

Good Life. Great Service.

DEPARTMENT OF REVENUE

2018 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTATOR

PAWNEE COUNTY

April 6, 2018

Pete Ricketts, Governo

Commissioner Keetle:

The Property Tax Administrator has compiled the 2018 Reports and Opinions of the Property Tax Administrator for Pawnee County pursuant to <u>Neb. Rev. Stat. § 77-5027</u>. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Pawnee County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to <u>Neb. Rev. Stat. § 77-1514</u>.

For the Tax Commissioner

Sincerely,

Ruth a. Sorensen

Ruth A. Sorensen Property Tax Administrator 402-471-5962

Introduction

<u>Neb. Rev. Stat. § 77-5027</u> provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all arm's-length transactions as required by <u>Neb. Rev. Stat. § 77-1327</u>. From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices. After analyzing all available information to determine that the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist.

Pursuant to <u>Section 77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

| General Property Class | Jurisdiction Size/Profile/Market Activity | COD Range |
|--|---|-------------|
| Residential improved (single family | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 10.0 |
| dwellings, condominiums, manuf. | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 15.0 |
| housing, 2-4 family units) | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 20.0 |
| | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 15.0 |
| Income-producing properties (commercial, industrial, apartments,) | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 20.0 |
| industrial, apartments,/ | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 25.0 |
| | Very large jurisdictions/rapid development/active markets | 5.0 to 15.0 |
| Residential vacant land | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 20.0 |
| | Rural or small jurisdictions/little development/depressed markets | 5.0 to 25.0 |
| | Very large jurisdictions/rapid development/active markets | 5.0 to 20.0 |
| Other (non-agricultural) vacant land | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 25.0 |
| _ | Rural or small jurisdictions/little development/depressed markets | 5.0 to 30.0 |

Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity.

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used in the county assessor's effort to establish uniform and proportionate valuations. The review of assessment practices is based on information filed from county assessors in the form of the Assessment Practices Survey, and in observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Section 77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales

file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the groupings and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with <u>Neb. Rev. Stat. § 77-1311.03</u> and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

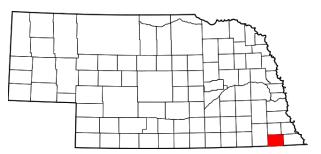

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for the end users, and highlight potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and practices are reviewed to ensure taxpayers are served with such transparency.

The comprehensive review of assessment practices is conducted throughout the year. When practical, potential issues identified are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

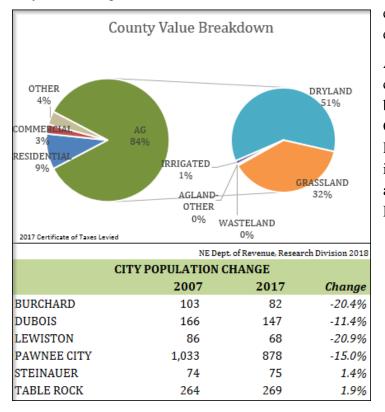

*Further information may be found in Exhibit 94

County Overview

With a total area of 431 square miles, Pawnee County had 2,652 residents, per the Census Bureau Quick Facts for 2016, a 4% population decline from the 2010 U.S. Census. Reports indicated that 77% of county residents were homeowners and 90% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Pawnee County are located in and around Pawnee City. According to the latest information available from the U.S. Census Bureau, there were 64

employer establishments with total employment of 472.

Agricultural land is the single greatest contributor to the county's valuation base by an overwhelming majority. Grassland makes up the majority of the land in the county. Pawnee County is included in both the Lower Big Blue and Nemaha Natural Resources Districts (NRD).

Assessor Actions

For 2018, and the next two years, Pawnee County is reviewing rural residential parcels and farm sites. They verified, reviewed and analyzed the residential sales throughout the county. Verification is done over the phone, followed by a drive by inspection. The county is on track to complete the six-year inspection cycle. Additionally, all pickup work was completed by the county, including onsite inspections of any remodeling or additions. The County is proactive in utilizing technology in the office and in having the information available to the public through their web site.

Description of Analysis

Residential parcels are valued utilizing seven valuation groupings that are based on the county assessor locations or towns in the county. Five of the groupings comprise the residential parcels inside specific towns, and two groupings consist of rural residential parcels and a recreational area in the County.

| Valuation Grouping | Assessor Location |
|--------------------|-------------------|
| 01 | Pawnee |
| 02 | Burchard |
| 03 | Dubois |
| 04 | Fraziers Lake |
| 05 | Rural |
| 06 | Steinauer |
| 07 | Table Rock |

For the residential property class, a review of Pawnee Counties statistical analysis profiles 65 residential sales, representing the valuation groupings. Valuation group 01 constitutes about 63% of the sales in the residential class of property, is the county seat, and is the retail anchor of the county. Of the three measures of central tendency for the residential class of properties, only the median is within acceptable range. These measures provide little support for each other but within the sample, the median provides the clearest indication of the level of value. Twenty percent of the sales have sale prices under 15,000 and sixty-five percent are less than 30,000. The occurrence of low dollar sales in the file, no doubt have an impact on the qualitative measures. For example, of the 28 sales less than \$30,000. With the removal of these sales, the Mean improves to 96% and the PRD improves to 108% the Median is 96%.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Pawnee County Assessor has developed a consistent procedure for both sales qualification and verification The Division's review inspects the nonqualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Pawnee County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's inspection and review cycle for all real property was discussed with the county assessor. The county is on schedule to comply with six-year inspection and review requirement as evidenced by the six-year inspection plan detailed in the reports and opinions. The county assessor has been aggressive in their approach to bring all the inspections up to date and have incorporated technology to aid in the assessment of the residential class. Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that affect the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the residential property class. The county typically bases the assessment decisions and review based on the individual towns and will adjust those with a separate economic depreciation if needed. Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy.

The review of Pawnee County revealed that the data was transmitted accurately but only periodically. The sale verification process and the usability decisions resulted in the use of all arm's length sales. There is no apparent bias in the measurement of real property. Review cycle of the residential property appears to be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the individual property record files.

Based on all relevant information, the quality of assessment of the residential class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Equalization

A review of both the statistics and the assessment practices suggest that assessments within the county is valued within the acceptable parameters, and therefore considered equalized.

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 41 | 97.91 | 104.44 | 96.34 | 20.75 | 108.41 |
| 02 | 2 | 124.59 | 124.59 | 111.05 | 25.25 | 112.19 |
| 03 | 4 | 152.24 | 153.00 | 141.73 | 20.47 | 107.95 |
| 04 | 1 | 70.95 | 70.95 | 70.95 | 00.00 | 100.00 |
| 05 | 6 | 104.72 | 105.64 | 73.75 | 38.03 | 143.24 |
| 06 | 2 | 66.18 | 66.18 | 67.97 | 06.95 | 97.37 |
| 07 | 8 | 74.92 | 84.50 | 60.49 | 45.74 | 139.69 |
| 0.9 | 1 | 98.19 | 98.19 | 98.19 | 00.00 | 100.00 |
| ALL | 65 | 97.91 | 103.91 | 90.91 | 27.60 | 114.30 |

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Pawnee County is 98%.

Assessment Actions

For 2018, Pawnee County analyzed the sales within the commercial class of properties and determined that no adjustments were necessary for this year. The county verified all commercial sales in the county. The county completed the permit and pickup work for the year.

Description of Analysis

Pawnee County has two valuation groupings for the commercial class, which are defined by assessor locations and towns within the county.

| VALUATION GROUPING | ASSESSOR LOCATION |
|--------------------|-------------------------|
| 01 | Pawnee City |
| 03 | Remainder of the County |

For the commercial property class, a review of the Pawnee County statistical profile includes 13 commercial sales, representing the two valuation groupings. Seven sales in grouping (01) and six sales in grouping (03). The sample is also a mixture of eleven different occupancy codes.

Although the calculated statistics indicate a median and mean level of value in the acceptable range, the weighted mean is well outside the acceptable range. With the removal of one high dollar sale. The weighted means moves from 55% to 88% and the PRD from 170% to 113%. There is limited support from these measures for any of the statistics derived from the sample. The qualitative measures are likewise compromised from the data in the statistical profile.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three-property classes. The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. The Division reviews the verification the sales and usability decisions for each sale. The county's inspection and review cycle for all real property is annually reviewed with the county assessor.

The review of Pawnee County revealed that the submission of sales as well as other statutory reports were transmitted accurately but only periodically. The sale verification process and the usability decisions resulted in the use of all arm's length sales. There is no apparent bias in the measurement of real property due to sale review. The county has successfully completed the first six-year inspection and review cycle of the improvements on commercial property and appears to

be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the property record files

Valuation groups were also examined to ensure that the group is equally subject to a set of economic forces that affect the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the commercial property class. Based on all relevant information, the quality of assessment of the commercial class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Equalization

Based on all relevant information, the quality of assessment of the commercial class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 7 | 92.85 | 87.45 | 37.68 | 31.52 | 232.09 |
| 03 | 6 | 98.68 | 100.25 | 87.49 | 27.05 | 114.58 |
| ALL | 13 | 93.08 | 93.36 | 54.96 | 30.18 | 169.87 |

The commercial class of property in Pawnee County is in compliance for equalization and quality of assessment and adheres to acceptable mass appraisal techniques.

Level of Value

Based on analysis of all available information, the level of value of the commercial class of real property in Pawnee County is 100%.

Assessment Actions

For 2018, Pawnee County has completed all pickup work of new improvements on agricultural parcels. They also update the land use on all parcels where changes were reported or observed. They have verified, reviewed and analyzed the agricultural sales throughout the county. A sales analysis was completed; as a result, grassland values decreased approximately 14%, irrigated and dry decreased approximately 2% and CRP decreased approximately 6% for 2018.

Description of Analysis

The majority of agricultural land in Pawnee County is grassland; the rest is dry cropland with hardly any irrigated. The entire county is considered as one market area. The county uses a schedule of values based generally on the LCG structure with some variations by soil type.

There are 33 agricultural sales in the statistical profile. The calculated median of the sample is rounded to 72%. A review of the statistical profile for the 80% majority land use (MLU) by Market Area indicates that for all classes of land, they are within the acceptable range.

| AREA (MARKET) | | | | | | |
|---------------|-------|--------|-------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 1 | 33 | 71.59 | 73.42 | 72.24 | 12.88 | 101.63 |
| ALL | 33 | 71.59 | 73.42 | 72.24 | 12.88 | 101.63 |

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action. Pawnee County needs improvement in submitting sales information to the state sales file in a timely fashion. While the delay never interfered with a review of the assessment, practices, the sales from the county were not always available to other users of the state sales file. The county has improved the submission of sales over the past year and is trying to submit sales on a monthly routine schedule.

One assessment practice reviewed is that of sales qualification and verification. Pawnee County's process consists of a mailed questionnaire sent to one or both parties of an agricultural transaction. The Division reviews the non-qualified sales to ensure that the reasons for disqualifying sales are supported and documented. The review also includes a dialogue with the county assessor and a consideration of verification documentation. It is the practice of the county assessor to consider all sales qualified unless shown to be non-arm's-length. The review of the county revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of agricultural land. The county's inspection and review cycle for

all real property was also discussed with the county assessor. Within the agricultural class, rural dwellings and outbuildings are reviewed at the same time as the rural residential review. Land use was updated for this assessment year, via comparison of each record to the information supplied by aerial imagery. In addition, Conservation Reserve Program acres are confirmed on a yearly basis. The county has been aggressive in their approach to bring all the inspections up to date and have incorporated technology to aid in the assessment of the agricultural class.

The review process also examines the agricultural market areas as needed to ensure that the areas defined are equally subject to a set of economic forces that affect the value of land within the delineated areas. The summary of the market area analysis concluded that the county has adequately identified market areas for the agricultural land class.

Another portion of the assessment practices relates to how rural residential and recreational land is identified apart from agricultural land within the county. Pawnee identifies land that is not used for recreation, residential or commercial use in the county as agricultural land. Based on all relevant information and Pawnee County having the highest percentage of grass of any of the other counties in southeast Nebraska. The quality of assessment of the agricultural class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Equalization

All dwellings located on both agricultural and residential use land are valued using the same cost index and depreciation schedule. Farm home sites carry the same value as rural residential home sites, because the county assessor believes there are minimal market differences between them.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Pawnee County is 72%.

2018 Opinions of the Property Tax Administrator for Pawnee County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Cum. Supp. 2016). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Residential Real Property 98 Meets generally accepted mass appraisal practices. No recommendation. Commercial Real Property 100 Meets generally accepted mass appraisal practices. No recommendation. | Class | Level of Value | Quality of Assessment | Non-binding recommendation |

CRP and TIMBER values are weighted averages from Schedule XIII, line 104 and 113.

Legend

County Lines

Market Areas

Geo Codes

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

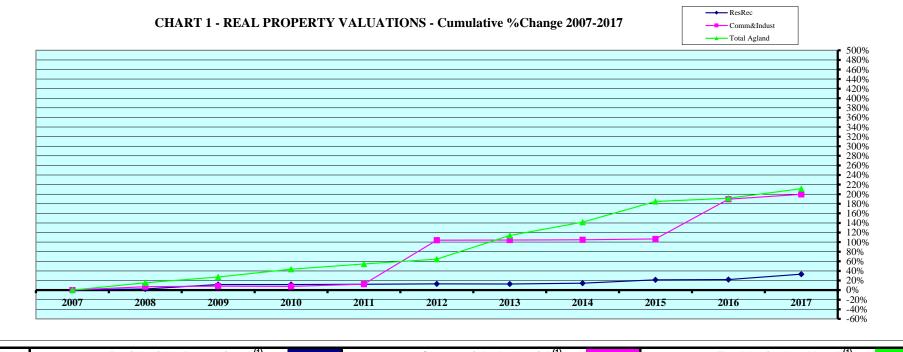

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

Somewhat poorly drained soils formed in alluvium on bottom lands

| | Currently there are no WRP parcels in the county. | | | | | |

PAWNEE COUNTY ASSESSOR'S OFFICE

PAWNEE CITY, NE

In accordance with 77-1311 section 9, as amended by LB 263, the Pawnee County Assessor's office has made a six–year plan to inspect properties in Pawnee County. The schedule of inspections is to be as follows

2018: Residential in Townships of Plum Creek, Miles, Pawnee and Sheridan

2019: Pawnee City residential

2020: Burchard, Du Bois, Lewiston, Steinauer and Table Rock residential

2021: County wide Commercial

2021: Residential in Townships of Turkey Creek, Steinauer, Clear Creek and Table Rock

2022: Residential in Townships of Mission Creek, West Branch, Clay and South Fork

The purpose of the inspections is to make sure all information on the property record card of each parcel is correct and to correct any information that is needed and to take an updated picture of the parcel. The Assessor's office shall then make any changes that are needed to have all parcels comply with the ruling and guidelines set forth by the statues of the Legislative body and the Department of Revenue, Property Tax Division.

This may include updated Marshall & Swift pricing, either Marshall & Swift or in house depreciation schedules, based on the study of sales rosters, that will give a uniform level of assessment to all classes and subclasses of property.

This schedule of events may change based on the need of the properties to meet the level of assessment set forth by the state or if the budgeted amount needed to make these inspections may change on a yearly basis.

Jonathan Bailey

Pawnee County Assessor
