Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Antelope County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Antelope County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Kelly Mueller, Antelope County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

| Property Class | COD | <u>PRD</u> |
|-------------------|-------|------------|
| Residential | .0515 | .98-1.03 |
| Newer Residential | .0510 | .98-1.03 |
| Commercial | .0520 | .98-1.03 |
| Agricultural Land | .0525 | .98-1.03 |

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

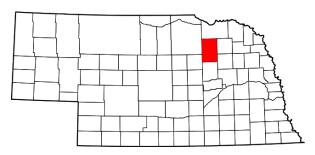

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

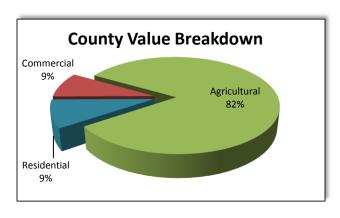

County Overview

With a total area of 857 square miles, Antelope had 6,398 residents, per the Census Bureau Quick Facts for 2014, a 4% population decline from the 2010 US Census. In a review of the past fifty years, Antelope has seen a steady drop in population of 37% (Nebraska Department of Economic Development). Reports indicated that

76% of county residents were homeowners and 90% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Antelope convene in and around Neligh, the county seat. Per the latest information available from the U.S. Census Bureau, there were 219 employer establishments in Antelope. County-wide employment was at 1,542 people, a 4% loss relative to

the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Antelope that has fortified the local rural area economies. Antelope is included in the Upper Elkhorn Natural Resources District (NRD). Irrigated land makes up the majority of the land in the county. When compared against the top crops of the other counties in Nebraska, Antelope ranks third in turkeys, fourth in popcorn, and fifth in hogs and pigs. In value of sales by commodity group, Antelope ranks fourth in both hogs and pigs and milk from cows (USDA AgCensus).

2016 Residential Correlation for Antelope County

Assessment Actions

For the residential class of property each valuation grouping was physically reviewed and inspected by office staff. New pictures were taken and the depreciation was updated. Rural residential land use was also reviewed throughout the county. The pick up work was completed timely.

Description of Analysis

Residential sales are stratified into eight valuation groupings. The majority of sales occur within valuation group 01 which consists of Neligh and Elgin which accounts for about 55% of the residential population.

| Valuation Grouping | Assessor Location |
|--------------------|-------------------|
| 01 | Neligh and Elgin |
| 05 | Tilden |
| 10 | Oakdale |
| 20 | Brunswick |
| 25 | Orchard |
| 30 | Clearwater |
| 35 | Rural |
| 40 | Royal |

The residential profile for Antelope County is made up of 120 total sales representing each of the eight valuation groupings. All three measures of central tendency for the residential class of properties are within the acceptable range and supportive of one another. The coefficient of dispersion and the price related differential are slightly above, but can be attributed to low dollar sales.

The indicated trend for the residential market demonstrates an increasing market. An approximate 4% increase for the county as a whole is observed for the two year study period as evidenced by examining the study year statistics.

| DATE OF SALE * RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
|------------------------|-------|--------|--------|----------|-------|--------|
| Study Yrs | | | | | | |
| 01-OCT-13 To 30-SEP-14 | 57 | 98.55 | 102.32 | 93.26 | 21.79 | 109.71 |
| 01-OCT-14 To 30-SEP-15 | 63 | 94.34 | 97.04 | 92.50 | 21.62 | 104.91 |

2016 Residential Correlation for Antelope County

This upward trend is consistent through each of the valuation groups in the county. This indicates that overall, residential value within the county has followed the general residential market activity.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One area of review is the county's sales qualification and verification processes. Antelope County has developed a sound procedure for verification. The county's sales verification process includes sending a verification questionnaire to all parties involved in the transaction. Any questions not answered by the questionnaire are followed up with a telephone interview by the county assessor or deputy county assessor. On-site review of the property is conducted if deemed necessary. Review of the non-qualified sales roster indicates that sales are generally coded properly and include a reasonable explanation for non-qualification. The county's process of sales qualification and documentation of non-qualified sales indicates that all available sales are being used for measurement.

The review also looked at the filing of Real Estate Transfer Statements as well as a check of the values reported on the Assessed Value Update (AVU). The transfer statements most recently are being filed monthly and the AVU was also accurate when compared with the property record cards.

The county's inspection and review cycle for all real property was discussed with the county assessor. The last residential review and inspection for all valuation groupings was completed in 2015 with exception to rural residential. Lot studies were last done in 2015 for the acreages and 2013 for all other valuation groupings. Farm homes and outbuildings are set up on the six year review cycle with different townships being reviewed each year.

Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the county has adequately identified economic areas for the residential property class.

Equalization and Quality of Assessment

The valuation group substratum indicates that all groups with sufficient sales are statistically within the acceptable range.

2016 Residential Correlation for Antelope County

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 66 | 99.29 | 101.46 | 93.53 | 18.69 | 108.48 |
| 05 | 9 | 96.33 | 92.64 | 93.24 | 11.92 | 99.36 |
| 10 | 8 | 98.18 | 101.61 | 100.53 | 21.67 | 101.07 |
| 20 | 2 | 88.32 | 88.32 | 89.34 | 02.16 | 98.86 |
| 25 | 9 | 100.78 | 108.96 | 98.69 | 28.01 | 110.41 |
| 30 | 13 | 94.35 | 94.37 | 81.38 | 28.00 | 115.96 |
| 35 | 11 | 95.35 | 92.72 | 91.93 | 20.81 | 100.86 |
| 40 | 2 | 99.20 | 99.20 | 23.25 | 87.50 | 426.67 |
| ALL | 120 | 96.88 | 99.55 | 92.80 | 21.67 | 107.27 |

Based on the assessment practices review and the statistical analysis, the quality of assessment in Antelope County is in compliance with professionally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Antelope County is 97%.

Assessment Actions

For the 2016 assessment year all office buildings and mini-mart/gas stations throughout Antelope County were reviewed/inspected and revalued. All pick up work was also completed.

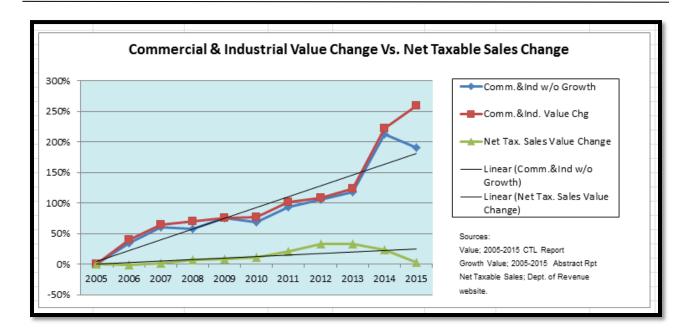

Description of Analysis

There are eight valuation groupings utilized in the valuation of the commercial class.

| Valuation Grouping | Assessor Location |
|-----------------------|----------------------|
| 01 | Neligh |
| 05 | Tilden |
| 10 | Oakdale |
| 15 | Elgin |
| 20 | Brunswick |
| 25 | Orchard |
| 30 | Clearwater |
| 35 | Rural |

The statistical analysis for the commercial class of real property has nineteen qualified sales distributed in seven of the valuation groupings. With a small sample such as this the reliability of the sample in representing the population for measurement purposes is reduced. Only the mean measure of central tendency is within the acceptable level and the wide dispersion in the statistical measures indicates that any adjustments to this class would not improve the equalization.

Determination of overall commercial activity within the county included the Analysis of Net Taxable Sales—non-Motor Vehicle (http://revenue.nebraska.gov/research/salestax_data.html) as one indicator of commercial market activity.

The Net Taxable Sales point toward an Average Annual Rate of .56% net increase over the last eleven years. The Annual Percent Change in assessed value illustrates an average annual percent change excluding growth for the same time period of 9.23%, a -8.67 point difference.

Except for 2006 and 2013, the movement in the Net Taxable Sales had indicated a somewhat positive upward trend until 2014 and 2015. A review of the Net Taxable Sales from 2014 to 2015 reveals that overall there was a decrease in collections of 17.48%. Since Antelope County relies on the agricultural economy another factor having impact was a legislative change in the collection of sales tax for the repair and parts of agricultural equipment and machinery which is now exempt from collection as of October 1, 2014.

The 'Study Yrs' on the statistical profile is indicating the commercial values to be lagging behind the market. The Three Year Plan of Assessment notes the commercial class is scheduled to begin review in 2016 and continue into 2017 and 2018.

| Study Yrs | | | | | | |
|------------------------|---|-------|--------|-------|-------|--------|
| 01-OCT-12 To 30-SEP-13 | 6 | 93.75 | 141.39 | 84.71 | 68.45 | 166.91 |
| 01-OCT-13 To 30-SEP-14 | 9 | 74.42 | 73.89 | 71.38 | 12.07 | 103.55 |
| 01-OCT-14 To 30-SEP-15 | 4 | 52.79 | 62.16 | 54.45 | 46.22 | 114.16 |

There are twelve occupancy codes represented in the sales file. They were reduced into six occupancy series in order to possibly create a subclass based on primary use. None of the groups contained more than 7 sales; this stratification was not meaningful to the analysis.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes, and any incongruities are noted and discussed with the county assessor for further action.

One area of review is the county's sales qualification and verification processes. Antelope County has developed a sound procedure for verification. The county's sales verification process includes sending a verification questionnaire to all parties involved in the transaction. Any questions not answered by the questionnaire are followed up with a telephone interview by the county assessor or deputy. On-site review of the property is conducted if deemed necessary. Review of the non-qualified sales roster indicates that sales are generally coded properly and include a reasonable explanation for non-qualification. The county's process of sales qualification and documentation of non-qualified sales indicates that all available sales are being used for measurement.

The review also looked at the filing of Real Estate Transfer Statements as well as a check of the values reported on the Assessed Value Update (AVU). The transfer statements are being filed monthly and the AVU was also accurate when compared with the property record cards.

The county's inspection and review cycle for all real property was discussed with the county assessor. The last commercial review and inspection was completed in 2014 for valuation grouping 15-Elgin, 2011 for VG 30-Clearwater, and 2010 for all other groupings. Lot studies were last done in 2013 for all valuation groupings.

Equalization and Quality of Assessment

For measurement purposes the commercial sample is unreliable and does not represent the commercial class as a whole or by substrata.

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 6 | 68.16 | 63.16 | 61.43 | 17.75 | 102.82 |
| 10 | 1 | 100.00 | 100.00 | 100.00 | 00.00 | 100.00 |
| 15 | 2 | 70.50 | 70.50 | 75.52 | 10.60 | 93.35 |
| 20 | 2 | 246.34 | 246.34 | 113.77 | 63.60 | 216.52 |
| 25 | 3 | 76.17 | 75.00 | 66.09 | 36.26 | 113.48 |
| 30 | 4 | 86.12 | 86.44 | 78.39 | 20.32 | 110.27 |
| 35 | 1 | 78.53 | 78.53 | 78.53 | 00.00 | 100.00 |
| ALL | 19 | 76.17 | 92.73 | 70.42 | 43.06 | 131.68 |

With the information available it was confirmed that the assessment practices are reliable and applied consistently. It is believed the commercial properties are being treated in a uniform and proportionate manner.

Level of Value

Based on the consideration of all available information and assessment practices, the level of value is determined to be at the statutory level of 100% of market value for the commercial class of real property.

2016 Agricultural Correlation for Antelope County

Assessment Actions

For 2016 after an analysis of the markets the county assessor decided to combine market area 2 with market area 1. All animal confinements throughout the county were physically reviewed and revalued. A sales analysis was completed with crop land slightly decreasing and grass land increasing approximately 10%.

Description of Analysis

Antelope County is now divided into two market areas. Market Area 1 is the north and west portion of the county that consists of moderately to steeply sloping soils as well as sandy and silty soils on uplands. Market Area 3 is the southeasterly portion of the county which has deep, gently sloping to steep, silty soils. These are well drained soils with high suitability for irrigation, as water availability is present throughout the area. The comparable counties to Market Area 1 are Pierce, Knox area two, Holt area one, Wheeler and Boone. Boone area one, Madison area one and Pierce are comparable to market area 3.

Analysis of the sales within the county showed that market area 1 had a disproportionate number of sales in the newer years. Market Area 3 was lacking sales in the middle and oldest years. Comparable sales from outside Antelope County were supplemented in both samples to maximize the majority land use (MLU) sample sizes and achieve a proportionate and representative mix of sales. The Market Area 3 sample is still somewhat small, particularly in the majority land use subclass of grass.

The statistics calculated for market area 1 supports that values are within the acceptable range for the overall area and for the irrigated, dry and grass land subclasses for the 80% majority land use subclass. The Market Area 3 statistics also support that values are within the acceptable range for the overall area as well as the irrigated and dry land subclasses. Even though there are not a sufficient number of grass land sales in this area, the county assessor has done a good job of keeping up with the market.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county Assessor for further action.

One area of review is the county's sales qualification and verification processes. Antelope County has developed a sound procedure for verification. The county's sales verification process includes sending a verification questionnaire to all parties involved in the transaction. Any

2016 Agricultural Correlation for Antelope County

questions not answered by the questionnaire are followed up with a telephone interview by the county assessor or deputy county assessor. On-site review of the property is conducted if deemed necessary. Review by the Division of the non-qualified sales indicates that sales are generally coded properly and include a reasonable explanation for non-qualification. The county's process of sales qualification and documentation of non-qualified sales indicates that all available sales are being used for measurement.

The review also looked at the filing of Real Estate Transfer Statements as well as a check of the values reported on the Assessed Value Update (AVU). The transfer statements are typically filed monthly and the AVU was accurate when compared with the property record cards.

The county's inspection and review cycle for the agricultural class was discussed with the county assessor. The review was determined to be systematic and comprehensive; land use is reviewed with the most current aerial imagery available. Inspection of agricultural improvements is completed within the six year cycle using an onsite inspection process that includes interior inspections and/or interviews with property owners where permitted as well as aerial imagery.

The review also supported that the market areas are well constructed in the county; the boundary lines separate distinctly different geographic areas within the county and sales analysis supports that these differences are recognized in the market place.

The final portion of the review that related to agricultural land included an analysis of how agricultural and horticultural land is identified, including a discussion of the primary use of the parcel. In Antelope County, the county assessor uses sales questionnaires to monitor use changes; the cyclical physical inspection of agricultural land is also very helpful in monitoring non-agricultural activity. The farm home site value is the same as the rural residential first acre home site.

Equalization

The analysis supports that the county has achieved equalization; comparison of Antelope County values compared to the adjoining counties shows that all values are reasonably comparable, and the statistical analysis supports that values are at uniform portions of market value. The market adjustments made for 2016 parallel the movement of the agricultural market across the region.

The Division's review of agricultural improvements and site acres indicate that these parcels are inspected and valued using the same processes that are used for rural residential and other similar property across the county. Agricultural improvements are believed to be equalized and assessed at the statutory level.

The quality of assessment of the agricultural class is in compliance with generally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Antelope County is 70%.

2016 Opinions of the Property Tax Administrator for Antelope County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class | Level of Value | Quality of Assessment | Non-binding recommendation | | | | | |
|------------------------------|----------------|--|----------------------------|--|--|--|--|--|
| Residential Real Property | 97 | Meets generally accepted mass appraisal practices. | No recommendation. | | | | | |
| | | | | | | | | |
| Commercial Real Property | 100 | Meets generally accepted mass appraisal practices. | No recommendation. | | | | | |
| | | | | | | | | |
| Agricultural Land | 70 | Meets generally accepted mass appraisal practices. | No recommendation. | | | | | |
| | | | | | | | | |

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

Legend

County Lines

Market Areas
Geo Codes

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on upland:

Well drained sity soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on unlands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

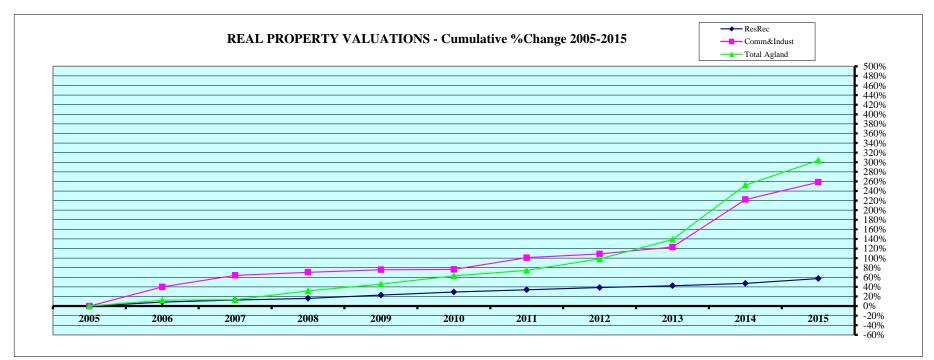

Somewhat poorly drained soils formed in alluvium on bottom lands

Lakes and Ponds

Value; 2005 - 2015 CTL Growth Value: 2005-2015

Sources:

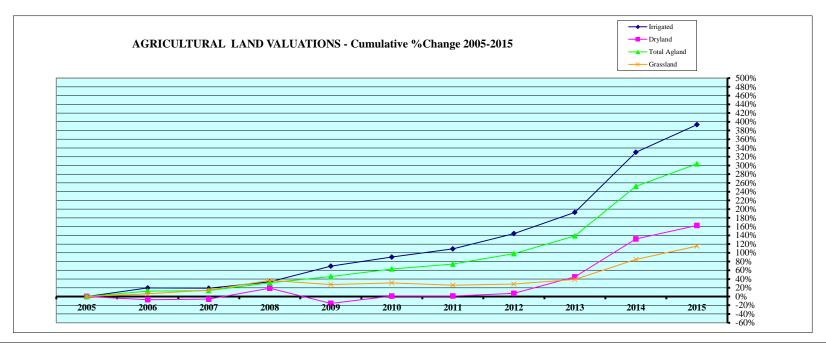

Growth Value; 2005-2015 Abstract of Asmnt Rpt.

(1) Residential & Recreational excludes AgDwelling & farm home site land; Comm. & Indust. excludes minerals; Agric. land incudes irrigated, dry, grass, waste & other agland, excludes farm site land. Real property growth is value attributable to new construction, additions to existing buildings, and any improvements to real property which increase the value of such property.

| 5. | Number of shared employees: |
| | None |
| 6. | Assessor's requested budget for current fiscal year: |
| | \$114,636 |
| 7. | Adopted budget, or granted budget if different from above: |
| | same as above |
| 8. | Amount of the total assessor's budget set aside for appraisal work: |
| | \$19,750 |
| 9. | If appraisal/reappraisal budget is a separate levied fund, what is that amount: |
| | N/A |
| 10. | Part of the assessor's budget that is dedicated to the computer system: |
| | \$14,300 |
| 11. | Amount of the assessor's budget set aside for education/workshops: |
| | \$1,000 |
| 12. | Other miscellaneous funds: |
| | None |
| 13. | Amount of last year's assessor's budget not used: |
| | \$11,427 |
| | |

B. Computer, Automation Information and GIS

| 1. | Administrative software: |
|----|---|
| | Thomson Reuters formully Terra Scan |
| 2. | CAMA software: |
| | Thomson Reuters formully Terra Scan |
| 3. | Are cadastral maps currently being used? |
| | Yes |
| 4. | If so, who maintains the Cadastral Maps? |
| | Staff |
| 5. | Does the county have GIS software? |
| | Yes |
| 6. | Is GIS available to the public? If so, what is the web address? |
| | www.antelope.gisworkshop.com |
| 7. | Who maintains the GIS software and maps? |
| | Assessor |
| 8. | Personal Property software: |
| | Thomson Reuters formully Terra Scan |

C. Zoning Information

| 1. | Does the county have zoning? |
|----|--|
| | Yes |
| 2. | If so, is the zoning countywide? |
| | Only in rural areas |
| 3. | What municipalities in the county are zoned? |
| | Neligh and Tilden |
| 4. | When was zoning implemented? |
| | 1999 |

D. Contracted Services

| 1. | Appraisal Services: |
|----|----------------------------|
| | No |
| 2. | GIS Services: |
| | website -GIS Workshop Inc. |
| 3. | Other services: |
| | None |

E. Appraisal /Listing Services

| 1. | Does the county employ outside help for appraisal or listing services? |
|----|---|
| | No |
| 2. | If so, is the appraisal or listing service performed under contract? |
| | N/A |
| 3. | What appraisal certifications or qualifications does the County require? |
| | None |
| 4. | Have the existing contracts been approved by the PTA? |
| | N/A |
| 5. | Does the appraisal or listing service providers establish assessed values for the county? |
| | N/A |

2016 Residential Assessment Survey for Antelope County

| 1. | Valuation da | ata collection done by: |
|----|-----------------------------------|--|
| | Staff | |
| 2. | List the characterist | valuation groupings recognized by the County and describe the unique ics of each: |
| | Valuation Grouping | Description of unique characteristics |
| | 1 | Neligh - County seat, hospital, school, active businesses, largest populated town in the county. Main Hwy. through Neligh is Hwy. 275. Also includes Elgin - medium sized community, public and private school, active businesses, located on HWY 14. These two assessor locations are being combined together as the residential market is very comparable. |
| | 5 | Tilden - half of town is in Antelope and half is in Madison County, medical clinic, active businesses. Main Hwy. through Tilden is Hwy. 275. |
| | 10 | Oakdale - Located in eastern portion of the county, few business operating. Main Hwy. through Oakdale is also Hwy. 275. |
| | 20 | Brunswick - Small village, minimal businesses, major source of employment is a grain facility. Located south of Hwy. 20. |
| | 25 | Orchard - Located in the northwestern side of the county, post office, school, and grocery store. Located northwesterly of Neligh on Hwy. 20. |
| | 30 | Clearwater - Located in the western side of the county, post office, school and grocery store. Located on Hwy. 275. |
| | 35 | Rural - All rural residential property outside the village limits |
| | 40 | Royal - Located in Northwestern portion of the county, small village with bar and body shop, located on Hwy 20. |
| | Ag | Agricultural homes and outbuildings |
| 3. | List and properties. Cost and Ma | describe the approach(es) used to estimate the market value of residential |
| 4. | | approach is used, does the County develop the depreciation study(ies) based on t information or does the county use the tables provided by the CAMA vendor? |
| | 1 | uses the depreciation tables provided by their CAMA vendor for all valuation ith exception to the rural residential which has it's own schedule. |
| 5. | Are individu | ual depreciation tables developed for each valuation grouping? |
| | Towns and table. | villages use the same depreciation table, rural residential uses a separate depreciation |
| 6. | Describe the | e methodology used to determine the residential lot values? |
| | Sale price, so | quare foot and feet per units. |
| | | |
| | | |

Antelope County 3 Year Plan of Assessment 2016-2018 July 10, 2015

Introduction

This plan of assessment is required by law, pursuant to section 77-1311, as amended by 2001 Neb. Laws LB 170, Section 5, and as amended by 2005 Neb. Laws LB 263, Section 9. It is to be submitted to the Antelope County Board of Equalization on or before July 31st, and the Department of Property Assessment & Taxation on or before October 31st, and every three years thereafter. The assessor shall update the plan yearly between the adoptions of each three-year plan. The plan and any update will describe all the duties of the Antelope County Assessor. It shall indicate the classes or subclasses of real property that the Antelope County Assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value of quality of assessment practices required by law and the resources necessary to complete those actions.

General Description of the Value Base of Antelope County

As reported in the 2015 County Abstract, Antelope County has a total count of 7,118 real property parcels. The residential parcel count is approximately 37% of the total; the Commercial/Industrial parcel count is 8% of the total base. Agricultural property accounts for 55% of the base. The total Antelope County real estate valuation as reported on the 2015 County Abstract, excluding centrally assessed property, is \$2,440,572,355. The total personal property value, as calculated on the 2015 County Totals for Locally Assessed Personal Property report is \$150,195,784. Antelope County processed 1309 personal property schedules in 2015.

Staff/Training

The staff of the Antelope County Assessor's Office consists of the Assessor, one full time deputy assessor, one full time data entry/general clerk, and one part time office assistant who works only during special projects. The Assessor compiles all reports, values all real property, inspects real property, maintains the sales file, makes corrections to the property records cards as dictated by 521's, death certificates, and court judgments, prices all improvements, updates cadastral maps, manages office finances, updates all GIS data and supervises all other duties. The clerk manages personal property files, oversees the homestead exemption program, processes and manages permissive exemptions, reports office inventory, compiles the annual inventory list, updates the website, and assists with pick up work. The deputy assists the Assessor with inspections of real property, collects and compiles information from building permits, and assists the clerk with overflow homestead and personal property management. The deputy, in the future, will be learning the operation & maintenance of our GIS database, which includes the digitizing of parcels, the application of current land use layers, and the calculation of agricultural land use acres.

The Assessor and the Deputy are required to hold an assessor certification and are required to complete continuing education to maintain certification.

Public Relations

Every year in October, County Government Day is held. The assessor's office is an active educator in this process. Communication with the local newspapers and the use of advertisements also help in the education of the general public. The Assessor hopes to coordinate and host several different informational meetings with the public this coming year, where different topics such as Homestead or Legislative changes involving Personal Property returns may be discussed. Land use change forms have been created to mail out to agriculture land owners this year to assist with land use changes prior to March 19th. A yearly manual of all public relation endeavors is kept in the office. Every year this manual is reviewed and analyzed with the expectation of improving our techniques in the future, and improving communication with the public. The assessor encourages property owners and all citizens to come to office with questions and concerns. The office maintains an "open door" policy.

ESRI Arc-GIS

As of 2004, ownership is being tracked on the ESRI Arc-GIS computer program. This is kept current with land transfers processed, surveys, and daily visual inspection. In 2007 the services of GIS workshop were secured in an effort to improve our system. All rural and urban parcels have been drawn & labels and are updated on a continuous basis. In 2010, all GIS measured acres were rolled into TerraScan providing accurate measurements for both. This program is an asset to both our staff and county. For 2011, GIS was utilized by cross-referencing with TerraScan to discover omitted farm property such as sheds, grain bins, etc. In 2012, Antelope County subscribed to WebGIS to make all aerial mapping and information accessible to our taxpayers and the public in general. GIS Workshop Inc. has been contracted to fly the county in the fall of 2015, to obtain new oblique photos of all rural improvements. The new oblique photos will be delivered to county prior to May 2016.

Policy & Procedure Manual

In 2015, the assessor created an Antelope County Assessor's Office Policy and Procedure Manual. This manual adheres to statute, regulation, and directive. It also assists employees in understanding of the processes within the office, as it includes procedures of daily office operations and expectations. This manual will be revised and updated by the Assessor and deputy on an annual basis in order to keep current.

Property Record Cards

The property record cards contain all information required by regulation 10-004, which include the legal description, property owner, classification codes, and supporting documentation. The supporting documentation includes any field notes, a sketch of the property, a photograph of the property, and if agricultural land is involved, an inventory of the soil types by land use. An aerial

photo of the agricultural land is also included. The cards are in good condition, and are updated as needed.

Homestead Exemptions

Homestead exemptions are accepted and processed according to State Statute 77-3510 through 77-3528. Every prior year's applicant is mailed pre-printed forms at the beginning of the homestead season in February. Applications are accepted from February 1st through June 30th. As of July 10, three hundred ninety homestead exemptions were filed in the Antelope County Assessor's Office. The Antelope County Assessor's Office provided free assistance to the public in filling out the income portion of the forms. This assistance was offered during regular business hours and did not require an appointment. The Antelope County Assessor's Office mails letters to all prior-year applicants who have not yet submitted their application as the filing deadline approaches, which usually begins one month prior to the deadline to allow for the scheduling of assistance with the income forms if needed. The Antelope County Assessor's Office works in conjunction with the Antelope County Veteran's Service Officer to insure that all qualifying applicants receive the exemption status that is most applicable to their situation. The Antelope County Assessor plans on accepting & processing homestead exemptions, providing assistance with the completion of required forms, mailing reminder letters one month prior to filing deadline followed by reminder telephone calls and working with the Veteran's Service Officer every year for the next three years.

Personal Property

All personal property is handled according to Regulation 20. On or before May 1st, is the time frame for returns to be filed without penalty. After May 1st, returns filed receive a 10% penalty. Returns filed after July 1st have a 25% penalty applied. Notices are placed in the county newspapers to remind taxpayers that it is personal property filing time. The taxpayer's federal income tax depreciation schedule is used as a basis for the personal property schedule. Local accountants, upon request, are provided with a list of taxpayers, and then request their clients' forms in advance, which they complete and return to our office. Annually new property owners and newly formed corporations are entered into the cama personal property files, to keep current. The Antelope County Assessor's Office anticipates this process to continue throughout the next three years.

Centrally Assessed/Railroad Property

Centrally assessed values are obtained from the State Department of Property Assessment & Taxation by August 10th. The values provided are entered into the computer and balanced by Assessor's Office staff. All corrections are forwarded to the Property Tax Division. The Antelope County Assessor's Office anticipates no changes in this process over the next three years.

Permissive Exemptions

Permissive exemption forms are prepared by Assessor's Office staff, and mailed to all entities that were permissively tax exempt the previous year by November 1st. These forms are received

back into the office by the end of the calendar year. The Assessor reviews all of the applications, brings the applications before the County Board of Equalization, and makes recommendations as to their qualifications. As property transfers in & out of exemption, the assessor contacts the parties involved to ensure that the proper classification is given to the property, and that all requirements are fulfilled. The Assessor's office plans on mailing forms to exempt entities by November 1st to allow more time for the entities to complete and return to office.

Levies

The assessor enters all certified levy rates from the county clerk into the cama system, TerraScan, that is necessary for billing and distribution of funds.

County Board of Equalization/TERC Appeals

The review of ownership and use of all cemetery real property is presented to the CBOE on or before August 1st. The 3 year plan of assessment is also presented prior to July 31. Tax roll corrections are periodically submitted to the CBOE, along with documentation explaining the need for the correction, for approval. The County Assessor (or her/his representative) attends all County Board of Equalization meetings. The Assessor prepares supporting documentation to be present during County Board of Equalization hearings and protests.

Real Property Assessment Requirements

All real property in the State of Nebraska is subject to property taxation unless expressly exempted by Nebraska Constitution, or is permitted by the constitution and legislation adopted by the legislature. All real property is to be valued according to market value. Residential, Commercial, Industrial, and Recreational properties are to be valued at 100% of market Value. Agricultural land is to be valued at 75%.

2016 - Residential

Review small villages: Oakdale, Royal, Brunswick, Orchard, and Clearwater to verify depreciation and economic factors are still accurate. This is also part of six year review Review city residential: Neligh, Tilden, and Elgin as part of new six year cycle. When doing the six year review all items are reviewed such as classification codes, legal description, year built, effective age, depreciation, and all attributes of the improvement. All parcels are updated also with a new photograph of the improvement and real property. All acreages are being reviewed, and verifying their classification as an acreage.

2017 – Residential

Review rural residential-reviewing all attibutes and updating property record cards with new oblique photos.

2018 - Residential

Review residential parcels as needed based on analysis of market area sales.

Pick-Up Work

The assessor and staff will gather all necessary data, which will be entered into the TerraScan. This includes inspection of resent sold properties, to verify sales in the sales file.

2016 Commercial

Review property to determine equal and proportionate value based on market area sales. Rural commercial properties will begin to be reviewed for 6 year cycle starting with fertilizer and grain operations in rural areas.

2017-2018 Commercial

To fulfill the 6 year review, commercial properties in rural areas will be reviewed, focusing on all miscellaneous businesses operating in rural area. All commercial in villages and cities will be reviewed. Neligh commercial will be inspected first, followed by Elgin.

Pick-Up Work

The assessor and staff will gather all necessary data, which will be entered into the TerraScan.

2016-2018 Agricultural

Statistics will be reviewed and property may be reappraised or updated as deemed necessary. Review will conclude on all Ag-improved parcels in the county. Oblique photos will be delivered in May of 2016, and then cross checked with our property record files, making updates and changes as needed. This should cover the physical inspection of farm sites. Land use will also be verified by comparison of the new 2014 photos on the GIS in comparison to the property record card information. Landuse will also be reviewed in 2017, following the completion of anticipated new 2016 GIS imagery.

Conclusion

I reserve the right to make changes and adjustments to my projected plan due to budget constraints, time, or other outside forces.

Kelly Mueller Antelope County Assessor
