

BEFORE THE NEBRASKA TAX EQUALIZATION AND REVIEW COMMISSION

Julie R. Culler,
Appellant,

Case No: 11R 490

v.

Decision Reversing
County Board of Equalization

Douglas County Board of Equalization,
Appellee.

GENERAL BACKGROUND & PROCEDURAL HISTORY

1. The Subject Property is a residential parcel located at 5725 North 167th Avenue, Omaha, Douglas County, Nebraska.
2. The Douglas County Assessor assessed the Subject Property at \$180,000 for tax year 2011.
3. Julie R. Culler (herein referred to as the "Taxpayer") protested this value to the Douglas County Board of Equalization (herein referred to as the "County Board") and requested a \$160,000 valuation.
4. The County Board determined that the assessed value of the Subject Property was \$180,000 for tax year 2011.
5. The Taxpayer appealed the determination of the County Board to the Tax Equalization and Review Commission (herein referred to as the "Commission").
6. A Single Commissioner hearing was held on June 24, 2013, at the Omaha State Office Bldg., 1313 Farnam, Omaha, Nebraska, before Commissioner Thomas D. Freimuth.
7. Julie R. Culler, the Taxpayer, was present at the hearing.
8. Brian Grimm, an employee of the Douglas County Assessor's Office, was present for the County Board.

SUMMARY OF HEARING DOCUMENTS & STATEMENTS

9. The Property Record Profile contained in the Assessment Report submitted by the County Board at the hearing indicates that the Taxpayer purchased the Subject Property for \$151,000 on October 29, 2010. The 1,406 square foot townhouse situated on the Subject Property was constructed in 2005.
10. The Property Record Profile for the Subject Property indicates that the County Board's \$180,000 determination for tax year 2011 includes \$21,000 for land and \$159,000 for the improvement component.
11. The Assessment Report indicates that the County Assessor's notice value for tax year 2011 attributable to the Subject Property's improvement component was based on a cost approach mass appraisal model.
12. The one-page "PVAL" document contained in the Assessment Report indicates that the County Board valued the Subject Property at \$134,200 in tax year 2005 and at \$153,800 for tax year 2006. The County Board increased the assessment of the Subject Property to \$156,300 for tax years 2007 and 2008 and to \$173,300 for tax years 2009 and 2010.

13. The Taxpayer asserted that the actual value of the Subject Property for tax year 2011 approximated her \$151,000 purchase price in October 2010. In support of this opinion of value, the Taxpayer submitted a \$160,000 fee appraisal of the Subject Property dated “as of” October 19, 2010, which she obtained in connection with purchase financing.
14. The Taxpayer’s appraisal is based on the sales comparison valuation approach. Of the four comparable sales analyzed in the appraisal, one involved the \$151,000 sale of a substantially similar parcel in close proximity to the Subject Property in September 2010. The appraiser deemed this transaction to be arm’s length.
15. The Taxpayer’s appraisal states that the Subject Property was originally listed in the Multiple Listing Service system in February 2010 for \$234,900 and then re-listed for the following amounts: (1) \$200,000 in April 2010; (2) \$189,900 in May 2010; (3) \$179,900 in June 2010; (4) \$169,900 in July 2010; (5) \$159,900 in August 2010; and (6) \$154,900 in September 2010.
16. The Taxpayer’s appraisal notes “market resistance” regarding general market conditions.
17. In further support of her \$151,000 opinion of value, the Taxpayer submitted documentation (screen-shots from the Douglas County Assessor’s website) analyzing the sale history of nearby parcels.

STANDARD OF REVIEW

18. The Commission’s review of the determination of the County Board of Equalization is de novo.¹ “When an appeal is conducted as a ‘trial de novo,’ as opposed to a ‘trial de novo on the record,’ it means literally a new hearing and not merely new findings of fact based upon a previous record. A trial de novo is conducted as though the earlier trial had not been held in the first place, and evidence is taken anew as such evidence is available at the time of the trial on appeal.”²
19. When considering an appeal a presumption exists that the “board of equalization has faithfully performed its official duties in making an assessment and has acted upon sufficient competent evidence to justify its action.”³ That presumption “remains until there is competent evidence to the contrary presented, and the presumption disappears when there is competent evidence adduced on appeal to the contrary. From that point forward, the reasonableness of the valuation fixed by the board of equalization becomes one of fact based upon all the evidence presented. The burden of showing such valuation to be unreasonable rests upon the taxpayer on appeal from the action of the board.”⁴
20. The order, decision, determination or action appealed from shall be affirmed unless evidence is adduced establishing that the order, decision, determination, or action was unreasonable or arbitrary.⁵
21. Proof that the order, decision, determination, or action was unreasonable or arbitrary must be made by clear and convincing evidence.⁶

⁶ *Omaha Country Club v. Douglas Cty. Bd. of Equal.*, 11 Neb. App. 171, 645 N.W.2d 821 (2002).

GENERAL VALUATION LAW

22. A Taxpayer must introduce competent evidence of actual value of the subject property in order to successfully claim that the subject property is overvalued.⁷
23. “Actual value, market value, and fair market value mean exactly the same thing.”⁸
24. Taxable value is the percentage of actual value subject to taxation as directed by Nebraska Statutes section 77-201 and has the same meaning as assessed value.⁹
25. All real property in Nebraska subject to taxation shall be assessed as of January 1.¹⁰
26. All taxable real property, with the exception of agricultural land and horticultural land, shall be valued at actual value for purposes of taxation.¹¹
27. Nebraska Statutes section 77-112 defines actual value as follows:

Actual value of real property for purposes of taxation means the market value of real property in the ordinary course of trade. Actual value may be determined using professionally accepted mass appraisal methods, including, but not limited to, the (1) sales comparison approach using the guidelines in section 77-1371, (2) income approach, and (3) cost approach. Actual value is the most probable price expressed in terms of money that a property will bring if exposed for sale in the open market, or in an arm’s length transaction, between a willing buyer and a willing seller, both of whom are knowledgeable concerning all the uses to which the real property is adapted and for which the real property is capable of being used. In analyzing the uses and restrictions applicable to real property the analysis shall include a full description of the physical characteristics of the real property and an identification of the property rights valued.¹²

VALUATION ANALYSIS

28. The Taxpayer’s \$160,000 fee appraisal and other sales analysis documentation that she submitted can best be described as an attempt to value the Subject Property using the sales comparison approach.
29. The sales comparison approach involves a defined systematic procedure that requires, among other steps, the following: “[l]ook for differences between the comparable sale properties and the subject property using the elements of comparison. Then adjust the price of each sale to reflect how it differs from the subject property or eliminate that property as a comparable. This step typically involves using the most comparable sale properties and then adjusting for any remaining differences.”¹³
30. The elements of comparison include real property rights conveyed in the sales, any financing terms, condition of the sale, expenditures made immediately after purchase,

market conditions, location, physical characteristics, economic characteristics, use and zoning, and any non-realty components of value.¹⁴ Consideration of many of these characteristics is required under Nebraska Statutes section 77-1371, which provides that “[c]omparable sales are recent sales of properties that are similar to the property being assessed in significant physical, functional, and location characteristics and in their contribution to value.”¹⁵

31. Based on a review of the Taxpayer’s fee appraisal, which relies on the sales comparison approach, together with all of the other documents and statements submitted at the hearing, the Commission finds clear and convincing evidence that the County Board’s determination for tax year 2011 was arbitrary or unreasonable.
32. The Commission further finds that the best evidence of value in this case is the \$160,000 valuation contained in the Taxpayer’s fee appraisal.

DISTRESSED SALES AS INDICATOR OF VALUE ANALYSIS

33. The Taxpayer asserted that the actual value of the Subject Property for tax year 2011 approximated her \$151,000 purchase price in October 2010.
34. In determining whether the Taxpayer has produced competent evidence that the County Board failed to faithfully perform its duties and to act on sufficient competent evidence to justify its actions, the Commission is mindful that “[s]ale price is not synonymous with actual value or fair market value.”¹⁶ The Commission is also mindful, however, that where the evidence indicates that the sale of the property was an arm’s length transaction, the sale price should be given strong consideration.¹⁷
35. The County’s representative noted that the \$151,000 sale of the Subject Property in October 2010 relied upon by the Taxpayer for her opinion of value was a foreclosure or otherwise distressed transaction and therefore not arm’s-length. The Commission notes that the Property Profile for the Subject Property indicates that the grantor in the October 2010 transaction was Wells Fargo Bank, which indicates that the sale was distressed in some manner.
36. The County’s representatives stated that the County does not consider distressed transactions valid for use in its valuation models. The County’s representatives further indicated that the County Assessor’s mass appraisal models used to value properties in the Subject Property’s market area exclude foreclosure sales and other distressed sales that are deemed not arm’s-length.
37. *The Dictionary of Real Estate Appraisal* defines an arm’s-length transaction as follows: “A transaction between unrelated parties under no duress.”¹⁸
38. In connection with the sales comparison approach to valuation, *The Appraisal of Real Estate* states as follows: “[s]ales that are not arm’s-length...should be identified and rarely if ever used.”¹⁹

¹⁴ *The Appraisal of Real Estate*, 13th Edition, Appraisal Institute (2008) at p. 141.

¹⁵ Neb. Rev. Stat. §77-1371 (Reissue 2009).

¹⁸ *The Dictionary of Real Estate Appraisal*, 4th Ed., Appraisal Institute, 2002, at p. 18.

¹⁹ *The Appraisal of Real Estate*, 13th Edition, Appraisal Institute, 2008, at p. 304.

39. As indicated above in the General Valuation Law section, Nebraska Statutes section 77-112 references arm's-length transactions in defining actual (i.e., market) value, stating as follows:

Actual value is the most probable price expressed in terms of money that a property will bring if exposed for sale in the open market, or in an arm's length transaction, between a willing buyer and a willing seller, both of whom are knowledgeable concerning all the uses to which the real property is adapted and for which the real property is capable of being used.²⁰

40. In addition to the factors referenced above in Nebraska Statutes section 77-112, *Property Assessment Valuation* states that actual or market value is derived from transactions involving "reasonable time for exposure to the market."²¹
41. The Taxpayer asserted that the economic crisis that began in 2007 created an environment where distressed transactions were a significant factor in the Subject Property's market area in the period leading up to tax year 2011. Consequently, the Taxpayer asserted that distressed transactions such as foreclosures, bank sales and short sales are valid indicators of value under the sales comparison approach and should be considered by the County in its mass appraisal models.
42. General guidance regarding consideration of the economic crisis by the County in the residential mass appraisal context is contained in *Property Assessment Valuation*, which is published by the International Association of Assessing Officers.²² For example, *Property Assessment Valuation* states that assessment officials are required to review factors such as foreclosure rates and vacancy rates as a part of developing and maintaining market area databases.²³ Additionally, in addressing mass appraisal techniques such as the model used by the County to value the Subject Property, *Property Assessment Valuation* states as follows:

Although the structure of a mass appraisal model may be valid for many years, the model is usually recalibrated or updated every year. To update for short periods, trending factors may suffice. Over longer periods, as the relationships among the variables in market value change, complete market analyses are required. **The goal is for mass appraisal equations and schedules to reflect current market conditions.**²⁴

43. The Illinois Court of Appeal stated as follows regarding consideration of "current market conditions" in a 2012 opinion affirming a lower court's approval of a \$300,000 judicial foreclosure sale of commercial real estate secured by a note with a principal balance in the amount of \$824,540:

²⁰ Neb. Rev. Stat. § 77-112 (Reissue 2009).

²¹ *Property Assessment Valuation*, 3rd Ed., International Association of Assessing Officers, 2010, at p. 15; See, *The Appraisal of Real Estate*, 13 ed., Appraisal Institute, 2008, at pgs. 54-77

²² *Property Assessment Valuation*, 3rd Ed., International Association of Assessing Officers, 2010, at pgs. 73 - 83.

²³ *Property Assessment Valuation*, 3rd Ed., International Association of Assessing Officers, 2010, at pgs. 77 - 83.

²⁴ *Property Assessment Valuation*, 3rd Ed., International Association of Assessing Officers, 2010, at p. 417-18 (emphasis added).

Our courts today face a similar situation as that faced by the court in [1937] *Levy* during the Great Depression, in that many properties were purchased during a time when real estate values greatly increased (referred to as “the real estate bubble”) **and those same properties plummeted in value after 2006 [and] continuing to the present.** Consequently, many property owners owe much more to the lenders than what the property is worth. While this fact is unquestionably tragic, the value of a given piece of property must be determined by considering all of the pertinent factors as they exist at the time of the sale, whether such sale is made in the open market or through a judicial sale as a result of a foreclosure action.²⁵

44. The Nebraska Supreme Court has also recently considered “current market conditions” in the aftermath of the economic crisis. In *County of Lancaster v. Union Bank & Trust Co. (In re Estate of Craven)*, the Court upheld a ruling issued by the Lancaster County Court that the \$113,000 purchase price of property sold at an estate auction in a weak real estate market after the decedent’s death in 2008 stemmed from an arm’s length transaction and was the best evidence of value for inheritance tax purposes.²⁶
45. With respect to whether distressed sales can be considered reliable indicators of market value in the property tax context, several courts outside of Nebraska have issued opinions in the aftermath of the economic crisis.²⁷ For instance, in 2012 the Oregon Tax Court considered whether “foreclosures and short sales characterize the market for the subject property” in *Greene v. Benton County Assessor*.²⁸ In noting the view of an Idaho assessment official, the Court stated as follows:

The Taxpayer testified that, although he is not a licensed broker or appraiser, he owns 11 properties and is experienced in real estate. As support that the subject property sale is representative of its real market value, Greene provided an article by Alan Smith (Smith), Deputy Assessor, Ada County Assessor’s Office, Boise, Idaho, entitled “Distressed Sales: Anomaly or Market Value?” Smith states that “bank-owned resales, if they are marketed by a realtor, or through a multiple listing service for a time period considered to be an average exposure to the market, will likely be very close to fair market value in this type of market.”²⁹

²⁵ *Sewickley, LLC v. Chicago Title and Trust Company*, 974 N.E.2d 397, 406 (Court of Appeal of Illinois, First District, Second Division 2012) (emphasis added).

²⁶ *County of Lancaster v. Union Bank & Trust Co. (In re Estate of Craven)*, 281 Neb. 122, 794 N.W.2d 406 (Neb. 2011).

²⁷ *Greene v. Benton County Assessor*, TC-MD 110687N (Oregon Tax Court 2012); *Voronaeff v. Crook County Assessor*, TC-MD No 110361C (Oregon Tax Court 2012); *Brashnyk v. Lane County Assessor*, TC-MD No 110308 (Oregon Tax Court 2011); *Witkin v. Lane County Assessor*, TC-MD No 110460C (Oregon Tax Court 2012); *Umpqua Bank v. Lane County Assessor*, TC-MD No 110594N (Oregon Tax Court 2012); *Columbus City School Dist. Bd. of Education v. Franklin County*, 983 N.E.2d 1285, 134 Ohio St.3d 529 (Ohio Supreme Court 2012) (bank sale deemed arm's-length because bank acted like a typically motivated seller); *Cattell v. Lake Cty. Bd. of Revision*, 2010-Ohio-4426, 2009-L-161 (Ohio Court of Appeals, Eleventh District 2010) (bank sales deemed arm's-length where properties were listed with a realtor on the open market).

²⁸ *Greene v. Benton County Assessor*, TC-MD 110687N, at p. 8 (Oregon Tax Court 2012).

²⁹ *Greene v. Benton County Assessor*, TC-MD 110687N, at p. 3 (Oregon Tax Court 2012).

46. In holding that the Taxpayer failed to prove that foreclosures or short sales characterized the market under the sales comparison approach, the Oregon Tax Court in *Greene* indicated that proof that the “majority” of market area sales were distressed is required:

[P]roperty purchased through foreclosure may be “a voluntary *bona fide* arm’s-length transaction between a knowledgeable and willing buyer and a willing seller.” *Ward v. Dept. of Revenue*, 293 Or 506, 508, 650 P2d 923 (1982). “There are narrow exceptions determined on a case-by-case basis to the holding that bank-owned property sales are not typically representative of real market value.” *Brashnyk v. Lane County Assessor (Brashnyk)*, TC-MD No 110308 at 8, WL 6182028 *5 (Dec 12, 2011). “[W]here the majority of sales are distress, it would seem that that kind of sale would provide a more accurate reflection of the market.” *Morrow Co. Grain Growers v. Dept. of Rev. (Morrow)*, 10 OTR 146, 148 (1985)..... Plaintiffs have not presented any evidence that foreclosures and short sales characterize the market for the subject property. Plaintiffs provided a list of sales that occurred between 2003 and 2011 in the subject property neighborhood; unadjusted sale prices in 2008, 2009, and 2010, ranged from \$335,000 to \$452,000. It is not clear which, if any, of those sales were foreclosures or short sales. Plaintiffs’ purchase of the subject property for \$295,000 in May 2009 is the lowest sale price identified for any of the years, 2003 through 2011. “Usually, one sale does not make a market.” *Truitt Brothers, Inc. v. Dept. of Rev.*, 302 Or 603, 609, 732 P2d 497 (1987).³⁰

47. The Oregon Tax Court has also considered the amount of open market exposure necessary to constitute an arm’s length transaction. For instance, in *Bennett Family Trust v. Deschutes County Assessor* the Court stated as follows in finding that the sale price of bank-owned property listed on the open market for over two years reflected actual value:

If a property has been marketed for a sufficiently long period of time, and properly exposed to the market, etc., the implication of distress on the part of the seller is removed and a bank sale may be found to be arm’s-length. *Ward v. Dept. of Revenue (Ward)*, 293 Or 506, 508, 650 P2d 923 (1982). The courts have found that a marketing period of between one and two years is sufficiently long. *Id.* (bank acquired property in 1976, taxpayer agreed to purchase in January 1978, and taxpayer completed purchase in June 1978); *Ernst Brothers Corp. v. Dept. of Rev. (Ernst Bros.)*, 320 Or 294, 305, 882 P2d 591 (1994) (18 month marketing period sufficient where expert had testified that a one to five year marketing period was necessary).³¹

48. The Oregon Tax Court has further considered three Oregon Department of Revenue directives issued to county assessors in 2009 and 2010 regarding consideration of

³⁰ *Greene v. Benton County Assessor*, TC-MD 110687N, at p. 8 (Oregon Tax Court 2012).

³¹ *Bennett Family Trust v. Deschutes County Assessor*, TC-MD No 120096C, at p. 8 (Oregon Tax Court 2012).

distressed transactions for purposes of the sales comparison approach and ratio studies.³² For instance, in *Brashnyk v. Lane County Assessor*, the Oregon Tax Court addressed whether bank sales were valid indicators of market value and quoted the Oregon Department of Revenue’s memorandum entitled “Valid Market Sales for Oregon Assessment Purposes” issued to county assessors on January 21, 2009:

‘[s]o long as the nominal standards for an acceptable comparable sale are met – arm’s length, voluntary, knowledgeable parties, exposure to the market, cash equivalent, etc. – such [bank] sales are appropriate to consider. Under the market value definition standard, any sale that meets those criteria should be considered as a potential comparable.’³³

49. In *Voronaeff v. Crook County Assessor*, the Oregon Tax Court addressed whether short sales were valid indicators of market value and quoted the Oregon Department of Revenue’s memorandum entitled “Valid Market Sales for Oregon Assessment Purposes” issued to county assessors on January 21, 2009:

‘[Short sales] should be carefully reviewed to determine if they meet the relevant criteria for a comparable. The mere fact that there is, presumably, some duress on the part of the seller (the upside down owner) that prompts the sale, does not itself disqualify the transaction from consideration, especially when there is some duress in the market. This situation is analogous to the owner losing his job and selling because he can’t make the mortgage payments. *We wouldn’t discount that sale simply because the owner was very motivated to sell* (some duress) so long as the sale was an arm’s-length with adequate exposure and contained no unusual financing terms or elements that couldn’t be adjusted out.’³⁴

50. In *Voronaeff v. Crook County Assessor*, the Oregon Tax Court also included the following excerpt from a letter from the Oregon Department of Revenue to the Crook County Assessor dated February 1, 2010:

‘We recommend you analyze all sales, foreclosure, short or otherwise, and determine if they represent market conditions. If elements of a particular sale raise reasonable doubt that the sale doesn’t represent the market, prevailing wisdom suggests eliminating that sale in the market value study. However, in a declining market, foreclosures and short sales are common and in many cases can and should be used in market value studies. *If, in your opinion, the current economics and market conditions, as of the valuation date, indicate some level of distress is a common*

³² *Brashnyk v. Lane County Assessor*, TC-MD No 110308, at p. 9 (Oregon Tax Court 2011); *Voronaeff v. Crook County Assessor*, TC-MD No 110361C, at p. 8-9 (Oregon Tax Court 2012).

³³ *Brashnyk v. Lane County Assessor*, TC-MD No 110308, at p. 9 (Oregon Tax Court 2011).

³⁴ *Voronaeff v. Crook County Assessor*, TC-MD No 110361C, at p. 9 (Oregon Tax Court 2012). [Emphasis in original Memorandum.]

*market characteristic, it is appropriate to include such sales in a comparable sale's value analysis or a ratio study.*³⁵

51. The Nebraska Department of Revenue Property Assessment Division's Sales File Practice Manuals for the beginning of the economic crisis in tax year 2008 through tax year 2011 do not address circumstances where foreclosures or short sales could be reliable indicators of market value. Nebraska's Sales File Practice Manual for tax year 2012, however, states as follows:

A deed transfer in lieu of foreclosure is a deed that is transferring the real property back to the original owner prior to the property being foreclosed on and should be considered a non-arm's length transaction.

A sale in which a lien holder is the buyer may be in lieu of a foreclosure or a judgment and the sale price may equal the loan balance only.

In a market where foreclosure properties are abundant, buyers may have comparable foreclosure properties to choose over conventional listings. Weak economic conditions in an area may cause the general residential and commercial market to meet the market of the foreclosure property resales, making foreclosures valid indicators of market value for non foreclosure properties.³⁶

52. Nebraska's 2011 and 2012 Sales File Practice Manuals also state as follows with respect to consideration of sales from banks for purposes of determining whether such a transaction is arm's-length:

Sales from banks should not be automatically considered a non-arm's-length transaction especially if you do not have an abundant supply of sales. Typically, values will be on the low end of the value range, but they may be considered arm's length transactions and included in the ratio study if all other criteria for being an open market arm's-length transaction are met.³⁷

53. As noted above, the Nebraska Supreme Court recently upheld a ruling issued by the Lancaster County Court that the \$113,000 purchase price of property sold at an estate auction in a weak real estate market after the decedent's death in 2008 stemmed from an arm's length transaction and was the best evidence of value for inheritance tax purposes.³⁸

54. Based on this Nebraska Supreme Court holding and the Nebraska Property Assessment Division's Sales File Practice Manual guidance set forth above regarding distressed sales, together with the statement in the Taxpayer's \$160,000 appraisal noted previously

³⁵ *Voronaeff v. Crook County Assessor*, TC-MD No 110361C, at pgs. 8-9 (Oregon Tax Court 2012). [Emphasis in original Letter.]

³⁶ 2012 Statewide Equalization Exhibit 107, p. 31.

³⁷ 2011 Statewide Equalization Exhibit 107, p. 117; 2012 Statewide Equalization Exhibit 107, p. 32.

³⁸ *County of Lancaster v. Union Bank & Trust Co. (In re Estate of Craven)*, 281 Neb. 122, 794 N.W.2d 406 (Neb. 2011).

concerning less than optimum market conditions in 2011 in the aftermath of the economic crisis (i.e., “market resistance”), the Commission finds that the Taxpayer’s purchase price is strong evidence of actual market value in this particular case as of January 1, 2011. In addition, while the cases discussed above from jurisdictions outside of Nebraska are not controlling, the Commission finds that they are instructive for purposes of this finding.

CONCLUSION

- 55. The Taxpayer has produced competent evidence that the County Board failed to faithfully perform its duties and to act on sufficient competent evidence to justify its actions.
- 56. The Taxpayer has adduced sufficient, clear and convincing evidence that the determination of the County Board is unreasonable or arbitrary and the decision of the County Board should be vacated and reversed.

ORDER

IT IS ORDERED THAT:

- 1. The Decision of the Douglas County Board of Equalization determining the value of the Subject Property for tax year 2011 is vacated and reversed.
- 2. That the taxable value of the Subject Property for tax year 2011:

Land	\$ 21,000
Improvements	\$139,000
Total	\$160,000

- 3. This decision and order, if no further action is taken, shall be certified to the Douglas County Treasurer and the Douglas County Assessor, pursuant to Neb. Rev. Stat. §77-5018 (2012 Cum. Supp.).
- 4. Any request for relief, by any party, which is not specifically provided for by this order is denied.
- 5. Each Party is to bear its own costs in this proceeding.
- 6. This decision shall only be applicable to tax year 2011.
- 7. This order is effective on February 14, 2014.

Signed and Sealed: February 14, 2014.

Thomas D. Freimuth, Commissioner
