed on a yearly

# **2017 Agricultural Correlation for Pawnee County**

basis. The county has been aggressive in their approach to bring all the inspections up to date and have incorporated technology to aid in the assessment of the agricultural class.

The review process also examines the agricultural market areas to ensure that the areas defined are equally subject to a set of economic forces that affect the value of land within the delineated areas. The summary of the market area analysis concluded that the county has adequately identified market areas for the agricultural land class.

Another portion of the assessment practices relates to how rural residential and recreational land is identified apart from agricultural land within the county. Pawnee identifies land that is not used for recreation, residential or commercial use in the county as agricultural land. Based on all relevant information and Pawnee County having the highest percentage of grass of any of the other counties in southeast Nebraska. The quality of assessment of the agricultural class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Based on all relevant information, the quality of assessment of the agricultural class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

### Equalization

All dwellings located on both agricultural and rural residential land are valued using the same cost index and depreciation schedule. Farm home sites carry the same value as rural residential home sites, because the county assessor believes there are minimal market differences between them.

The quality of assessment of the agricultural class is in compliance with generally accepted mass appraisal standards.

## Level of Value

Based on analysis of all available information, the level of value of agricultural land in Pawnee County is 71%.

# 2017 Opinions of the Property Tax Administrator for Pawnee County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Cum. Supp. 2016). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	98	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	71	Meets generally accepted mass appraisal practices.	No recommendation.

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2017.

# **2017** Assessment Survey for Pawnee County

# A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	1
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	0
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$82,875.10
7.	
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$8,800
9.	
10.	Part of the assessor's budget that is dedicated to the computer system:
	This is budgeted out of county general in the amount of 9,700 for MIPS programing. (Do not know if this is current as new Clerk does not give break down sheet on MIPS costs.)
11.	Amount of the assessor's budget set aside for education/workshops:
	\$800
12.	
13.	Amount of last year's assessor's budget not used:
	\$1,000

## **B.** Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Assesspr
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	http://www.pawnee.gisworkshop.com/
7.	Who maintains the GIS software and maps?
	GIS Workshop
8.	Personal Property software:
	MIPS

## **C. Zoning Information**

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes
3.	What municipalities in the county are zoned?
	Pawnee City
4.	When was zoning implemented?
	2001

## **D. Contracted Services**

1.	Appraisal Services:
	Tax Valuation Inc.
2.	GIS Services:
	GIS Workshop
3.	

## E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Yes, for listing services.
2.	If so, is the appraisal or listing service performed under contract?
	No
3.	What appraisal certifications or qualifications does the County require?
	None
4.	Have the existing contracts been approved by the PTA?
	NA
5.	Does the appraisal or listing service providers establish assessed values for the county?
	No

8.	Valuation Grouping	<u>Date of</u> <u>Depreciation Tables</u>	<u>Date of</u> <u>Costing</u>	<u>Date of</u> Lot Value Study	Date of  Last Inspection
	01	2013	2013	2013	2013
	02	2014	2013	2014	2014
	03	2014	2013	2014	2014
	04	2014	2013	2014	2013
	05	2007	2007	2014	2012
	06	2014	2013	2014	2014
	07	2014	2013	2014	2014

The County relies on these valuation groups because of the similar amenities available and has determined that the unique location reflects the variable market influences. The inspection and review schedule also influences the groupings.

# **2017** Commercial Assessment Survey for Pawnee County

1.	Valuation data collection done by:				
	Assessor and lister				
2.	List the valuation groupings recognized in the County and describe the unique characteristics of each:				
	Valuation     Description of unique characteristics       Grouping     One of unique characteristics				
	01 Pawnee City – County seat and predominate trade center for the county.				
	Remainder of the County, comprised of the small towns of Lewiston, DuBois, Steinauer, and Table Rock. This grouping also includes the various commercial properties located in rural Pawnee County				
3.	List and properties.	describe the approac	h(es) used to est	timate the market v	alue of commercial
	Market approach developed from a depreciated cost basis. The county also analyzes sales from other similar counties to aid in determining the market for various occupancies. The county used the state sales file to locate sales and verified with the individual counties web sites.				-
3a.	Describe the	process used to determin	ne the value of unique	e commercial properties.	
	The County uses Marshall and Swift costing in their CAMA system and the county assessor will use sales from other counties to help substantiate market value.				
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?				
	The county develops a depreciation study from the market.				
5.	Are individual depreciation tables developed for each valuation grouping?				
	Depreciation tables are developed on the valuation groups. But the county develops tables for different occupancy codeswithin the valuation groups.				
6.	Describe the	methodology used to det	termine the commerc	ial lot values.	
	The county uses a market approach in determining lot values and generally prices them out using a square foot basis.				
7.	<u>Valuation</u> <u>Grouping</u>	<u>Date of</u> <u>Depreciation Tables</u>	<u>Date of</u> <u>Costing</u>	<u>Date of</u> Lot Value Study	<u>Date of</u> <u>Last Inspection</u>
	01	2015	2015	2015	2015
	03	2015	2015	2015	2015
	The valuation groups represent the appraisal cycle of the County. They have typically reviewed Pawnee City in one year and will then review the balance of the county during another year.				

# 2017 Agricultural Assessment Survey for Pawnee County

1.	Valuation data collection done by:					
	Assessor					
2.	. List each market area, and describe the location and the specific characteristics that make each unique.					
	Market Area	Description of unique characteristics	Year Land Use Completed			
	1	There are no noted characteristics to differentiate more than one market are in the County	2010			
	The entire county is considered as one market area.					
3.	Describe the process used to determine and monitor market areas.					
	The Assessor conducts a sales analysis by majority land use to see if the sales trends are generally the same for each geographic area of the County.					
4.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.					
	Any land that is not used for recreation, residential or commercial use in the county is considered agricultural land. This could be described as classifying by the present use of the property. This generally follows the zoning that is allowed in the county.					
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?					
	Yes	Yes				
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.					
	Currently there are no WRP parcels in the county.					

#### PAWNEE COUNTY ASSESSOR'S OFFICE

PAWNEE CITY, NE

In accordance with 77-1311 section 9, as amended by LB 263, the Pawnee County Assessor's office has made a six—year plan to inspect properties in Pawnee County. The schedule of inspections is to be as follows

2016: Residential in Townships of Turkey Creek, Steinauer, Clear Creek and Table Rock

2017: Residential in Townships of Mission Creek, West Branch, Clay and South Fork

2018: Residential in Townships of Plum Creek, Miles, Pawnee and Sheridan

2019: Pawnee City residential

2020: Burchard, Du Bois, Lewiston, Steinauer and Table Rock residential

2021: County wide Commercial

The purpose of the inspections is to make sure all information on the property record card of each parcel is correct and to correct any information that is needed and to take an updated picture of the parcel. The Assessor's office shall then make any changes that are needed to have all parcels comply with the ruling and guidelines set forth by the statues of the Legislative body and the Department of Revenue, Property Tax Division.

This may include updated Marshall & Swift pricing, either Marshall & Swift or in house depreciation schedules, based on the study of sales rosters, that will give a uniform level of assessment to all classes and subclasses of property.

This schedule of events may change based on the need of the properties to meet the level of assessment set forth by the state or if the budgeted amount needed to make these inspections may change on a yearly basis.

Jonathan Bailey

Pawnee County Assessor
