

# 2017 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTATOR

# **PLATTE COUNTY**

April 7, 2017

Pete Ricketts, Governor

### Commissioner Salmon:

The Property Tax Administrator has compiled the 2017 Reports and Opinions of the Property Tax Administrator for Platte County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Platte County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

Kuth a. Sorensen

402-471-5962

cc: Thomas M. Placzek, Platte County Assessor

### Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

### **Statistical Analysis:**

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

<b>Property Class</b>	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

### **Analysis of Assessment Practices:**

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds' records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

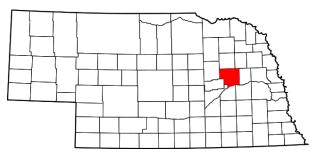

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

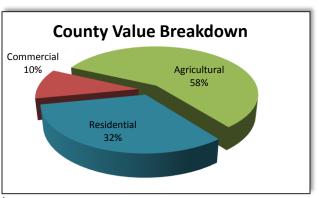

<sup>\*</sup>Further information may be found in Exhibit 94

### **County Overview**

With a total area of 674 square miles, Platte had 32,847 residents, per the Census Bureau Quick Facts for 2015, a 2% population increase over the 2010 US Census. In a review of the past fifty-five years, Platte has seen a steady rise in population of 37% (Nebraska Department of Economic Development). Reports indicated that 73% of

county residents were homeowners and 87% of residents occupied the same residence as in the prior year (Census Quick Facts).

2017 Abstract of Assessment, Form 45						
U.S. CENSUS POPULATION CHANGE						
	2006	2016	Change			
COLUMBUS	20,998	22,111	5%			
CRESTON	215	203	-6%			
DUNCAN	359	351	-2%			
HUMPHREY	786	760	-3%			
LINDSAY	276	255	-8%			
MONROE	307	284	-7%			
NEWMAN GROVE	797	721	-10%			
PLATTE CENTER	359	336	-6%			
TARNOV	63	46	-27%			

The majority of the commercial properties in Platte convene in and around Columbus, the county seat. Per the latest information available from the U.S. Census Bureau, there were 1,014 employer establishments in Platte. Countywide employment was at 16,727 people, a steady employment rate relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Platte that has fortified the local rural area economies. Platte is included in the Lower Elkhorn, Lower Platte North, Lower Loup, and Central Platte Natural Resources Districts (NRD). Irrigated land makes up the majority of the land in the county. When compared against the top crops of the other counties in Nebraska, Platte ranks fifth in corn for silage. In value of sales by commodity group, Platte ranks first in hogs and

pigs and fourth in vegetables, melons, potatoes, and sweet potatoes (USDA AgCensus).

The ethanol plant located in Columbus is another contributory factor to the economy.

# 2017 Residential Correlation for Platte County

### **Assessment Actions**

For the current assessment year, Platte County updated the following valuation groups. Valuation groupings 03 & 04(Columbus NHBD B & B-1) cost tables were updated to 2016 in a few of the subdivisions within the neighborhoods that have been experiencing upward market movement. Valuation grouping 06(Columbus NHBD D) cost table was updated to 2016 in one addition in the neighborhood. Valuation grouping 07(Columbus NHBD E) was reappraised for 2016. Valuation grouping 12(Columbus NHBD L) cost table was updated to 2016. The small towns of Creston, Duncan, Lindsay and Monroe, which are part of valuation grouping 13, had their cost tables updated to 2016. Valuation grouping 19 cost tables were updated to 2016. All acreages/farm sites were inspected and reviewed and the cost tables were updated to 2016. Farm outbuildings were also updated to 2016 costing and the assessed values were removed from the smaller farm bins that are typically not used. All pick up work was completed timely.

### Description of Analysis

Residential parcels are analyzed utilizing 15 valuation groupings that are based on the assessor locations in the county.

Valuation Grouping	Assessor Location
01	Columbus; NBHD -A
02	Columbus; NBHD -A1
03	Columbus; NBHD -B
04	Columbus; NBHD -B1
05	Columbus; NBHD -C
06	Columbus; NBHD -D
07	Columbus; NBHD -E
08	Columbus; NBHD -F
09	Columbus; NBHD -H
10	Columbus; NBHD -I
11	Columbus; NBHD -K
12	Columbus; NBHD -L
13	Small Towns & Villages; (incl. Creston, Duncan, Lindsay, Monroe and
	Platte Center; and villages; Cornlea, Oconee, and Tarnov)
15	Humphrey
19	Acreages

For the residential property class, a review of Platte County's statistical analysis profiles 858 residential sales, representing all the valuation groupings. All valuation groupings with a sufficient

# 2017 Residential Correlation for Platte County

number of sales are within the acceptable ranges. All three measures of central tendency are in the range as well.

#### Assessment Practice Review

The annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any inconsistencies are noted and discussed with the county assessor for further action.

One of the areas addressed includes sales verification. The county assessor reaches out to the buyer and seller by phone to verify sales. The Division reviews the verification of the sales and the usability decisions for each sale. In this test, three things are reviewed; first, that there are notes on each disqualified sale; second, that the notes provide a reasonable explanation for disqualifying each sale; and third, the reviewer notes if the percentage of sales used is typical or if the file appears to be excessively trimmed. The review of Platte County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. Platte County has done a good job of transmitting data timely and accurately.

The county's inspection and review cycle for all real property was discussed with the county assessor. For residential property, the county continues to meet the six-year review cycle.

Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the county has adequately identified economic areas for the residential property class. Based on all relevant information, the quality of assessment of the residential class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

# **2017 Residential Correlation for Platte County**

### Equalization and Quality of Assessment

A review of the statistics with sufficient sales and the assessment practices suggest that assessments within the county are valued within the acceptable parameters, and therefore considered equalized.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	130	93.72	98.29	94.53	15.70	103.98
02	31	98.64	95.86	96.10	08.73	99.75
03	62	98.11	98.25	98.63	07.78	99.61
04	35	95.23	95.50	95.44	14.31	100.06

10	29	96.18	94.68	93.69	12.34	101.06
11	24	96.09	94.98	94.72	06.57	100.27
12	103	98.21	103.71	100.16	14.79	103.54
13	59	96.18	101.35	98.72	13.07	102.66
15	31	92.91	99.29	88.54	22.28	112.14
19	34	94.02	95.76	93.03	16.65	102.93
ALL	858	95.19	97.68	95.65	11.93	102.12

### Level of Value

Based on the analysis of all available information, the level of value of the residential class of real property in Platte County is 95%.

# **2017** Commercial Correlation for Platte County

#### Assessment Actions

For the current assessment year, Platte County did not have any commercial groupings scheduled for inspection and review, but all pickup work for new and omitted construction was completed in a timely manner. The county assessor completed a sales analysis of the commercial class and based on the general movement of the market, no changes were deemed necessary.

### Description of Analysis

Commercial parcels are analyzed utilizing three valuation groupings based on the assessor locations in the county.

Valuation Grouping	Assessor Location
01	All parcels within Columbus
02	All parcels in close proximity but outside Columbus city limits
03	All small town and rural parcels

For this study period, there were 83 commercial sales profiled for the three valuation groups. 68 sales were in valuation group 01, eight sales in valuation group 02 and nine sales in valuation group 03. Valuation group 01 carries the majority of the commercial sales activity. Valuation group 02 is located in close proximity to Columbus, but outside the city limits and has a fairly organized market. Valuation group 03 is combination of small towns and rural parcels that is very diverse. The overall median and the weighted mean are in the acceptable range and the mean is only a percentage point out, which is not deemed a concern.

The overall median was then tested by removing outliers on the high and low end. The median did not move significantly indicating the median can be relied upon as a stable statistical measure.

The movement of the commercial assessments for the county as a whole confirm the assessment actions report of the county assessor that indicated no changes were made other than pickup work from the new and omitted construction. While the commercial base increased a total of 1% over the prior year, 2 ½% was attributable to growth. The overall movement of -1 ½% in the commercial class is similar to the movement of the general area, which suggests the county's decision to stand firm on the current assessments were in proper response to the market.

Additionally, the net taxable sales shows an increase of just under 2%, which supports the decision to keep assessed values the same as last year.

### Assessment Practice Review

The annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all

# **2017** Commercial Correlation for Platte County

three property classes. Any inconsistencies are noted and discussed with the county assessor for further action.

One of the areas addressed includes sales verification. The Division reviews the verification of the sales and the usability decisions for each sale. In this test, three things are reviewed; first, that there are notes on each disqualified sale; second, that the notes provide a reasonable explanation for disqualifying each sale; and third, the reviewer notes if the percentage of sales used is typical or if the file appears to be excessively trimmed. The review of Platte County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. Platte County has done a good job transmitting data both timely and accurately.

The county's inspection and review cycle for all real property was discussed with the county assessor. For commercial property, the county continues to meet the six-year review cycle.

Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the county has adequately identified economic areas for the commercial property class. Based on all relevant information, the quality of assessment of the commercial class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

### Equalization and Quality of Assessment

Based on the assessment practices review and the statistical analysis, the quality of assessment in Platte County is in compliance with professionally accepted mass appraisal standards.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	66	99.75	105.70	102.38	15.71	103.24
02	8	96.68	99.37	96.53	07.31	102.94
03	9	58.45	71.03	45.71	62.77	155.39
ALL	83	98.43	101.33	100.15	18.46	101.18

### Level of Value

Based on the analysis of all available information, the level of value of the commercial class of real property in Platte County is 98%.

# **2017 Agricultural Correlation for Platte County**

#### Assessment Actions

Platte County continually verifies sales along with updating land use in the agricultural class of property. The county completed reviewing aerial imagery for the entire county to verify land use. The imagery was also used to review all agricultural improvements and acreages. Any changes were updated on the property record card. All pickup work was completed in a timely fashion. A sales analysis was completed, and as a result, the county made no changes to the agricultural land values for the 2017 assessment year.

### Description of Analysis

There are two market areas within Platte County; Market Area 3 is predominantly irrigated cropland and some pasture but tends to have sandier soils than the rest of the county. Market Area 3 exists in the region at the south of the county between the Loup and the Platte Rivers. Market Area 6 is much larger and is made up of all of the rest of the county north of the Loup River.

The Division's standard statistical output removes sales less than 40 acres to reduce the possibility that non-agricultural influences impact the measurement of agricultural land. However, agricultural parcels under 40 acres are not a rarity for this county, and the automatic removal of the sales significantly reduces the size of the measurement sample. These sales were scrutinized and were found to be arm's-length and valid indicators of market value for agricultural land. Further, the inclusion of these sales in the sample did not negatively impact the median as would be expected if non-agricultural influences were present. Therefore, it was determined that adding back the arm's-length sales between 30 and 40 acres would increase the number of sales in the study period and create a larger pool to be analyzed.

The initial analysis was done using the 62 sales within Platte County for the three study periods. All three measures of central tendency are within the acceptable range. The overall median was then tested by removing outliers on the high and low end. The median did not move significantly indicating the median can be relied upon as a stable statistical measure.

Another analysis studied the sales that have 80% or more of the acres in a single major land use category. In this case, the major land classes with a sufficient number of sales all had medians that fell in the acceptable range.

A comparison was done using sales from the surrounding counties to measure Platte County's schedule of values. The results of this analysis were comparable to the results of the sales within Platte County indicating that their schedule of values are equalized with the surrounding counties that have similar markets.

# **2017 Agricultural Correlation for Platte County**

#### Assessment Practice Review

The annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any inconsistencies are noted and discussed with the county assessor for further action.

The agricultural land review in Platte County was determined to be systematic and comprehensive. The current process of verification of land use is through aerial imagery. Phone calls and physical inspections are also used to gather information. The county has reviewed the sales as required by Directive 16-3 and has removed any sales that may have sold at a substantial premium or discount. The county's practice considers all available information when determining the primary use of the parcel. The review supported that the county has used all available sales for the measurement of agricultural land. The process used by the county gathers sufficient information to adequately make qualification determinations; usability decisions have been made without a bias.

The Division also reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. Platte County has done a good job of transmitting data timely and accurately.

### Equalization and Quality of Assessment

Agricultural homes and outbuildings have been valued using the same valuation process as rural residential acreages. Agricultural improvements are believed to be equalized and assessed at the statutory level.

A review of the statistics with sufficient sales and the assessment practices suggest that assessments within the county are valued within the acceptable parameters. A comparison of Platte County values with the adjoining counties shows that all values are reasonably comparable and therefore equalized.

# **2017** Agricultural Correlation for Platte County

### Level of Value

Based on analysis of all available information, the level of value of agricultural land in Platte County is 73%.

# 2017 Opinions of the Property Tax Administrator for Platte County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Cum. Supp. 2016). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	95	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	98	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	73	Meets generally accepted mass appraisal practices.	No recommendation.

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2017.

## **2017** Assessment Survey for Platte County

## A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	1
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	5
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$336,000
7.	Adopted budget, or granted budget if different from above:
	\$336,000 –all health care, retirement and social security costs are paid from county general.
8.	Amount of the total assessor's budget set aside for appraisal work:
	Not separated
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	N/A
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$40,000
11.	Amount of the assessor's budget set aside for education/workshops:
	\$1,000
12.	Other miscellaneous funds:
	None
13.	Amount of last year's assessor's budget not used:
	\$0

## **B.** Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Deputy and Staff
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	Yes; platte.assessor.gisworkshop.com
7.	Who maintains the GIS software and maps?
	Staff and GIS Workshop
8.	Personal Property software:
	MIPS

## **C. Zoning Information**

	-
1.	Does the county have zoning?
	No not in the rural areas
2.	If so, is the zoning countywide?
	N/A
3.	What municipalities in the county are zoned?
	Columbus, Duncan, Humphrey, Platte Center, and Monroe
4.	When was zoning implemented?
	Uncertain of the date in Columbus but many years ago; Humphrey is not known; zoning was implemented in Duncan and Platte Center in 2009; and zoning was implemented in Monroe in 2015.

### **D. Contracted Services**

1.	Appraisal Services:
	Wayne Kubert with Great Plains Appraisal is occasionally contracted for special commercial projects.
2.	GIS Services:
	GIS Workshop
3.	Other services:
	None

## E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Occasionally for special purpose commercial or industrial parcels.
2.	If so, is the appraisal or listing service performed under contract?
	They typically only use a verbal agreement.
3.	What appraisal certifications or qualifications does the County require?
	Certifications are secondary to qualifications. They want an appraiser to know the county, know mass appraisal processes and know how to appraise and defend the specific property type being appraised.
4.	Have the existing contracts been approved by the PTA?
	No; they have only used verbal agreements.
5.	Does the appraisal or listing service providers establish assessed values for the county?
	No, Whenever the county uses contract appraisal services, the appraiser provides an estimate of value and the support for that estimate, but the assessor reviews and approves all of the values before they are used.

Valuation data collection done by:					
Assessor and Assistant					
List the valuation groupings recognized by the County and describe the characteristics of each:					
Valuation Grouping	Description of unique characteristics				
1	Neighborhood 'A' is within the city of Columbus and consists of older homes that are mostly one and a half and two stories. Neighborhood 'A' is geographically located just North, East, and West of the County Courthouse. Contains approximately 1550 parcels.				
2	Neighborhood 'A-1' consists of golf course and lake properties.  Parcels in this area are both inside and outside of the city limits of Columbus. Consists of approximately 475 parcels.  Neighborhood 'B' is within the city of Columbus and is located geographically in the Southeast part of the town of Columbus, and consists of parcel that are average quality and in relatively close proximity to elementary schools. Contain approximately 600 parcels.				
3					
4	Neighborhood 'B-1' is an area of subdivisions outside the city limits of Columbus. Consists of subdivision parcels and mobile home courts.				
5	Neighborhood 'C' is within the city of Columbus and geographically located North highway 30 in Columbus and is made up of houses built generally between 1950 a 1970. Contains approximately 1275 parcels.  Neighborhood 'D' is within the city of Columbus and is primarily located in the Western most part of the city of Columbus and consists of parcels that diverse in style and quality, but the common characteristic is their location. Conta approximately 675 parcels.				
6					
7	Neighborhood 'E' is within the city of Columbus and is physically located between Neighborhoods C and D. The parcels in this area are relatively the same quality but the common characteristic is geographic. Group E contains approximately 600 parcels.				
8	Neighborhood 'F' is within the city of Columbus and is physically located between Neighborhoods C and D. The parcels in this area are relatively the same quality but the common characteristic is geographic. Group F contains approximately 575 parcels.				
9	Neighborhood 'H' is within the city of Columbus and is physically located in the Northeast part of the town of Columbus. Parcels in this are linked together because of their geographical connection to one another. Contains approximately 450 parcels.				
10	Neighborhood 'I 'is within the city of Columbus and consists of the Wagner Lakes ar and nearby subdivisions. These parcels are within the city limits of Columbus in t Southwest portion. Consists of approximately 400 parcels.				
11	Neighborhood 'K' is within the city of Columbus; this grouping is mostly townhouse developments throughout the city.				
12	Neighborhood 'L' is within the city of Columbus is basically the original town of Columbus along with subdivisions South of the Platte County Courthouse. There are approximately 1400 parcels in this area.				
13	Small Towns: the three small villages, Cornlea, Oconee, and Tarnov; and five of the small towns, Creston, Duncan, Lindsay, Monroe and Platte Center; into a single residential valuation group. All have limited commercial services and most are part of consolidated schools located in other towns.				

	Town of Humphrey
	Of the small towns outside of Columbus, Humphrey has a strong school system and a fair amount of commercial activity so it is measured individually for the residential class.
	Acreages that consists of all rural residential parcels in the county. Review is conducted by township. When the dates for inspection and review, costing, depreciation tables and lot value study are reviewed.
	Ag Agricultural homes and outbuildings
	List and describe the approach(es) used to estimate the market value of residential properties.
	The county uses the cost approach and applies market derived depreciation.
,	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?
	Based on local market information.
	Are individual depreciation tables developed for each valuation grouping?
	Yes; and also for each assessor location in the consolidated group.
	Describe the methodology used to determine the residential lot values?
	Valued by square foot primarily with values derived from vacant lot sales.
•	Describe the methodology used to determine value for vacant lots being held for sale or resale?
	There are no subdivisions under development in the county where a discounted cash flow (DCF) methodology has been used to value the undeveloped lots. Any subdivision that has been developed in the recent past has been sized to sell out in one to two years. To date there has been only one individual who made application for DCF valuation as provided for in LB 191.
	only one marviadar who made apprearion for Der variation as provided for in EB 171.

----The county has developed the valuation groups partly based on the original assessor locations and partly on the way they organize their work. They typically inspect, review and analyze each town or valuation group separately. The county has identified characteristics that make each town unique. Those characteristics vary, but are usually related to the population, schools, location, businesses and services in each town. Of the 15 valuation groups, the first 12 are sub-strata of the city of Columbus; Valuation Group #13 is a consolidation of 3 small villages and 5 small towns. This was first created for use in 2016. Humphrey is the only remaining individual small town. Unlike the others it has strong schools and a fair amount of commercial activity. Last is the valuation group named acreages, also known as rural residential; (the houses on agricultural parcels and agricultural buildings buildings tend to be represented by this group and are valued like the acreages).

## **2017** Commercial Assessment Survey for Platte County

	Valuation data collection done by:						
	Assessor and Staff						
2.	List the valuation groupings recognized in the County and describe the unique characteristics of each:						
	Valuation     Description of unique characteristics       Grouping     Description of unique characteristics						
	1 All commercial in the town of Columbus.						
	Commercial in close proximity to Columbus, but outside the city limits. These parcels a inspected, reviewed and revalued as an independent subclass.						
	All small town parcels and rural parcels throughout the county.  The small town parcels are inspected, reviewed and revalued at the same time as their residential counterparts. The rural parcels that are not in close proximity to Columbus are usually inspected, reviewed and revalued in the same time frame as the small town or the rural residential that they are near.						
3.	List and properties.	describe the approac	ch(es) used to est	timate the market v	alue of commercial		
	The county uses the cost approach with depreciation developed from the market for all parcels and the income approach is used when information is available. That is mostly available for apartments, some general retail and warehouse type occupancies.						
3a.	Describe the	process used to determin	ne the value of unique	e commercial properties.			
	The major unique commercial or industrial properties are valued by an outside appraiser with expertise in appraising such property. Otherwise, they are valued by the assessor and staff along with the more typical commercial properties.						
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?						
	Platte County uses local sales data to develop market derived depreciation.

•	List each market area, and describe the location and the specific characteristics that make each unique.				
	Market Area	Description of unique characteristics	Year Land Use Completed		
	3	Area 3 was newly created for use in 2015. This area exists in the southern part of the county, south of the Loup river and north of the Platte River. The soils in this region tend to be sandier and less productive than the northern part of the county and sale analysis has revealed that the values in this area have not kept pace with the northern part of the county. This is a small area estimated to be only about 15% of the agricultural acres in the county.	2015		
	6	This area contains the majority of the agricultural acres in the county. It consists of all of the land in the county north of the Loup River. This part of the county generally has superior soils and sales analysis has shown the values tend to be noticeably higher than those in Area 3.	2015		
	photo base is the primary source for land use verification and it is monitored for changes the county inspects and reviews the improvements in the rural areas of the county, to review the land use that they are able to observe. The date posted for Land Use County completed the review of all of the land use throughout the county by comparing photo base to the 2014 GIS photo base on a parcel by parcel basis. This review was conduring 2015 for use in the 2016 tax year.

	If your county has special value applications, please answer the following			
7a.	How many special valuation applications are on file?			
	50			
7b.	What process was used to determine if non-agricultural influences exist in the county?			
	The county annually verifies and analyzes all agricultural sales. They do this primarily to establish agricultural land values each year, but also to see if there are differing value trends that would indicate that some land values are driven by influences from outside the typical agricultural land market.			
	If your county recognizes a special value, please answer the following			
7c.	Describe the non-agricultural influences recognized within the county.			
	The non agricultural influence has come from the development of residential or recreational sites or developments near the rivers.			
7d.	Where is the influenced area located within the county?			
	The influenced area in Platte County occurs along the rivers and is sometimes used for residential and recreational purposes.			
7e.	Describe in detail how the special values were arrived at in the influenced area(s).			
	The sales of similar land that occur in the non-influenced part of the county are analyzed to develop the values throughout the county. These values are also applied to the qualified parcels that exist in the influenced parts of the county.			

# PLATTE COUNTY PLAN OF ASSESSMENT

Thomas M. Placzek
PLATTE COUNTY ASSESSOR
3 Year Plan
Introduction

Pursuant to Neb. Laws 2005, LB263, Section 9.

#### **County Description of Real Property in Platte County:**

Per the 2016 County Abstract, Platte County consists of the following real property types:

	Parcels	% of Total Parcels	% of Taxable	Value Base
Residential	12388	63.9%	30.1%	1,459,824,824
Commercial	1426	7.4%	9.2%	446,914,890
Industrial	71	.4%	5.3%	254,448,935
Recreational	61	.35%	.1%	4,432,245
Agricultural	5302	27.5%	54.9%	2,666,310,669
Special Value	86	.45%	.4%	21,162,965
	19334	100%	100%	4,853,094,528

Agricultural land-taxable acres 390,405

New Property: For assessment year 2016 an estimated 300 building permits and/or information statements were filed for new property construction/additions in the county.

## **Current Assessment Procedures for Real Property**

#### STAFF

- 1 Assessor
- 1 Deputy Assessor
- 3 Fulltime Clerks

#### 2 Appraiser Assistants

Assessor prints and checks all reports. Helps with the sales review process for residential, Ag, and commercial properties. Tax corrections are written by the Assessor/Deputy Assessor.

Deputy Assessor, and 3 clerks work on Personal Property & Homestead Exemptions and answers the phone.

Deputy Assessor---Works on CAMA system (data entry & problem solving) in addition to Homestead Exemption & Personal Property .

Clerks in the assessor's office assist in all the general duties in the office. Personal property, Homestead exemptions, maintenance of cadastral books, entering data in the Cama real estate system and GIS data implementation.

Assessor and Appraiser Assistant—Sales review and appraisal review and pickup work for Residential, Commercial and Ag properties and Ag Land sales review & GIS data implementation.

#### **Current Assessment Procedures for Real Property:**

A. Real Estate Transfers Statements are updated within a couple weeks of when received from The Register of Deeds Office. The Assessor reviews the sales. Once reviewed the transfer statements are passed to a clerk, will update the computer & GIS Sys with the new information and transfer 521 information electronically to the Department of Assessment and Taxation. Sales information sheets are filled out either by making phone calls or mail. We also send letters for appointments so the Assessor or Appraiser Assistant can make a physical review of the property.

B. Internal sales ratio studies are done by neighborhoods and Platte County works well with State of Nebraska Field Liaison and review results.

### Level of Value, Quality, and Uniformity for assessment year 2016:

Property Class	Median	COD	PRD
Residential	97	13.05	103.52

Commercial	99	15.40	102.61
Agricultural Land	74	17.53	102.53

#### Assessment Actions Planned for Assessment Year 2017:

#### Residential

Sales Review of all neighborhoods. Outside review of neighborhood K, pickup work, and review of lot values both deeded and leased at Wagner & Stires Lakes.

#### **COMMERCIAL**

Pickup work.

#### **Agricultural**

Review Ag land sales and pickup work. Land review based on 2015 Ag Dept photos & Homesite & Acreage review per 2016 aerial photos.

### **Assessment Actions Planned for Assessment Year 2018:**

#### Residential

Sales review of all neighborhoods . Pickup work. Small towns & Humphrey outside review and Neighborhoods A-1 & B-1.

#### Commercial

Sales review of commercial and Industrial. Outside review of all small towns and pickup work.

### **Agricultural**

Sales review on land sales & Pickup work.

## **Assessment Actions Planned for Assessment Year 2019:**

#### Residential

Sales Review of all neighborhoods and pickup work. Review neighborhoods H  $\&\ L$ 

#### **Commercial**

Sale Review of Commercial and Industrial. Pickup work.

## **Agricultural**

Pickup work & Sales review of land sales.

Methodology for Special Valuation

Platte County

Platte County submits this report pursuant to Title 350, Neb Regulation - 11-005.04.

Platte County has instituted Special Valuation along the Loup and Platte Rivers. The following methodology is used to value agricultural land following non-agricultural influences has been identified.

Sales along the rivers have indicated that grass and tree cover are selling for approximately \$2,500 per acre.

In this process, I have determined that market value for grass land and tree cover in this area has been driven up by purchases for hunting and other recreational type uses.

The "special valuation" for qualified parcels were determined by using sales away from the river in an "uninfluenced" area.

Sincerely,

Thomas M. Placzek
Platte County Assessor
