

Good Life. Great Service. DEPARTMENT OF REVENUE

2020 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

## PHELPS COUNTY

## Good Life. Great Service.

Commissioner Hotz:

The Property Tax Administrator has compiled the 2020 Reports and Opinions of the Property Tax Administrator for Phelps County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Phelps County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner
Sincerely,

Ruth A. Sorensen
Property Tax Administrator
402-471-5962
cc: Melodia Marvin, Phelps County Assessor

Ad Hoc Reports Submitted by County (if applicable)

## Introduction

Pursuant to Neb. Rev. Stat. § 77-5027, annually, the Property Tax Administrator (PTA) shall prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R\&O). The R\&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments for consideration by the Commission.

The statistical and narrative reports in the R\&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by Neb. Rev. Stat. § 77-1327. From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio). After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R\&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level-however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R\&O.

In 2019, Neb. Rev. Stat. § 77-1363 was amended with the passage of LB 372. The bill became operative on August 31, 2019 and specified that Land Capability Group (LCG) classifications must be based on land-use specific productivity data from the Natural Resources Conservation Service (NRCS). The Division used the NRCS data to develop a new LCG structure to comply with the statutory change. Each county received the updated land capability group changes and applied them to the inventory of land in the 2020 assessment year.

## Statistical Analysis:

Before relying upon any calculated statistical measures to evaluate a county's assessment performance, the Division must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may bean indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of $15 \%$ indicates that half of the assessment ratios are expected to fall within $15 \%$ of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to Neb. Rev. Stat. §77-5023, the acceptable range is $69 \%$ to $75 \%$ of actual value for agricultural land and $92 \%$ to $100 \%$ for all other classes of real property.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

| General Property Class | Jurisdiction Size/Profile/Market Activity | COD Range |
| :---: | :---: | :---: |
| Residential improved (single family dwellings, condominiums, manuf. housing, $2-4$ family units) | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 10.0 |
|  | Large to mid-sized jurisdictions/older \& newer properties/less active markets | 5.0 to 15.0 |
|  | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 20.0 |
| Income-producing properties (commercial, industrial, apartments,) | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 15.0 |
|  | Large to mid-sized jurisdictions/older \& newer properties/less active markets | 5.0 to 20.0 |
|  | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 25.0 |
| Residential vacantland | Very large jurisdictions/rapid development/active markets | 5.0 to 15.0 |
|  | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 20.0 |
|  | Rural or small jurisdictions/little development/depressed markets | 5.0 to 25.0 |
| Other (non-agrioultural) vacant land | Very large jurisdictions/rapid development/active markets | 5.0 to 20.0 |
|  | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 25.0 |
|  | Rural or small jurisdictions/little development/depressed markets | 5.0 to 30.0 |

A COD under 5\% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is $98 \%$ to $103 \%$. A perfect match in assessment level
between the low-dollar properties and high-dollar properties indicates a PRD of $100 \%$. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

## Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. §77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the Division, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices
are reviewed to ensure taxpayers are served with such transparency.
Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, potential issues are identified they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

Reviews of the timeliness of submission of sales information, equalization of sold/unsold properties in the county, the accuracy of the AVU data, and the compliance with statutory reports, are completed annually for each county. If there are inconsistencies or concerns about any of these reviews, those inconsistencies or concerns are addressed in the Correlation Section of the R\&O for the subject real property, for the applicable county, along with any applicable corrective measures taken by the county assessor to address the inconsistencies or concerns and the results of those corrective measures.
*Further information may be found in Exhibit 94

## County Overview

With a total area of 540 square miles, Phelps County had 8,996 residents, per the Census Bureau Quick Facts for 2018, reflecting a $2 \%$ decrease from the 2010 U.S. Census. Reports indicated that $72 \%$ of county residents were homeowners and $88 \%$ of residents occupied the same residence as in the prior year (Census Quick Facts). The average home value
 is $\$ 117,862$ (2019 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Phelps County are located in and around Holdrege, the county seat. Information from the U.S. Census Bureau shows there were 330 employer establishments with total employment of 3,913.

Agricultural land makes up the majority of the county's valuation base and irrigated land makes up the majority of the land in the county. Phelps County is included in the Tri Basin Natural Resources Districts (NRD).

## 2020 Residential Correlation for Phelps County

## Assessment Actions

For the residential class, the county assessor and staff continued the physical inspection of Holdrege, completing the rest of neighborhood 3 and started neighborhood 2. The county assessor conducted a market analysis and decreased the economic factors to bring the locations up to market value. In Holdrege, the approximate increases to the improvements were as follows: Neighborhood 1 was 13\%, Neighborhood 2, 6\%; Neighborhood 3, 12\%; and Neighborhood 4, 9\%. Outside of Holdrege, the approximate increases to the improvements were as follows: Rural Residential, 13\%; Loomis, 7-11\%; Bertrand, 5\%; Funk, 14\%; and Atlanta, 3\%.

For the remainder of the class, pick-up work was completed in a timely manner.

## Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the review of the assessment practices to determine compliance and the review to ensure that all data submitted to the State sales file is timely and accurate, were completed.

Sales verification and qualification processes were also reviewed. For the residential class, all sales are verified with a written sales questionnaire. If information regarding the transaction is still unclear, the assessor will attempt to follow up with a phone call. The practice of the county is that all sales are considered qualified unless the county assessor is able to verify that the sales was not at an arm's-length. This has caused the usability rate to be higher than what is typical. An additional trimming analysis was conducted. The result of this test showed that the median did not fluctuate, however, the quality statistics did improve. This indicates that the practices of the county are not harmful to the statistics used for measurement purposes.

Valuation groups were also examined to ensure that economic factors were adequately identified within the county. For the residential class, Phelps County is structured into four separate valuation groups. Valuation Group 1 is represented by the City of Holdrege. Holdrege is the county seat and has a strong residential market. Valuation Group 2 and 3 are comprised of the smaller villages within the county. They are divided based on their proximity to Holdrege and amenities available. The final group is composed of the rural residential parcels outside of the city limits. The structure created by the county results in an adequate stratification of the economic forces that affect market value for the residential class of property.

Review of the six-year inspection and review cycle is another important part of the assessment practice review. For the residential class, review work is conducted in house and is typically completed in a four-year cycle. Onsite inspections are completed with an attempt at an interior inspection or interview with the property owner. Review of the property record cards confirm that the county is in compliance with the requirements of the six-year inspection and review cycle.

## 2020 Residential Correlation for Phelps County

The final part of the practice review is the evaluation of the appraisal tables and documentation of valuation processes. This includes the costing, depreciation models, lot values and a written valuation methodology. For costing, the county updates costing at the same time for all residential parcels. The depreciation model is created using the City of Holdrege with additional economic depreciation applied to the smaller villages. Lot values in the residential class was updated for the 2019 assessment year. The county maintains an abbreviated valuation methodology in house and supporting documentation is readily available upon request. This review shows that the county is current with all aspects that affect value and remains transparent with the work that they do.

## Description of Analysis

For the residential class, Phelps County has identified four separate valuation groups based on unique economic influences that would affect value.

| Valuation Group | Description |
| :---: | :--- |
| 1 | Holdrege |
| 2 | Bertrand, Loomis |
| 3 | Atlanta, Funk |
| 4 | Rural Residential |

Review of the overall statistical sample show two of the three measures of central tendency are within the acceptable range, the median and weighted mean. The mean is high but is affected by outliers, the sample includes 12 sales with a ratio of $200 \%$ or higher that is affecting the mean and PRD. The overall qualitative statistics are above the acceptable guidelines provided by IAAO. There are 29 low dollar sales under thirty thousand that have an effect on these statistics. Hypothetically, if removed the median would still be within the range and the qualitative statistics would improve, moving closer to the acceptable range.

| SALE PRICE * |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| Low \$ Ranges |  |  |  |  |  |  |
| Less Than 5,000 | 1 | 184.59 | 184.59 | 184.59 | 00.00 | 100.00 |
| Less Than 15,000 | 10 | 166.67 | 207.70 | 198.22 | 45.95 | 104.78 |
| Less Than 30,000 | 29 | 147.04 | 169.68 | 156.00 | 41.53 | 108.77 |
| Ranges Excl. Low \$_ |  |  |  |  |  |  |
| Greater Than 4,999 | 296 | 93.44 | 103.51 | 93.83 | 28.47 | 110.32 |
| Greater Than 14,999 | 287 | 92.24 | 100.16 | 93.57 | 25.75 | 107.04 |
| Greater Than 29,999 | 268 | 91.75 | 96.65 | 92.89 | 22.45 | 104.05 |

When stratified further into valuation groups, all valuation groups have medians within the acceptable range. However, the dispersion is wide for all four valuation groups. Additional analysis to the stability of the median was conducted. For Valuation Groups 1 and 2 the median stayed generally stable. On the other hand, the removal of one sale on either side of the array moved the median from $82-95 \%$ for Valuation Group 3 while the median moved from 88-98\%

## 2020 Residential Correlation for Phelps County

with the removal of one sale in Valuation Group 4. This test indicates that the median is a reliable level of value for Valuation Group 1 and 2 but not for Valuation Group 3 and 4.

Further analysis of the historical valuation changes over the past decade to the villages show a 3$5 \%$ annual increase. When compared valuation changes of similar villages in surrounding counties, these changes appear to follow the general residential market trends for the villages including Valuation Group 3. Review of valuation changes to the rural properties over the prior four years using the Abstract Schedule XI- Residential Assessor Location Detail reveal the rural properties have changed approximately 5\% annually, supporting that the rural properties have also kept pace with the market.

Review of the 2020 County Abstract of Assessment of Real Property, Form 45 Compared with the 2019 Certificate of Taxes Levied Report (CTL) show the residential population increased approximately $5 \%$ while the sales increased at approximately $6 \%$. The movement of both the population and sales at a similar rate indicate that values have been uniformly and equitably applied for the residential class.

## Equalization and Quality of Assessment

Although the median is not reliable for Valuation Group 3 and 4, further analysis indicates that these groups have appreciated with the market. Additionally, the same appraisal processes are used for Valuation Group 3 and 4 as Valuation Group 1 and 2. It is believed that Valuation Group 3 and 4 have achieved an acceptable level of assessment. Based on all relevant information, the quality of assessment of the residential class of real property in Phelps County complies with generally accepted mass appraisal techniques.

| VALUATION GROUP |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 1 | 234 | 93.31 | 103.19 | 93.86 | 27.01 | 109.94 |
| 2 | 38 | 94.05 | 103.45 | 91.81 | 31.90 | 112.68 |
| 3 | 11 | 94.23 | 107.35 | 96.61 | 41.19 | 111.12 |
| 4 | 14 | 93.00 | 111.63 | 95.74 | 38.40 | 116.60 |
| __ALL | 297 | 93.52 | 103.78 | 93.84 | 28.67 | 110.59 |

## Level of Value

Based on analysis of all available information, the level of value for the residential property in Phelps County is $94 \%$.

## 2020 Commercial Correlation for Phelps County

## Assessment Actions

For the commercial class of real property, routine maintenance was completed timely.

## Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the review of the assessment practices to determine compliance and the review to ensure that all data submitted to the State sales file is timely and accurate, were completed.

Sales qualification and verification processes are also evaluated. The county applies the same practices to all three-property classes. It is the practice to leave all sales qualified unless the county can verify that the sale is not an arm's-length transaction. This practice can cause the county to use more sales than is typical, which is shown in the review of the usability percentages for the commercial class. Additional analysis was conducted by completing a trimmed analysis for the commercial class. Results of the analysis show that the median did not move and qualitative statistics improved; and the higher usability was deemed not harmful to the measurement process. Review of the disqualified sales show that the county has adequately described the reasoning for exclusion. It is believed that the county has generally provided all arm's length transaction for measurement.

Additionally, valuation groups are analyzed to ensure that economic factors are adequately stratified. For the commercial class, the valuation groups mimic those of the residential class. Valuation Group 1 is the City of Holdrege. Holdrege is the county seat and has an active business district. Valuation Group 2 is comprised of the smaller towns of Bertrand and Loomis, these villages have some commercial activity however, the market is more sporadic than Holdrege. Valuation Group 3 consists of the small villages of Funk and Atlanta, neither village has a viable commercial market. The final group, Valuation Group 4 encompasses commercial parcels outside the city limits. These commercial parcels are largely agricultural in nature and differ from commercial within the villages.

Compliance with the six-year inspection and review was also completed. For the 2019 assessment year, the county completed a two-year reappraisal. The county assessor hired a contract appraisal firm to complete the physical inspection and reappraisal. The county complies with the six-year inspection and review cycle.

Final portion of the review includes inspection of the county's appraisal tables. The county updated the costing, depreciation and land values during the reappraisal for the 2019 assessment year.

## 2020 Commercial Correlation for Phelps County

## Description of Analysis

Phelps County recognizes four separate valuation groups for the commercial class. The majority of the commercial sales occur in Valuation Group 1, Holdrege.

| Valuation Group | Description |
| :---: | :--- |
| 1 | Holdrege |
| 2 | Bertrand, Loomis |
| 3 | Atlanta, Funk |
| 4 | Rural Residential |

Review of the statistical sample show that the median and weighted mean are within the acceptable range. The mean is above the range but can be heavily influenced by outliers. Additionally, the qualitative statistics are slightly above the parameters recommended by IAAO.

Analysis of the sales by valuation group reveal that only Valuation Group 1 has an adequate number of sales for independent measurement. Valuation Group 1 is the Town of Holdrege, which represents the most stable commercial market of the county. Review of the statistics show that only the median is within the acceptable range for Valuation Group 1, however, the COD and PRD indicate that the assessed values have been equitably applied within this group. Valuation Group 2 represents the two larger villages of Loomis and Bertrand, generally the commercial market is softer than Holdrege but more stable than the smaller villages. Although the median is within the acceptable range, the qualitative statistics indicate a wide range of dispersion across the sales, with the ratios varying from $34 \%-183 \%$.

Further analysis of the valuation changes over the past decade for the commercial class was conducted. The smaller villages of Valuation Group 3 increased at approximately 1-2\% annually, while the larger villages of Valuation Group 2 increased at $2-4 \%$ and Holdrege increased $6 \%$. When compared to similar communities based on size and economics, it appears that the villages have appreciated at a market rate.

The 2020 Abstract of Assessment for Real Property, Form 45 Compared with the 2019 Certificate of Taxes Levied Report (CTL) show that the general commercial population increased at approximately less than $1 \%$ while the sample changed $2 \%$, supporting the reported assessment actions of routine maintenance.

## Equalization and Quality of Assessment

Although Valuation Groups 2, 3, and 4 are statistically unreliable for measurement, the same appraisal processes are used for all four valuation groups, therefore it is believed that Valuation Groups 2, 3, and 4 have achieved an acceptable level of value along with Valuation Group 1. The

## 2020 Commercial Correlation for Phelps County

quality of assessment of the commercial class of real property in Phelps County complies with generally accepted mass appraisal techniques.

| VALUATION GROUP |  |  |  |  |  |
| :--- | :--- | ---: | ---: | ---: | ---: |
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD |
| 1 | 32 | 97.59 | 102.25 | 101.07 | 11.35 |
| 2 | 11 | 93.96 | 96.41 | 74.43 | 36.98 |
| 3 | 2 | 212.12 | 212.12 | 262.44 | 59.30 |
| 4 | 2 | 98.78 | 98.78 | 98.97 | 02.12 |
| $A L C$ | 97.55 | 105.41 | 100.29 | 21.72 |  |

## Level of Value

Based on analysis of all available information, the level of value for the commercial property in Phelps County is $98 \%$.

## 2020 Agricultural Correlation for Phelps County

## Assessment Actions

For the agricultural class, the county assessor's staff physically inspected agricultural improvements in the townships of Prairie, Rock Falls, Industy, and Lake. Agricultural land was physically inspected for the townships Garfield, Westmark, Center and Anderson.

Additionally, the county assessor completed the Land Capability Group (LCG) conversion timely, and then conducted a market study of agricultural land. As a result, all three subclasses, irrigated land, dryland and grassland were decreased $2 \%$.

## Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the review of the assessment practices to determine compliance and the review to ensure that all data submitted to the State sales file is timely and accurate, were completed.

The frequency of the six-year inspection and review cycle was discussed. For the agricultural class, homes are reviewed at the same time as rural residential homes. Outbuildings and land use are also physically inspected on different cycles. The use of multiple cycles for the rural allows the county assessor to discover changes like new construction more frequently. In addition to the physical inspection of the land, aerial imagery is inspected for changes to the land use. Phelps County complies with the six-year physical inspection and review cycle.

Market areas were also evaluated to ensure that geographical and topographical differences that affect market value is adequately stratified. The Phelps County Assessor recognizes two separate market areas. Market Area 1 is the largest market area encompassing most of the county. The soils here are highly productive and the topography makes the land ideal for cropping. The majority of the makeup of Market Area 1 is irrigated land. Market Area 2 is in the southwest portion of the county. This area is much more rugged and more similar to the canyon-like terrain found in Gosper County Market Area 4 and Furnas County. Market Area 2 is more suited for rangeland than cropping.

Currency of the appraisal tables for agricultural homes and outbuildings are also reviewed. Agricultural homes are valued using the same appraisal tables as the rural residential parcels. Outbuildings are costed and valued using a straight-line depreciation table based on the age and condition of the improvement. Costing, depreciation models, and lot tables are compliant with the six-year inspection and review cycle.

## Description of Analysis

Review of the statistical sampling show that all three measures of central tendency are within the acceptable range and closely correlate with one another. This along with the low qualitative

## 2020 Agricultural Correlation for Phelps County

statistics indicate a stabilization of the agricultural market. When broke down by market area, only Market Area 1 has an adequate sampling of sales. Which is typical since Market Area 2 is only a small portion of the county. Historically the county has moved values in Market Area 2 in a similar fashion to Market Area 1 while also attempting to equalize with the surrounding counties of like comparability. When stratified further into $80 \%$ Majority Land Use (MLU), only the irrigated subclass contains any sales. For the $80 \%$ MLU irrigated subclass, all three measures of central tendency are within the range overall and within Market Area 1.

With no MLU sales for the dryland and grassland subclasses, comparability with similar surrounding counties are reviewed. Market Area 1 is most comparable to Buffalo, Kearney, Gosper Market Area 1 and Harlan Market Area 1. Market Area 2 is comparable to Harlan Market Area 2, Furnas, Gosper Market Area 4 and Franklin Market Area 2. When dryland and grassland values are compared to the surrounding counties, the results support that intra-county equalization has occurred and that values set for dryland and grassland have achieved an acceptable level of value.

## Equalization and Quality of Assessment

Although dryland and grassland subclasses are not represented in the statistical sample, comparison with similar counties indicate that along with the irrigated subclass, dryland and grassland are equalized and have obtained an acceptable level of value. Based on the review of the assessment practices and the statistical analysis, agricultural land and improvements are believed to be equalized. The quality of assessment of the agricultural class of property in Phelps County complies with generally accepted mass appraisal techniques.

## Level of Value

Based on analysis of all available information, the level of value of agricultural land in Phelps County is 70\%.

## 2020 Opinions of the Property Tax Administrator <br> for Phelps County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Reissue 2018). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class | Level of Value | Quality of Assessment | Non-binding recommendation |
| :--- | :---: | :---: | :--- | :--- |
| Residential Real <br> Property | $\mathbf{9 4}$ | Meets generally accepted mass appraisal <br> techniques. | No recommendation. |
| Commercial Real <br> Property | $\mathbf{9 8}$ | Meets generally accepted mass appraisal <br> techniques. | No recommendation. |
|  |  |  |  |
| Agricultural Land | $\mathbf{7 0}$ | Meets generally accepted mass appraisal <br> techniques. | No recommendation. |

**A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2020.

Legend
$\square$ Market_Area $\quad$ Soils
Registered_WellsDNR geocode
——Federal Roads
$\square$ Excesssive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills Excessively drained sandy soils formed in eolian sands on uplands in sandhills

Moderately well drained silty soils on uplands and in depressions formed in loess Well drained silty soils formed in loess on uplands
$\square$ Well drained silty soils formed in loess and alluvium on stream terraces
Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
Somewhat poorly drained soils formed in alluvium on bottom lands
Moderately well drained silty soils with clay subsoils on uplands

## 2020 Assessment Survey for Phelps County

## A. Staffing and Funding Information

| 1. | Deputy(ies) on staff: |
| :---: | :---: |
|  | 0 |
| 2. | Appraiser(s) on staff: |
|  | 0 |
| 3. | Other full-time employees: |
|  | 3 |
| 4. | Other part-time employees: |
|  | 1 |
| 5. | Number of shared employees: |
|  | 0 |
| 6. | Assessor's requested budget for current fiscal year: |
|  | \$123,676 |
| 7. | Adopted budget, or granted budget if different from above: |
|  | same |
| 8. | Amount of the total assessor's budget set aside for appraisal work: |
|  | \$0 |
| 9. | If appraisal/reappraisal budget is a separate levied fund, what is that amount: |
|  | \$159,933 |
| 10. | Part of the assessor's budget that is dedicated to the computer system: |
|  | \$24,000 for the GIS System and \$10,000 |
| 11. | Amount of the assessor's budget set aside for education/workshops: |
|  | \$3,500 |
| 12. | Other miscellaneous funds: |
|  | None |
| 13. | Amount of last year's assessor's budget not used: |
|  | \$22,231.82 |

## B. Computer, Automation Information and GIS

| $\mathbf{1 .}$ | Administrative software: |
| :--- | :--- |
|  | MIPS PC v3 |
| 2. | CAMA software: |
|  | MIPS PC v3 |
| 3. | Are cadastral maps currently being used? |
|  | Yes |
| 4. | If so, who maintains the Cadastral Maps? |
|  | The assessor and staff |
| 5. | Does the county have GIS software? |
|  | Yes |
| 6. | Is GIS available to the public? If so, what is the web address? |
|  | Yes, phelps.gworks.com |
| 7. | Who maintains the GIS software and maps? |
|  | The county assessor \& staff |
| $\mathbf{8 .}$ | What type of aerial imagery is used in the cyclical review of properties? |
|  | Gworks and FSA maps |
| 9. | When was the aerial imagery last updated? |
|  | 2018 |
| $\mathbf{1 0 .}$ | Personal Property software: |
|  | MIPS PC v3 |

## C. Zoning Information

| $\mathbf{1 .}$ | Does the county have zoning? |
| :--- | :--- |
|  | Yes |
| 2. | If so, is the zoning countywide? |
|  | Yes |
|  |  |

| 3. | What municipalities in the county are zoned? |
| :--- | :--- |
|  | All municipalities are zoned. |
| 4. | When was zoning implemented? |
|  | 2000 |

## D. Contracted Services

| 1. | Appraisal Services: |
| :--- | :--- |
|  | Tax Valuation Inc |
| 2. | GIS Services: |
|  | gWorks |
| 3. | Other services: |
|  | Pritchard and Abbott for oil and minerals |

## E. Appraisal /Listing Services

| $\mathbf{1 .}$ | Does the county employ outside help for appraisal or listing services? |
| :--- | :--- |
|  | Tax Valuation, Inc. for commercial property only |
| $\mathbf{2 .}$ | If so, is the appraisal or listing service performed under contract? |
|  | Yes |
| $\mathbf{3 .}$ | What appraisal certifications or qualifications does the County require? |
|  | Certified General Appraisers |
| $\mathbf{4 .}$ | Have the existing contracts been approved by the PTA? |
|  | Yes |
| $\mathbf{5 .}$ | Does the appraisal or listing service providers establish assessed values for the county? |
|  | Yes |

## 2020 Residential Assessment Survey for Phelps County

| 1. | Valuation data collection done by: |
| :---: | :---: |
|  | The county assessor and staff |
| 2. | List the valuation group recognized by the County and describe the unique characteristics of each: |
|  | Valuation  <br> Group Description of unique characteristics |
|  | Holdrege - county seat; strong local economy with jobs and services available. The residential market has been stable to slightly increasing with steady growth in recent years. |
|  | $\begin{array}{l\|l} 2 & \begin{array}{l} \text { Bertrand \& Loomis - midsized villages; each contains their own school system and } \\ \text { limited amenities. The residential market is active, but softer than Holdrege. } \end{array} \\ \hline \end{array}$ |
|  | 3 l\|llath villages with no schools or amenities. The market in these towns |
|  | $4 \quad$ Rural - homes outside of the political subdivisions. |
|  | AG Agricultural homes and outbuildings |
| 3. | List and describe the approach(es) used to estimate the market value of residential properties. |
|  | The cost approach with market derived depreciation is used to value all residential properties. |
| 4. | For the cost approach does the County develop the deprecation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor? |
|  | Depreciation tables are developed using local market information. |
| 5. | Are individual depreciation tables developed for each valuation group? |
|  | One physical depreciation table is used county wide; economic depreciation is developed and applied by location where warranted. |
| 6. | Describe the methodology used to determine the residential lot values? |
|  | Lots are priced by the square foot and by the acre. Lot values are established by neighborhood in Holdrege and each Village has a separate land table. |
| 7. | How are rural residential site values developed? |
|  | Improved rural and vacant rural sales are studied to arrive at market value. |
| 8. | Are there form 191 applications on file? |
|  | No |
| 9. | Describe the methodology used to determine value for vacant lots being held for sale or resale? |

|  | All lots being held for sale or resale are being valued the same as all other lots within the neighborhood. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## 2020 Agricultural Assessment Survey for Phelps County

| 1. | Valuation data collection done by: |
| :---: | :---: |
|  | The county assessor and staff |
| 2. | List each market area, and describe the location and the specific characteristics that make each unique. |
|  | Market Description of unique characteristics  <br> Area  Year Land Use <br> Completed |
|  | This area is flat, quality farmland which is nearly all irrigated. 2017-2019 |
|  | This area is topographically rough, and is mostly hills and canyons. The 2017-2019 majority of the area is pasture land, although some farming is done where feasible. Well depths are deeper, and there is less irrigation. |
| 3. | Describe the process used to determine and monitor market areas. |
|  | The market areas were mapped according to soils and topography. Annually, sales are plotted and reviewed and a ratio study is conducted to determine whether the market continues to support the defined areas. |
| 4. | Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land. |
|  | Rural residential and recreational lands are identified through the office land use procedures, through physical review, and also through sales verification. |
| 5. | Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value? |
|  | Farm home sites and rural residential home sites are valued using the same schedule. |
| 6. | What separate market analysis has been conducted where intensive use is identified in the county? |
|  | Buildings are reviewed and priced the same as all rural improvements. Land under the feed yard are priced at $\$ 1,080 /$ acre |
| 7. | If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program. |
|  | Assessed values for lands in the Wetlands Reserve Program are assessed at $100 \%$ of the market value of grass land in the county. |
|  | If your county has special value applications, please answer the following |
| 8a. | How many parcels have a special valuation application on file? |
|  | N/A |
| 8b. | What process was used to determine if non-agricultural influences exist in the county? |
|  | county analyzes sales for other influences |
|  | If your county recognizes a special value, please answer the following |

| 8c. | Describe the non-agricultural influences recognized within the county. |
| :--- | :--- |
|  | N/A |
| 8d. | Where is the influenced area located within the county? |
|  | N/A |
| 8e. | Describe in detail how the special values were arrived at in the influenced area(s). |
|  | N/A |

# 2019 PLAN OF ASSESSMENT FOR PHELPS COUNTY ASSESSMENT YEARS 2020-2021-2022 <br> DATE: 07-23-2019 

## Plan of Assessment Requirements:

Pursuant to Nebr. Laws 2005, LB 263, Section 9, on or before June $15^{\text {th }}$ of each year, the assessor shall prepare a plan of assessment, (herein after referred to as the "plan"), which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes and subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Department of Property Assessment and Taxation on or before October 31 each year.

## Real Property Assessment Requirements:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade."

Assessment levels required for real property are as follows:

1. $100 \%$ of actual value for all classes of real property excluding agricultural and horticultural land;
2. $75 \%$ of actual value for agricultural land and horticulture land.

## GENERAL DESCRIPTION OF REAL PROPERTY IN PHELPS COUNTY

Per the 2019 County Abstract, Phelps County consists of the following real property types:
Parcels $\%$ of Total Parcels

| Residential | 3767 | $52 \%$ |
| :--- | ---: | ---: |
| Commercial | 596 | $8 \%$ |
| Industrial | 13 | $1 \%$ |
| Recreational | 1 |  |
| Agricultural | 2851 | $39 \%$ |

Agricultural land for taxable acres for 2019 assessment was 319,216.
Agricultural land is approx. 71\% of the real property valuation base in Phelps County and of that approx. $94 \%$ is taxed as irrigated.

For more information see the 2019 Reports and Opinions, Abstract and Assessor Survey.

## CURRENT RESOURCES

There are currently three full time employees and one part time employee on staff and the Assessor. Assessor is certified by the Property Tax Administrator. The Assessor will continue to keep her certification current by attending continuing education and obtaining the number of hours required by the Property Tax Division. The assessor or staff member will try to attend as many district meetings and workshops provided. Current statues and regulations will continue to be followed to the best of our ability.

Proposed Office Budget for July 1, 2019 - June 30, 2020 will be $\$ 123,715$. The proposed appraisal budget for July 1, 2019- June 30, 2020 will be $\$ 159,933$.

## Residential;

Continue with physical reviews for Holdrege. Do market study to insure residential properties are in compliance with state statutes. All residential pick-up work and building permits will be reviewed and completed by March 1, 2020.

## Commercial:

Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance with state statutes. Pick-up work and building permits will be reviewed and completed by March 1, 2020.

## Agricultural land and Improvements:

Continue to physically review rural out buildings. Land use and water transfers will be updated in GIS as reported. Continue to physically review land. Land use and market areas will be reviewed and updated as information becomes available. Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance with state statutes. Pick up work and permits will be done by March 1, 2020.

## Assessment Actions Planned for Assessment Year 2021:

## Residential:

Continue with physical review of Holdrege residential properties. Maybe start on physical reviews of the villages. Do market study to insure residential properties are in compliance with state statutes. All residential pick-up work and building permits will be reviewed and completed by March 1, 2021.

## Commercial:

Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance with state statutes. Pick-up work and building permits will be reviewed and completed by March 1, 2021.

## Agricultural land and Improvements:

Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance with state statutes. Continue to physically review rural out buildings. Continue with physically review of land use. Land use and market areas will be reviewed and updated as information becomes available. Pick up work and permits will be done by March 1, 2021.

Assessment Actions Planned for Assessment Year 2022:

## Residential:

Continue with physical reviews of village properties. Maybe start on physical reviews of rural residential. Market analysis will be conducted to insure the level of value and quality of assessment is in compliance with state statutes. Complete pick-up work and building permits by March 1, 2022.

## Commercial:

Start with physical reviews of Holdrege. Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance with state statutes. Pick-up and building permits will be reviewed and completed by March 1, 2022.

## Agricultural land and Improvements:

Continue to physically review rural out buildings. Market analysis will be conducted to ensure that the level of value and quality of assessment is in compliance to state statutes. Continue to physically review land use. Land use and market areas will be reviewed and updated as information becomes available. Pick up work and permits will be done by March 1, 2022.

## Other functions performed by the assessor's office, but not limited to:

1. Appraisal cards are updated yearly. Ownership changes are made as the transfers are given to the assessor's office from the register of deeds and the green sheets are worked and forward to the Property Assessment Division. Splits and subdivision changes are made as they become available to the assessor's office from the surveyor or county clerk. These are updated in the GIS system at the same time they are changed on the appraisal cards and in the computer administrative package.
2. Annually prepare and file Assessor Administrative Reports required by law/regulation:
a. Real Estate and Personal Property Abstracts
b. Assessor Survey
c. Sales information to PA\&T roster, annual Assessed Value update w/abstract \& Assessment Actions
d. Certification of Value to Political Subdivisions
e. School District Taxable Report
f. Homestead Exemption Tax Loss Report
g. Certificate of Taxes Levied Report
h. Report of all exempt property and taxable government owned property
i. Annual Plan of Assessment Report (Three year)
j. Personal Property Tax Loss Report
3. Personal Property - administer annual filing of approximately 1500 schedules, prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required.
4. Permissive Exemptions - administer annual filings of applications for new or continued exempt use, review and make recommendations to county board.
5. Taxable Government Owned Property - annual review of government owned property not used for public purpose, send notices of intent to tax, etc.
6. Homestead Exemptions - administer approximately 350 annual filings of applications, approval/denial process, taxpayer notifications and assistance.
7. Centrally Assessed - review of valuations as certified by PA\&T for railroads and Public service entities, establish assessment records and tax billing for tax list.
8. Tax Increment Financing - management of record/valuation information for Properties in community redevelopment projects for proper reporting on Administrative reports and allocation of ad valorem tax.
9. Tax Districts and Tax Rates - management of school district and other tax entity boundary changes necessary for correct assessment and tax information; input/review of tax rates used for tax billing process.
10. Tax Lists - prepare and certify tax lists to county treasurer for real property, personal property, and centrally assessed.
11. Tax List Corrections - prepare tax list correction documents for county board to approve.
12. County Board of Equalization - attend county board of equalization meetings for valuation protests- assemble and provide information.
13. TERC Appeals - prepare information and attend taxpayer appeal hearings before TERC, defend valuation.
14. TERC Statewide Equalization - attend hearings if applicable to county, defend values, and/or implement orders of the TERC.
15. Education - Assessor and/or Appraisal Education - attend meetings, workshops, and educational classes to obtain required hours of continuing education to maintain assessor certification.

## Conclusion:

For 2019-2020 a budget request of an increase of approximately $3 \%$ will be submitted to the County Board for approval.

The Phelps County Assessor's Office will strive to maintain an efficient and professional office.

Respectfully submitted:

[^0]:    (1) Residential \& Recreational excludes Agric. dwelling \& farm home site land. Commercial \& Industrial excludes minerals. Agricultural land includes irrigated, dry, grass, waste, \& other agland, excludes farm site land.
