

2025 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

WHEELER COUNTY

April 7, 2025

Commissioner Hotz:

The 2025 Reports and Opinions of the Property Tax Administrator have been compiled for Wheeler County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Wheeler County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Sarah Scott

Property Tax Administrator

Introduction

Pursuant to Neb. Rev. Stat. § 77-5027 the Property Tax Administrator (PTA) shall annually prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments to be considered by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by Neb. Rev. Stat. § 77-1327. From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level; however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

Statistical Analysis:

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division teammates must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties. The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is the recognition by IAAO of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

| General Property Class | Jurisdiction Size/Profile/Market Activity | COD Range |
|---|---|-------------|
| Residential improved (single family | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 10.0 |
| dwellings, condominiums, manuf. | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 15.0 |
| housing, 2-4 family units) | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 20.0 |
| | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 15.0 |
| Income-producing properties (commercial, industrial, apartments,) | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 20.0 |
| | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 25.0 |
| | Very large jurisdictions/rapid development/active markets | 5.0 to 15.0 |
| Residential vacant land | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 20.0 |
| | Rural or small jurisdictions/little development/depressed markets | 5.0 to 25.0 |
| Other (non-agricultural) vacant land | Very large jurisdictions/rapid development/active markets | 5.0 to 20.0 |
| | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 25.0 |
| | Rural or small jurisdictions/little development/depressed markets | 5.0 to 30.0 |

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to Neb. Rev. Stat. §77-5023, the acceptable range is 69% to 75% of actual value for agricultural land, except for taxes levied to pay school bonds passed after January 12, 2022 for which the acceptable range is 44% to 50% of actual value. For all other classes of real property, the acceptable range is 92% to 100% of actual value.

Analysis of Assessment Practices:

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. §77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with Neb. Rev. Stat. \sigma 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

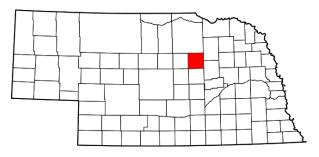

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the Division, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

*Further information may be found in Exhibit 94

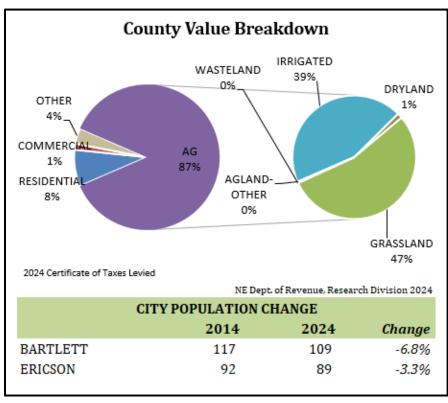

County Overview

With a total area of 575 square miles, Wheeler County has 775 residents, per the Census Bureau Quick Facts for 2023, a slight increase in population from the 2020 U.S. Census. Reports indicate that 81% of county residents are homeowners and 92% of residents occupy the same residence as in the prior year (Census Quick Facts).

The average home value is \$97,887 (2024 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Wheeler County are located in and around the county seat of Bartlett. According to the latest information available from the U.S. Census Bureau, there are 19 employer establishments with total employment of 75, for a 16% decrease in employment.

The majority of the total valuation base in Wheeler County comes from agricultural land. Wheeler County is included in both the Lower Loup and Upper Elkhorn Natural Resource Districts (NRD).

2025 Residential Correlation for Wheeler County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

Sales qualification and verification processes are reviewed. The sales usability rate for the residential class is near the statewide average. The rate of return of sales questionnaires is low. The county assessor receives most sale information by word of mouth and review by the contract appraiser. A review of the roster shows a small number of total sales; the qualified sales roster supports all sales that have been utilized for the measurement of the class are arm's-length.

Valuation groups are reviewed to ensure that economic differences are adequately identified and stratified. Wheeler County consists of three valuation groups defined by assessor locations. Valuation Group 1 includes the two villages within the county, Valuation Group 2 includes all rural areas, and Valuation Group 3 includes the rapidly developing recreational area near Lake Ericson.

The six-year inspection and review cycle of the county is examined. Residential properties are valued by a contract appraiser, including pick-up work and revaluations. The county remains in compliance with statutory requirements. Letters are sent to property owners prior to the contract appraiser's review. The inspection includes new pictures and measurements if needed. The contract appraiser enters the home for interior inspection if granted access.

The county assessor has a written methodology on file.

| 2025 Residential Assessment Details for Wheeler County | | | | | | | |
|--|---|----------------------------|-----------------|----------------------------|-------------------------------|--|--|
| Valuation Group | Assessor Locations within Valuation Group | Depreciation Table Year | Costing Year | Lot Value Study Year | Last Inspection Year(s) | Description of Assessment Actions for Current Year | |
| 1 | Bartlett & Ericson | 2021 | 2022* | 2024* | 2023 | | |
| 2 | Rural | 2021 | 2022* | 2021 | 2021 | | |
| 3 | Lake Ericson | 2021 | 2022* | 2021 | 2023 | 30% increase to land | |

Additional comments:

Pick-up work was completed by the contract appraiser and placed on the assessment roll.

Description of Analysis

A review of the statistical profile shows 20 sales were qualified for measurement purposes. Two measures of central tendency are within acceptable range, the mean is slightly high. The COD and PRD are high. Further analysis of the overall statistics indicates they are split between two

^{* =} assessment action for current year

2025 Residential Correlation for Wheeler County

valuation groups. Valuation Group 1 has measures of central tendency at or near the low end of the acceptable range; and qualitative measures that support uniformity.

The median of Valuation Group 2 is within acceptable range; the mean, weighted mean and qualitative measures are high. A single outlier with a 245% ratio is affecting all the statistics, its removal brings everything but the median within range; however, reduces the median below range. The county assessor updated costing and increased land 30% in Valuation Group 2; the assessment practices indicate the county assessor has kept the costing, land values and deprecation tables updated within the six-year inspection cycle. The COD at 37% suggest that there is significant disparity in the ratios; which is also seen in the lack of correlation in the measures of central tendency. There is some variability in the sample, but all factors point to a level of value at the low end of the acceptable range.

The 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) is consistent with the reported actions of the assessor.

Equalization and Quality of Assessment

Based on the review of the county assessor's assessment practices for the residential property in Wheeler County, the quality of assessment complies with generally accepted mass appraisal techniques.

| VALUATION GROUP | | | | | | |
|-----------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 1 | 12 | 92.84 | 92.10 | 91.40 | 13.07 | 100.77 |
| 3 | 8 | 92.47 | 114.25 | 100.59 | 37.21 | 113.58 |
| ALL | 20 | 92.47 | 100.96 | 95.63 | 22.75 | 105.57 |

Level of Value

Based on analysis of all available information, the level of value for the residential property in Wheeler County is determined to be 92% of market value.

2025 Commercial Correlation for Wheeler County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

Sales qualification and verification processes are reviewed. The sales usability rate for the commercial class is below the statewide average. The county has no qualified commercial sales. A review of the sales roster shows a total of four sales; the majority are substantially changed or storage buildings for personal use.

The county assessor uses one valuation group due to the low number of commercial parcels within the county. The six-year inspection and review cycle of the county is examined. Commercial properties are valued by a contract appraiser, including pick-up work and revaluations. The county assessor remains in compliance with statutory requirements. Letters are sent to property owners prior to the contract appraiser's review. The inspection includes new pictures and measurements if needed. The contract appraiser enters commercial businesses for interior inspection if granted access.

| | 2025 Commercial Assessment Details for Wheeler County | | | | | | | |
|--------------------|---|----------------------------|-----------------|----------------------------|-------------------------------|--|--|--|
| Valuation Group | Assessor Locations within Valuation Group | Depreciation Table Year | Costing Year | Lot Value Study Year | Last Inspection Year(s) | Description of Assessment Actions for Current Year | | |
| 1 | Bartlett, Ericson & Rural | 2023 | 2022* | 2023 | 12022-2023 | Economic depreciation of 31% was applied | | |

Additional comments:

Pick-up work was completed by the contract appraiser and placed on the assessment roll.

Description of Analysis

With no sample and no viable commercial market in Wheeler County, a review of the assessment practices will constitute the primary factor for determining statutory compliance.

Review of History Chart 2, Real Property & Growth Valuations indicates that commercial property in the county has been appraised on a similar cycle as residential property in the county, which supports that values in the commercial class have kept pace with the market.

The 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) is consistent with the reported actions of the assessor.

^{* =} assessment action for current year

2025 Commercial Correlation for Wheeler County

Equalization and Quality of Assessment

Based on the review of the county assessor's assessment practices for the commercial property in Wheeler County, the quality of assessment complies with generally accepted mass appraisal techniques.

Level of Value

Based on analysis of all available information, the level of value for the commercial property in Wheeler County is determined to be at the statutory level of 100% of market value.

2025 Agricultural Correlation for Wheeler County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

Sales qualification and verification processes are reviewed. The sales usability rate for the agricultural class is below the statewide average. A review of the non-qualified sales revealed the majority are adjoining landowner and family sales that do not reflect market value. The county assessor provides documented reasons for all sales that are disqualified. The rate of return of sales questionnaires is low. The county assessor receives most sale information by word of mouth and review of the contract appraiser. The review revealed that no apparent bias exists in the qualification determination and that all arm's length transactions have been made available for measurement purposes.

One agricultural market area is used in Wheeler County for analyzing agricultural sales. The county assessor reviews sale information and identifies common characteristics of the parcels. The sales support one market for the entire county.

The county assessor is current and in compliance with the six-year inspection and review cycle. A contract appraiser reviews all agricultural improvements. Letters are sent to property owners prior to the contract appraiser's review. The inspection includes taking new pictures and measurements if needed. Staff members utilize aerial imagery to update land use; if necessary, a review will be conducted by the contract appraiser.

The county identifies intensive use including feedlots, hog confinements and chicken barns. Cattle and hog facilities are valued at \$1000 per acre. Chicken barns are valued at \$1200 per acre. The contract appraiser physically reviewed and inspected these properties and did a market analysis to arrive at the value.

2025 Agricultural Correlation for Wheeler County

| Market Area | Description of Unique Characteristics | Land Use Reviewed Year | Description of Assessment Actions for Current Year | | | |
|--|---------------------------------------|------------------------------|--|--|--|--|
| 1 | Entire County | 2021 | Irrigated land 30% increase Grassland 5% increase CRP 10% decrease Waste land 17% increase | | | |
| Additional comments: * = assessment action for current year | | | | | | |

Description of Analysis

The statistical sample for the agricultural class includes 14 qualified sales. Two measures of central tendency are within range, while the mean is slightly low. The COD is within acceptable range.

The 80% Majority Land Use (MLU) statistics for grassland has a median within the acceptable range. The dryland subclass has no sales. The irrigated land measurement is below acceptable range; however, four of the five qualified irrigated land sales are transactions between the same seller, and the buyer being of the same father and son farm operation, purchased through an online auction. Due to these transactions being majority of the irrigated sales, it is difficult to make an adjustment based on the median.

Review of the 2025 County Abstract of Assessment for Real Property Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) reflect the reported adjustments to agricultural land.

Equalization and Quality of Assessment

Agricultural homes and outbuildings are valued utilizing the same appraisal processes as the rural residential properties across the county. Agricultural improvements are equalized and assessed at the statutory level.

Agricultural land values are equalized at uniform portions of market value; all values have been determined to be acceptable and are comparable to adjoining counties. The quality of assessment of agricultural land in Wheeler County complies with generally accepted mass appraisal techniques.

| 80%MLU By Market Area | | | | | | |

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Wheeler County is 72%.

2025 Opinions of the Property Tax Administrator for Wheeler County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class | Level of Value | Quality of Assessment | Non-binding recommendation | | |
|------------------------------|----------------|---|----------------------------|--|--|
| Residential Real Property | 92 | Meets generally accepted mass appraisal techniques. | No recommendation. | | |
| | | | | | |
| Commercial Real Property | 100 | Meets generally accepted mass appraisal techniques. | No recommendation. | | |
| | | | | | |
| Agricultural Land | 72 | Meets generally accepted mass appraisal techniques. | No recommendation. | | |
| | | | | | |

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 7th day of April, 2025.

Growth Value; 2014 - 2024 Abstract of Asmnt Rpt. Prepared as of 02/11/2025

(1) Residential & Recreational excludes AgDwelling & farm home site land; Comm. & Indust. excludes minerals; Agric. land includes irrigated, dry, grass, waste & other agland, excludes farm site land. Real property growth is value attributable to new construction, additions to existing buildings, and any improvements to real property which increase the value of such property.

| | MIPS | | |
| 3. | Personal Property software: | | |
| | MIPS | | |
| 4. | Are cadastral maps currently being used? | | |
| | Yes | | |
| 5. | If so, who maintains the Cadastral Maps? | | |
| | County assessor and staff | | |
| 6. | Does the county have GIS software? | | |
| | Yes | | |
| 7. | Is GIS available to the public? If so, what is the web address? | | |
| | Yes, https://wheeler.gworks.com/ | | |
| 8. | Who maintains the GIS software and maps? | | |
| | gWorks | | |
| 9. | What type of aerial imagery is used in the cyclical review of properties? | | |
| | GIS aerial imagery | | |
| 10. | When was the aerial imagery last updated? | | |
| | 2022 | | |

C. Zoning Information

| 1. | Does the county have zoning? |
|----|---|
| | Yes |
| 2. | If so, is the zoning countywide? |
| | Yes, except the villages; they have their own regulations |
| | |

| 3. | What municipalities in the county are zoned? |
|----|---|
| | The two villages fall under the village zoning ordinance. |
| 4. | When was zoning implemented? |
| | 1998 |

D. Contracted Services

| 1. | Appraisal Services: |
|----|---------------------|
| | Stanard Appraisal |
| 2. | GIS Services: |
| | gWorks |
| 3. | Other services: |
| | None |

E. Appraisal /Listing Services

| 1. | List any outside appraisal or listing services employed by the county for the current assessment year | | | | |
|----|---|--|--|--|--|
| | Stanard Appraisal completes annual pickup work. | | | | |
| 2. | If so, is the appraisal or listing service performed under contract? | | | | |
| | N/A | | | | |
| 3. | What appraisal certifications or qualifications does the County require? | | | | |
| | Must be a certified appraiser and be able to obtain a bond | | | | |
| 4. | Have the existing contracts been approved by the PTA? | | | | |
| | N/A | | | | |
| 5. | Does the appraisal or listing service providers establish assessed values for the county? | | | | |
| | No, assessor does. | | | | |

2025 Residential Assessment Survey for Wheeler County

| 1. | Valuation data collection done by: | | | |
|----|---|--|--|--|
| | Contract Appraiser | | | |
| 2. | List and describe the approach(es) used to estimate the market value of residential properties. | | | |
| | Cost approach for improvements is used to estimate the market value of residential properties. | | | |
| 3. | For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor? | | | |
| | CAMA tables are used, however, economic deprecation is adjusted based on the sales study. | | | |
| 4. | Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted. | | | |
| | One depreciation table is used for all valuation groups, and is adjusted using economic depreciation for each valuation group based on the sales study. | | | |
| 5. | Describe the methodology used to determine the residential lot values? | | | |
| | The contract appraiser conducts a sales study that is used to determine residential lot values as well as looking at the land to building ratios. | | | |
| 6. | How are rural residential site values developed? | | | |
| | Stanard Appraisal develops value based on sales and on the cost of a well, septic and electric at the time. | | | |
| 7. | Are there form 191 applications on file? | | | |
| | None at this time. | | | |
| 8. | Describe the methodology used to determine value for vacant lots being held for sale or resale? | | | |
| | All lots are treated the same; no applications to combine lots have been received. | | | |

2025 Commercial Assessment Survey for Wheeler County

| 1. | Valuation data collection done by: | | |
|-----|---|--|--|
| | Contract Appraiser | | |
| 2. | List and describe the approach(es) used to estimate the market value of commercial properties. | | |
| | Cost approach, as well as a market analysis of the qualified sales to estimate the market value of properties. | | |
| 2a. | Describe the process used to determine the value of unique commercial properties. | | |
| | Commercial properties are valued by contract appraiser, including pickup work and revaluations. Unique properties would be reviewed with the appraiser prior to having appraisal work completed. | | |
| 3. | For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor? | | |
| | CAMA tables are used, however, economic deprecation is adjusted based on the sales study. | | |
| 4. | Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted. | | |
| | One depreciation table is used and is adjusted using economic depreciation based on the sales study. | | |
| 5. | Describe the methodology used to determine the commercial lot values. | | |
| | A sales study conducted by the contract appraiser is used to determine commercial lot values. | | |

2025 Agricultural Assessment Survey for Wheeler County

| 1. Valuation data collection done by: | | | | |
|--|--|--|--|--|
| | County Assessor and Staff, and Contract Appraiser | | | |
| 2. | Describe the process used to determine and monitor market areas. | | | |
| | Sales are analyzed each year to determine if one market area for the entire county is supported by the sales and market characteristics | | | |
| 3. Describe the process used to identify rural residential land and recreational land in apart from agricultural land. | | | | |
| | The primary use of the parcel is determined by physical inspection, sales verification, reviewing GIS imagery, and other means of normal discovery. | | | |
| 4. | Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value? | | | |
| | Yes | | | |
| 5. | What separate market analysis has been conducted where intensive use is identified in the county? | | | |
| | The intensive uses identified are feedlots, hog confinements and chicken barns valued at \$1,200/acre. The contract appraiser physically reviewed and inspected these properties and did a market analysis to arrive at the value. | | | |
| 6. | If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program. | | | |
| | The assessed value for the parcels enrolled in WRP is based on sales from the area. Current WRP acres are valued at \$525/acre. | | | |
| 6a. | Are any other agricultural subclasses used? If yes, please explain. | | | |
| | Irrigated Grass | | | |
| | If your county has special value applications, please answer the following | | | |
| 7a. | How many parcels have a special valuation application on file? | | | |
| | None | | | |
| 7b. | What process was used to determine if non-agricultural influences exist in the county? | | | |
| | N/A | | | |
| | If your county recognizes a special value, please answer the following | | | |
| 7c. | Describe the non-agricultural influences recognized within the county. | | | |
| | N/A | | | |
| 7d. | Where is the influenced area located within the county? | | | |
| | | | | |

| | N/A | | |
|-----|--|--|--|
| 7e. | Describe in detail how the special values were arrived at in the influenced area(s). | | |
| | N/A | | |

2024 THREE YEAR ASSESSMENT PLAN FOR

WHEELER COUNTY

Assessment Years 2025, 2026 and 2027 GENERAL DESCRIPTION OF COUNTY

Wheeler County is located in the Sandhills of Nebraska, and has a population of 774. There are two villages in the county, the county seat, Bartlett, population 103, and Ericson, population 92. The county economic base consists of mainly of Agricultural activities. The largest use of the land is raising cattle on grassland, row crops under center pivot irrigation and some dry land farming. Two major cattle feedlot operation and several major swine facilities are located in the county. Countywide zoning was implemented in 1998. The County seat is located in Bartlett.

Real Property Assessment Requirements:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade." Neb. Rev. State. 77-112(Reissue 2003) Assessment levels required for real property are as follows:

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land:
- 2) 75% of actual value for agricultural land and horticultural land; and
- 3) 75% of special value for agricultural and horticultural land which meets the qualifications for special valuation under 77-1344 and 75% of its recapture value as defined in 77-1343 when the land is disqualified for special valuation under 77-1347.

General Description of Real Property in Wheeler County: Per the 2024 County Abstract, Wheeler County consists of the following real property types.

| Parcels | % of Total Parcels | % of Taxable Value Base |
|-------------------|--------------------|-------------------------|
| Residential 722 | 36.26% | 8.08% |
| Commercial 73 | 3.67% | 1.35% |
| Recreational 9 | .45% | less than .01% |
| Agricultural 1187 | 59.62 % | 90.56% |

Agricultural land – 360,828.64. Total Taxable Acres 97.88% of County is agricultural and of that 80.36% consists primarily of grassland.

New Property: For assessment year 2024, an estimated 13 building permits and or information statements were filed for new property constructions/additions in the county. For more information see 2024 Reports & Opinions, Abstract and Assessor Survey.

CURRENT RESOURCES:

- A. **Staff/Budget/Training**: The Wheeler County Clerk serves also as the County Assessor, Clerk of District Court, Election Commissioner, Register of Deeds and Jury Commissioner. Her staff consists of one full time person. The Assessor & Staff both work on the assessment function. The assessor attends education classes on an annual basis to keep her Assessor's certificate current pursuant to requirement. The Assessor does her best to keep updated on all educational training, by means of attending classes, internet and manuals. The purposed budget for the 2023-24 fiscal year is \$10,000.00. The office has implemented MIPS CAMA system and is updating data to the program as the 6 year reviews are completed.
- B. **Maps**: The cadastral maps were done in 1966 and are still in good condition. The assessor & staff keep these maps updated routinely as to ownership and descriptions. Misc Maps used in the Assessor's office is a plat map of the County updated by ownership and displayed in the courthouse for the public, school district maps and precinct maps. Maps of Sales which are color coded are maintained. Aerial map is available.
- C. **Property Record Cards** –, current listings, photo, sketches, etc. There is a property card for every real estate property in the county. The real estate property cards are located in the recording room of the County Clerk/Ex-Officio Assessor office. The property record cards are maintained and kept current by the Assessor and Staff.

<u>RURAL</u>: The rural real estate and improvement parcels are color coded green and are organized in file cabinets by Section Twp and Rng, beginning with the northern most eastern corner of Wheeler County (Sec 1 Twp24 Rng 9) continuing through to the south western most corner of the county (Sec 31 Twp21 Rng 12).

<u>URBAN</u>: The County's village properties parcel cards are white colored coded and are organized in file cabinets by lot number and Village Additions.

<u>LAKE</u>: The Lake Ericson properties parcel cards are light blue colored coded and organized in file cabinet beginning with the first Lake lot extending to the last lot according to the plat of Lake Ericson.

COMMERICIAL: Commercial property cards are color coded yellow and are organized in file cabinets within the class of property the Commercial is located, (i.e., rural, urban, Lake.

- D. Software MIPS County Solution, Data entry and reports. Been adding sketches and information as 6 year review is being done.
- E. Web based –Fall of 2017 we went on with GIS. At this time we are working with GIS Workshop trying to get the many mistakes corrected on their site, such as parcels incorrectly labeled or sketched.

PROCEDURE MANUAL

Wheeler County has written policies and procedures. The assessor and Staff work together in updating the County policies and procedures. The Assessor reviews the policies and procedures with the County Attorney and County Commissioners.

APPRAISAL FUNCTIONS, CONTRACT WITH APPRAISER FOR THE DATA COLLECTION AND PRICING COLLECTION, REVIEW ASSESSMENT SALES RATIO STUDIES BEFORE ASSESSMENT ACTIONS: RECONCILIATION OF FINAL VALUE AND DOCUMENTATION.

Wheeler County contracts with a certified appraiser in the appraisal of improvements and annual pickup work. The appraiser is certified and follows all Regulations and IAOO guide lines. Appraiser is contracted on an annual basis to do the County's pickup work. The Assessor maintains a continuous list of pick-up work throughout the year. The Assessor reviews with the contracted Appraiser the list of pick-up work properties, discussing their locations by virtue of maps, and provides a signed notice to the Appraiser to be presented to the owner for the reason of property inspection. New improvements in the county are located by means of owner reporting, zoning permits, word of mouth and Assessor and Commissioner's driving of the county. The pickup work involves on site inspection, measurements, interior inspection when ever possible and interviewing the owner. The pickup work is completed every year in a timely matter and the growth calculated. Every effort is made to insure that information on all new construction is collected and included in the assessment rolls on an annual basis. Values are updated on an Annual Basis based on sales.

There are no Industrial or Special Value classes in Wheeler County, year 2024.

Level of Value, Quality, and Uniformity for assessment year 2024:

| Property Class | <u>Median</u> | COD* | <u>PRD*</u> |
|----------------|------------------|----------------|-------------|
| Residential | 95.00% | 19.66 | 106.49 |
| Commercial | 100.0% | NA | NA |
| Recreational | Not enough Sales | s to Determine | |
| Agricultural | 72.0% | 22.45% | 84.65 |

^{*}COD means coefficient of dispersion and PRD means price related differential. For more information regarding statistical measures see 2024 Reports & Opinions.

- f. Tax List Corrections prepare tax list correction documents for county board approval.
- g. County Board of Equalization attends taxpayer appeal hearings before TERC, defend valuation.
- h. TERC Appeals prepare information and attend taxpayer appeal hearings before TERC, defend valuation.
- i. TERC Statewide Equalization attend hearings if applicable to county, defend values and/or implement orders of the TERC.

CONCLUSION

The Assessor is a Clerk-Ex officio who has numerous duties in addition to the Assessor's function. She has one employee to assist her in all her various duties. The county board, in the past, has authorized general appraisals by outside appraisers when the need arises.

Wheeler county will, of course, continue annually updating values based on market studies and sales, maintain & update all Assessor's records and to do the annual pickup work. In the event that a disparity in general valuations and values appear in any classification we will undertake a general professional

revaluation study for that classification. Wheeler County will maintain the standards of Level of Value and Quality of Assessment as required by Nebraska Law and Regulations.

Respectfully submitted.

Cara Sníder

Wheeler County Assessor
