

2016 REPORTS & OPINIONS

MADISON COUNTY

DEPARTMENT OF REVENUE

PO Box 94818 • Lincoln, Nebraska 68509-4818 Phone: 402-471-5729 • revenue.nebraska.gov

April 8, 2016

Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Madison County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Madison County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Jeff Hackerott, Madison County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

Property Class	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

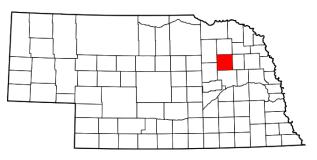

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

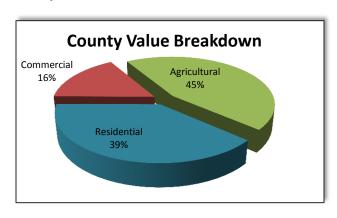

County Overview

With a total area of 573 square miles, Madison had 35,174 residents, per the Census Bureau Quick Facts for 2014, a slight population increase over the 2010 US Census. In a review of the past fifty years, Madison has seen a steady rise in population of 40% (Nebraska Department of Economic Development). Reports indicated that

64% of county residents were homeowners and 84% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Madison convene in and around Norfolk, the county seat. Per the latest information available from the U.S. Census Bureau, there were 1,320

employer establishments in Madison. County-wide employment was at 18,878 people, a 4% gain relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Madison that has fortified the local rural area economies. Madison is included in both the Lower Elkhorn and Lower Platte North Natural Resources Districts. A mix of dry and irrigated land makes up the majority of the land in the county. When compared against the top crops of the other counties in Nebraska, Madison ranks seventh in corn for silage. In value of sales by commodity group, Madison ranks seventh in sheep, goats, wool, mohair, and milk and ninth in fruits, tree nuts. and berries (USDA) AgCensus).

2016 Residential Correlation for Madison County

Assessment Actions

Madison County continues with the reappraisal of various neighborhoods within the city of Norfolk. A market analysis is completed to assure that all residential property are uniform and meet an acceptable level of value. Building permits are filed with the county and all are completed and added to the assessment for 2016.

Description of Analysis

Residential parcels are valued utilizing seven valuation groupings that are based on the county assessor locations or towns in the county.

Valuation Grouping	Definition
05	Madison
10	Newman Grove
15	Battle Creek
20	Tilden
25	Meadow Grove
30	Norfolk
70	Rural

For the residential property class, a review of Madison's statistical analysis profiles 1,148 residential sales, representing all the valuation groupings. Valuation Group 30 (Norfolk) represents 75% of the statistical profile. All valuation groupings with a sufficient number of sales are within the acceptable level of value. All three measures of central tendency for the residential class of properties are within acceptable range.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any inconsistencies are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Madison County Assessor determines that all sales are good unless adequate information is provided on the transfer statement to reveal otherwise. The county assessor will contact the buyer, seller or the real estate agent involved in the transaction if questions remain about the transfer. The

2016 Residential Correlation for Madison County

Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a conversation with the county assessor and a consideration of verification documentation. The review of Madison County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's inspection and review cycle for all real property was discussed with the county assessor. For residential property the county continues to meet the six-year review cycle. The county assessor and staff have been aggressive in their approach to keep all the inspections up to date and have continued a strong consistent review of the residential class of property.

Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the residential property class. Based on all relevant information, the quality of assessment of the residential class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Equalization and Quality of Assessment

A review of the statistics with adequate sales and the assessment practices suggest that assessments within the county are valued within the acceptable parameters, and therefore considered equalized.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
0.5	54	93.10	96.12	95.44	20.48	100.71
10	36	93.57	104.09	87.53	33.17	118.92
15	49	92.95	99.44	95.75	18.48	103.85
20	28	95.37	103.52	88.87	29.83	116.48
25	23	92.50	89.81	84.57	21.91	106.20
30	861	94.22	97.88	93.41	16.55	104.79
70	97	91.84	97.84	87.43	23.93	111.91
ALL	1,148	94.08	98.03	92.58	18.35	105.89

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Madison County is 94%.

Assessment Actions

For the current assessment year, the only change to the values was completing the pickup work for the commercial class of property. Madison County continues to monitor the sales activity in the commercial class of property and determined that the assessed values are acceptable for the 2016 assessment year.

Description of Analysis

Madison County has seven valuation groupings for the commercial class, which are based on the county assessor locations or towns in the county.

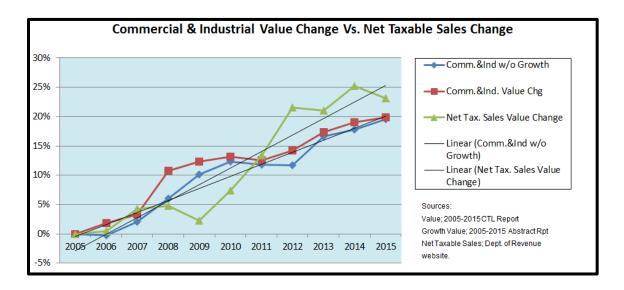

Valuation Grouping	Definition
05	Madison
10	Newman Grove
15	Battle Creek
20	Tilden
25	Meadow Grove
30	Norfolk
70	Rural

For the commercial property class, a review of Madison's statistical analysis showed 119 commercial sales, representing all the valuation groupings. Valuation Group 10 has ten sales with a median of 101.17. There are two low dollar sales of under \$5,000 in the total. Hypothetical removal of those two sales would indicate a median of 99 and only 8 sales left. Regardless the COD and PRD are well outside the expected parameters. Valuation group 30 (Norfolk) makes up 69% of the sold parcels. As reported on the survey the costing data in Norfolk ranges from 1999 through 2013.

When referencing the sold parcels it is noteworthy to compare the median levels for each year of the study period which gives a strong indication that the market activity has changed. Because the sample contains 69% of the sold parcels in the city of Norfolk and the remaining valuation groups have minimal sales, it strongly suggests the market is changing in Norfolk.

	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
Study Yrs						
10/01/2012 To 09/30/2013	39	97.51	110.26	88.04	37.68	125.24
10/01/2013 To 09/30/2014	36	91.21	98.49	85.67	34.28	114.96
10/01/2014 To 09/30/2015	44	79.89	92.58	88.41	40.39	104.72

The general trend of sales tax receipts for the county compared to the general trend of the valuations of the commercial and industrial property is examined. While there is not a direct link between the two, there is the expectation that they should trend in the same direction. If local sales are in an upward trend, if they seem to be flat or are declining, it might be expected that commercial values would eventually trend in a similar manner. The Net Taxable Sales has experienced years of some decline (2009 and 2013) but overall there has been a slight increase in the commercial activity. The trend is indicating that the commercial values have been on a steady and moderate incline.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any inconsistencies are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Madison County Assessor determines that all sales are good unless adequate information is provided on the real estate transfer statement to reveal otherwise. The county assessor will contact the buyer, seller or the real estate agent involved in the transaction if questions remain about the transfer. The

Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a conversation with the county assessor and a consideration of verification documentation. The review of Madison County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's inspection and review cycle for all real property was discussed with the county assessor. All property in Madison County has been inspected during the first six-year review cycle and the county is continuing the next cyclical review. Even though the reviews are keeping on task with the physical inspection and review process it appears the data is not being used to update costing and depreciation models. As noted the cost tables for Norfolk seem to range from 2009 to 2013. The lack of newer cost indexes and updated depreciation models cause concern with uniformity and equalization with the commercial properties within the city of Norfolk.

Valuation groups were also examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the county has adequately identified economic areas for the commercial property class.

Equalization and Quality of Assessment

Review of the assessment practices of the county reveals that the city of Norfolk is lacking in true and accurate occupancy codes assigned to the commercial property. The market activity in the past year has shown significant increase. The combination of the two makes the quality of assessment unreliable. Based on this information the Division will be monitoring the county for further analysis to ensure a plan is developed to address the assessment of the commercial class.

VALUATION GROUPING							
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD	
05	3	104.12	102.48	102.22	05.13	100.25

70	12	77.23	80.61	89.26	33.41	90.31	
ALL							
10/01/2012 To 09/30/2015	119	93.61	100.16	87.20	36.44	114.86	

Level of Value

Based on an analysis of all available information, the level of value of the commercial class of real property in Madison County is not statistically determinable. The level is therefore determined to be at the statutory level of 100%.

2016 Agricultural Correlation for Madison County

Assessment Actions

Madison County has been monitoring the agricultural market for a few years and decided for the 2016 assessment year that it was necessary to define two market areas. Based on the analysis the values for irrigation in market area 1 increased 7%, dry increased 3% and the grass remained unchanged. In market area 2, the county showed a slight decrease in the irrigated values from the 2015 values and the dryland decreased 11% to 21%, the grass values also remained the same in market area 2.

Description of Analysis

Madison County analyzed the sales and found it necessary to define two market areas this year. The northern portion of the county has soils that are similar to adjoining Pierce County. The market indicated that there is a difference in the dry land compared to the south portion of the county. Market area 2 is the southern portion of Madison County. The soils are less sandy and compare more to adjoining Boone and Platte counties.

Analysis of the sales within the county indicated that the market area one and market area two sample was disproportionate when stratified by sale date. The samples were expanded with sales from the comparable counties. The statistics calculated for market area one and market area two supports that values are within the acceptable range for the overall market area. Each majority land use subclass with an adequate number of sales is also within the acceptable range.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes, and any inconsistencies are noted and discussed with the County assessor for further action.

The Real Estate Transfer Statements filed by the county were reviewed and have proven to be filed reasonably timely and accurately. Assessed values were also found to be reported accurately. The quality reporting demonstrates the reliability of the source information used in the Division's measurement process.

For Madison County, the review supported that the county has used all available sales for the measurement of agricultural property. The process used by the county gathers sufficient information to adequately make qualification determinations; usability decisions have been made without a bias. The Division also reviewed agricultural land values to ensure uniform application and confirmed that sold properties are valued similarly to unsold properties.

The county continues with the physical inspection process to ensure that the process captured all the characteristics that impact market value. The review in Madison County was determined to

2016 Agricultural Correlation for Madison County

be systematic and comprehensive. The current process of verification of land use is imagery. Questionnaires and physical inspections are used to gather information regarding any other questionable characteristics that impact value. Inspection of agricultural improvements is going to be completed within the six year cycle using an onsite inspection process that includes comparison of the current property record card for changes to the physical characteristics of the property. The county's practice considers all available information when determining the primary use of the parcel.

Equalization

The analysis supports that the county has achieved equalization; comparison of Madison County values with the adjoining counties shows that all values are reasonably comparable, and the statistical analysis supports that values are at uniform portions of market value. The Division's review of agricultural improvements and site acres indicate that these parcels are inspected and reappraised using the same processes that are used for rural residential and other similar property across the county. Agricultural improvements are believed to be equalized and assessed at the statutory level.

The quality of assessment of the agricultural class is in compliance with generally accepted mass appraisal standards.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Madison County is 69%.

2016 Opinions of the Property Tax Administrator for Madison County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	94	Meets generally accepted mass appraisal practices.	No recommendation.
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.
Agricultural Land	71	Meets generally accepted mass appraisal practices.	No recommendation.

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

Legend

- County Lines
- Market Areas
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Moderately well drained silty soils with clayey subsoils on uplands
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Somewhat poorly drained soils formed in alluvium on bottom lands
- I akes and Ponds

2016 Assessment Survey for Madison County

A. Staffing and Funding Information

Deputy(ies) on staff:
1
Appraiser(s) on staff:
0
Other full-time employees:
4
Other part-time employees:
0
Number of shared employees:
0
Assessor's requested budget for current fiscal year:
\$476,708.00
Adopted budget, or granted budget if different from above:
Same as #6
Amount of the total assessor's budget set aside for appraisal work:
\$97,000.00
If appraisal/reappraisal budget is a separate levied fund, what is that amount:
N/A
Part of the assessor's budget that is dedicated to the computer system:
\$54,500.00 (Includes CAMA, GIS and Web-site & 1/2 of new oblique imagery)
Amount of the assessor's budget set aside for education/workshops:
\$3,450.00
Other miscellaneous funds:
\$700.00
Amount of last year's assessor's budget not used:
\$Unknown

B. Computer, Automation Information and GIS

1.	Administrative software:
	Terra Scan
2.	CAMA software:
	Terra Scan
3.	Are cadastral maps currently being used?
	Yes (The County has converted to GIS digital mapping).
4.	If so, who maintains the Cadastral Maps?
	Assessor and Staff
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	Yes. madison.gisworkshop.com
7.	Who maintains the GIS software and maps?
	Assessor and Staff
8.	Personal Property software:
	Terra Scan

C. Zoning Information

1.	Does the county have zoning?					
	Yes					
2.	If so, is the zoning countywide?					
	Yes					
3.	What municipalities in the county are zoned?					
	Entire County - All Municipalities					
4.	When was zoning implemented?					
	1975					

D. Contracted Services

1.	Appraisal Services:								
	Madison County contracts with Great Plains Appraisal Co. to do large industrial propertiers and special use properties such as the ethanol plant and the steel mill.								
2.	GIS Services:								
	GIS Workshop maintains the Assessor's web-site and provides support for GIS services.								
3.	Other services:								
	Morrissey Motor Company services the county vehicles and Western Office Technologies services the copier and typewriters.								

E. Appraisal /Listing Services

1.	Does the county employ outside help for appraisal or listing services?
	On a limited bases
2.	If so, is the appraisal or listing service performed under contract?
	Yes.
3.	What appraisal certifications or qualifications does the County require?
	Extensive pervious experience in mass appraisal and specialized knowledge, expertise and competency with complex properties.
4.	Have the existing contracts been approved by the PTA?
	Yes.
5.	Does the appraisal or listing service providers establish assessed values for the county?
	All assessed values are established by the Assessor. The sevices provide assistance with data compilation, research, listing, and analysis. this data is then reviewed, scrutinized and edited by the county to establish assessed values.

2016 Residential Assessment Survey for Madison County

1.	Valuation da	ta collection done by:								
	Assessor and part time lister.									
2.	List the valuation groupings recognized by the County and describe the unique characteristics of each:									
	Valuation Grouping	Description of unique characteristics								
	5	Madison - Very sporadic market, affected by deferred maintenance. County Seat. Approximate population 2,438. K-12 school system. Located in south-east portion of the county at intersection of highway 81 and highway 32.								
	10	Newman Grove - Affected by location -comparatively extreme distance to other cities and Norfolk. Approximate population of 721. K-12 school system. Located in south-west corner of the county on highway 32.								
	Battle Creek - Stong small town market. Good proximity to Norfolk. Approximate population of 1,207. K-12 school system. Located approximately 10 minutes west of Norfolk on highway 275.									
	Tilden - Quite a distance from Norfolk. Straddles the county-line with Antelope County. Approximate population of entire town (both counties) is 953. K-12 school system. Located west of Norfolk on highway 275.									
	25	Meadow Grove - Very small town. Not connected to any other market. Influenced by lack of school system, grocery store, etc Approximate population of 301. Located west of Norfolk on highway 275.								
	30	Norfolk - Largest city in Madison County. Active, diversified market. One public school system and multiple parochial school systems. Approximate population of 24,210. Located in the north-east corner of the county at the intersections of highway 81 and highway 275								
	Rural - very diversified market									
	AG	Agricultural homes and outbuildings

2016 Commercial Assessment Survey for Madison County

1.	Valuation data collection done by:				
	Assessor and part-time lister				
2.	2. List the valuation groupings recognized in the County and describe the unique cha of each:				
	Valuation Description of unique characteristics Grouping Description of unique characteristics				
5 Madison - Very sporadic market - affected by deferred maintenance					
	10 Newman Grove - Small town - affected by extreme distance/location 15 Battle Creek - Strong small town market - good proximity to Norfolk 20 Tilden - Straddles county line - quite a distance from Norfolk 25 Meadow Grove - Very small town - no connection to another market 30 Norfolk - Largest city in County - active, diversified market				
	70	Rural - Very diversified market			
3.	List and describe the approach(es) used to estimate the market value of commerciant properties.				
	Cost Approach, Income Approach and Market Approach				
3a.	Describe the process used to determine the value of unique commercial properties.				
	Unique propertires are usually done using the Cost Approach. Typically, there is not enough information to develop a market approach and an income approach would also be difficult to determine.				
4.	If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor?				
	Some of both. If we don't have enough data to determine our own market-derived depreciation tables then existing tables are used.				
5.	Are individual depreciation tables developed for each valuation grouping?				
	If a particular location is determined to necessitate a separate table then one is developed.				
6.	Describe the methodology used to determine the commercial lot values.				
	Commercial lot values are determined using several different methods depending on location. Those methods are the Square foot, Front foot, Unit or Lot, and Acre.				

7.	<u>Valuation</u>	Date of	Date of	Date of	Date of
	Grouping	<u>Depreciation Tables</u>	<u>Costing</u>	Lot Value Study	<u>Last Inspection</u>
	5	2014	06/2011	2014	2014

	15	2013	06/2011	2013	2013
	20	2012	06/2011	2012	2012
	25	2012	06/2011	2012	2012
	30	1999-2013	6/1999-6/2013	1999-2013	1999-2013
	70	1999	06/1999	2011	2010-2014

All small towns have now been completely re-done. Norfolk is a work in-progres because of the number of parcels and the available resources both fiscal and labor related.

2016 Agricultural Assessment Survey for Madison County

1.	Valuation da	Valuation data collection done by:				
	Assessor and part time lister					
2.	List each market area, and describe the location and the specific characteristics that make each unique.					
	Market Description of unique characteristics Area		Year Land Use Completed			
	1	Market Area 1 is the southern portion of the county. This is an area of heavier soils	2016			
	2	Market Area 2 was created in 2016 to address valuation concerns observed in the market. This new area also blends with counties along the north part of the county. This area was delineated along soil boundaries	2016			
	Land use is a	n on-going continual process.				
3.	B. Describe the process used to determine and monitor market areas.					
	The county has had one market area for several years. A second market area was developed for 2016. The boundary between market areas was established based on differences in soil types as determined by the soil survey. This is continuously monitored by the sales activity.					
4.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.					
	Rural residential land is one-acre of land under a house. It is determined to be one econom along with the home. Recreational land is land that is used primarily for recreational pur In Madison County there is very recreational land. In Madison County there is minimal with a predominately recreational use.					
5.	Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences?					
	For the most part - yes. However, some rural residential home-sites are valued considerable more than farm home sites if indicated by the market. These typically are around the City of Norfolk. Zoning is also considered.					
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.					
	We research sales in surrounding counties attempting to supplement the lack of current sales in Madison County.					
	If your county has special value applications, please answer the following					
7a.	How many special valuation applications are on file?					
	At this time Madison County has 4 parcels qualifying for special valuation.					
7b.	What process was used to determine if non-agricultural influences exist in the county?					
	Non-agricultural influences present in the county are mainly restricted to areas near the City of Norfolk. This is primarily due to "urban-sprawl" and the desire for acreages located in close proximity to Norfolk.					
	If your county recognizes a special value, please answer the following					

7c.	Describe the non-agricultural influences recognized within the county.				
	Non-Agricultural influences have been primarily limited to residential acreages and come commercial development around the City of Norfolk. This is commonly known as urban-sprawl.				
7d.	Where is the influenced area located within the county?				
	Near the City of Norfolk				
7e.	Describe in detail how the special values were arrived at in the influenced area(s).				
	Pleae see Annual Special Valuation Report.				

MADISON COUNTY THREE-YEAR PLAN OF ASSESSMENT ASSESSMENT YEARS 2016, 2017, AND 2018

15 - June - 2015

Plan of Assessment Requirements:

Pursuant to Neb. Laws 2005, LB 263, Section 9, on or before June 15 of each year the Assessor shall prepare a plan of assessment. This plan shall describe the assessment actions planned for the next assessment year and two (2) years thereafter. The plan shall indicate the classes or subclasses of real property that the County Assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31 of each year, the Assessor shall present the plan to the County Board of Equalization and the Assessor may amend the plan, if necessary, after the budget is approved by the County Board. A copy of the plan and any amendments thereto shall be mailed to the Property Assessment Division on or before October 31 of each year.

Real Property Assessment Requirements:

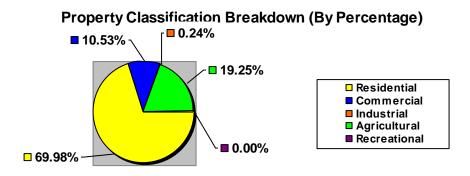

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade" Neb. Rev. Stat. §77-112 (Reissue 2003).

Assessment levels required for real property are as follows:

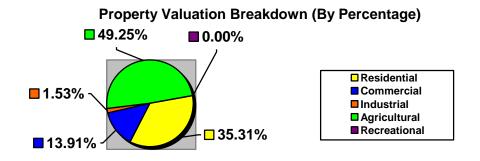

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land.
- 2) 75% of actual value for agricultural land and horticultural land
- 3) 75% of special value for agricultural land and horticultural land which meets the qualifications for special valuation under §77-1344 and 75% of its recapture value as defined in §77-1343 when the land is disqualified for special valuation under §77-1347.

County Description:

Madison County has a total real property parcel count of 17,660 as certified on the 2015 Abstract of Assessment for Real Property dated 19-March-2015. The Residential class of property (12,358) accounts for 69.98%, the Commercial class (1,860) represents 10.53%, the Industrial class (43) contains 0.24%, the Agricultural class (3,399) accounts for 19.25%, and the Recreational class (0) accounts for .00% of the total parcel count as calculated from the Abstract of Assessment. Included in the above totals are the following property types: Special Value parcels (2), Exempt parcels (1,203), Game & Parks parcels (9), and the Tax Increment Financing (12) parcels. The following chart provides a visual representation of the property classification breakdown.

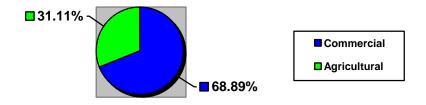

The 2015 Abstract of Assessment for Real Property, dated 19-March-2015, lists the total Madison County real property valuation as \$3,490,777,960. The Residential class (\$1,232,386,234) accounts for 35.31%, the Commercial class (\$485,706,684) represents 13.91%, the Industrial class (\$53,400,929) makes up 1.53%, the Agricultural class (\$1,719,284,113) accounts for 49.25%, and the Recreational class accounts for 0.00% of the total real property valuation as calculated from the Abstract of Assessment for Real Property. The following chart provides a visual representation of the property valuation breakdown.

Madison County has 2,426 personal property schedules with a total valuation of \$188,751,475, as certified on the 2015 Personal Property Abstract dated 15-June-2015. Of these schedules, 1,653 are commercial property with a valuation of \$117,371,968. Additionally, 773 are agricultural property representing a valuation of \$71,379,507. Please note that not all schedules have been returned at this date as there are still a number of delinquent schedules that have yet to be filed. In addition, there are multiple schedules where the property owner has filed an extension on their income taxes. The numbers presented above are a representation of the schedules on file here in the office as of the date of this report. The following chart provides a visual representation of the Personal Property schedule breakdown according to valuation.

Personal Property Breakdown (By Percentage)

As of 15-June-2015, Madison County has 906 parcels with a Homestead Exemption.

For assessment year 2015, approximately 439 building permits and information statements were received by the Madison County Assessor's Office. This period covers the calendar year of 2014 from January 01, 2014 through December 31, 2014. Fifty-Two (52) of the aforementioned permits were for new single family dwelling construction. In total, the permits for assessment year 2015 totaled approximately \$26,591,734.

For more information please refer to the 2015 Reports and Opinions of the Property Tax Administrator, Abstract, and Assessor Survey for Madison County.

2015 R & O Statistics (or T.E.R.C. Statistics): *

Property Class	<u>Median</u>	<u>C.O.D.</u>	<u>P.R.D.</u>
Residential:	93.00	19.55	106.66
Commercial/Industrial:	94.00	37.39	118.45
Agricultural Unimp.:	71.00	22.67	106.41

*(For more information regarding statistical measures, please refer to the 2015 Reports and Opinions of the Property tax Administrator)

From the above statistical information, it is apparent that there is still room for improvement with regards to both the uniformity and quality of assessment in Madison County. It is the hope of the Madison County Assessor that additional staff, more efficient utilization of current staff, and a disciplined approach to achieving defined goals, will result in the continued improvement of the aforementioned statistical measures. The following plan will address the steps necessary to achieve this goal and in addition satisfy the requirements of LB 334 Sec.100.

Budget, Staffing & Training:

Budget:

The 2015 / 2016 Assessor's Budget = \$234,758 The 2015 / 2016 Re-appraisal Budget = \$241,950 Total Office Budget: \$476,708

Staff:

For the last decade this office has been operated with a less than ideal number of staff members. In the past, several of these staff members have not been utilized in the most efficient manner. Because the GIS parcel layer is now mostly complete, it now makes sense to eliminate the GIS position and replace it with two entry-level clerk positions. This will allow a more diverse set of tasks to be accomplished with the same budgetary allocation. However, Madison County has implemented a hiring freeze until further notice. The most urgent need at this time is a full-time appraiser. It is also hoped that one other staff position may be added. A full-time listing position is still waiting to be filled. As of June 15, 2015 the Madison County Assessor's Office is comprised of 6 staff members broken down as follows:

(1) Assessor: This person is responsible for all real property valuation. The Assessor must also do approximately ½ of the annual pick-up work and sales reviews. At this time the Assessor is responsible for all data entry of property characteristics into TerraScan. In addition, the

Assessor is responsible for all of the report generation. The Assessor is also responsible for all computer maintenance and updates. The above is in addition to the day-to-day management & operation of the office and staff.

- (1) Deputy Assessor: This person is responsible for entering all agricultural land changes. In addition, the Deputy Assessor must also complete all splits and new additions. This person is also responsible for quality control and checking all data entry. Currently, this position is not utilized to the fullest extent. This position will transition to more of a roving position available to help wherever needed with differing tasks.
- (3) Full-time Clerks: These staff members are responsible for all aspects of both Personal Property and Homestead Exemptions with the exception of report generation. In addition these members are also responsible for handling phone calls and waiting on the counter. Most walkin taxpayer assistance is also handled by these staff members. These staff positions also make copies for customers, pull property record cards, and file property record cards. All building permits are processed through one of the staff members. In addition, Form 521 Transfer Statements are handled by these members and the data is entered into TerraScan. These members also proof and correct all rosters as provided by the P.A.D. through the on-line State Sales File. An additional responsibility is attaching new value sheets to the property record card and writing new values on the outside of the record card. All no-contact letters are produced by these members.
- (1) Full-Time GIS Specialist. This person is responsible for building the GIS System from the ground-up. This person does not do any clerical work other than that related to the GIS System.
- (1) Part-time Lister: This person is responsible for data collection. This includes listing all new construction, additions, renovations, conducting sale review, etc. This person does not do any data entry into the computer system at the present time. This person works 24 hours per week. In the future this position will probably have to switch to full-time in order to meet the demanding schedule of the 6-year cyclical review process as specified in LB 334. This office has been without a field-lister since July 18, 2012.

Public Relations:

The Madison County Assessor's Office attempts to create as inviting and welcoming an office environment for the public as possible. Given the importance of maintaining clear, open lines of communication with the public the Assessor's Office attempts to provide as much information as possible to the public with regards to upcoming projects. Newspaper articles are provided to inform the public that we will be conducting reviews / reappraisals in their area. Additionally, the City Offices, local law enforcement and the County Sheriff's Office are also notified of the upcoming projects. These press releases / notices also ask for the public's assistance in providing information to the Assessor's Office / Lister in order to obtain the most accurate information possible.

Social media is a relatively new addition to the public relations tool box. Social media is an important tool to reach those who may not utilize the standard media information outlets. In light of this, the Madison County Assessor's Office plans to begin implementation of social media in certain aspects of public relations.

On occasion, the Madison County Assessor's Office has employed bilingual individuals in a good-faith effort to reach out and bridge the gap with those to whom language may be a barrier.

The Madison County Assessor's Office provides a page on the County web-site (www.madisoncountyne.com/county-offices/assessor) as well as a separate GIS web-site (http://madison.gisworkshop.com/#) to make information available 24/7.

Both newspaper and radio interviews are provided when requested. This also helps to inform the public of the activities taking place here in the Assessor's Office. Certain information is required to be published and or provided to the media outlets in Madison County. These documents are provided on a timely basis to the Norfolk Daily News and all Norfolk radio stations.

Contract Appraiser:

The Madison County Assessor's Office contracts with Great Plains Appraisal, (Wayne Kubert), to appraise complex commercial and industrial properties on an as-needed basis.

Training:

The Madison County Assessor attends all required workshops provided by the Nebraska Department of Revenue, Property Assessment Division. In addition, the Assessor attends annual schooling in order to maintain the Assessor's Certificate. The Assessor also attends appraisal classes, when possible, that offer relevant topics. This is done to stay current with appraisal techniques and to keep abreast of regulatory changes that affect the appraisal industry.

The Deputy Assessor attends schooling in order to maintain the Assessor's Certificate.

The Clerks have historically not received any training outside of the office. This will probably change as the responsibilities of certain members are increased.

The lister has not received any training outside of the office. When this position is replaced, the new lister will receive some training outside of the office as more duties will be assumed by that position.

Three-Year Appraisal Plan: 2016:

Residential: This year marks the second year of the second phase of the 6-year cyclical review / inspection requirement pursuant to Neb. Rev. Stat. 77-1311.03. As during the first review cycle, current parcel information will be verified and updated based on this physical inspection. This review will entail complete exterior inspections of all properties. Front and rear pictures will be taken where possible of all houses. Additionally, photos will be taken of other structures or unique property characteristics where deemed appropriate. Interior inspections will be conducted when possible, where allowed, and whenever it is deemed necessary by specific circumstances.

For 2016 it is planned to re-appraise portions of the City of Norfolk. This will entail entering all information into TerraScan. In addition, new costing and depreciation will be used. An exterior inspection will be conducted on all parcels. An interior inspection will be conducted when possible or where requested. Current information will be verified and updated based on this physical review. New digital pictures will be taken. Currently there are 8,182 active parcels in Norfolk with a residential appraisal type. Of this number approximately 7,604 parcels, or 92.94%, are improved.

At this time it is anticipated this will encompass approximately 2,401 parcels. Because of the number of parcels in the City of Norfolk, this is a multi-year, on-going project.

Appraisal maintenance will continue to be completed on the balance of the residential property class. In addition to the above work all sales reviews and pick-up work will be completed county-wide.

<u>Commercial / Industrial</u>: For 2016 we will begin planning the upcoming reappraisal of commercial property in the City of Norfolk. This will coincide with the residential re-appraisal also taking place in this location. It is hoped that the budget will remain largely in-tact and thus allow this additional undertaking. This re-appraisal will entail entering all

information into TerraScan. All new costing and depreciation will be used. All properties will be physically inspected. Current information will be verified and / or updated based on this physical review. An interior inspection will be conducted when possible or where requested. New digital pictures will be taken. Currently there are approximately 1,267 active commercial & industrial parcels in Norfolk with a property class of 2000 or 3000. Of this, approximately 1,008 parcels, or 79.56%, are improved. In addition, all sales reviews and pick-up work will be completed county-wide.

Agricultural: Madison County switched all agricultural land back to a single market area for the 2012 valuation year. This issue had been extensively studied and reviewed for two years by both the County Assessor and the Property Assessment Division Liaison assigned to Madison County. This change reflects similar market area revisions in some surrounding counties over the last several years. Continuation of the development of the Land Use Layer in GIS will continue to be a major task and will again require an extensive time allocation. The development and implementation of the GIS system is seen as a long-term process. However, once this is achieved, this will allow the use of digitized satellite imagery in order to more accurately calculate soil types and acreages. As in the past, we will continue to cooperate with the Lower Elkhorn Natural Resources District in their efforts to manage and certify new irrigation here in Madison County. There will be an in-depth analysis of all agricultural sales in Madison County. The sales will be analyzed by L.C.G. as well as by market area. The Assessor will determine if adjustments are necessary in order to maintain statistical compliance. In addition, the Assessor will determine if the sales support the current market area(s) or if an adjustment to these areas is needed. All sales reviews and pick-up work will be completed countywide.

2017:

Residential: Depending on the outcome of the 2016 appraisal plan, it is hoped to continue to re-appraise other Assessor Locations. For 2017 it is anticipated that more efforts will be directed toward the City of Norfolk. Because of the large number of parcels in Norfolk, this will be a multi-year project. This will entail entering all information and property characteristics into TerraScan. In addition, new costing and depreciation will be used. All properties will be physically inspected. Current information will be verified and / or updated based on this physical review. An attempt will be made to inspect the interior of these properties where possible and when allowed. New digital pictures will be taken. Currently there are approximately 8,182 parcels with a residential appraisal type in the

City of Norfolk. Of this number approximately 7,604 parcels, or 92.94%, are improved. In addition, all sales and pick-up work will be completed county-wide. It is hoped time will allow the entering of all rural residential data into TerraScan in anticipation of a re-valuation for next year.

Commercial / Industrial: It is anticipated that the process of the reappraisal of commercial properties in the City of Norfolk will continue this year. Because of the number of parcels and the diversity of those parcels it is anticipated that this will be a multi-year project. This process will entail entering all information and property characteristics into TerraScan. All new costing and depreciation will be used. All properties will be physically inspected. Current information will be verified and / or updated based on this physical review. An attempt will be made to inspect the interior of these properties where possible and when allowed. New digital pictures will be taken. Currently the City of Norfolk contains approximately 1,267 parcels with a property class of 2000 or 3000. Of those parcels approximately 1,008, or 79.56%, are improved. In addition, all sales reviews and pick-up work will be completed county-wide.

Agricultural: There will be an in-depth analysis of all agricultural sales in Madison County. The sales will be analyzed by L.C.G. as well as by market area. The Assessor will determine if adjustments are necessary in order to maintain statistical compliance. In addition, the Assessor will determine if the sales support the current market area(s) or if an adjustment to these areas is needed. All sales reviews and pick-up work will be completed county-wide.

2018:

Residential: For 2018 efforts will be concentrated once again on the city of Norfolk. Additionally, it is anticipated that some focus will be on rural properties. This will entail entering all information and property characteristics into TerraScan. In addition, new costing and depreciation will be used. All properties will be physically inspected. Current information will be verified and / or updated based on this physical review. An attempt will be made to inspect the interior of these properties where possible. New digital pictures will be taken. Currently, there are approximately 1,863 <u>rural</u> residential parcels (property class 1000 & 4500). Of this number, approximately 1,542 parcels, or 82.77%, are improved. It is anticipated that the farm houses will be done in conjunction with rural residential. At this time there are 1,202 active, rural, improved parcels in property class 4000. Of this number, 741 have a house value. In addition, all sales and pick-up work will be completed county-wide.

Commercial / Industrial: As with the Norfolk residential properties, this year will also see a concentrated effort placed on Norfolk commercial properties. Additionally, rural commercial properties may be reappraised for 2018 to coincide with the residential reappraisal taking place in the rural areas. This will entail entering all information and property characteristics into TerraScan. All new costing and depreciation will be used. All properties will be physically inspected. Current information will be verified and / or updated based on this physical review. An attempt will be made to inspect the interior of these properties where possible. New digital pictures will be taken. Currently there are approximately 301 *rural* commercial parcels with a commercial appraisal type. Of these parcels, approximately 181 parcels, or 60.13%, are improved. In addition, all sales reviews and pick-up work will be completed county-wide.

Agricultural: There will be an in-depth analysis of all agricultural sales in Madison County. The sales will be analyzed by L.C.G. as well as by market area. The Assessor will determine if adjustments are necessary in order to maintain statistical compliance. It is hoped that agricultural improvements (buildings & bins) can be re-appraised this year to coincide with the rural residential and commercial parcels. In addition, the Assessor will determine if the sales support the current market area(s) or if an adjustment to these areas is needed. All sales reviews and pick-up work will be completed county-wide.

The following table will provide a visual representation of the proposed *Three-Year Plan of Assessment:*

Prop. Class	Residential	Commercial / Industrial	Agricultural

Disclaimer:

Please be advised that the above plan / graph should be seen as a guide, not a binding time-line of appraisal scheduling. During the analysis of statistical data from the sales file it may become apparent that certain areas will need immediate attention in order to resolve issues relating to current market conditions. Flexibility to respond to changing market conditions is not shown in this plan. By nature, the fluidity of the market is unpredictable and thus impossible to forecast in this 3-year plan. However, this flexibility must be available to the Assessor in order to respond, as timely as the law will allow, to any such market fluctuations. This flexibility will allow the Assessor to produce the accurate and equitable valuations the constituency has come to expect.

This plan may or may not coincide with the activities outlined in the 6-year plan of review. Additionally, budgetary restrictions as well as changes in legislation and regulations promulgated by the Property Tax Administrator may also necessitate revisions in the timeline contained herein. Given this insight, which may not have been available at the time this report was drafted, the Madison County Assessor's Office reserves the right to deviate from the above outlined appraisal / review plan and address those issues which are deemed to be more urgent in nature.

Attest this, the 15th day of June 2015.

RE: Annual Special Valuation Report

Dear Ms. Sorensen,

Pursuant to REG-11-005.04, I am hereby submitting a report on Special Valuation in Madison County Nebraska.

The extensive market analysis that has been performed over the past few years has not demonstrated that there are consistently measurable non-agricultural influences in the vast majority of the Madison County market.

It is my opinion the valuations that have been established for agricultural land in Madison County do not reflect any measurable non-agricultural influences and are therefore an accurate reflection of the uninfluenced actual market value of agricultural land.

To date four (4) parcels have been granted special valuation in Madison County. Specific descriptions are as follows:

Parcel #1:

Parcel Number: 590158538

Legal Description: E1/2, E1/2, 18-23-1. This parcel contains approximately 160 acres.

Parcel #2:

Parcel Number: 590146971

Legal Description: SW1/4, 18-24-1

This parcel contains approximately 154.4 acres.

Parcel #3:

Parcel Number: 590150917

Legal Description: Pt. NW1/4, SE1/4, 23-24-2, Tech's 1st Lot Split

This parcel contains approximately 10 acres.

Parcel #4:

Parcel Number: 590150909

Legal Description: Pt. E1/2, NW1/4, SE1/4, 23-24-2, Tech's 2nd Lot Split

This parcel contains approximately 10 acres.

These parcels meet all of the requirements for approval as a special valuation parcel. As such all were approved. At the present time I have been unable to determine a consistently measureable valuation influence other than that of agricultural land for Parcels # 1 & 2. There have been no sales in the area of land for uses other than agricultural land. At this time my opinion of the highest and best use of the property is the current use of agricultural land. I currently have these parcels valued as agricultural land according to the L.V.G.'s present on the parcel. These parcels are currently in agricultural Market Area 1.

Parcels #3 & 4 have been determined to have a valuation influence other than agricultural land. These parcels are rural acreages with prime location and size for residential development. As such they have a market value of approximately \$7,000 to \$10,000 per acre. However, both of these parcels are currently used for agricultural use and were planted to row crops in 2015. These parcels are in Market Area 1 where a typical dryland farm would command a current agricultural land market valuation of approximately \$5,000 to \$8,000 per acre depending on soil type, slope, and other factors.

If I may be of further assistance please do not hesitate to contact me.

Sincerely,

Jeff Hackerott

Madison County Assessor
