April 8, 2016

Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Fillmore County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Fillmore County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Lynn Mussman, Fillmore County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

Property Class	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

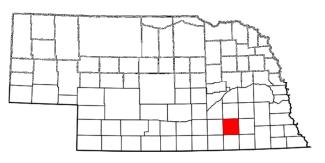

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

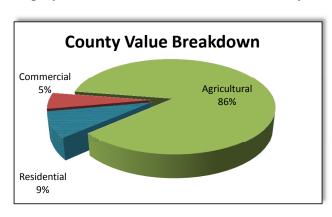

County Overview

With a total area of 575 square miles, Fillmore had 5,661 residents, per the Census Bureau Quick Facts for 2014, a 4% population decline from the 2010 US Census. In a review of the past fifty years, Fillmore has seen a steady drop in population of 40% (Nebraska Department of Economic Development). Reports indicated that

76% of county residents were homeowners and 86% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Fillmore convene in and around Geneva, the county seat. Per the latest information available from the U.S. Census Bureau, there were 222 employer establishments in Fillmore. County-wide employment was at 3,212 people, a 3% gain

relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Fillmore that has fortified the local rural area economies. Fillmore is included in both the Little Blue and Upper Big Blue Natural Resources Districts (NRD). Irrigated land makes up a majority of the land in the county. When compared against the value of sales by commodity group of the other counties in Nebraska, Fillmore ranks seventh in grains, oilseeds, dry beans, and dry peas. In top livestock inventory items, Fillmore ranks first in alpacas (USDA AgCensus).

Assessment Actions

For 2016, Fillmore County completed all residential pickup work. They verified, reviewed and analyzed the residential sales throughout the county. The verification is done over the phone, followed by a drive-by inspection. When the analysis was completed the county did not need to adjust any residential values by percentage.

For 2016, all of the residences and buildings in the villages, except Geneva, were inspected. Also, all of the rural residential parcels, and residences and buildings on agricultural parcels throughout the county were inspected. The inspections were conducted at the site or on the site if needed. The county compared the existing records to the improvements that they observed. Their review was designed to discover any errors or omissions in the records. They also added unreported construction and removed the listings of buildings that had been torn down. They reviewed quality and condition of all of the houses and buildings and took new date stamped digital photos of all houses and relevant buildings. All lot and site values were affirmed and were not changed for 2016. New costs were calculated, new depreciation was developed from the market and all of the inspected parcels were revalued for 2016. The costs for the rural residences and buildings were from 2012 cost manuals and represented the end of the second inspection and review cycle. The costs used for the villages were developed from the 2015 cost manuals and represented the beginning of the third inspection and review cycle. All inspections and revaluations were documented with the photo dates as well as an entry in each electronic file.

Description of Analysis

Residential parcels are analyzed utilizing 6 valuation groupings that are based on the assessor locations throughout the county.

Valuation Grouping	Assessor Location
01	Geneva
02	Exeter
03	Fairmont
04	Shickley
05	Small Villages; (incl. Grafton, Milligan, Ohiowa, and Strang)
06	Rural

There are several aspects of the data that are examined to develop an opinion of the level of valuation of property. No single analysis carries all of the weight, but the calculated statistics for the study period, the annual assessment actions, the combined assessment actions for multiple years, and the assessment practices review are all important factors in the level of value decision. The following paragraphs outline the information considered as well as the statistics when analyzing the level of value of real property.

The statistical analysis of all of the qualified sales within the defined study period offers an initial indication of the level of value. The median ratio calculated from the sample offers a strong starting point in determining the level of value of the class of property. In cases where data is plentiful, there may also be valid indicators of the level of value for some of the subclasses demonstrated by the statistical analysis.

The residential statistics are as follows:

Number of	Sales	:	103	Median	:	99	COV :	32.79
Total Sales	Price	:	8,380,786	Wgt. Mean	:	96	STD :	34.13
Total Adj. Sales	Price	:	8,380,786	Mean	:	104	Avg.Abs.Dev :	13.79
Total Assessed	Value	:	8,048,405					
Avg. Adj. Sales	Price	:	81,367	COD	:	13.93	MAX Sales Ratio :	322.33
Avg. Assessed	Value	:	78,140	PRD	:	108.40	MIN Sales Ratio :	59.59

There are 103 qualified residential sales used to calculate the 2016 county statistics. The median ratio for this sample is 99 with a COD of 13.93 and a PRD of 108.40. The median is well within the acceptable range. The COD is also within the range. The PRD is above the range suggesting a regressive valuation. It is likely that this is mostly due to the presence of low dollar sales. When the 20 sales with selling prices lower than \$30,000 are excluded, both the COD and the PRD improve. The median is still 99 but the COD becomes 8.51 and the PRD is 102.57. These are statistics that are more realistic to measure the uniformity and regressivity for the residential class as a whole. Regressivity occurs when higher-valued properties have a lower assessment to sales ratio than low-dollar properties.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately impact the uniform and proportionate valuation of all three property classes.

The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy.

The Division reviews the verification the sales and usability decisions for each sale. The notes in the sales file document the county's usability decisions. In this test, three things are reviewed; first that there are notes on each disqualified sale; second that the notes provide a reasonable explanation for disqualifying each sale; and third the reviewer notes if the percentage of sales used is typical or if the file appears to be excessively trimmed.

The county's inspection and review cycle for all real property is annually discussed with the assessor. The progress is documented in the assessment actions portion of this R&O. The past assessment actions may be reviewed to follow the progress of subclasses that require multiple years for inspection. Each individual parcel inspection should be documented, so a sample of the property record files are reviewed for documentation of completed inspections. The combination of these reviews usually reveals the progress of the county inspection and review process.

The review of Fillmore County revealed that the data was transmitted accurately and in a timely manner. The sale verification process and the usability decisions resulted in the use of all arm's-length sales. There is no apparent bias in the measurement of real property. The county has successfully completed the first six-year inspection and review cycle of the residential property and appears to be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the individual property record files.

Equalization and Quality of Assessment

Valuation groups are the primary subclasses that are regularly examined as candidates for adjustment. They are prepared to stratify the sales into groups that have similar locations or economic conditions. They do not however stratify any of the other conditions that may impact the value of property. There may be additional county assessor locations or valuation groups that have no sales and are not displayed.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	50	97.01	104.17	93.06	22.48	111.94
02	12	99.29	114.95	102.99	16.67	111.61
03	18	99.36	100.33	100.16	02.23	100.17
04	9	99.11	98.97	98.89	00.83	100.08
05	9	99.06	105.65	99.04	07.54	106.67
06	5	98.50	97.41	97.12	01.74	100.30
ALL						
10/01/2013 To 09/30/2015	103	99.00	104.10	96.03	13.93	108.40

The chart reports that the median ratios for the county and the significant valuation groupings are all between the statutory required level of 92 to 100%. A review of both the statistics and the assessment practices suggest that assessments in the county are valued within the acceptable parameters, and therefore considered equalized.

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Fillmore County is represented by the median ratio of 99%. There are no strong indications of any major subclass outside the range. There are no recommended adjustments to the class or to any subclass of residential property.

Assessment Actions

For 2016, Fillmore County completed all commercial pickup work. They have verified, reviewed and analyzed the commercial sales throughout the county.

For 2016, the county conducted no inspection, review and update of commercial parcels. During 2013, all of the commercial parcels were inspected, reviewed and updated for use in 2014. That action completed the second cycle of commercial inspection and review.

Description of Analysis

Commercial parcels are analyzed utilizing 6 valuation groupings.

Valuation Grouping	Assessor Location
01	Geneva
02	Exeter
03	Fairmont
04	Shickley
05	Small Villages; (incl. Grafton, Milligan, Ohiowa, and Strang)
06	Rural

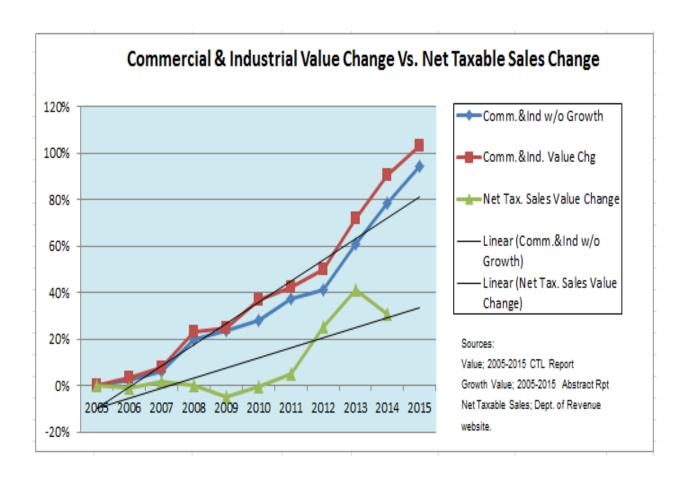

There are several aspects of the data that are examined to develop an opinion of the valuation of the commercial and industrial property. No single analysis carries all of the weight, but the annual assessment actions, the combined assessment actions for multiple years, and the assessment practices review are important in the level of value decision. Frequently there are too few sales to rely on the median for the level of value of the commercial class. There are usually too few sales to identify a level of value for any subclass of the commercial and industrial class of property. The following paragraphs outline the information considered beyond the statistics when analyzing the level of value of the commercial and industrial property.

Another element of data that is reviewed is the trend or the lack of a trend of the study years. If the median ratios array from older to newer with a lower ratio each year, it tends to indicate that there is an upward trend in value. The following is an extract from the 2016 statistical pages.

Study Yrs						
10/01/2012 To 09/30/2013	10	99.27	96.18	94.02	04.66	102.30
10/01/2013 To 09/30/2014	3	97.89	96.95	100.20	07.88	96.76
10/01/2014 To 09/30/2015	5	69.42	73.68	66.89	18.28	110.15

In this case, the medians do not form a clear pattern indicating that either there is not an upward trend or that there is insufficient data for a conclusion. The first study year makes up over half of the sales. The sales in the final study year have a dramatically lower median, causing concern about the data, not about the economic conditions of the county.

The general trend of sales tax receipts for the county compared to the general trend of the valuations of the commercial and industrial property is examined. While there is not a direct link between the two, there is the expectation that they should trend in the same direction. If local sales are in an upward trend, or if they seem to be flat or are declining, it might be expected that commercial values would eventually trend in a similar manner. The following chart demonstrates a similar trend of valuation and sales tax receipts. In this case both trends are upward but the valuation is trending more rapidly than the net taxable sales.

Another stratification that is done in the commercial and industrial sales file is the review of occupancy codes and the more general review of series codes that exist in the sales file. This is done to see if like uses of property have demonstrated any valuation trends in the county. In Fillmore County, the 8 different occupancy codes that were represented in the 18 qualified sales are compressed into 5 occupancy series. Analysis shows that no occupancy code exceeds 4 sales and 5 of the 8 occupancy series have 2 or less sales. This would cause the statistics from any individual occupancy series to be unreliable.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately impact the uniform and proportionate valuation of all three property classes. The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. The Division reviews the verification the sales and usability decisions for each sale. The county's inspection and review cycle for all real property is annually reviewed with the county assessor. The assessment practice review is more thoroughly described in the previous section-2016 Residential Correlation.

The review of Fillmore County revealed that the data was transmitted accurately and in a timely manner. The sale verification process and the usability decisions resulted in the use of all arm's-length sales. There is no apparent bias in the measurement of real property due to sale review. The county has successfully completed the first six-year inspection and review cycle of the improvements on commercial property and appears to be on schedule to comply with the ongoing inspection and review requirements. The inspections are documented in the property record files.

Valuation groups are the primary subclasses that are regularly examined as candidates for adjustment. These are prepared to stratify the sales into groups that have similar locations or economic conditions. They do not however stratify all of the many individual uses of commercial and industrial property.

Equalization and Quality of Assessment

The 18 sales in the 2016 statistical data have been stratified into 6 assessor locations and then into 6 valuation groupings. Valuation Group #1, with 10 sales, has a median within the range and the other 5 valuation groups have 2 or less sales, making them unreliable for statistical analysis. There are additional assessor locations and other occupancy codes that have no sales and are not represented. The median of only one valuation group is acceptable, so the question of location is not answered and the sample does not address the diversity of the commercial uses encompassed in the occupancy codes.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	10	99.02	92.50	94.87	08.77	97.50
02	2	80.85	80.85	80.34	05.19	100.63
03	1	101.04	101.04	101.04		100.00
04	2	82.62	82.62	74.18	15.98	111.38
05	2	85.06	85.06	73.51	22.62	115.71
06	1	98.05	98.05	98.05		100.00
ALL						
10/01/2012 To 09/30/2015	18	97.97	90.06	90.84	11.07	99.14

Based on all relevant information, the assessment practices are good. The trend of the study years and the trend of sales tax receipts versus valuation growth do not establish a clear direction of the values. The statistical tests demonstrate that the overall valuations of the parcels that have been sold have good median ratio but the overall sample is too small to be representative of the entire commercial class and is not reliable to measure the level of value of the commercial class. Based on their assessment practices, the county has valued the commercial property on a regular basis, consistently and uniformly.

Level of Value

Based on analysis of all available information, the level of value of the commercial class of real property in Fillmore County is not statistically determinable. The level of value is expected to be within the acceptable range and is called at 100%. There is no data available that suggests a need to adjust the class or any subclass of commercial property.

2016 Agricultural Correlation Section for Fillmore County

Assessment Actions

For 2016, Fillmore County has completed all pickup work of new improvements on agricultural parcels. They also update the land use on all parcels where changes have been reported or observed. They have verified, reviewed and analyzed the agricultural sales throughout the county. The verification is done over the phone and frequently is followed by a drive-by inspection. Fillmore also analyzed all agricultural land sales and updated all parcels with new land values. They expect the agricultural land valuations to increase for 2016 but not as much as in the past few years.

For 2016, the county inspected, reviewed and revalued all of the residences and the buildings on all of the agricultural parcels throughout the county. This process has been thoroughly described in the Residential Assessment Actions.

Description of Analysis

There are two market areas within Fillmore County; Market Area 1 is predominantly irrigated crop land as there is ground water available throughout that part of the county. Market Area 2 differs mostly in that ground water is not generally available so the crops are either dryland or grass land. The irrigation that does exist in Market Area 2 is scattered along the edge of the area and is often from lower capacity wells.

The analysis was done using a supplemented sample of 37 qualified sales. After supplementation, the sample was both proportional among the 3 study years and representative by majority land use. With that accomplished, the values that the county developed were tested using the supplemented sample. It should be noted that there was only limited analysis that could be done in Market Area 2 since the lack of water is not common in the immediate area and comparable sales are scarce. The supplemented file only contained 10 sales. The results of the overall analysis were satisfactory, yielding a median ratio of 70% for the county.

Another analysis was done where only sales with 80% or more acres of a major land use are included. This test often does not have sufficient sales to indicate the level of value for all major land uses. In this case, only one of the three major uses in one market area had a reasonable test of their level of value. The 80% irrigated land in Market Area 1 with 20 sales had a median ratio that rounded to 71%; among the other major uses of land, none had more than 6 sales so they were all inconclusive.

Beyond the statistical analysis, the review included; an overview of the general assessment practices, a comparison of the schedule of values to the surrounding counties, the dollar amount of change of each major land use. In this county, the number of sales in the study was sufficient to rely on most of the statistical calculations. The review of the county's assessment actions

2016 Agricultural Correlation Section for Fillmore County

produced confidence in the valuations that were produced. Together, the actions and statistics were adequate to determine the level of value for agricultural land.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately impact the uniform and proportionate valuation of all three property classes. The Division reviews the transmission of data from the county to the sales file to see if it was done on a timely basis and for accuracy. The Division reviews the verification the sales and usability decisions for each sale. The utilization of agricultural sales in 2015 was about 25% which is below the typical level for the region, but many sales are substantially changed adding irrigation after the date of the sale causing those sales to be unusable. All of this caused the sample to be unusually small and is likely an anomaly and not a trend. The county's inspection and review cycle for all real property is annually reviewed with the county assessor. The assessment practice review is more thoroughly described in the residential correlation.

The review of Fillmore County revealed that the data was transmitted accurately and in a timely manner. The sale verification process and the usability decisions resulted in the use of all arm's-length sales. There is no apparent bias in the measurement of real property due to the review of sales. The county has successfully completed the first six-year inspection and review cycle of the improvements on agricultural property and appears to be on schedule to comply with the ongoing inspection and review requirements. They also keep the agricultural land use current. The inspections are documented in the property record files.

Equalization

The analysis supports that the county has achieved equalization; a comparison of Fillmore County values to the adjoining counties shows that all values are reasonably comparable. The statistics show that the values are within the desired range. The Division's review of county's 3 Year Plan, a sample of their assessment records and their current and past assessment actions indicated that agricultural improvements and site acres are inspected and reappraised using the same processes that are used for rural residential and other similar property across the county. Agricultural improvements are believed to be equalized and assessed at the statutory level. All of the agricultural land acres are analyzed and valued within the required classification structure and values are applied uniformly throughout each market area. The assessment actions are well documented in the property record files. The level of value and the quality of assessment of the agricultural class is in compliance with generally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of agricultural land for the county is 70%. There are no strong indications of any major subclass outside the range. There are no recommended adjustments to the class or to any subclass of agricultural land.

2016 Opinions of the Property Tax Administrator for Fillmore County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	99	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	70	Meets generally accepted mass appraisal practices.	No recommendation.

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

Legend

- County Lines
- Market Areas
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Moderately well drained silty soils with clayey subsoils on uplands
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Lakes and Ponds
- IrrigationWells

(Locally Assessed)						

2016 Assessment Survey for Fillmore County

A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	1
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	2
4.	Other part-time employees:
	0
5.	Number of shared employees:
	0
6.	Assessor's requested budget for current fiscal year:
	\$207,090
7.	Adopted budget, or granted budget if different from above:
	\$207,090; The assessor's budget contains no costs for benefits. The benefits for the assessor's office are paid separately from the county general fund.
8.	Amount of the total assessor's budget set aside for appraisal work:
	0
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	0
10.	Part of the assessor's budget that is dedicated to the computer system:
	N/A (this is in the county data processing budget)
11.	Amount of the assessor's budget set aside for education/workshops:
	\$4,500
12.	Other miscellaneous funds:
	none
13.	Amount of last year's assessor's budget not used:

B. Computer, Automation Information and GIS

1.	Administrative software:
	County Solutions
2.	CAMA software:
	County Solutions / Micro Solve
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Assessor and Staff
5.	Does the county have GIS software?
	Yes; GIS Workshop
6.	Is GIS available to the public? If so, what is the web address?
	Yes; www.fillmorecounty.org
7.	Who maintains the GIS software and maps?
	Assessor and Staff and GIS Workshop
8.	Personal Property software:
	County Solutions

C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes
3.	What municipalities in the county are zoned?
	All towns are zoned except Strang
4.	When was zoning implemented?
	2000

D. Contracted Services

1.	Appraisal Services:
	None
2.	GIS Services:
	GIS Workshop
3.	Other services:
	County Solutions

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	No
2.	If so, is the appraisal or listing service performed under contract?
	N/A
3.	What appraisal certifications or qualifications does the County require?
	N/A
4.	Have the existing contracts been approved by the PTA?
	N/A
5.	Does the appraisal or listing service providers establish assessed values for the county?
	N/A

2016 Residential Assessment Survey for Fillmore County

List the characterist	valuation groupings recognized by the County and describe the uniquics of each:
Valuation Grouping	Description of unique characteristics
01	Geneva: (Including: Sub Geneva; Rural Geneva) Unique characteristics include: The primary host location for the K-12 school district(Fillmore Central) with part of the system in Fairmont; an active downtown commercial business district; a fairly broad selection of employment in the retail and service sectors; an organized residential market; the only hospital in the county.
02	Exeter: Unique characteristics include: A shared K-12 school district (Exeter Milligan) with parts of the system in both Exeter, and Milligan; a moderately active downtown commercial business district; a fairly limited selection of employment in the retail and service sectors.
03	Fairmont: Unique characteristics include: A K-12 school district (Fillmore Central) with most of the system in Geneva and part in Fairmont; Little to no business district or available services; a very limited selection of employment in the retail and service sectors, but some in the ag and ag related sector with a large ethanol plant nearby.
04	Shickley: (Including: Sub Shickley) Unique characteristics include: A K-12 school district (Shickley) but affiliate with Bruning Davenport for sports activities; a moderately active downtown commercial business district; a fairly limited selection of employment in the retail and service sectors.
05	Small Villages: (Including: Grafton; Milligan; Ohiowa; and Strang) Unique characteristics include: very limited or no schools operating in these towns, only Milligan has a grade school. Schools tend to drive both residential vitality and much of the commercial activity. There are very few stores or service businesses which means limited employment outside of the agricultural sector. All four of these small villages are in stages of decline.
06	Rural: There are few unique characteristics common to all parcels in this valuation group. The parcels are located in the non-urban areas throughout the county. Residences on agricultural parcels and ag buildings are associated with this valuation group and valued at the same time.
Ag	Agricultural homes and outbuildings
List and properties.	describe the approach(es) used to estimate the market value of residentia
The cost and	sales comparison approaches; both are rooted in the analysis of the local market.

The cou	nty uses	the	vendo	r prov	ided	depreciation	on t	ables	in	conjunc	tion	with	the	quality	and	
condition	observat	ions	made	during	the	inspection	and	revie	ew	process.	Ther	n, the	loc	al mark	et is	
analyzed	to develor	a loc	cational	depreci	ation	factor for e	ach v	aluati	on g	group.						

5. Are individual depreciation tables developed for each valuation grouping?

No; each assessor location is reviewed separately and the locational factors are developed independently, so the valuation group is not the smallest unit considered in the valuation process.

6. Describe the methodology used to determine the residential lot values?

Review the Sales and develop the land value by square foot.

7. Describe the methodology used to determine value for vacant lots being held for sale or resale?

There are only a scattering of vacant lots found throughout the county. In most of the towns, there is no organized development taking place. There is some development in Geneva but it is not a common practice for developers to maintain a surplus of vacant lots. The largest group of available lots is owned by the city. To date, no developer has requested a discounted cash flow analysis of the valuation of their lots. All lots are valued the same and there is no discount in place for vacant lots.

8.	Valuation Grouping	Date of Depreciation Tables	<u>Date of</u> <u>Costing</u>	<u>Date of</u> Lot Value Study	<u>Date of</u> <u>Last Inspection</u>
	01	2012	2012	2012	2014
	02	2015	2015	2015	2015
	03	2015	2015	2015	2015
	04	2015	2015	2015	2015
	05	2015	2015	2015	2015
	06	2012	2012	2015	2015
	Ag	2012	2012	2015	2015

----Depreciation is developed when a class of property is reviewed and new cost tables are implemented. The depreciation tables are all related to and similar to the cost table dates. They are typically prepared in the same year or may be one year newer than the cost tables.

----The rural residential, residences on agricultural parcels and agricultural buildings costs are 2012; Geneva is costed using 2012 cost tables; and all of the small towns and villages were costed using 2015 cost tables. All of the small town residential and rural and agricultural residences and buildings were inspected during 2015. The land values were all either updated or affirmed. Most land values were affirmed and remained unchanged for 2016.

----Land values were established in the past for all residential property. During each inspection and review cycle, land values are analyzed, and affirmed or updated as the inspection process is done. The land values are related to and similar to the dates of the cost tables.

----For 2016, the county has agreed to consolodated the four small villages into a single valuation group as all are in some stage of economic decline. The other 4 towns are judged to be stable and somewhat self sufficient with each hosting a high school which tends to drive residential and commercial activity.

2016 Commercial Assessment Survey for Fillmore County

1.	Valuation da	ata collection done by:						
1.		Assessor and Staff						
2.	List the va of each:	luation groupings recognized in the County and describe the unique characteristics						
	Valuation Grouping	Description of unique characteristics						
	01	Geneva: (Including: Sub Geneva; Rural Geneva) Unique characteristics include: The primary host location for the K-12 school district (Fillmore Central) with part of the system in Fairmont; an active downtown commercial business district; a fairly broad selection of employment in the retail and service sectors; an organized residential market; the only hospital in the county.

3.	List and properties.	describe the approach(es) used to estimate the market value of commercial						
	The cost and	sales comparison approaches.						
3a.	Describe the	process used to determine the value of unique commercial properties.						
	When the county values unique commercial property they use the cost approach on all parcels; they do additional sales research beyond Fillmore County; and they study the methodologies, approaches to values and values of similar parcels in other counties. All of this is done to address uniformity as well as develop the best estimate of market value that they can.							
4.		approach is used, does the County develop the depreciation study(ies) based on information or does the county use the tables provided by the CAMA vendor?						
	The county u	ses the local market to develop depreciation tables.						
	-	20 Fillmore Dage 55						

5. Are individual depreciation tables developed for each valuation grouping?

Yes; The county develops their depreciation countywide then determines a local multiplier based on the market, except for the unique and single purpose properties.

6. Describe the methodology used to determine the commercial lot values.

All sales are reviewed and land values are analyzed and prepared by square foot.

7.	Valuation Grouping	<u>Date of</u> <u>Depreciation Tables</u>	Date of Costing	<u>Date of</u> Lot Value Study	<u>Date of</u> <u>Last Inspection</u>
	01	2013	2012	2013	2013
	02	2013	2012	2013	2013
	03	2013	2012	2013	2013
	04	2013	2012	2013	2013
	05	2013	2012	2013	2013
	06	2013	2012	2013	2013

----The county inspected, reviewed and revalued all of the commercial property during 2013 for use in 2014. the costs were all from 2012, the depreciation was prepared during 2013, and the lots were revalued in Geneva and affirmed in the small towns in 2013. The rural commercial land was affirmed and not changed during 2013.

----For 2016, the county has agreed to consolodated the four small villages into a single valuation group as all are in some stage of economic decline. The other 4 towns are judged to be stable and somewhat self sufficient with each hosting a high school which tends to drive residential and commercial activity.

2016 Agricultural Assessment Survey for Fillmore County

	Zoto Agriculturar Assessment Survey for Finniore Coun	<i>V</i>					
1.	Valuation data collection done by:						
	Assessor and Staff						
2.	List each market area, and describe the location and the specific characteristics that make each unique.						
	Market Description of unique characteristics Year Land Use Area Completed						
	Area #1 differs mainly from Area 2 in that there is ground water available throughout the area and the crops raised and the purchases of land reflect it.	2015					
	Area #2 is unique because it mostly exists in a location where little or no ground water is available for irrigation. Since there is little potential for future irrigation, the general farming practices vary accordingly. There is usually only dry crop or grass land options available to the land owner, and the price of land reflects that. On the edges of the area, there is some irrigation but it is usually spotty or has limited capacity wells.	2015					
	During 2015, the county reviewed their 2014 GIS photo base to discover any cland use. They also carried the individual land records of all agricultural parcel the land use in the field, countywide, as they did the inspection of the rural improvements.	ls and reviewed					
3.	Describe the process used to determine and monitor market areas.						
	The county verifies sales, monitors well registrations, and has current information from the NRD. Since the ability to irrigate is reflected in the value of the land, it is the predominant characteristic in the development of the market areas.						
4.	4. Describe the process used to identify rural residential land and recreational land in t county apart from agricultural land.						
	This would be determined by the predominant present use of the parcel. There are presently no parcels classified as recreational.						
5. Do farm home sites carry the same value as rural residential home sites? If no the market differences?		not, what are					
	Yes; The first acre for the home site at \$10,000, and the next 2 acres at \$3,000 are valued the same. This is the same throughout the county. Zoning requires rural residential parcels to be at least 3 acres. Additional acres may vary since agricultural use may be a factor on predominantly agricultural parcels.						
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.						
	The county actively verifies all agricultural sales with the buyer or seller. Those verifications, the trend in values, and the ongoing observation of the present use of the parcels are all important to detect non-agricultural characteristics in the market. In the case of the Wetland Reserve Program (WRP), there are few known parcels with WRP acres in the county. The county believes that the WRP values closely align with the dry land values, so they use a value that would represent 100% of the market value for dry land to value WRP acres						

FILLMORE COUNTY

Plan of Assessment – 2015

State law establishes the framework within which the assessor must operate. However, a real property assessment system requires that an operation or procedure be done completely and in a uniform manner each time it is repeated. An accurate and efficient assessment practice represents prudent expenditure of tax monies, establishes taxpayer confidence in local government, and enables the local government to serve its citizens more effectively. The important role the assessment practices play in local government cannot be overstated. Pursuant to Nebraska Laws 2005, LB263, Section 9 the assessor shall submit a Plan of Assessment to the county board of equalization before July 31st and the Department of Revenue Property Assessment Division on or before October 31st. The plan and update shall examine the level, quality, and uniformity of assessment in the county.

The responsibilities of assessment include record maintenance. Ownership is updated in the cadastral and on our record cards using 521 Real Estate Transfer Statements (RETS) and the miscellaneous book to check for death certificates, etc. Our mapping procedure include updates to the cadastral and GIS. We use the GIS to draw out any new tracts and to change land uses in the county.

Reports are systematically filed as required by law. Real estate abstract is filed by March 19. Certification of values for levy purposes is mailed to all entities in the county by August 20. The school district taxable value report is sent to the state by August 25. The Tax list of real and personal property is delivered to the treasurer by November 22, and the Certificate of Taxes Levied (CTL) is filed with the state by December 1. Tax list corrections are made only if necessary. Homestead exemption applications are mailed by February 1 and must be filled out, signed and returned to our office by June 30. Personal property forms are mailed by February 15th and must be filled out, signed and returned by May 1. Notices of valuation change are mailed on or before June 1. Exempt property applications are mailed in November and must be filled out, signed and returned by December 31.

The assessor is responsible for valuing at market value all real property in the county except railroads and public service entities as of January 1 of each year.

Assessors use professionally accepted mass appraisal techniques, including but not limited to: the sales comparison (sales of property of known or recognized value) taking into account location, zoning, and current functional use; the income approach, and the cost approach. By statute all real property is assessed at 100% of actual value, except for agricultural land and horticultural land which is assessed at 75% of actual value.

The qualification process involves a careful review of the information on the 521 Real Estate Transfers. The assessor and staff do the sale qualification. Personal knowledge of the sales is also used to make determinations on the usability of those sales. Some are later modified based on information discovered during the verification and inspection process. Most of the interviews conducted outside the inspection process are for clarification or when another party to the sale is contacted, and for unimproved parcels that are not inspected.

Most of the verification process is done during the inspection and most interviews are done at that time. The phone is used for verification with persons who are unavailable during the inspection process or if additional clarification is needed.

In Fillmore County the order of preference for verification is buyer, buyer's representative, seller and then real estate agent.

When conducting a physical inspection, the county looks for many of the same things that are looked for when listing property. We check for the accuracy of the listing. We also believe the sale file review serves as a semi-random sampling of the assessed property. The review enables us to plan for reappraisal priorities, and prepare for future changes of classes and sub-classes.

After sales are reviewed and analyzed the Assessor determines if a certain class or sub-class of property needs to be reassessed.

We have a systematic review of all property in the county and the county attempts to inspect all improved sales in the sales roster.

The information gathered during the sale review process is kept in the county sales books and the state sales file.

Pick-up work is scheduled based on our permits. We try to schedule pick-up work and sales review in the same area.

Unreported pick-up work and alterations are listed and errors that are discovered are corrected on the records accordingly. Omissions are usually parcels of unreported pick-up work, which are listed, valued and added to the tax roll.

We continue to work with the Natural Resource Districts (NRD) for accurate and up to date land use information. We track our permits and run a list of these permits in our administrative program. All pick-up work is entered on corresponding property record cards.

Our current aerial photos were taken in 2012/2013 for all rural parcels. This helps in the process of locating and identifying buildings in the rural area. Permits are required for any new buildings or additions and need to be approved prior to construction.

Fillmore County Assessor's office personnel include the assessor, the deputy assessor, clerk and a part time person. The assessor and deputy assessor have completed continuing education classes to keep up with certification requirements and is certified through 2018. Money has been included in the budget for continuing education for this certification and continuing education for clerks.

Fillmore County utilizes the computerized administrative system PC Admin, provided and supported by MIPS County Solutions & NACO. The Marshall and Swift costing tables are used for estimating replacement costs for the residential parcels and agriculture homes & buildings. Fillmore County has purchased the M&S costing manuals for residential and commercial properties. The county administrative system includes the MIPS CAMA V2.5 package. The assessment records are kept in the hard copy format with updates made in the form of inserts. The valuation history on the face of the hard copy is updated to reflect all valuation changes that are made annually. Houses are sketched in our APEX Program.

According to the 2015 abstract, the real property within Fillmore County is comprised of the following: 2,551 residential parcels of which 279 are unimproved, 534 commercial parcels of which 77 are unimproved, 14 industrial parcels, there are no recreational parcels, and 3,392 agricultural parcels of which 2,519 are unimproved. Among the improved agricultural parcels there are 457 with residential improvements. The percentage breakdown of the three primary classes of real estate is as follows: residential 41%, commercial/industrial 8%, agricultural 51% and 0.00% comprising any other classes. There are two other groups to mention; the administrative parcels (including Game and Parks and exempt parcels), numbering 333 and there are 3 parcels that have additional valuation responsibility (TIF Projects). These groups are mentioned because they represent additional assessment responsibility but will not be included in the parcel count in this report. The total number of parcels that are associated with the total real property value from the total records on the front page of the abstract in Fillmore County is estimated at 6,492 and contain no parcels with oil & mineral interests. The total number of parcels including exempt, Game and Parks and TIF is 6,828.

The total valuation as certified on the abstract of assessment for real property 2015 to the Department of Revenue Property Assessment Division is 2,102,686,698. The breakdown of valuation is as follows:

	<u>Valuation</u>	Total Parcels
Real Estate	2,102,686,698	6492
Personal Property (as of 6/15/2015)	154,090,209	1293
Railroad & Public Service Utilities	24,859,982	
(Certified by PA&T in 2014)		
TOTAL	2,281,636,889	

Homestead Exemption applications for 2015 are 264

Charitable exemption applications for 2015 were 33 excluding cemeteries.

Cadastral maps show the boundaries of subdivisions of land usually with the bearings and lengths thereof and the areas of individual tracts for the purpose of describing and recording ownership. Our current cadastral maps were made in 1989. The ownership names and property lines are routinely updated, and we consider them current.

Our property record cards serve as a reference to and inventory of all portions of the property. It contains a summary of the general data relevant to the parcel it represents. Our most recent record cards (for all classes of property) were new for 2010, while still maintaining the data from 1993 to current. Our 2015 records are currently up-to-date along with the 2015 values. We also

updated all photos for our town/village record cards for 2012. The Geneva and rural photos were updated for 2012. New Photos are taken for new construction/and or updates to current homes and buildings.

When a parcel of real property in the State of Nebraska transfers and a deed is recorded a Real Estate Transfer Statement, Form 521, is required. A copy of Form 521 is provided to the assessor. The assessor is responsible for maintaining the changes of ownership on the property record cards of the county. The assessor completes supplemental worksheets on these sales and submits this information to the Department of Revenue Property Assessment Division within 45 days.

Our office has developed a formal manual of office and assessment procedures, which includes a job description. It is our practice to follow all rules, regulations, and directives that govern the assessment process.

We qualify all sales, review most of them, prepare in-depth analysis on most property classes or subclasses and identify the projects that need to be done.

Our level of value, quality and uniformity for assessment year 2015:

Property Class	Median	COD	PRD
Residential	98%	14.84	107.86
Commercial	99%	6.47	102.12
Agricultural Land	70%	18.75	106.00

Our three year plan is as follows:

➤ 2015 Continue systematic review of all classes of property

Examine the level, quality and uniformity of assessment in the county Review level of value and make any needed changes by class of property Review agricultural land for any changes in land areas and value.

Verify land usage with landowners (FSA maps) & NRD information

Add new construction/removal of old buildings

Continue our systematic review of property

Update cost tables to begin Review process of rural acreages/ rural homes and outbuildings (part of 6 year review)

New Photos as needed.

Start 6 year review cycle of rural acreages/rural homes

Feasibility Study on new vendor program (Vanguard CAMA Vision)

(Will visit Seward County/ Demo

➤ 2016 Continue sales review of all classes of property

Examine the level, quality and uniformity of assessment in the county Review level of value and make any needed changes by class of property Review agricultural land for any changes in land areas and values Verify land usage with landowners (FSA maps) & NRD information Add new construction/removal of old buildings Continue our systematic review of property Review rural homes/buildings.

This will complete Fillmore County's second cycle of the 6 year review process.

➤ 2017 Continue sales review of all classes of property

Examine the level, quality and uniformity of assessment in the county Review level of value and make any needed changes by class of property Review agricultural land for any changes in values and land areas Verify land usage with landowners (FSA maps) & NRD information Add new construction/removal of old buildings Continue our systematic review of property

BEGIN 3RD CYCLE OF 6 YEAR REVIEW

Villages, Geneva City or Commercial.

Determination based on statistical analysis. (Level of Value)

Determine if rural aerial photos need to be retaken. (GIS)

Examine the level, quality and uniformity of assessment in the county
Review level of value and make any needed changes by class of property
Review agricultural land for any changes in values and land areas
Verify land usage with landowners (FSA maps) & NRD information
Add new construction/removal of old buildings
Continue our systematic review of property (whichever class of property not
Reviewed in 2017)

Past Inspections and Reviews

2006	Reviewed the rural homes and buildings and Geneva
	Completed parcel layer in GIS/Aerial photos

- 2007 Reviewed all the small towns
- 2008 Worked on completing the land use layer and converted the land Classification codes from the old soil symbols to the new numeric Codes
- 2009 Commercial & Industrial values reviewed including new photos (-20% all homes 1939 or older with average or lower condition in Geneva due to statistics)
- Reviewed Geneva and all towns (6 year review process)
 Made new record cards
 New APEX sketching program, drew all residential/commercial sketches
- 2011 Beginning rural residential and building review/new rural home & OB photos/ begin new aerial imagery
- 2012 Rural Home & OB Values (part of continued 6 year review)
 Aerial Imagery completed. City and Village Photos
 Grafton village decrease value on homes and improvements-5% to be in

compliance. (Level of value at 1.015 for 2012)

2013 Residential Review in villages (continued 6 yr. review)

statistics indicate we are out of range in a couple of villages based on sales.

However we are looking at only a couple of sales in these villages)

Residential Photos

CAMA-V2.5 (new costing program)

Annotation Layer (GIS)

Completes second cycle of 6 year review process on residential Parcels

2014 Commercial & Industrial Review (part of continued 6 yr. review)

Geneva City Review (part of 6 yr. review)

Change Lot Values for Commercial (sale indicates adjustment needed.)

Completes second cycle of 6 year review process on commercial Parcels

2015 Review agricultural land for any changes in land areas and value.

Verify land usage with landowners (FSA maps) & NRD information

Add new construction/removal of old buildings per permits

Continue our systematic review of property

Start 6 year review of rural acreages/rural homes

Completes second cycle of 6 year review process on rural homes/outbuildings
