#### Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Banner County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Banner County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Sharon Sanberg, Banner County Assessor

#### Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

#### **Statistical Analysis:**

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

<b>Property Class</b>	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

#### **Analysis of Assessment Practices:**

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with <a href="Neb. Rev. Stat.">Neb. Rev. Stat.</a> § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

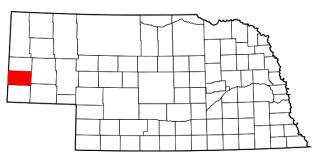

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

<sup>\*</sup>Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

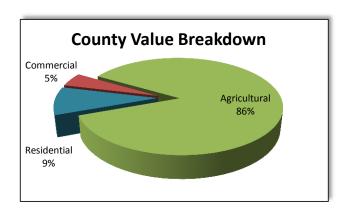

### **County Overview**

With a total area of 746 square miles, Banner had 764 residents, per the Census Bureau Quick Facts for 2014, a 10% population increase over the 2010 US Census. In a review of the past fifty years, Banner has seen a steady drop in population of 40% (Nebraska Department of Economic Development).

Reports indicated that 68% of county residents were homeowners and 89% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Banner are mostly rural in location. Per the latest

Banner County Quick Facts					
Founded	1888				
Namesake	"Banner County" of Nebraska				
Region	Panhandle				
County Seat	Harrisburg				
Other Communities					
Most Populated	Harrisburg (100)				
Census Bureau Quick Facts 2014/N	Jebraska Dept of Economic Development				

information available from the U.S. Census Bureau, there were ten employer establishments in Banner. County-wide employment was at 405 people, a 3% gain relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Banner that has fortified the local rural area economies. Banner is included in the North Platte Natural Resources District (NRD). Grass land makes up the majority of the land in the county. When compared against the top crops of the other counties in Nebraska, Banner ranks sixth in both wheat for grain and winter wheat for grain, seventh in dry edible beans, and ninth in bison. In value of sales by commodity group, Banner ranks first in aquaculture (USDA AgCensus).

# 2016 Residential Correlation for Banner County

#### Assessment Actions

For the current assessment year, the county assessor reviewed all improvements in Range 54, and after conducting a review of residential land values, determined to value any additional rural residential acres (above the home site) at a site value similar to that of the second acre farm site value. Additionally, all pickup work was completed.

#### Description of Analysis

Valuation Grouping	Description			
10	All residential parcels within the village of Harrisburg.			
80	Rural—all remaining residential parcels not within the village.			

Residential parcels are valued utilizing only two valuation groupings that are based solely on the geographic location of the parcel. Either the parcel is located in VG 10 (Harrisburg) or VG 80 (Rural). Analysis of the statistical profile reveals only ten qualified sales that occurred during the two year timeframe of the sales study. Seven are found in the first year of the study, with the remaining three found in the second year. Further, the majority of sales (seven) consist of VG 80 and the remainder is found in VG 10. The overall statistical measures indicate a wide dispersion and this is indicative of an erratic, rather than competitive residential market. The residential market in the county does not function on a purely supply/demand economic market. There are few parcels available for the individual who desires to live in Banner County.

RESIDENTIAL IMPROV	ED			Type : Qualified						
			1	Date Rar	ige :	10	)/01/2013 to 09	/30/2015	Posted	Before : 3
Number of Sa	les	:	10	М	edian	:	64		COV :	59.98
Total Sales Pr	ice	:	863,500	Wgt.	Mean	:	69		STD :	51.64
Total Adj. Sales Pr	ice	:	863,500		Mean	:	86	Avg.Ab	s.Dev :	41.82
Total Assessed Va	lue	:	599,234							
Avg. Adj. Sales Pr	ice	:	86,350		COD	:	65.58 MA	AX Sales 1	Ratio :	171.72
Avg. Assessed Va	lue	:	59,923		PRD	:	124.05 MI	IN Sales I	Ratio :	36.83

By valuation grouping, the three sales in VG 10 are all significantly above the upper limit of acceptable range, while the seven sales in VG 80 are almost (with one exception) well below the lower limit of acceptable range.

# 2016 Residential Correlation for Banner County

VALUATION GROUPING								
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD	MIN	MAX
10	3	151.88	155.16	150.57	06.55	103.05	141.87	171.72
80	7	44.54	56.49	56.10	33.41	100.70	36.83	99.97
ALL								
10/01/2013 To 09/30/2015	10	63.77	86.09	69.40	65.58	124.05	36.83	171.72

Historically, over the last eight assessment years the residential median has been within acceptable range only twice (in 2013 and 2010). The remaining years indicate a median below 80% (64, 72, 62, 70, 75, and 76%). The 2013 median was merely the result of the one A/S ratio of 94.38 being the middle ratio. The remaining eight ratios from highest to lowest are: 136.68, 128.44, 124.89, 96.77, 78.26, 76.25, and 61.71.

This raises a question about the correct market value for rural residential acreages, since both rural and Harrisburg improvements are valued using the same cost index and are subject to the same depreciation schedule. Also, the criteria for determining quality, condition and effective age need to be further examined.

#### Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Banner County Assessor utilizes a sales questionnaire that is sent to both the buyer and seller of all three classes of property. For those sales that do not produce a response, the county assessor and her staff member use their personal knowledge of the county to aid in the qualification process. A nonverified sale is assumed to be qualified unless further information to the contrary is discovered. The Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Banner County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's inspection and review cycle for all real property was discussed with the county assessor. All three property classes have been physically inspected during the first six-year review cycle. The county assessor reviews all property by one Range (two if possible) per year.

# 2016 Residential Correlation for Banner County

Valuation groups were also examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the county has adequately identified economic areas for the residential property class.

#### Equalization and Quality of Assessment

As mentioned above, analysis of the statistical profile for not only this year, but historically show that there is a recurring difference between the assessment/sales ratios of Harrisburg residential when compared with rural residential property. Both are outside of the range, but in the opposite direction and do not appear to be a function of the date of the cost index—rather, lot/land values and the listing characteristics of style, quality and condition may be part of the equation.

#### Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Banner County cannot be determined.

# 2016 Commercial Correlation for Banner County

#### Assessment Actions

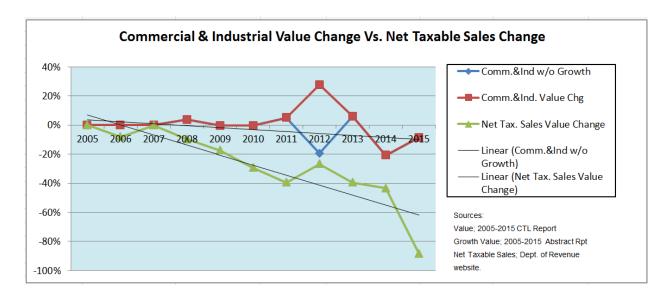

For assessment year 2016, the county assessor completed the physical review of all improvements in Range 54, which consists of rural commercial properties in the Western six mile edge of the county.

#### Description of Analysis

Valuation Grouping	Description
10	All commercial parcels within the village of Harrisburg.
80	Rural—all remaining commercial parcels not within the village of Harrisburg.

The county assessor uses two valuation groupings to value commercial property within the county and these are based on "Assessor Location." There are only eight commercial parcels within the county—only one typical commercial occupancy code (the local bank)—with the remainder consisting of the closed café and wrecking yard and Wyrulec sites and a communications tower.

Determination of overall commercial activity within the county included the Analysis of Net Taxable Sales—non-Motor Vehicle (http://revenue.nebraska.gov/research/salestax\_data.html) that would be one modest indicator of commercial market activity.

Net Taxable Sales would indicate an average annual rate of about -12.88%. The Annual Percent Change in assessed value appears to be significantly less than this at 4.5% (Chart 2 of Exhibit 4B). The commercial market can readily be seen to be in a steep decline, and it must be noted that the very significant drop in the percent of change in Net Taxable Sales in 2015 is in large

# 2016 Commercial Correlation for Banner County

part due to the main reliance on the agricultural economy and the legislative change in the collection of sales tax for the repair and parts of agricultural equipment (that is now exempt from collection as of October 1, 2014).

Since there were no qualified commercial sales occurring during the three-year timeframe of the sales study, there is no data to additionally address the commercial market in Banner County.

#### Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes, and any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The county's verification and qualification process consists of a questionnaire that is mailed to both the buyer and seller of all residential, commercial and agricultural property in which the recorded transactions contain documentary tax stamps. For sales that do not produce a questionnaire response, the county assessor and her staff member use their personal knowledge of the county to aid in the qualification process. All non-verified sales are assumed to be qualified unless further information to the contrary is discovered.

The county's inspection and review cycle for all real property was discussed with the county assessor. All property in Banner County has been inspected in-house by the county assessor. The county assessor reviews all property within one Range per assessment year (and at times two).

Valuation groups were also examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the commercial property class, with the limited information available.

#### Equalization and Quality of Assessment

For measurement purposes there are no commercial sales available. The level of value and quality of assessment become a function of the assessment practices of the county assessor, which are considered to be in compliance with generally accepted mass appraisal standards.

#### Level of Value

Based on analysis of all available information, the level of value of the commercial class of real property in Banner County is determined to be at the statutory level of 100% of market value.

# 2016 Agricultural Correlation for Banner County

#### **Assessment Actions**

For assessment year 2016, the county assessor updated land use by mailed postcard to all agricultural land owners within Range 54. Overall, adjustments were made to the three land classes to bring these closer to 75% of market: irrigated land was increased by 25%, dry was increased by about 15%, grass land was increased by approximately 14% and land enrolled in Conservation Reserve Program (CRP) was raised on average by 16%.

#### Description of Analysis

Agricultural land within Banner County is not divided into market areas, based on the county assessor's decision that only if significant differences in market activity occurred within a particular area of the county and was "on-going," would she consider establishing a separate agricultural market area. Land use is comprised of approximately 66% grass (of which 12.5% of that figure is actually CRP), 26% dry land and roughly 5% irrigated. The remainder of land is comprised of waste and "other."

Neighboring counties to Banner include Scotts Bluff to the north, Morrill to the east (a small portion of Banner's southeast corner touches Cheyenne County), and Kimball County to the south. Of the three neighboring counties the most comparable by soil similarity in descending order would be Morrill, Scotts Bluff and Kimball counties. Four comparable sales from outside Banner County were supplemented in the sample to enhance the majority land use (MLU) for grass land.

The statistical sample of forty sales reveals the median measure of central tendency within range. A review of the statistical profile for the 80% MLU by Market Area indicates that the majority of sales fall within dry and grass land use. Both land classes indicate two of the three measures of central tendency for each are within acceptable range (it should be noted that five of the sales that are shown as grass in the profile actually contain land enrolled in CRP).

Analysis of CRP sales across the Panhandle region—and within Banner County specifically—supports that CRP will typically bring at least as much as grass land, and in areas where cropping is more feasible CRP will typically sell between the market value of dry and grass land. A five-year analysis of Banner's sales comparing the average sale price per acre for grass with the average sale price per acre for CRP indicates the following:

Assessment Yr	Avg SP/Acre Grass	Avg SP/Acre CRP
2012	354	372
2013	403	365
2014	408	407
2015	456	556
2016	500	544

# 2016 Agricultural Correlation for Banner County

Therefore, it appears that CRP values are most likely below acceptable range (and in the least are valued below the average grass value). However, since CRP is a relatively minor portion of the agricultural market (12.5% of the total grass is in reality enrolled in CRP), it is not possible to provide a conclusive point estimate for level of value of this subclass in order to recommend any action. Therefore, no non-binding recommendation will be made, and it is believed that the majority of agricultural land in the county is equalized.

#### Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One assessment practice reviewed is that of sales qualification and verification. The county's verification and qualification process includes a questionnaire mailed to agricultural buyers and sellers. Any non-returned questionnaires for sales are assumed to be qualified, unless any personal knowledge of the county assessor and her staff coupled with other information proves otherwise. The Division reviews the non-qualified sales to ensure that the reasons for disqualifying sales are supported and documented. The review also includes a dialogue with the county assessor and a consideration of verification documentation. The review of the county revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of agricultural land.

The inspection and review cycle for all real property was also examined. Within the agricultural class all rural dwellings and outbuildings were last reviewed in 2013. Physical inspection by the county assessor is used to note and pickup any changes to the property. Land use is now undertaken to be updated on a yearly basis, via mailed postcards by range, aerial imagery comparison and physical inspection.

The review process also examined the agricultural market areas to ensure that the areas defined are equally subject to a set of economic forces that impact the value of land within the delineated areas. The summary of the market area analysis concluded that Banner County currently consists of only one unified area based on sales activity.

Another portion of the assessment practices review relates to how rural residential and recreational land use is identified apart from agricultural land within the county. The county assessor determines rural residential land use first by assuming that a small parcel of land is considered residential—unless it adjoins an active agricultural operation—and this is confirmed by response to a mailed questionnaire. Regarding recreational use, the land must actually have recreation as its primary use to be classified as such. Land leased during hunting season for a

# **2016** Agricultural Correlation for Banner County

limited period of time does not constitute a recreational classification. Hunting preserves are classified as recreational, if hunting is the primary use.

#### Equalization

All dwellings located on both agricultural and residential-use land are valued using the same cost index. Farm home sites carry the same value as rural residential home sites. However, both farm and home residences are subject to the same determination regarding style, quality and condition that is in question as noted in the residential correlation.

Agricultural land values appear to be equalized at uniform portions of market value (see the discussion of the CRP subclass under the Description of Analysis section); all values have been determined to be acceptable and are reasonably comparable to adjoining counties. The quality of assessment of agricultural land in Banner County complies with professionally accepted mass appraisal standards.

80%MLU By Market Area

#### Level of Value

Based on analysis of all available information, the level of value of agricultural land in Banner County is 73%.

# 2016 Opinions of the Property Tax Administrator for Banner County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation	
Residential Real Property	*NEI Does not meet generally accepted mass appraisal practices.		No recommendation.	
Commercial Real Property	Meets generally accented mass appraisal		No recommendation.	
Agricultural Land	73	Meets generally accepted mass appraisal practices.	No recommendation.	

<sup>\*\*</sup>A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

# 2016 Assessment Survey for Banner County

# A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	None
2.	Appraiser(s) on staff:
	None
3.	Other full-time employees:
	None
4.	Other part-time employees:
	One at 32 hrs per week.
5.	Number of shared employees:
	None
6.	Assessor's requested budget for current fiscal year:
	\$62,950
7.	Adopted budget, or granted budget if different from above:
	Same.
8.	Amount of the total assessor's budget set aside for appraisal work:
	None out of the Assessor's total budget.
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	\$6,000 from Miscellaneous General fund for Pritchard & Abbott to appraise oil, gas and mineral interests.
10.	Part of the assessor's budget that is dedicated to the computer system:
	None of the Assessor's budget is dedicated to the computer system. All offices are included in the Miscellaneous General Fund.
11.	Amount of the assessor's budget set aside for education/workshops:
	\$850
12.	Other miscellaneous funds:
	\$17,500 for data processing from the Misc. General fund; likewise \$5,000 for GIS from the Misc. General fund.
13.	Amount of last year's assessor's budget not used:
	\$1,655

# **B.** Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Are cadastral maps currently being used?
	No.
4.	If so, who maintains the Cadastral Maps?
	N/A
5.	Does the county have GIS software?
	Yes.
6.	Is GIS available to the public? If so, what is the web address?
	Yes. The web address is http://banner.gisworkshop.com
7.	Who maintains the GIS software and maps?
	GIS Workshop and staff.
8.	Personal Property software:
	MIPS

### **C. Zoning Information**

1.	Does the county have zoning?
	No
2.	If so, is the zoning countywide?
	N/A
3.	What municipalities in the county are zoned?
	N/A
4.	When was zoning implemented?
	N/A

### **D. Contracted Services**

1.	Appraisal Services:
	Pritchard & Abbott for oil, gas and mineral interests.
2.	GIS Services:
	GIS Workshop
3.	Other services:
	MIPS/PC Admin for CAMA, administrative and personal property software.

### E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Only Pritchard & Abbott
2.	If so, is the appraisal or listing service performed under contract?
	Yescontract for 2016 and 2017.
3.	What appraisal certifications or qualifications does the County require?
	Pritchard & Abbott is a certified appraisal firm for oil, gas and mineral interests.
4.	Have the existing contracts been approved by the PTA?
	Yes.
5.	Does the appraisal or listing service providers establish assessed values for the county?
	Only for oil, gas and mineral interests.

# **2016** Commercial Assessment Survey for Banner County

1.	Valuation data collection done by:					
	The Assessor and her staff member.					
2.	List the valuation groupings recognized in the County and describe the unique characteristics of each:					
	Valuation     Description of unique characteristics       Grouping     Description of unique characteristics					
	10 All commercial parcels within the village of Harrisburg.					
	80 Ruralall remaining commercial parcels not within the village of Harrisburg.					
3.	List and describe the approach(es) used to estimate the market value of commercial properties.					
	Replacement	cost new, minus depreciat	ion.			
3a.	Describe the	process used to determin	ne the value of unique	commercial properties.		
	There are no unique commercial properties in Banner County.					
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?					
	The Assessor relies upon the tables provided by the CAMA vendor (for the bank).					
5.	Are individual depreciation tables developed for each valuation grouping?					
	No, since there is no viable commercial market in Banner County. As listed above, none of the existing commercial properties would fit in a unique valuation grouping.					
6.	Describe the methodology used to determine the commercial lot values.					
	Since there are only eight commercial parcels in the County, commercial lots carry a "site" value.					
7.	Valuation Grouping	Date of Depreciation Tables	Date of Costing	Date of Lot Value Study	Date of Last Inspection	
	10	2013	2014	2010	2013	
	80	2013	2014	2010	2013	
	The eight commercial parcels consist of two closed businesses (a cafe and wrecking yard), one cellular phone towers, four rural electric sites and the remaining commercial property is the bank. The Assessor believes that they would be better analyzed by occupancy code rather than classified as a valuation grouping.					

# 2016 Agricultural Assessment Survey for Banner County

1. Valuation data collection done by:  The Assessor's staff member.  2. List each market area, and describe the location and the specific characteristics that make each unique. within the County when compared to the remainder of the County, she would monitor this to determine if the difference was not only significant, but on-going in order to establish a separate market area.  4. Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.				
county apart from agricultural land.				
A small parcel of land is considered rural residential, unless it adjoins an active agricultural				
operation, and this is usually determined by the taxpayer's response to a mailed questionnaire.  Recreational land must have recreation as its primary use to be classified as such. The leasing of land during hunting season for a limited period of time is not seen as a primary recreational use. Hunting preserves are classified as recreational land if hunting is the primary use.				
5. Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?				
Yes.				
6. If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.				
There are currently no parcels enrolled in the Wetland Reserve Program.				
If your county has special value applications, please answer the following				
How many special valuation applications are on file?				
N/A				
7b. What process was used to determine if non-agricultural influences exist in the county?				
N/A				
If your county recognizes a special value, please answer the following				
7c. Describe the non-agricultural influences recognized within the county.				
N/A				
7d. Where is the influenced area located within the county?				
N/A				
04 Banner Page 49				

7e.	Describe in detail how the special values were arrived at in the influenced area(s).
	N/A

### 2016 Plan of Assessment for Banner County, Nebraska Assessment Years 2016, 2017, and 2018 Date: June 10, 2015

### Plan of Assessment Requirements:

Pursuant to Neb. Laws 2005, LB 263, Section 9, on or before June 15 each year, the assessor shall prepare a plan of assessment (herein after referred to as the "plan") which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Department of Property Assessment and Taxation on or before October 31 each year.

### Real Property Assessment Requirements:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade." Neb. Rev. Stat. 77-112 (Reissue 2003)

Assessment levels required for real property for 2015 are as follows:

- (1) 100% of actual value for all classes of real property excluding agricultural and horticultural land
- (2) 75% of actual value for agricultural land and horticultural land (as amended by LB 968); and
- (3) 75% of special value for agricultural and horticultural land which meets the qualifications for special valuation under 77-1344 and 80% of its recapture value as defined in 77-1343 when the land is disqualified for special valuation under 77-1347.

Reference, Neb Rev Stat 77-201 (R S Supp 2004)

### General Description of Real Property in Banner County

Per the 2015 County Abstract, Banner County consists of the following real property types:

	Parcels	% of Total Parcels	Value	% of Taxable Value Base
Residential	100	5.27%	3,355,768	1.40%
Commercial	8	0.42%	179903	0.08%
Recreational				
Agricultural	1582	83.85%	219,490,488	91.65%
Mineral Interest- Producing	84	4.43%	15,484,204	6.47%
Mineral Interest- Non-Producing	109	5.74%	58,460	0.02%
Game & Parks	15	0.79%	928,863	0.39%
	1898		238,568,823	

Agricultural land - taxable acres

The county is predominately agricultural consisting of the following sub classes:

	Acres	Value
Irrigation	24,131.05	33,310,718
Dry crop	123,866.95	59,761,329
Grass & CRP	308,355.93	97,939,219
Waste	7,408.28	259,314
Other (feedlot & shelterbelt)	3,165.54	671,271

Total of 466,927.75 acres with a value of \$191,941,851

New property: For assessment year 2015, an estimated 1 information statement was filed for new property construction within the county.

For more information see 2015 Reports & Opinions, Abstract and Assessor Survey

#### **Current Resources**

### A. Staff/Budget/Training

Presently have 1 employee who works part time in the summer months and full time during the winter

The 2014-15 budget for the assessor's office was \$61,650 plus \$6000 included in Miscellaneous General for Appraisal (which includes pickup work and oil and gas appraisal) The assessor's office was split from the ex-officio office as of January 2011

Training – The employee has attended Class 101

B Cadastral Maps accuracy/condition, other land use maps, aerial photos

Cadastral maps are in a large book and have been discontinued. Aerial photos with individual mylar overlays containing ownership information, land use, and soil types are approximately 20 years old. The ownership on aerial photos is updated as deeds are filed

C Property Record Cards – new cards were prepared for the 2006 year.

For strictly ag land parcels, the land valuation sheets are printed on the MIPS program and placed behind the property record card in a plastic page protector.

Property Records Cards for parcels with improvements are a manila folder with the property record card imprinted on the front. A listing of each individual building with values for each year is permanently attached to the back of the manila folder. Each building is numbered on the site photo. A small snapshot in a photo sleeve has a corresponding number . This number is also noted on the MIPS improvement printouts and the yearly listing as mentioned.

House sketches, house photos, and farm site sketches have been updated in the MIPS CAMA

- D We received a grant for an ESRI software and instructions in August of 2005. The GIS program now contains the ownership, soil conversion, and land use. We have networked the GIS program with the MIPS real estate administrative program. Our office will be working with the road department to prepare a layer showing roads locations, legal proceedings establishing roads, and the location of bridges, culverts, and all traffic signage.
- E Web based property record information access The MIPS records have been online since June 2013. The GIS records were placed on-line in 2013

### Current Assessment Procedures for Real Property

### A. Discover, List & Inventory all property.

Copies of the deeds and Form 521's filed with the Register of Deeds are processed as they are received. A copy of the 521 is filed in a notebook with a copy of the deed and agland inventory sheets if applicable. At the time the 521's are processed a form letter is sent to the seller and the buyer requesting information concerning the sale.

Information statements are not filed on a regular basis – discovery of new improvements is usually through personal observation of county officials or other reports

#### B Data Collection

One sixth of the improvements were physically reviewed for 2015. Photos were taken for all improvements

Market data is obtained from the Form 521 and the questionnaire mailed to buyers and sellers.

#### C Review assessment sales ratio studies

Market data is entered on an Excel spreadsheet with formulas which figure average selling price, median, COD, and PRD for irrigated, dry crop, grass, CRP, shelterbelts, waste, and sites. All sales (improved sales are used with the value of improvements being subtracted from the assessed value and also the selling price) are used in these computations. With time permitting the above studies are also computed with the unimproved sales only.

#### D Approaches to Value

- 1 Market approach; sales comparison Used for agland sales. Have had an increasing number of sales in recent years so that sales comparison approach is more accurate than previous years. Strictly residential sales are still limited. Usually the agland sales where purchaser is actually occupying home are also included in the residential sales for computations.
- 2 Cost approach; cost manual used and date of manual and latest depreciation study- The Marshall Swift costing manual for 2014available in conjunction with the MIPS CAMA program were used for 2015. Depreciation was figured on the qualified sales and the current depreciation schedules were checked with these figures.

- 3 Income Approach, income and expense data collection Because of the wide variety of rental and lease arrangements on agland, this method is not an accurate measure of value. Banner County also has few rental houses available for any kind of an income study.
- 4. Land valuation studies, establish market areas, special value sales are plotted on a large map using different colors for each year's sales. This is used to determine if market areas would be appropriate. Banner County does not have zoning at the present time so special value is not a consideration
- E Reconciliation of Final Value and documentation statements are attached to the property record card explaining the method used for final valuations
- F Review assessment sales ratio studies after assessment actions New values for the current year are reported on the Assessed Value Update
- G Notices and Public Relations. Change of value notices are sent to every landowner in Banner County regardless if the value changed or not. With the 2015 COV notices we will include a printout of the land valuation groups and acres, value, etc. A letter will be sent with the COV notices that reminds landowners to report change of use, etc.

### Level of Value, Quality and Uniformity for assessment year 2015:

Property Class Median COD PRD

Residential Insufficient sales Commercial Insufficient sales

Agricultural Land 71% 22.71 105.61

<sup>\*</sup>COD means coefficient of dispersion and PRD means price related differential For more information regarding statistical measures see 2015 Reports & Opinions

### **Assessment Actions Planned for Assessment Year 2016**

Residential – The improvements located in Range 54 will be reviewed. Review will be conducted by the assessor and employee with possible part time help. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial - Commercial properties that are located in Range 54 will be reviewed at the same time as the residential and farm buildings.

Agricultural Land – We are using the GIS program to check land use and acreages.

Special Value - Agland - no special value anticipated

#### **Assessment Actions Planned for Assessment Year 2017**

Residential – The improvements in Range 53 will be reviewed. The same data collectors as the previous year. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial – Commercial property in Range 53 will be reviewed at the same time as the rural residential and farm outbuildings

Agricultural Land- We are using the GIS program to check land use and acreages

Special Value – Agland – no special value anticipated. Land use will continue to be check by using the GIS and FSA maps for questionable acreages.

#### **Assessment Actions Planned for Assessment Year 2018**

Residential – The improvements in Range 58 will be reviewed. The individual building photos in the property record cards are several years old so new pictures of all buildings will be taken and filed in the records.

Commercial – Commercial property in Range 58 will be reviewed at the same time as the rural residential and farm outbuildings

Agricultural Land- We are using the GIS program to check land use and acreages

Special Value – Agland – no special value anticipated

### Other Functions performed by the assessor's office, but not limited to:

- 1. Record Maintenance, mapping updates, and ownership changes
- 2. Annually prepare and file Assessor Administrative Reports required by law/regulation:
  - a. Abstracts
  - b. Assessor Survey
  - c. Sales information to PA&T rosters and annual Assessed Value Update w/Abstract
  - d. Certification of Value to Political Subdivisions
  - e. School District Taxable Value Report
  - f. Homestead Exemption Tax Loss Report (in conjunction with Treasurer)
  - g. Certificate of Taxes Levied Report
  - h. Report of current values for properties owned by Board of Educational Lands & Funds
  - i. Report of all Exempt Property and Taxable Government Owned Property
  - j. Annual Plan of Assessment Report
- 3 Personal Property; administer annual filing of 190 schedules with a value of 12,739,031; prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required
- 4 Permissive Exemptions: administer 5 annual filings of applications for new or continued exempt use, review and make recommendations to county board.
- 5 Taxable Government Owned Property annual review of government owned property not used for public purpose, send notices of intent to tax, etc
- 6. Homestead Exemptions: administer 22 annual filings of applications, approval/denial process, taxpayer notifications, and taxpayer assistance.
- 7 Centrally Assessed review of valuations as certified by PA&T for railroads and public service entities, establish assessment records and tax billing for tax list.
- 8 Tax Districts and Tax Rates management of school district and other tax entity boundary changes necessary for correct assessment and tax information; input/review of tax rates used for tax billing process
- 9. Tax Lists; prepare and certify tax lists to county treasurer for real property, personal property, and centrally assessed.
- 10 Tax List Corrections prepare tax list correction documents for county board approval

- 11 County Board of Equalization attend county board of equalization meetings for valuation protests assemble and provide information.
- 12 TERC appeals prepare information and attend taxpayer appeal hearings before TERC, defend valuation
- 13 TERC State wide Equalization attend hearings if applicable to county, defend values, and/or implement orders of the TERC
- 14 Education: Assessor and or Appraisal Education attend meetings, workshops, and educational classes to obtain required hours of continuing education to maintain assessor certification.
