

2016 REPORTS & OPINIONS

LOGAN COUNTY

DEPARTMENT OF REVENUE

PO Box 94818 • Lincoln, Nebraska 68509-4818 Phone: 402-471-5729 • revenue.nebraska.gov

April 8, 2016

Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Logan County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Logan County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Debbie Myers, Logan County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

Property Class	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

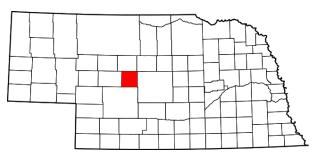

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

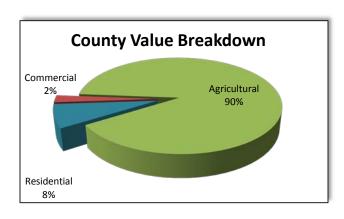

County Overview

With a total area of 571 square miles, Logan had 750 residents, per the Census Bureau Quick Facts for 2014, a slight decline from the 2010 US Census. In a review of the past fifty years, Logan has seen a steady drop in population of 32% (Nebraska Department of Economic Development). Reports indicated that 69% of

county residents were homeowners and 88% of residents occupied the same residence as in the prior year (Census Quick Facts).

Per the latest information available from the U.S. Census Bureau, there were twenty-three employer establishments in Logan. County-wide employment was at 487, a 4% gain relative to

the 2010 Census (Nebraska Department of Labor).

The agricultural economy has remained a strong anchor for Logan that has fortified the local rural area economies. Logan is included in the Upper Loup Natural Resources District (NRD). Grass land makes up a majority of the land. Cattle production is the primary agricultural activity in Logan County. (USDA CropScape).

2016 Residential Correlation for Logan County

Assessment Actions

For the current assessment year, the county physically inspected the rural residential parcels. Pick-up and permit work was completed in a timely fashion.

Description of Analysis

There is only one valuation grouping within the county. No unique characteristics have been defined in the market that would warrant more than one valuation grouping. The residential market seems to be somewhat stable acknowledging the influences of the larger trade center to the south.

The statistical profile shows that there are eleven qualified sales within the two-year study period. The sample is considered reliable and satisfactory for measurement of the residential class of real property in Logan County. Two of the three measures of central tendency are within the acceptable parameter set by professionally accepted mass appraisal techniques. The coefficient of dispersion is also within the acceptable range. The price related differential is slightly higher than acceptable but still indicates uniformity of assessment.

The assessment actions state that the rural residential was re-inspected for the 2016 assessment year. Changes to the abstract of assessment and sales file reflect the listing changes to the rural residential. The county will update costing and depreciation with the review of the villages in the following assessment year.

Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine whether valuation processes result in the uniform and proportionate valuation of real property.

One of the areas addressed included sales qualification and verification. As an ex-officio officer the assessor is able to communicate with realtors and titles companies when they are filing the deeds or researching the property. The county assessor also utilizes a sales questionnaire that is sent to both the buyer and seller. The Division's review inspects the non-qualified sales to ensure that the grounds for non-qualifying sales are supports and documented. The review of Logan County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for measurement purposes.

The county's inspection and review cycle for all real property was discussed with the county assessor. The physical inspection of the villages was last completed in 2011 according to the date stamps on photos. During the review this summer it was discovered that the rural residential properties had no evidence of being systematically reviewed, although it was believed that the

2016 Residential Correlation for Logan County

properties had been reviewed at some point in the cycle. The county assessor took action and hired a contract appraiser to review the rural areas in the fall to meet the criteria of the six-year inspection and review process. It is believed that the county is now in compliance with the inspection and review requirements.

Several reviews are conducted throughout the year to test the accuracy of the data being submitted to the State and to ensure that sales are being timely submitted as well. The Real Estate Transfer Statements reviewed were accurately reported in the State sales file. A review was conducted of the assessed values updated in the sales file and compared to the county's property record card to ensure that values are being properly updated. Lastly, an examination of the electronic tracking file indicated that the county was timely submitting sales to the state. It is believed that the county complies with data submission timelines and that the sales and value information is accurate as well.

Valuation groups were examined to ensure that the groupings defined are equally subject to a similar set of economic forces that impact market value. The county has adequately identified that there are no distinct economic factors that affect the market, and therefore the county only has one valuation grouping for the residential class.

Equalization and Quality of Assessment

A review of the statistics and assessment practices suggest that assessments within the county are uniformly assessed and considered equalized. The overall quality of assessment in the county is considered in compliance. Based on the assessment practices review, the quality of assessment in Logan County is in compliance with professionally accepted mass appraisal standards.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	11	97.31	94.04	90.42	09.92	104.00

10/01/2013 To 09/30/2015	11	97.31	94.04	90.42	09.92	104.00

Level of Value

Based on the review of all available information, the level of value of residential property in Logan County is 97%.

2016 Commercial Correlation for Logan County

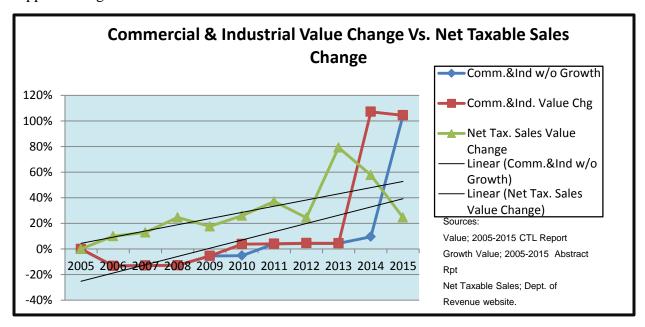

Assessment Actions

For the current assessment year, the commercial class as a whole was physically inspected and pick up work was completed timely.

Description of Analysis

For the commercial property class, there are thirty-six improved commercial parcels countywide. The parcels are found in twelve different occupancy codes. Most of the occupancy codes have only one or two parcels per code. There are currently two qualified sales during the current study period. The sample contains an insufficient number of sales for a statistical analysis to be meaningful.

Additional analysis of the Net Taxable Sales compared to the Assessed Value Change can be used to gauge the commercial market activity. The Chart shows sharp spikes and dips over the years indicating an erratic commercial market. Logan County makes up a portion of the North Platte, NE Micropolitan Statistical Area along with McPherson County. Stapleton is 25 miles from North Platte and residents within the county rely on the goods, services, and job opportunities offered in and around North Platte. The economics within the county do not support an organized commercial market.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all

2016 Commercial Correlation for Logan County

three property classes, and any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Logan County assessor utilizes a sales question that is sent to both the buyer and the seller. The county assessor is also the Register of Deeds and has the opportunity to communicate with individuals when the deed is filed. A review was conducted to inspect the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review of Logan County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's physical inspection and review cycle for all real property was discussed with the county assessor. All commercial parcels were inspected for the 2016 assessment year. The county is in compliance with the inspection and review cycle.

Valuation groups were also examined to ensure that the area or group defined is equally subject to a set of economic forces that impact the value of properties within that geographic area. With so few commercial parcels within the county and a lack of differing economic factors, the county has only one valuation group for the commercial class.

Equalization and Quality of Assessment

With so few commercial sales, the statistics should not be relied upon to measure a level of value. A review of the assessment practices suggest that assessments within the county are uniformly assessed and considered equalized. The overall quality of assessment in the county is considered in compliance.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	2	94.06	94.06	97.98	04.59	96.00
ALL						
10/01/2012 To 09/30/2015	2	94.06	94.06	97.98	04.59	96.00

Level of Value

Based on an analysis of all available information, the level of value of the commercial class of real property in Logan County is determined to be at the statutory level of 100% of market value.

2016 Agricultural Correlation for Logan County

Assessment Actions

A sales analysis was completed, as a result, grass land values increased approximately 25% throughout the county, and crop land values were unchanged for 2016.

Description of Analysis

Logan County is located in the Nebraska Sandhills and Loess Hills region of Nebraska. The majority of the county is comprised of Sandhill's soils. A branch of the South Loup River runs through the southernmost portion of the county creating a transition between the Sandhills to the north and the Loess Hills to the south. The county is mainly comprised of grass land. The surrounding counties of Blaine, Thomas, Lincoln (Market Area 2), McPherson and parts of Custer County are considered to be comparable.

Analysis of the sales files indicated that the sample was disproportionate when stratified by sale date and contained an inadequate number of sales. The samples were expanded with sales from the comparable counties. The sample contains a proportionate and representative group of sales with adequate sample of grassland, but few irrigated or dry sales.

The sample of the irrigated class is remains small and unbalanced. True comparability does not exist with the surrounding counties. Logan County is a transitional area that transitions from the sandhills to better cropland into Custer and Dawson County. The county structures values through the LCGS as to recognize the Sandhills region without creating market areas. Adjustments to the midpoint in the irrigated class would make the individual LCG values higher than that of Custer, which is illogical. The irrigated market has been stable in the region, the assessor took a market increase to the irrigated class of 3%. Although there is very little dry land in the county, historically the county assessor has raised dry land at a similar rate as irrigated land. The values set by the county assessor transition well with the surrounding counties and are believed to be acceptable.

The calculated statistics supports that values are within the acceptable range for grass land subclasses. The overall median is being affected by the irrigated sales and is outside the range. Whereas the county is primarily made up of grass, the 95% majority land use median of the grass land is considered the best indicator of the level of value for the county.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county Assessor for further action.

2016 Agricultural Correlation for Logan County

The Real Estate Transfer Statements were reviewed and were confirmed to be filed both timely and accurately. Assessed values were also found to be reported accurately. The quality reporting demonstrates the reliability of the source information used in the Division's measurement process.

The sales qualification and verification review is completed by the Division annually for all counties. This involves a review of the non-qualified sales to ensure that reasons for disqualifying the sales were substantiated and documented. No apparent bias existed in the qualification determinations and it is believed that all arm's-length transactions were made available for measurement purposes.

Although there are separate and distinct geographical differences in the county, there are no separate market areas. The county addresses these differences using in the valuation structure of the cropland LCG's. The county adequately addresses market differences through valuation of the LCG structures.

The physical inspection process was reviewed to ensure that the process was timely and captured all the characteristics that impact market value. The review in Logan County was determined to be systematic and comprehensive; land use was last completed in 2014 utilizing aerial imagery. Inspection of agricultural improvements is completed within the six-year cycle using an onsite inspection process that was completed for the 2016 assessment year.

Equalization

The analysis supports that the county has achieved equalization; comparison of Logan County values compared the adjoining counties shows that all values are reasonably comparable, and the statistical analysis supports that values are at uniform portions of market value.

The Division's review of agricultural improvements and site acres indicate that these parcels are inspected and reappraised using the same processes that are used for rural residential and other similar property across the county. Agricultural improvements are believed to be equalized and assessed at the statutory level.

2016 Agricultural Correlation for Logan County

The quality of assessment of the agricultural class is in compliance with generally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Logan County is 70%.

2016 Opinions of the Property Tax Administrator for Logan County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	97	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	70	Meets generally accepted mass appraisal practices.	No recommendation.

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

Legend

County Lines
Market Areas

Moderately well drained silty soils on uplands and in depressions formed in loess

Moderately well drained silty soils with clayey subsoils on uplands

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

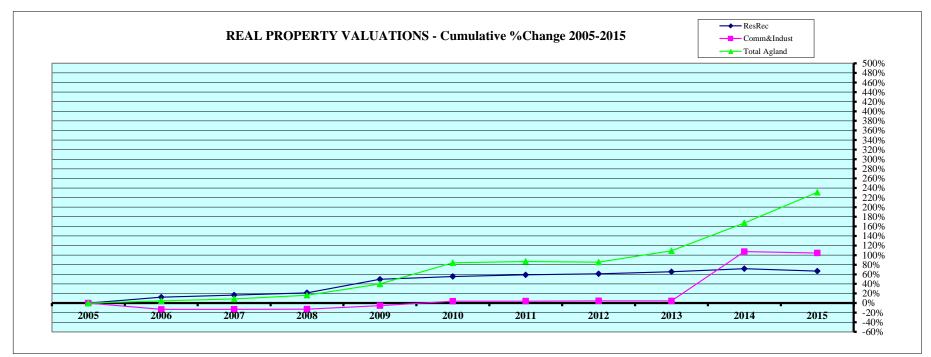

Somewhat poorly drained soils formed in alluvium on bottom lands

CHART 2

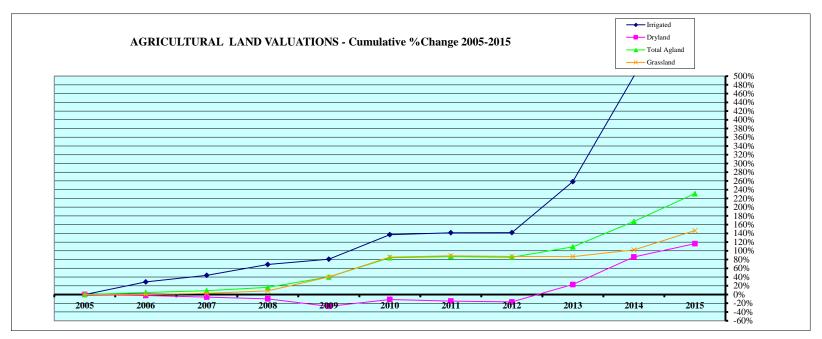

(1) Residential & Recreational excludes AgDwelling & farm home site land; Comm. & Indust. excludes minerals; Agric. land incudes irrigated, dry, grass, waste & other agland, excludes farm site land. Real property growth is value attributable to new construction, additions to existing buildings, and any improvements to real property which increase the value of such property. Sources:

2016 Assessment Survey for Logan County

A. Staffing and Funding Information

Deputy(ies) on staff:
0
Appraiser(s) on staff:
0
Other full-time employees:
1
Other part-time employees:
0
Number of shared employees:
0
Assessor's requested budget for current fiscal year:
\$ 72,000
Adopted budget, or granted budget if different from above:
same
Amount of the total assessor's budget set aside for appraisal work:
\$ 25,000
If appraisal/reappraisal budget is a separate levied fund, what is that amount:
Not applicable.
Part of the assessor's budget that is dedicated to the computer system:
\$13,000
Amount of the assessor's budget set aside for education/workshops:
\$ 4,000
Other miscellaneous funds:
N/A
Amount of last year's assessor's budget not used:
\$ 22,194.37

B. Computer, Automation Information and GIS

1.	Administrative software:
	TerraScan (owned by Thomson Reuters)
2.	CAMA software:
	TerraScan (owned by Thomson Reuters)
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Assessor
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	www.logan.gisworkshop.com
7.	Who maintains the GIS software and maps?
	GIS Workshop
8.	Personal Property software:
	TerraScan (owned by Thomson Reuters)

C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	No - only the rural area is zoned.
3.	What municipalities in the county are zoned?
	None
4.	When was zoning implemented?
	2003

D. Contracted Services

1.	Appraisal Services:
	Tax Valuation Inc
2.	GIS Services:
	GIS Workshop
3.	Other services:
	TerraScan (owned by Thomson Reuters)

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	Yes, Tax Valuation Inc
2.	If so, is the appraisal or listing service performed under contract?
	Yes
3.	What appraisal certifications or qualifications does the County require?
	Credentialed and professional experience in the appraisal field.
4.	Have the existing contracts been approved by the PTA?
	Yes
5.	Does the appraisal or listing service providers establish assessed values for the county?
	The appraisal firm completes the listing work and helps create the depreciation tables but ultimately the appraiser sets the values

2016 Residential Assessment Survey for Logan County

2016 Agricultural Assessment Survey for Logan County

1.	Valuation data collection done by: Assessor and deputy. List each market area, and describe the location and the specific characteristics that make each unique.					
2.						
	Market Area	Description of unique characteristics	Year Land Use Completed			
	0	Logan County is very homogeneous in geographic and soil characteristics; the county is approximately eighty-seven percent grassland, seven percent irrigated, and five percent dry. Most of the cropland is in the southern portion of the county.	2014			
	GIS was reviewed in 2014 to capture the irrigated acres and changes in land use throughout county.					
3.	Describe th	process used to determine and monitor market areas.				
	Not applicable.					
4. Describe the process used to identify rural residential land and recreational land county apart from agricultural land.						
	The county follows the zoning manual in identifying rural residential land as no more than acres. There is no recreational at this time.					
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?					
	Rural home sites are valued at \$5000 for the first acre and the building site is \$500. Values 4500 (rural residential) parcels are the first acre \$5000, \$2395 up to ten acres and \$2395 up twenty acres. These values are used for the whole county.					
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.					
	With lack of	f market evidence, WRP is valued at 100% market value of grass.				

LOGAN COUNTY 3-YEAR PLAN OF ASSESSMENT JUNE 17, 2015

Logan County has 278 residential properties, 46 Commercial Properties and 1140 agricultural properties. There are an estimated 150 personal property filings each year and estimated 36 homestead exemptions.

Logan County has an official and one full-time clerical that deal with listing of properties, determining of values, and filing personal property schedules. The county also will hire an appraiser as needed. The official handles most of the computer work such as data entry, sketching, record changes, and running necessary reports. The official has final responsibility of setting values for all classes of property.

The County assessor maintains the cadastral mapping system at the time of the recording of a deed. The records have current ownership and land depreciation.

Aerials were taken 2001-2002. Actions that were completed for 2015 are as follows: Ag-land sales were studied and adjusted value according to sales for dryland, grass and irrigated classes. Added new irrigated acres. Reviewed and took pictures of surrounding areas as we done our pickup work for rural residential properties and added to Terrascan System. We did a review of residential properties in Gandy Village. No change for village lots in Gandy Village for 2015. Gandy Commercial lot values for 2015 weren't changed from 2007. We did a review of residential properties in Stapleton Village. No change for Stapleton Village Lots for 2015. Stapleton Commercial land values and improvements were not changed in 2015. Planning are revaluing commercial improvements for 2016. Rural Commercial land remained the same as 2007. A new 2015 Depreciation schedule was used for residential property rural, Stapleton Village and Gandy Village. 2014 Marshal Swift Pricing for Rural, Gandy Village and Stapleton was used for 2015. 2008 Marshall Swift pricing, with 2009 depreciation for rural outbuildings, for improvements that are not included on Marshall Swift Pricing, planning on looking at rural outbuildings for 2016. The new 2015 depreciation schedule for Mobile Homes located in rural and villages was used for 2015, same as residential 2015 depreciation, small number of mobile homes located in Logan County. Ag sites for 4000 were not changed. Rural Ag sites 4500 for 2009 were redefined and revalued same value that was used in 2009 for 2015.

We start our pickup work as time allows. We list all pickup work in a notebook. This work is completed timely according to statute. In 2015-2017 we plan to drive the County and review all property. Work on the assessor's record files. Study Ag-land and take pictures of rural improvements to insert in Terrascan system. We reviewed quality and condition classifications for improved residential property in 2015 and updated Marshall Swift Pricing for Rural, Gandy Village and Stapleton Village to 2014 and worked up a new depreciation schedules for Rural, Gandy Village and Stapleton Village in 2015. We plan on reviewing our commercial improvements and outbuildings for 2016, using Marshal Swift 2014 pricing and working up a new depreciation schedule.

Assessor completes 521 data as soon as possible.

Reports of the Logan County Assessor are filed on time.

Homestead Exemption applications are filed on or before June 30. State Statute.

State Statutes, rules and regulations are followed in filing personal property schedules and abstracts are filed on time.
