

# 2019 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

THURSTON COUNTY

April 5, 2019

Pete Ricketts. Governor

#### Commissioner Keetle:

The Property Tax Administrator has compiled the 2019 Reports and Opinions of the Property Tax Administrator for Thurston County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Thurston County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

Kuth a. Sorensen

402-471-5962

cc: Susan Schrieber, Thurston County Assessor

### County Reports:

- County Abstract of Assessment for Real Property, Form 45
- County Abstract of Assessment for Real Property Compared to the Prior Year Certificate of Taxes Levied (CTL).
- Assessor Survey
- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

### Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by Neb. Rev. Stat. § 77-1327. From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices for arm's-length sales. After analyzing all available information to determine that the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations.

#### **Statistical Analysis:**

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist.

Pursuant to <u>Section 77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class Jurisdiction Size/Profile/Market Activity		COD Range
Residential improved (single family	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
dwellings, condominiums, manuf.	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
housing, 2-4 family units)	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
Income-producing properties (commercial, industrial, apartments,)	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
Residential vacant land	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
j	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
Other (non-agricultural) vacant land	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
900 900 00 10 10 10 10 10 10 10 10 10 10 10 1	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity.

#### **Analysis of Assessment Practices:**

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used in the county assessor's effort to establish uniform and proportionate valuations. The review of assessment practices is based on information filed from county assessors in the form of the Assessment Practices Survey, and in observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Section 77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales

file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

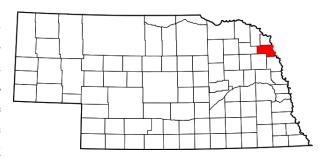

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for the end users, and highlight potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and practices are reviewed to ensure taxpayers are served with such transparency.

The comprehensive review of assessment practices is conducted throughout the year. When practical, potential issues identified are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

\*Further information may be found in Exhibit 94

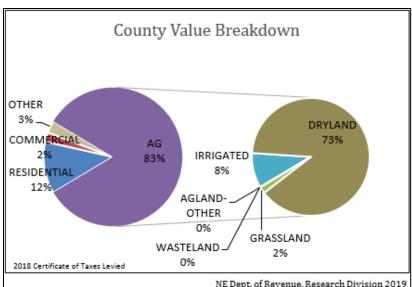

## **County Overview**

With a total area of 394 square miles, Thurston County had 7,223 residents, per the Census Bureau Quick Facts for 2017, a 4% population increase over the 2010 U.S. Census. Reports indicated that 60% of county residents were homeowners and 88% of residents occupied the same residence as in the prior year (Census Quick

Facts). The average home value is \$70,360 (2018 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Thurston County are located in and around the county seat of Pender. According to the latest information available from the U.S. Census Bureau, there were 118 employer establishments with total employment of 1,425, a 15% increase in total employment from the prior year.

largest contributing factor in the county's overall valuation base. Dryland makes up the majority of the land in the county. Thurston County is included in the Papio-Missouri River Natural Resources District (NRD).

Agricultural land is the single

NE Dept. of Revenue, Research Division 2019						
C	CITY POPULATION CHANGE					
	2008	2018	Change			
EMERSON	817	840	2.8%			
MACY	-	-				
PENDER	1,148	1,002	-12.7%			
ROSALIE	194	160	-17.5%			
THURSTON	125	132	5.6%			
WALTHILL	909	780	-14.2%			
WINNEBAGO	768	774	0.8%			

## **2019 Residential Correlation for Thurston County**

#### Assessment Actions

The county assessor analyzed the preliminary statistics and concluded the town of Pender to be outside the acceptable range; the county reviewed all sales and made a depreciation adjustment to homes built prior to 1990 in Pender. The county also revisited and reviewed the towns of Walthill and Winnebago.

#### Assessment Practice Review

Annually a review of the assessment practices is completed to examine the specific assessment practices of the county and determine if the county complies with all aspects of the process to achieve uniform and proportionate valuation for the residential class of property.

A review of the submission of the Real Estate Transfer Statement (Form 521) was completed to assure the county is submitting all sales. The Form 521 that have been reviewed were submitted accurately and the supplemental data was submitted accurately and timely. An audit of the county's Assessed Value Update (AVU) records showed no errors.

The sales verification process was also reviewed to determine if an adequate sample of sales are used and the non-qualified sales are explained with proper documentation verifying the sale is not arm's-length. A review of the sales file indicates good documentation and a reasonable percentage of qualified sales in the sales file.

The valuation groups were reviewed, the county has four valuation groups for the residential class. The review confirms that the valuation groups are defined by the geographic locations within the county and the economic forces.

Vacant lot studies are completed when the reappraisal is done for each valuation group. The county is reviewed to determine if the six-year inspection and review is current and up to date. Thurston County meets the six-year inspection and review. The county costing table for the residential class is 2013.

The county assessor believes that the assessment process can be explained to a taxpayer, however, does not currently have a formal written methodology.

The county meets all of the statutory reporting schedules as well as consistently transfers sales on a timely basis.

## **2019 Residential Correlation for Thurston County**

### Description of Analysis

Residential parcels are valued utilizing four valuation groups that are based on the assessor locations or towns in the county. Valuation Group 10 is comprised of three towns that are all located on the eastern side of the county.

Valuation Group	Description
1	Pender
5	Emerson and Thurston
10	Rosalie, Walthill and Winnebago
30	Rural

The residential statistical profile has 57 qualified sales. Forty nine percent of the sold parcels are located in valuation group 1 (Pender). The median and the weighted mean are the only two measures considered within the acceptable parameters. The diversity of the market in valuation group 10 is difficult to monitor, and tends to skew the COD and PRD.

Comparison of the statistical sample and the changes to the 2019 Count Abstracts of Assessment, Form 45, Compared to the 2018 Certificate of Taxes Levied Report (CTL) indicates that the population changed in the areas addressed by the county for the 2019 assessment.

### Equalization and Quality of Assessment

A review of the statistics with sufficient sales and the assessment practices suggest that assessments within the county are valued within the acceptable parameters, and therefore considered equalized.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	28	93.70	99.94	93.66	18.88	106.71
5	4	134.50	120.05	102.20	33.06	117.47
10	15	99.75	117.57	76.86	45.63	152.97
15	10	91.90	116.46	97.45	35.93	119.51
ALL	57	93.98	108.89	92.32	32.35	117.95

### Level of Value

Based on analysis of all available information, the level of value for the residential class of property in Thurston County is 94%.

## 2019 Commercial Correlation for Thurston County

#### Assessment Actions

Thurston reported no major changes to the commercial class of property other than the pick-up work on remodeled parcels and new construction.

#### Assessment Practice Review

Annually a review of the assessment practices is completed to examine the specific assessment practices of the county and determine if the county complies with all aspects of the process to achieve uniform and proportionate valuation for the commercial class of property.

A review of the submission of the Real Estate Transfer Statement (Form 521) was completed to assure the county is submitting all sales. The Form 521 had been submitted on time at least 92% of the time; data is also submitted accurately. An audit of the county's Assessed Value Update (AVU) records showed no errors.

The sales verification process was also reviewed to determine if an adequate sample of sales are used and the non-qualified sales are explained with proper documentation verifying the sale is not arm's-length. A review of the sales file indicates good documentation and a reasonable percentage of qualified sales in the sales file.

The valuation groups were reviewed, the county has four valuation groups for the commercial class. The review with the county assessor confirms that the valuation groups are defined by the geographic locations within the county and the economic forces.

Vacant lot studies are completed when the reappraisal is done for each valuation group. Thurston County has been on schedule with the six-year inspection and review cycle for the commercial class of property and the costing tables are 2013.

The county assessor believes that the assessment process can be explained to a taxpayer, however, does not currently have a formal written methodology.

## 2019 Commercial Correlation for Thurston County

## Description of Analysis

Thurston County has four valuation groups for the commercial class, which are defined by towns within the county, as shown below.

Valuation Group	Description
1	Pender
5	Emerson
10	Rosalie, Walthill, Winnebago
15	Rural

The commercial statistical profile contains five qualified sales displayed in three of the valuation groups. One of the sales are in Valuation Group 1 (Pender) which is the county seat and the hub of the commercial activity for Thurston County. The sample is small, the ratios range from 58-132%, supporting that the statistics cannot be relied upon.

The 2019 County Abstract of Assessment for Real Property, Form 45 Compared with the 2018 Certificate of Taxes Levied Report (CTL) also indicates a value change of 1.35% for the commercial indicating minimal change to the commercial class.

## Equalization and Quality of Assessment

The review of the current statistics concludes there is not a single valuation group within the acceptable level of value or an occupancy code with an adequate sample. The commercial class had a complete revaluation in 2016 and the county is current on the six-year inspection and review cycle. There is no adjustment that would enhance the quality of assessment. The quality of assessment of the commercial class of property complies with generally accepted mass appraisal techniques.

RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
L	1	73.82	73.82	73.82	00.00	100.00
10	3	104.86	108.00	114.92	13.97	93.98
15	1	58.84	58.84	58.84	00.00	100.00
ALL	5	87.60	91.33	60.71	23.69	150.44

### Level of Value

Based on analysis of all available information, Thurston County has achieved the statutory level of value of 100% for the commercial class of real property.

## **2019 Agricultural Correlation for Thurston County**

#### Assessment Actions

Thurston County monitored the sale activity in the agricultural class and found little movement in the market. Therefore, there were no land value changes for 2019. The county continues to complete the review work and pick-up new construction.

#### Assessment Practice Review

Annually a review of the assessment practices is completed to examine the specific assessment practices of the county and determine if the county complies with all aspects of the process to achieve uniform and proportionate valuation for the agricultural class of property.

A review of the submission of the Real Estate Transfer Statement (Form 521) was completed to assure the county is submitting all sales. The Form 521 has been submitted accurately and the supplemental data was submitted accurately and timely. An audit of the county's Assessed Value Update (AVU) records showed no errors.

The sales verification process was also reviewed to determine if an adequate sample of sales are used and the non-qualified sales are explained with proper documentation verifying the sale is not arm's-length. Review of the sales file indicates good documentation and reasonable samples of qualified sales and that the county has appropriately excluded sales with non-agricultural influences.

A review of the market areas was found to be sufficient to identify the economic markets in the county. The data supports that two market areas for the agricultural class are adequate for the county. The process for the agricultural values are discussed to determine land use verification and how improvements are assessed. Thurston County meets the six-year inspection and review requirement. The rural homes and outbuildings were all reviewed and between 2014 and 2016 and the county assessor has started a second cyclical review in 2017. The costing date for the rural homes is also 2013The county has also begun the identification process to identify Conservation Reserve Program (CRP) within the county.

The county assessor believes she can describe the assessment process to a taxpayer, but does not currently have a formal written methodology.

## Description of Analysis

An analysis of the sales for Thurston County determined that the sales within the county are reliable and sufficient. The sample reflects the current market conditions in the northeast portion of the state. The market is generally flat or slightly decreasing.

Thurston County is currently divided into two market areas. Market Area 1 is the western portion of the county. The counties adjoining area one are Dixon, Wayne, Cuming and they are considered comparable. Market Area 2 is the eastern portion of the county and is bordered on the north edge

## **2019 Agricultural Correlation for Thurston County**

by Dakota County, the south by Burt County and are considered comparable. The Missouri River is the east border of the county.

Market Area 1 is 83% dryland use and Market Area 2 is 85% dryland. Annually the county reviews the market information to verify the need to have the two areas. Irrigation is a minority land use in the county, with approximately 10,326 acres in Market Area 1 and approximately 2844 acres in Market Area 2. Due to the limited number of acres, the irrigated land values are the same in both market areas. The grassland values are a little higher in Market Area 2.

The statistical profile is within the acceptable range. Thurston County has very little irrigated land and grassland, however, when the values are compared with adjoining counties they are reasonably close. The 80% Majority Land Use (MLU) statistic in both market areas indicates that the dryland in both market areas are within the acceptable parameters. The land values compared to surrounding counties supports that Thurston is within a reasonable range of value. The same scenario is true for Market Area 2 sales.

## Equalization and Quality of Assessment

Agricultural homes and rural residential acreages have all been valued the same with the same depreciation and costing. The rural acreages, though there is limited sales, measures within an acceptable level of value therefore, the agricultural homes are also equalized.

The county majority land use supports that the dryland class is the only use with a sufficient number of sales and supports the overall level of value when looked at as the whole county. The overall dryland median is 68.94%, which is basically the same as the overall median. There are no statistics for the irrigated land and grassland; it is believed that the values are comparable to adjoining counties.

The quality of assessment of agricultural land in Thurston County complies with generally accepted mass appraisal techniques.

RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
Dry						
County	26	68.94	72.72	62.48	21.79	116.39
<u>.</u>	8	68.53	70.51	69.81	12.75	101.00
2	18	69.59	73.70	59.25	25.51	124.39
ALL	31	68.65	76.39	62.84	32.70	121.56

### Level of Value

Based on the analysis of all available information, the level of value of agricultural land in Thurston County is 69%.

# 2019 Opinions of the Property Tax Administrator for Thurston County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Reissue 2018). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	94	Meets generally accepted mass appraisal techniques.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal techniques.	No recommendation.
Agricultural Land	69	Meets generally accepted mass appraisal techniques.	No recommendation.

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 5th day of April, 2019.

## Legend

- County Lines

  Market Areas
- Market Area
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Moderately well drained silty soils with clayey subsoils on uplands
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Lakes and Ponds
- IrrigationWells

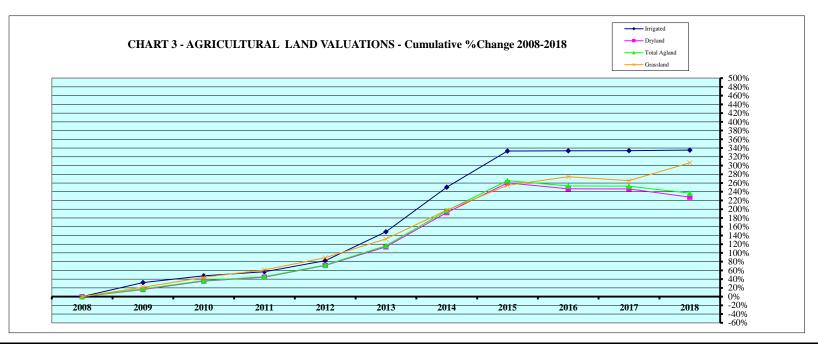

CHART 2

(1) Residential & Recreational excludes AgDwelling & farm home site land; Comm. & Indust. excludes minerals; Agric. land incudes irrigated, dry, grass, waste & other agland, excludes farm site land. Real property growth is value attributable to new construction, additions to existing buildings, and any improvements to real property which increase the value of such property. Sources:

# **2019 Assessment Survey for Thurston County**

# A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	1
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	1
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$102,275.00 includes County Assessor, Deputy and operating expenses.
7.	Adopted budget, or granted budget if different from above:
	\$102,275.00
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$0
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	\$77,775.00
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$11,100.00
11.	Amount of the assessor's budget set aside for education/workshops:
	\$1,250.00
12.	Other miscellaneous funds:
	\$0
13.	Amount of last year's assessor's budget not used:
	Yes, but unsure of total amount

# **B.** Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	County Assessor and staff
5.	Does the county have GIS software?
	Yes, currently working with gWorks to fully implement.
6.	Is GIS available to the public? If so, what is the web address?
	Yes. www.thurston.gworks.com
7.	Who maintains the GIS software and maps?
	gWorks
8.	Personal Property software:
	MIPS

## C. Zoning Information

1.	Does the county have zoning?
	No
2.	If so, is the zoning countywide?
	N/A
3.	What municipalities in the county are zoned?
	Emerson, Pender, Thurston, and Walthill are zoned.
4.	When was zoning implemented?
	Unknown

## **D. Contracted Services**

1.	Appraisal Services:		
	Small Portion with Tax Valuation - this year 5 parcels		
2.	GIS Services:		
	gWorks		
3.	Other services:		
	None		

# E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Sometimes, very minimal, will hire an independent appraiser on a limited basis to assist in listing difficult properties
2.	If so, is the appraisal or listing service performed under contract?
	Yes.
3.	What appraisal certifications or qualifications does the County require?
	Licensed Appraiser
4.	Have the existing contracts been approved by the PTA?
	Yes
5.	Does the appraisal or listing service providers establish assessed values for the county?
	Yes

### Assessment Years 2019, 2020, and 2021 Date: June 2018

#### **General Description of Real Property in Thurston County:**

Thurston County is located in Northeast Nebraska. The county is irregular in shape with the Missouri River forming the eastern boundary. Pender is the county seat and largest community. Pender is located in the southwestern part. Other communities include Macy, Rosalie, Thurston, Walthill, Winnebago, and part of the community of Emerson. Thurston County was organized in 1889. It was originally part of the acreage selected by the Omaha Indians as their reservation. The Omaha tribe sold part of the land to the Winnebago Reservation also includes part of Dixon County. The county has a checker board type of ownership. Approximately 56,654 acres of the land in Thurston County is exempt. Approximately 674 acres were put in exempt status for 2011. This property is exempt because it is U.S.A. in Trust for the Winnebago Tribe of Nebraska or the Omaha Tribe of Nebraska and Allotment land. Complicating the process, a large number of HUD houses, mobile homes, and commercial buildings located on the above described exempt land. Native American's are exempt from taxation on Improvements on leased land. Some of the properties are co-owned by non-Indian people. That portion is taxable; the discovery process is very difficult in these situations.

Thurston County had a total count of 4,439 taxable parcels on the 2018 County Abstract.

Per the 2018 County Abstract, Thurston County consists of the following real property types.

	<b>Parcels</b>	% of Total Parcels	% of Taxable Value Base
Residential	1813	38	17
Commercial	263	7	3
Industrial	11	0	1
Recreational	28	0	1
Agricultural	2324	56	78
Special Value	0		

Agricultural land – Taxable acres 182,100.65

For Assessment year 2018, an estimated 110 building permits, information statements and others means of assessing were valued as new property construction/additions.

#### **Current Resources**

The staff of the Thurston County Assessor's office consists of the Assessor, deputy assessor & one full time Clerk. With limited funds in Thurston County there is little money available for registration, motels and travel. However, the mileage allowance, fuel, office equipment and

repair, office supplies, dues, registration, training and data processing fees, printing and publishing are all increasing. MIPS contract costs have really put the office in a budget bind. Board took away the GIS funding in 2018..

Discover, List & Inventory all property. Real Estate Transfers along with a photocopy of the deeds are filed timely by the Clerks office. A clerk processes the Real Estate Transfers, followed by a double check by a second clerk. The Assessor reviews the transfer than forwards the information to Department of Revenue.

The property record cards contain all information required by regulation 10-004, which included the legal description property owner, classification codes, and supporting documentation. The supporting documentation includes any field notes, a sketch of the property. A photograph of the property, and if agricultural land is involved an inventory of the soil types by land use. The new and old aerial photographs of the buildings are included. The cards are in good condition and updated and or replaced as needed. Allotment land cards are kept in a separate file. Because of the reservations located in Thurston County, the historical information is kept in the Assessor's office.

#### Level of Value, Quality, and Uniformity for Assessment year 2018

<b>Property Class</b>	Median %	C.O.D. %	P.R.D. %
Residential	95	29.08	118. 23
Commercial	100		
Agricultural Land	71	21.22	112.42
Special Value	0		

#### **Assessment Actions Planned for Assessment year 2019:**

Residential: 2018 we did re-costing All Rural Residential: final inspections where necessary. This will include comparison of the current property record card, inspection of the house, list outbuildings & new photos. Re-cost. Start on Emerson, Thurston, Rosalie & Walthill.

Commercial: completed inspections, reappraisal in 2016. Will monitor for changes.

Agricultural: finish 6 year inspection & review of land use changes by GIS, & drive by to review land. Finishing with Pender, Thayer & Bryan Townships. Conduct market analysis of agricultural sales. Rural residential as described above.

Special Value: None

### Assessment Actions Planned for Assessment year 2020:

Residential. All rural residential: begin inspection process with townships of Anderson, Blackbird This will include comparison of the current property record card, inspection of the house, list outbuildings & new photos.

Commercial: continue to evaluate process.

Agricultural: continue the review land use changes by GIS. Drive by & review land for Flournoy, Merry, Perry, & Omaha Townships. Conduct market analysis of agricultural sales. Rural residential as described above.

Special Value: none

### Assessment Actions Planned for Assessment year 2021:

Residential: All rural residential: begin inspection process with townships of Dawes, Winnebago This will include comparison of the current property record card, inspection of the house, list outbuildings & new photos.

Commercial: continue to evaluate process

Agricultural Land: review land use changes for finish up townships by GIS & drive by. Conduct market analysis of agricultural sales. Rural residential as described above.

**Special Value: none** 

The Cadastral Maps in Thurston County are old. The maps are current with parcel identification according to regulation 10-004.03. The office has implemented GIS system.

Other functions performed by the assessor's office, but not limited to:

Record Maintenance, Mapping updates, & Ownership changes

Annually prepare and file Assessor Administrative Reports required by law/regulation:

- a. Abstracts (Real & Personal Property)
- b. Assessor Survey
- c. Sales information to Department of Revenue rosters & annual Assessed Value Update w/Abstract
- d. Certification of Value to Political Subdivisions
- e. School District Taxable Value Report
- f. Homestead Exemption Tax Loss Report

- g. Certificate of Taxes Levied Report
- h. Report of current values for properties owned by Board of Education Lands & Funds
- . Report of all Exempt Property and Taxable Government Owned Property
- j. Annual Plan of Assessment Report

Personal Property: administer annual filing, 491 schedules; prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required.

Permissive Exemption: Administer annual filings of applications for new or continued exempt use, review and make recommendations to county board.

Taxable Government Owned Property-annual review of government owned property not used for public purpose, send notices of intent to tax.

Homestead exemptions: administer 143 annual filings of applications approval/denial process, taxpayer notifications, and taxpayer assistance.

Centrally Assessed-Review of valuations as certified by Department of Revenue for railroads and public service entities, establish assessment records and tax billing for tax list.

Tax Districts and Tax Rates- management of school district and other tax entity boundary changes necessary for correct assessment and tax information: input/review of tax rates used for tax billing process.

Tax Lists: prepare and certify tax list correction documents for county board approval.

County Board of Equalization – Attend county board of equalization meetings for valuation protest-assemble and provide information.

TERC Appeals-prepare information and attend taxpayer appeal hearings before TERC, defend valuation.

TERC Statewide Equalization-attend hearings if applicable to county, defend values, and/or implement orders of the TERC.

Education: Assessor and/or Appraisal Education- attend meetings, workshops, and educational classes to obtain required hours of continuing education to maintain assessor certification.

#### **Conclusion:**

This document is a description of the various duties and three year plan of assessment in the Assessors office. Without proper funding the tasks described will be difficult to complete. The current budget request is \$99,354 for the General Fund; \$77,725 board cut Reappraisal fund, the last two years
