Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Hayes County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Hayes County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Susan Messersmith, Hayes County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

Property Class	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

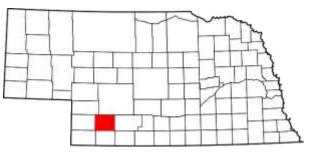

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

County Overview

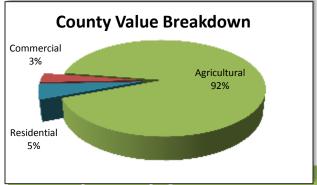

With a total area of 713 square miles, Hayes had 933 residents, per the Census Bureau Quick Facts for 2014, a 4% population decline from the 2010 US Census. In a review of the past fifty years, Hayes has seen a steady drop in population of 51% (Nebraska Department of Economic Development). Reports indicated that

69% of county residents were homeowners and 89% of residents occupied the same residence as in the prior year (Census Quick Facts).

There are few commercial parcels in Hayes County. Per the latest information available from the U.S. Census Bureau, there were twenty employer establishments in Hayes. County-wide employment was at 605 people, a 2% loss relative to the 2010 Census (Nebraska Department of

Labor).

Other Communities Hamlet
Palisade

Most Populated Hayes Center (213)

Steady since 2010 US Census

Census Bureau Quick Facts 2014/Nebraska Dept of Economic Development

Agriculture is the economic driver of the county. Hayes is included in the Middle Republican Natural Resources District (NRD). Grass land makes up a majority of the land in the county.

2016 Residential Correlation for Hayes County

Assessment Actions

A reappraisal of all the residential properties in the county was completed for this year. Land studies were conducted, but the land tables appeared to be achieving market value without adjustment. Costing tables were updated and depreciation studies were completed and implemented.

In addition to the reappraisal work, the cyclical inspection work included on site property reviews of improvements in township six, the pickup work was also completed timely.

Description of Analysis

Residential sales are stratified into three valuation groups; the majority of the parcels are in Hayes Center. The total county population is less than 1,000 and the market is not organized.

Valuation Grouping	Assessor Location
1	Hayes Center
3	Hamlet, Palisade
4	Rural Residential

Review of the statistical profile does support a level of value within the acceptable range, although the sample is very small, and the measures of central tendency can be significantly shifted by the inclusion or exclusion of a single sale. The dispersion in the sample is demonstrated by the width of the 95% confidence interval which ranges from 81% to 147%.

The county assessor's valuation process used an expanded study period in an attempt to identify the most probable market value of residential property. The valuation changes made by the county for the current year did shift the median of the sold properties from 88% to 99% which correlates with a county wide increase to residential property of 17% as displayed in the 2016 County Abstract of Assessment, Form 45 Compared to the 2015 Certificate of Taxes Levied. Although the statistic cannot confidently be used to develop a point estimate of the level of value, the analysis supports that the statutory level has been achieved.

Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine whether valuation processes result in the uniform and proportionate valuation of real property.

One aspect of the review is to examine the sales verification and qualification processes. The county mails a sales questionnaire documented to both property buyer and seller and typically receives a response from at least one of the parties. Review of the sales rosters indicated that the county has high sales utilization rates, and attempts to use as many transactions as possible. The

2016 Residential Correlation for Hayes County

transactions that were non-qualified were well documented. The review confirmed that qualification determinations are made without bias. The sales review also included a process to ensure that sales data and assessed values are accurately reported to the Division. Although sales transfers should be done more routinely, the county does accurately report information to the Division.

The frequency and completeness of the physical review cycle was also examined. The county began a new inspection cycle this year, and has established a plan to ensure that properties are inspected no less frequently than every six years. Review of the property record cards, indicate that the review work is thorough and well documented; the process also includes a review of the listing determinations to ensure consistency of the subjective data.

The annual review also includes an analysis of assessed value changes to ensure that assessment actions are systematic, and are evenly distributed to sold and unsold property. In Hayes County, residential valuation changes were uniformly distributed to both sold and unsold property, valuation changes represented the reported actions, and there was no evidence of selective reappraisal.

During the review, the valuation groups within the residential class were examined to ensure that the groups being utilized represent true economic areas within the county. While the market throughout Hayes County is not organized, Hayes Center does have more activity than Hamlet and Palisade and property will typically sell better within the community; therefore the county utilizes two valuation models for properties in the Villages. The rural properties tend to be more desirable and will utilize a different structure for valuing land, for these reasons, the three valuation groups utilized by the county appear to be well constructed. The review of the valuation groups also supported that valuation methodologies were well documented, the county assessor is transparent in explaining her processes, both to the Division and to the taxpayers of Hayes County.

The final section of the assessment practices review that pertains to the residential class included a review of the vacant land valuation methodologies. The county utilizes a square foot valuation method; land sales are reviewed at least cyclically when the class is reappraised and are adjusted when warranted.

Equalization and Quality of Assessment

There are too few sales outside of Hayes Center to analyze the statistics for purposes of equalization. The assessment process in the county is transparent and consistently applied, all property values are believed to be uniformly assessed. Based on the review of assessment practices the quality of assessment of residential property in Hayes County complies with generally accepted mass appraisal standards.

2016 Residential Correlation for Hayes County

RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	10	98.78	107.70	102.50	24.87	105.07
03 04	1	159.82	159.82	159.82		100.00

ALL						
10/01/2013 To 09/30/2015	12	98.78	109.39	95.93	27.81	114.03

Level of Value

Based on the analysis of all available information, Hayes County has met the statutory level of value of 100% in the residential class.

2016 Commercial Correlation for Hayes County

Assessment Actions

Within the commercial class of property, only routine maintenance was completed for 2016; there was no new construction within the commercial class this year.

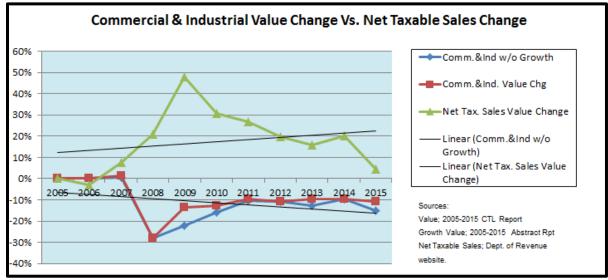

Description of Analysis

There are no valuation groups within the commercial class of property; there are only 42 improved commercial properties in the entire county, with the majority of these parcels being within Hayes Center. There is not an organized market for commercial property within the county.

Only one qualified commercial sale occurred within the study period, a level of value determination based on statistics is not feasible. The county reported that only routine maintenance occurred; the 2016 County Abstract of Assessment, Form 45 Compared to the 2015 Certificate of Taxes Levied reflects a 5% increase to the class, this change is not an increase in valuation, but rather the reclassification of a parcel that was previously coded residential. Actual value in the commercial class changed less than 0.1%.

With so few commercial parcels in the county, an analysis whether conducted by the Division or the county is difficult and conclusions would likely be unreliable. For this reason, only the cost approach is used within the class and depreciation is established based on actual age and condition. Properties were revalued with new costing in 2012, and were last inspected in 2014.

The annual percentage change in net taxable sales is sporadic, and shows single year changes that are not consistent with the general economic trends in this region of the state; the chart provides further support that the market within the county is not organized.

2016 Commercial Correlation for Hayes County

Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine whether valuation processes result in the uniform and proportionate valuation of real property.

One aspect of the review is to examine the sales verification and qualification processes. The county mails a sales questionnaire document to both property buyer and seller and typically receives a response from at least one of the parties. Review of the sales rosters indicated that there was only one non-qualified commercial transaction within the study period. The sales review also included a process to ensure that sales data and assessed values were accurately reported the Division. Although sales data should be submitted more frequently, the county has accurately reported data to the Division.

The frequency and completeness of the physical review cycle was also examined. As there are so few commercial parcels in the county, a physical inspection of all properties is conducted every six years. Review of the property record cards indicated that the review work is thorough and well documented.

The annual review also includes an analysis of assessed value changes to ensure that assessment actions are systematic, and are evenly distributed to sold and unsold property. In Hayes County, the review indicated minimal changes to either sold or unsold properties in both the 2015 and 2016 assessment years.

During the review, the valuation groups within the commercial class were examined to ensure that the groups being utilized represent true economic areas within the county. With so few commercial properties within the county, they are not stratified by location for valuation purposes.

The final section of the assessment practices review that pertains to the commercial class included a review of the vacant land valuation methodologies. The county utilizes a square foot valuation method and applies the same tables to residential and commercial properties, sales are reviewed at least cyclically when the residential class is reappraised and tables are adjusted when warranted.

Equalization and Quality of Assessment

There are not adequate sales in Hayes County to analyze the statistics for purposes of equalization. The assessment process in the county is transparent and consistently applied, all property values are believed to be uniformly assessed. Based on the review of assessment

2016 Commercial Correlation for Hayes County

practices the quality of assessment of commercial property in Hayes County complies with generally accepted mass appraisal standards.

Level of Value

Based on the analysis of all available information, Hayes County has met the statutory level of value of 100% in the commercial class.

2016 Agricultural Correlation for Hayes County

Assessment Actions

The agricultural homes were revalued for 2016 with updated costing and depreciation; additionally agricultural improvements in township six were physically inspected and land use in township 6 was reviewed with aerial imagery.

A study of agricultural land sales was conducted; as a result, irrigated land in the county increased five percent, dry land decreased two percent; grass and Conservation Reserve Program (CRP) land increased fifteen percent.

Description of Analysis

The majority of agricultural land in Hayes County is grassland; about 40% of the acres are irrigated and dry cropland. The county is in the Middle Republican Natural Resource District, which imposes water allocation restrictions on irrigated parcels. All counties adjoining Hayes are generally comparable where they adjoin, although comparability is defined using soil maps and not by an absolute extension of the county line as differences immerge at varying distances.

Analysis of sales within the county indicated that while the sales were proportionately distributed, the sample was heavily weighted with irrigated sales and the majority land use (MLU) samples were unreliably small. The sample was expanded with comparable sales to maximize the size of the MLU samples.

Review of the statistical profile supports that all land uses have been valued within the acceptable range. Additionally, the adjustments made by the county assessor are similar to the general economic trends in this portion of the state, where dry land largely remained stable while irrigated land continues to show a slight market increase. Irrigated and dry land are subject to similar economic forces and tend to move similarly in the market; however, in this region of the state irrigated water rights are a scare market resource and sales occurring after the end of the study period continue to indicate some appreciation in the market. The county assessor increased CRP this year after examining CRP sales from across this region of the state, which indicated that the market value of CRP land is closer to dry land than grass land.

The irrigated and dry values established by the county assessor are reasonably comparable to the surrounding counties, a larger spread in value occurs between Hayes and Chase, Perkins, and Lincoln Counties where soils are somewhat superior and larger portions of the land are more suitable for cropping.

Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine whether valuation processes result in the uniform and proportionate valuation of real property.

One aspect of the review is to examine the sales verification and qualification processes. In Hayes County, verification documents are sent to both the buyer and seller; the assessor reports

2016 Agricultural Correlation for Hayes County

that at least one party will respond for nearly every transactions. The questionnaire seeks to determine how selling prices were established. Adjustments for personal property are made when the verification indicates the value of the personal property influenced the sales price. The sales portion of the review also includes processes to ensure that sales information and assessed values are accurately and timely filed with the Division; the sales information provided by Hayes County has been accurate and complete. The county should work towards a schedule of filing sales with the Division on a monthly basis.

The frequency and completeness of the physical review cycle was also examined. For the agricultural class the, inspection process complies with the statutory time requirements, is well documented, and is thoroughly conducted using the same process described for the residential improvements. A review of agricultural land using aerial imagery is also conducted at the same time as the improvements are reviewed.

The annual review also includes an analysis of assessed value changes to ensure that assessment actions are systematic, and are evenly distributed to sold and unsold property. In Hayes County, it was verified that all properties are valued using the same schedule of values.

During the review, the market areas were reviewed to ensure that they represent unique characteristics that impact market value. There are no market areas within Hayes County. The county is geographically similar and annual review of sales transactions has not shown a need to stratify the county into market areas.

The final portion of the review that related to agricultural land included a discussion of the primary use of a parcel and identification of agricultural and horticultural uses. All parcels in the county are routinely reviewed for land use. Parcels that are smaller than 20 acres and are not being cropped will be examined more closely for land use. When no agricultural activity is discovered, either a physical inspection is conducted or the county will request other evidence of agricultural use from the property owner.

Equalization and Quality of Assessment

Agricultural homes and buildings have been valued using the same appraisal tables as the rural residential properties have; all were revalued for the current assessment year. Similarly, the same first acre home site value is used for rural residential and farm home sites. Since rural residential properties have been determined to be assessed in the acceptable range, agricultural improvements are believed to be equalized at the statutory level.

Agricultural values are also equalized at uniform portions of market value; all values are in the acceptable range and are reasonably comparable to adjoining counties. The quality of assessment of agricultural land in Hayes County complies with professionally accepted mass appraisal standards.

Based on the analysis of all available information, the level of value of agricultural land in Hayes County is 70%.

2016 Opinions of the Property Tax Administrator for Hayes County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation		
Residential Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.		
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.		
Agricultural Land	70	Meets generally accepted mass appraisal practices.	No recommendation.		

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

Legend

County Lines

Market Areas

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

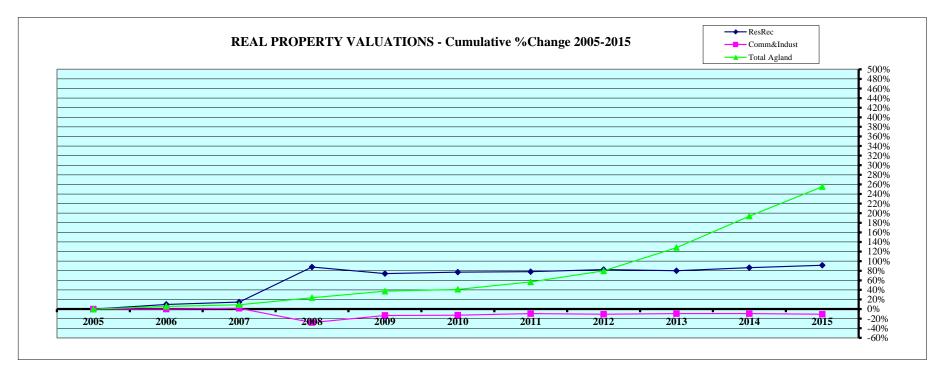

Somewhat poorly drained soils formed in alluvium on bottom lands

Lakes and Ponds

IrrigationWells

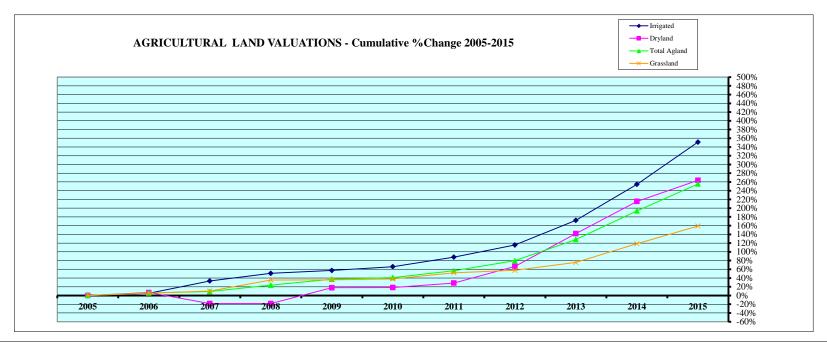

CHART 2

(1) Residential & Recreational excludes AgDwelling & farm home site land; Comm. & Indust. excludes minerals; Agric. land incudes irrigated, dry, grass, waste & other agland, excludes farm site land. Real property growth is value attributable to new construction, additions to existing buildings, and any improvements to real property which increase the value of such property.

2016 Assessment Survey for Hayes County

A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	1
2.	Appraiser(s) on staff:
	0
3.	Other full-time employees:
	0
4.	Other part-time employees:
	1
5.	Number of shared employees:
	None
6.	Assessor's requested budget for current fiscal year:
	\$104,878
7.	Adopted budget, or granted budget if different from above:
	same
8.	Amount of the total assessor's budget set aside for appraisal work:
	\$6,000
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	n/a
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$14,500
11.	Amount of the assessor's budget set aside for education/workshops:
	\$1,500
12.	Other miscellaneous funds:
	n/a
13.	Amount of last year's assessor's budget not used:
	\$10,017

B. Computer, Automation Information and GIS

1.	Administrative software:						
	MIPS PC V2						
2.	CAMA software:						
	MIPS PC V2						
3.	Are cadastral maps currently being used?						
	They are sometimes used but no longer maintained.						
4.	If so, who maintains the Cadastral Maps?						
	n/a						
5.	Does the county have GIS software?						
	Yes						
6.	Is GIS available to the public? If so, what is the web address?						
	Yes, www.hayes.gisworkshop.com						
7.	Who maintains the GIS software and maps?						
	The assessor and staff						
8.	Personal Property software:						
	MIPS PC V2						

C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes
3.	What municipalities in the county are zoned?
	Hayes Center and Palisade
4.	When was zoning implemented?
	1998

D. Contracted Services

1.	Appraisal Services:
	Pritchard & Abbott for the appraisal of oil and gas mineral interests
2.	GIS Services:
	GIS Workshop, Inc
3.	Other services:
	n/a

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Yes, Pritchard & Abbott
2.	If so, is the appraisal or listing service performed under contract?
	The county has a contract with Pritchard & Abbott
3.	What appraisal certifications or qualifications does the County require?
	The county does not specify qualifications.
4.	Have the existing contracts been approved by the PTA?
	No
5.	Does the appraisal or listing service providers establish assessed values for the county?
	The oil and gas mineral values are established by Pritchard and Abbott.

2015 Plan of Assessment for Hayes County Assessment Years 2016, 2017, and 2018 July 31, 2015

Plan of Assessment Requirements:

Pursuant to NE State Statue, 77-1311.02, on or before June 15 each year, the assessor shall prepare a plan of assessment, which describes the assessment actions planned for the next assessment year and two years thereafter. This plan is to be presented to the county board of equalization on or before July 31 each year and to the Department of Revenue on or before October 31 each year.

Assessment requirements for Real Property

All real property in the State of Nebraska is subject to taxation unless expressly exempt by Nebraska Statues or the Nebraska Constitution. All real property other than agricultural land and horticultural land shall be valued at 92-100% of its actual value. Agricultural and horticultural land shall be valued at 69-75% of the actual value. Personal Property shall be valued at its net book value.

General description of Real Property in Hayes County

Per the March 2015 County Abstract, Hayes County consists of the following real property types:

	Parcels Land Value Impr Value		Total Value		% Value		
Residential/Rec	273	\$	575,155.00	\$ 8,858,377.00	\$	9,433,532.00	1.86
Commercial/Ind	53	\$	88,310.00	\$ 2,036,315.00	\$	2,124,625.00	.419
Agricultural	2045	\$	469,163,356.00	\$ 23,604,076.00	\$	492,767,432.00	97.32
Mineral	18	\$	-	\$ -	\$	2,555,310.00	.50
Total	2384	\$	469,826,821.00	\$ 34,498,768.00	\$	506,325,589.00	100

Current Resources:

Staff & Training

Due to the population of the Hayes County, the County Clerk is required to be an ex-officio County official who must also hold the office of Assessor, Register of Deeds, Clerk of District Court and Election Commissioner. A valid Nebraska Assessor's Certificate is required in order to file for or assume the position of County Clerk. Current staff consists of the Clerk/Assessor, one full time and one part time office helper. The Clerk holds a valid Nebraska Assessor's Certificates.

The 60 hours of education required during the current re-certification period ending December 31, 2018 will be met by all office personnel currently holding an assessor certificate.

Budget

The office of the Clerk/Assessor encompasses the following five offices: County Clerk, Register of Deeds, County Assessor, Election Commissioner, and Clerk of District Court. The Assessor's budget is sufficient to cover the upcoming expenses of office operation.

2015-2016 Proposed Budget

Salaries	\$80,378.00
Office Operation & Misc	\$14,500.00
Office Equip & Supply & Training	\$4,000.00
Pickup appraisal work	\$6,000.00
	\$104,878.00

Hardware and Software:

Hayes County uses MIPs CAMA and Administrative software for parcel record keeping. GIS Workshop is used to map land use and soil type. This system will replace the need to update the current cadastral maps. Three new computers, with required hardware specifications to run GIS workshop and maps, were purchased in 2014.

GIS Workshop has built a web-based appraisal /assessment page for Hayes County. The web page allows anyone with internet access to search for real estate records and information via the internet. We have made efforts to notify the public of this web page through publication in the newspaper, mailings, and informing people in person and by phone.

Property Record Cards

All property record cards are updated annually, or as needed, electronically and with hard copies of the current information. Each Property Record Card includes the following information:

Current owner and address (if applicable, a situs address if different from owners mailing address) Legal description of parcel

A property record break down report detailing:

History of property

Codes relating to taxing districts,

Property classification codes,

Soil types and uses by acre and total acres

Current and previous valuation

Book and pages of last deed record

Assessment Procedures

Discover, List and Inventory all property:

All real and personal property subject to taxation shall be assessed as of January 1, current year. The appropriate paperwork for ownership changes, splits and combinations are completed according to statutory requirements. All sales are considered to be arm's length, unless through the verification process, it is proven to be otherwise. Sales questionnaires are sent to both seller and buyer to assist in completing the sales review process.

Data Collection: Hayes County will implement procedures to complete a physical inspection of all properties on a six-year cycle.

Real Property Improvements: Hayes County uses various methods of discovering changes in real property. County and village zoning permits, personal property depreciation schedules, reports of taxpayers, realtors and appraisers, information on sales questionnaires and ongoing physical inspections by staff and other sources are all used as means of discovery.

Homestead Exemptions: Homestead exemption applications are accepted in the office from February 1st through June 30 pf each year. Letters containing pre-printed applications are sent to the previous years' applicants. When returned, they are verified that the applicant is owner/occupant. Applications along with an income statement are forwarded to the Nebraska Department of Revenue by August 1st for income verification.

Personal Property: Personal property data is gathered primarily using the taxpayer's federal income tax depreciation schedules. All Real Estate Transfer Form 521's with non-real property value excluded from the purchase price are required to provide an itemized listing of such personal property for use on the following year personal property return of the new owner. Personal property filing forms are sent to each property owner the beginning of March and deadline reminders are published in the local paper twice prior to the filing deadline. Non-responders are contacted by phone prior to the deadline.

Ag Land: Currently, ag land details are gathered from several sources. Irrigated land acres are cross referenced with a listing of owner certified acres at the NRD. CREP and CRP contracts are also used as information sources. Visual inspection along with surveys verifies land usage and size. Once the GIS system is complete, it will be used to keep ag land information current and correct.

Improvements on Leased Land: IOLL data is gathered in the same manner as real property improvements. Current ownership of IOLL's on school land is updated after each Board of Educational Lands and Funds auction.

Level of Value, Quality and Uniformity for assessment year 2015

Sales rosters provided by the state along with the "what if" spread sheet are used when reviewing the level of value. Information for the following chart was taken from the summary sheets of 2015 Reports and Opinions of the Property Tax Administrator.

Property Class	Median
Residential	100
Commercial	100
Agriculture	72

The office will continue to work with our Liaison to maintain appraisal ratios which comply with Department of Revenue, Property Assessment Division requirements.

	Median	COD	PRD
Residential	92-100%	< 15	98-103%
Commercial	92-100%	< 20	98-103%
Agland	69-75%	< 20	98-103%

Other Functions Performed by the Assessor's Office

- 1. Record Maintenance, mapping updates, ownership changes and pickup work
- 2. Annually prepare and file Assessor Administrative Reports required by law/regulation:
 - * Abstracts (Real & Personal Property)
 - * Assessor survey
 - * Sales information to PA&T rosters and annual Assessed Value Update w/Abstract
 - * Certification of Value to Political Subdivisions
 - * School District Taxable Value Report
 - * Homestead Exemption and Tax Loss Report
 - * Certificate of Taxes Levied Report
 - * Report of current values for properties owned by Board of Education Lands & Funds
 - * Report of all Exempt Property and Taxable Government Owned Property
 - * Report of Trusts owning Ag land in Hayes County
 - * Report of average assessed value in Hayes County of single-family residential property
 - * Annual Plan of Assessment Report

- 3. Send Personal Property schedules; administer annual filing of personal property schedules, prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required.
- 4. Permissive Exemptions: administer annual filings of applications for new or continued exempt use, review and make recommendations to county board.
- 5. Taxable Government Owned Property; annual review of government owned property not used for public purpose, send notices of intent to tax, etc.
- 6. Homestead Exemptions; administer annual filings of applications, approval/denial process, taxpayer notifications and taxpayer assistance.
- 7. Centrally Assessed-review of valuations as certified by PA&T for railroads and public service entities, establish assessment records and tax billing for tax list.
- 8. Tax Districts and Tax Rates-management of school district and other tax entity boundary changes necessary for correct assessment and tax information; input/review of tax rates used for tax billing process.
- 9. Send Notice of Valuation Changes
- 10. Tax Lists; prepare and certify tax lists to county treasurer for real property, personal property and centrally assessed. Prepare tax statements for the county treasurer.
- 11. Tax List Corrections-prepare tax list correction documents for county board approval.
- 12. County Board of Equalization; attend county board of equalization meetings for valuation protests, assemble and provide information.
- 13. TERC Appeals; prepare information and attend taxpayer appeal hearings before TERC, defend valuations.
- 14. TERC Statewide Equalization; attend hearings if applicable to county, defend values and/or implement orders of the TERC.
- 15. Education; Assessor education- attend meetings, workshops and educational classes to obtain 60 hours of continuing education to maintain assessor certification.

Assessment Actions Planned for Assessment Year 2016

Ag Land: A market analysis of ag sales by land classification groups will be conducted to determine any possible adjustments needed to comply with statistical range requirements. All qualified sales with sale information (ie, date of sale, type of land, selling price) are plotted on a county map to aid in the public education process. Reviews will be done based on GIS aerial maps.

Residential and Commercial: Residential and commercial parcels will be reviewed based on sales information and statistical data. Pickup work of new construction, remodeling and removals will be completed annually as well as a review of all sales. Depreciation tables for dwellings will be reviewed and updated according to current sales information. The miscellaneous building component value pricing sheet pricing will be reviewed

GIS maps will continue to be refined. GIS maps will be reviewed by landowners in the office or will be printed and mailed to landowners. Landowners will be requested to review the maps and visit our office with any questions.

A pickup list for future site visits is continuously being updated. We will continue the current process of sending sales questionnaires to all sellers and buyers to assist in the maintenance of the sales file. Hayes County will comply with the systematic inspection and review requirements of §77-1311.03. A physical inspection and a GIS Review of Township 5-N will be completed this year.

Assessment Actions Planned for Assessment Year 2017

Ag Land: A market analysis of ag sales by land classification groups will be conducted to determine any possible adjustments needed to comply with statistical range requirements. All qualified sales information will be plotted on a county map to aid in the public education process. Review of land and acre use will be completed with GIS Workshop aerial maps.

Residential and Commercial: Residential and commercial parcels will be review based on sales information and statistical data. Pickup work of new construction, remodeling and removals will be completed annually as well as a review of all sales. Depreciation tables for dwellings will be reviewed and updated according to current sales information.

Pick-up work for all classes of property will be conducted. County and village building and zoning permits will be monitored and inspected along with new land sale locations. A pickup list of sites for future visits will be continuously updated. Sales questionnaires will be sent to all sellers and buyers to assist in the maintenance of the sales file and personal property. Hayes County will comply with the systematic inspection and review requirements of §77-1311.03. A physical inspection and a GIS review of Township 8-N will be completed this year.

Assessment Actions Planned for Assessment Year 2018

Ag Land: A market analysis of ag sales by land classification groups will be conducted to determine any possible adjustments needed to comply with statistical range requirements. All qualified sales information will be plotted on a county map to aid in public education of the 3 year sales study process. Review of land use will be completed with GIS Workshop.

Residential and Commercial: Residential and commercial parcels will be reviewed based on sales information and statistical data. Pickup work of new construction, remodeling and removals will be completed annually as well as a review of all sales. Depreciation tables for dwellings will be reviewed and updated according to current sales information. The miscellaneous building component value pricing sheet pricing will be reviewed

Pick-up work for all classes of property will be conducted. County and village building and zoning permits will be monitored and inspected along with new land sale locations. A pickup list of sites for future visits will be continuously updated. Sales questionnaires will be sent to all sellers and buyers to assist in the maintenance of the sales file. Hayes County will comply with the systematic inspection and review requirements of §77-1311.03. A physical inspection and a GIS review of Township 7-N will be completed this year.

Respectfully Submitted:

Susan Messersmith Hayes County Assessor 7/14/15
