

2016 REPORTS & OPINIONS

RICHARDSON COUNTY

DEPARTMENT OF REVENUE

PO Box 94818 • Lincoln, Nebraska 68509-4818 Phone: 402-471-5729 • revenue.nebraska.gov

April 8, 2016

Commissioner Salmon:

cc:

The Property Tax Administrator has compiled the 2016 Reports and Opinions of the Property Tax Administrator for Richardson County pursuant to Neb. Rev. Stat. § 77-5027. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Richardson County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to Neb. Rev. Stat. § 77-1514.

For the Tax Commissioner

Sincerely,

Ruth A. Sorensen

Property Tax Administrator

402-471-5962

Pam Vice, Richardson County Assessor

Introduction

Neb. Rev. Stat. § 77-5027 provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the state-wide sales file that contains all arm's-length transactions as required by Neb. Rev. Stat. § 77-1327. From this sale file, the Division prepares a statistical analysis comparing assessments to sale prices. After determining if the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the Division's analysis is presented and contained within the correlation sections for Residential, Commercial, and Agricultural land.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the price related differential and coefficient of variation. As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the Price Related Differential (PRD) and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15 percent indicates that half of the assessment ratios are expected to fall within 15 percent of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Pursuant to Neb. Rev. Stat. § 77-5023, the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property. Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO establishes the following range of acceptability:

Property Class	COD	<u>PRD</u>
Residential	.0515	.98-1.03
Newer Residential	.0510	.98-1.03
Commercial	.0520	.98-1.03
Agricultural Land	.0525	.98-1.03

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted methods are used in the county assessor's effort to establish uniform and proportionate valuations.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Neb. Rev. Stat. § 77-1327, the Division audits a random sample from the county registers of deeds records to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices are necessary to ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the Division ensures intra-county equalization exists. The progress of the county's six-year inspection cycle is documented to ensure compliance with Neb. Rev. Stat. § 77-1311.03 and also to confirm that all property is being uniformly listed and described for valuation purposes.

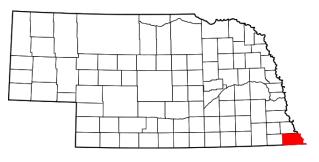

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

The comprehensive review of assessment practices is conducted throughout the year. Issues are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

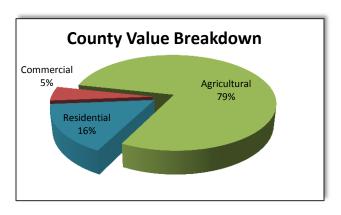

^{*}Further information may be found in Exhibit 94 at http://www.terc.ne.gov/2016/2016-exhibit-list.shtml

County Overview

With a total area of 552 square miles, Richardson had 8,128 residents, per the Census Bureau Quick Facts for 2014, a 3% population decline from the 2010 US Census. In a review of the past fifty years, Richardson has seen a steady drop in population of 42% (Nebraska Department of Economic Development). Reports indicated that

75% of county residents were homeowners and 90% of residents occupied the same residence as in the prior year (Census Quick Facts).

Richardson	County Quic	k Facts

	Preston	
	Rulo	
	Salem	
Most Populated	Falls City (4,21	6)
	-3% from 2010	US Census
Census Bureau Quick Facts 2014/Ne	braska Dept of Economic De	velopment

The majority of the commercial properties in Richardson convene in and around Falls City with some commercial contribution from Humboldt as well. Per the latest information available from the U.S. Census Bureau, there were 259 employer establishments in Richardson. County-wide employment was at 4,187 people, a 3% gain relative to the 2010 Census (Nebraska Department of Labor).

Simultaneously, the agricultural economy has remained another strong anchor for Richardson that has fortified the local rural area economies. Richardson is included in the Nemaha Natural Resources District/s (NRD). Dry land makes up the majority of the land in the county. In value of sales by commodity group, Richardson ranks tenth in cut Christmas trees and short rotation woody crops, when compared against the other counties in Nebraska (USDA AgCensus).

2016 Residential Correlation for Richardson County

Assessment Actions

For the current assessment year, the County conducted a statistical analysis of the residential class of properties. The county adjusted values for valuation group 11, which represents, the rural residential properties, after the physical review to bring the level of value within the statutory range. Additionally, all pickup work was completed by the county, including onsite inspections of any remodeling or additions.

Description of Analysis

Residential parcels are valued utilizing eight valuation groupings that are based on the assessor locations or towns in the county, and one that consists of the rural residential properties.

Valuation Grouping	Assessor Location
01	Falls City
02	Dawson
03	Humboldt
04	Stella
05	Salem
06	Rulo
07	Verdon
08	Shubert
11	Rural

For the residential property class, a review of Richardson's statistical analysis profiles 250 residential sales, representing the valuation groupings. Valuation group 01 (Falls City) constitutes about 68% of the sales in the residential class of property and is the major trade center of the county.

Two of the three measures of central tendency for the residential class of properties are within acceptable range (the median and the weighted mean). The measures of central tendency offer support of each other. The mean or arithmetic average is skewed by outlying sales and improvement is observed when low dollar sales are removed as evident in the statistics of sales with a selling price of greater than 14,999. The qualitative statistics are both above the recommended range. They are also impacted by low dollar sales over 20% of the profile consists of sales with sale prices 15,000 dollars or lower. All of the valuation groups with an adequate representation fall within the acceptable range for the calculated median.

2016 Residential Correlation for Richardson County

Study Yrs				
01-OCT-13 To 30-SEP-14	106	100.20	101.90	96.85
01-OCT-14 To 30-SEP-15	144	91.81	109.48	88.32

The indicated trend for the residential market demonstrates an increasing market. A 9% increase for the county as a whole is observed for the two year study period as evidenced by examining the study year statistics. This upward trend is consistent through all of the valuation groups in the county. This indicates that overall, residential value within the county has followed the general residential market activity as observed in the southeast area of the state.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Richardson County Assessor has developed a consistent procedure for both sales qualification and verification. The County utilizes a sales questionnaire to aid in the verification of all the residential sales. The Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Richardson County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of real property.

The county's inspection and review cycle for all real property was discussed with the county assessor. For residential property the rural residential properties along with agricultural improvements have been inspected this year which completes the current six-year review cycle. The county assessor and staff have been aggressive in their approach to bring all the inspections up to date and also have incorporated technology to aid in the assessment of the residential class.

Valuation groups were examined to ensure that the groupings defined are equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the residential property class. Based on all relevant information, the quality of assessment of the residential class adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

2016 Residential Correlation for Richardson County

Equalization and Quality of Assessment

A review of both the statistics and the assessment practices suggest that assessments within the county are valued within the acceptable parameters, and therefore considered equalized.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	171	98.95	109.09	94.32	30.90	115.66
02	19	92.68	100.34	84.70	26.94	118.47
03	31	92.37	93.91	83.64	19.34	112.28
05	7	86.21	176.00	87.43	121.24	201.30
06	3	61.98	63.35	62.59	02.69	101.21
07	6	72.23	73.82	60.63	21.21	121.75
11	13	97.01	94.55	93.66	17.04	100.95
ALL	250	95.82	106.27	91.63	31.34	115.98

Level of Value

Based on analysis of all available information, the level of value of the residential class of real property in Richardson County is 96%.

2016 Commercial Correlation for Richardson County

Assessment Actions

For the current assessment year, the county assessor verified the sales and conducted an analysis of the sales. Operating minerals were revalued. Additionally, all pickup work was completed by the county, and on-site inspections of any remodeling, and demolitions were conducted.

Description of Analysis

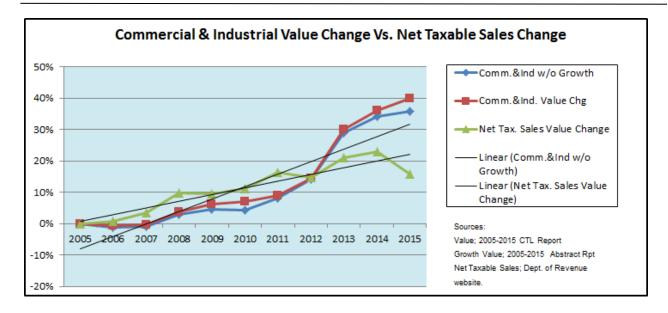

Valuation Grouping	Assessor Location
01	Falls City
02	Humboldt
03	Remainder of County

For the commercial property class, a review of Richardson County's statistical profile includes twenty-seven commercial sales, representing all three valuation groupings. Valuation group 01 constitutes about 66% of the sample and this accurately reflects the composition of the commercial population. Only one of the three measures of central tendency for this valuation group is within acceptable range (the mean). The qualitative statistics are both well outside the recommended range, bringing in to question the reliability of the statistics. The level of value over the three year study period demonstrates that, with the larger sample of sales in the most recent year, the level of value is in the range.

Study Yrs				
01-OCT-12 To 30-SEP-13	6	79.70	81.66	87.24
01-OCT-13 To 30-SEP-14	6	85.94	104.82	92.95
01-OCT-14 To 30-SEP-15	15	91.66	103.68	76.33

Determination of overall commercial activity within the county included the Analysis of Net Taxable Sales—non-Motor Vehicle (http://revenue.nebraska.gov/research/salestax_data.html)—that would be one modest indicator of commercial market activity, or as noted on the website "general sales and economic activity for selected locations". The Net Taxable Sales by business classification is comprised of eight codes—from Agriculture to Public Administration in Richardson County. The three largest business classifications in the County that provide the bulk of Net Taxable Sales are: Retail Trade, Other Services, and Accommodation and Food Services.

2016 Commercial Correlation for Richardson County

Net Taxable Sales for the last eleven years indicates an average of 1.53% net increase over this period of time. Comparing this figure to the Annual Percent Change in Assessed Value shown in Chart 2 of Exhibit 7B (2.24% annual percent change excluding growth for the same time period) indicates less than one point difference.

This would tend to indicate that overall, commercial value within the county has followed a general indicator of commercial market activity. Further, although there were three years in the data that indicated a decline from the previous year (years 2009, 2012 and 2015), the remainder were positive and the latest year's comparison of Net Taxable Sales [2015] to the previous year was down by 5.8%. This decline may be attributable to the exclusion of agricultural equipment parts.

Assessment Practice Review

An annual comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes, and any incongruities are noted and discussed with the county assessor for further action.

One of the areas addressed included sales qualification and verification. The Richardson County Assessor is developing a consistent procedure for both sales qualification and verification. The Division's review inspects the non-qualified sales to ensure that the grounds for disqualifying sales were supported and documented. The review includes a dialogue with the county assessor and a consideration of verification documentation. The review of Richardson County revealed that no apparent bias existed in the qualification determination and that all arm's-length sales

2016 Commercial Correlation for Richardson County

were made available for the measurement of real property. From a historical review there appears to be consistency in the utilization of sales over a five year period.

The county's inspection and review cycle for all real property was discussed with the county assessor. All property in Richardson County has been inspected during the current six-year review cycle. The county assessor states that her review goal is to begin the inspection of the commercial class in 2016. She is using physical on-site inspections by office staff for the inspection and review. The county is timely in the submission of sales as well as other statutory reports.

Valuation groups were also examined to ensure that the group defined is equally subject to a set of economic forces that impact the value of properties within that geographic area. The review and analysis indicates that the County has adequately identified economic areas for the commercial property class. Based on all relevant information, the county adheres to professionally accepted mass appraisal standards and has been determined to be in general compliance.

Equalization and Quality of Assessment

For measurement purposes the commercial sample is unreliable and does not represent the commercial class as a whole or by substrata.

VALUATION GROUPING						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
01	14	85.94	85.60	76.26	22.86	112.25
02	4	66.70	89.58	67.54	82.88	132.63
03	9	86.34	124.15	96.75	55.66	128.32
ALL	27	84.95	99.04	80.22	41.41	123.46

With the information available it was confirmed that the assessment practices are reliable and applied consistently. It is believed the commercial properties are being treated in a uniform and proportionated manner using accepted mass appraisal techniques.

Level of Value

Based on the consideration of all available information and assessment practices, the level of value is determined to be at the statutory level of 100% of market value for the commercial class of real property.

2016 Agricultural Correlation for Richardson County

Assessor Actions

A sales analysis was completed, as a result grass land values increased approximately 20% throughout the county, and crop land values were increased about 3% for 2016. Other changes reported for agricultural land were the result of land use changes that were reported or observed by the county.

The county completed the inspection and review work for agricultural outbuilding and dwellings. In addition all pickup and permit work was completed for the year.

Description of Analysis

The majority of agricultural land in Richardson County is dry land at approximately 70% of the total. 24% is grass with the balance of irrigated at 3%. The entire county is considered as one market area.

There are 63 sales in the statistical profile of the county. Review of the profile supports that land uses have been valued within the acceptable range. Of the measures of central tendency only the weighted mean is below the range. With the limited number of sales of grass land and no sales of irrigated land the county assessor made adjustments based on the movement of the market of the general area. The adjustments made by the county assessor are similar to the general market trends in this portion of the state. Grass land was increased the most at approximately 20% with the dry and irrigated classes being increased approximately 3%. The agricultural values established by the county assessor are reasonably comparable to the adjoining counties.

Assessment Practice Review

Annually, a comprehensive review of assessment practices is conducted for each county. The purpose of the review is to examine the specific assessment practices of the county to determine compliance for all activities that ultimately affect the uniform and proportionate valuation of all three property classes. Any incongruities are noted and discussed with the county assessor for further action.

One assessment practice reviewed is that of sales qualification and verification. Richardson County's process consists of a mailed questionnaire sent to one or both parties to an agricultural transaction. The Division reviews the non-qualified sales to ensure that the reasons for disqualifying sales are supported and documented. The review also includes a dialogue with the county assessor and a consideration of verification documentation. It is the practice of the county assessor to consider all sales qualified unless shown to be non-arm's-length. The review of the county revealed that no apparent bias existed in the qualification determination and that all arm's-length sales were made available for the measurement of agricultural land.

2016 Agricultural Correlation for Richardson County

The inspection and review cycle for all real property was also examined. Within the agricultural class rural dwellings and outbuildings are reviewed at the same time as the rural residential review. Therefore, the last review of agricultural improvements was completed for the current assessment year. Land use was updated for this assessment year, via comparison of each record to the information supplied by the geographic information system (GIS).

The review process also examines the agricultural market to ensure if areas are defined they are equally subject to a set of economic forces that impact the value of land within the delineated areas. The summary of the market area analysis concluded that the county has adequately identified that the establishment of market areas for the agricultural land class is not currently necessary.

Another portion of the assessment practices review relates to how rural residential and recreational land use is identified apart from agricultural land within the county. The county assessor's policy is to consider the use of the additional acres associated with the rural dwelling. Exceptions are made for land contiguous to a current agricultural operation. To further distinguish whether the parcel is rural residential or recreational would involve the stated use by the taxpayer via the sales verification questionnaire.

Equalization

All dwellings located on both agricultural and residential-use land are valued using the same cost index and depreciation schedule. Farm home sites carry the same value as rural residential home sites, because the county assessor believes there are very minimal market differences between them.

Agricultural land values appear to be equalized at uniform portions of market value; all values have been determined to be acceptable and are reasonably comparable to adjoining counties. The quality of assessment of agricultural land in Richardson County complies with professionally accepted mass appraisal standards.

2016 Opinions of the Property Tax Administrator for Richardson County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation				
Residential Real Property	96	Meets generally accepted mass appraisal practices.	No recommendation.				
Commercial Real Property	100	Meets generally accepted mass appraisal practices.	No recommendation.				
Agricultural Land	70	Meets generally accepted mass appraisal practices.	No recommendation.				

^{**}A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.

Dated this 8th day of April, 2016.

B. Computer, Automation Information and GIS

1.	Administrative software:
	Thompsen Reuter
2.	CAMA software:
	Thompsen Reuter
3.	Are cadastral maps currently being used?
	Yes
4.	If so, who maintains the Cadastral Maps?
	Assessor and staff
5.	Does the county have GIS software?
	Yes
6.	Is GIS available to the public? If so, what is the web address?
	Yes, http://www.richardson.assessor.gisworkshop.com/
7.	Who maintains the GIS software and maps?
	GIS Workshop
8.	Personal Property software:
	Thompsen Reuter

C. Zoning Information

1.	Does the county have zoning?
	No
2.	If so, is the zoning countywide?
	No
3.	What municipalities in the county are zoned?
	Falls City, and Humboldt
4.	When was zoning implemented?
	Unsure of date,

D. Contracted Services

1.	Appraisal Services:
	Prichard & Abbott- mineral interests
2.	GIS Services:
	GIS Workshop
3.	Other services:
