

BEFORE THE TAX EQUALIZATION AND REVIEW COMMISSION

IN THE MATTER OF EQUALIZATION)
OF VALUE OF REAL PROPERTY)
WITHIN GRANT COUNTY, NEBRASKA,)
FOR TAX YEAR 2014)

COUNTY NUMBER 38
AFFIDAVIT OF TERRY CURTISS

STATE OF NEBRASKA, County of Box Butte: ss.

Terry Curtiss, being first duly sworn on oath, states:

1. I am the Grant County Attorney. I am familiar with real estate in Grant County. I am also the attorney for Chimney Rock Public Power District, which provides electrical service for irrigation in Morrill County, Panhandle Rural Electric Membership Association which provides electrical service for irrigation in the southern half of Sheridan County, the northern half of Garden County, southwestern Cherry County, Grant County, and Arthur County, and Northwest Rural Public Power District, which provides electrical service for irrigation in Dawes County, the north half of Sheridan County, and the northwest corner of Cherry County.

2. According to the Operations Manager of Panhandle Rural Electric Membership Association (PREMA), four center pivot irrigation systems and associated wells therefore situated in Grant County, Nebraska are powered by electricity. All remaining irrigation is powered by diesel engine power units. This is a result of the lack of three phase lines required for irrigation operations and in some cases the distance to existing lines.

3. Based upon the knowledge I have acquired in representing Chimney Rock Public Power Districts and Northwest Rural Public Power District, similar problems do not exist in the parts of Morrill and Sheridan County where the comparable sales are situated. The systems' density is greater than for PREMA in Grant County, Nebraska and three phase lines exist. Some diesel power for irrigation exists in southern Sheridan County, where customer density is similar to PREMA's in Grant County, but the bulk of the services in Morrill County and Sheridan County exist in areas with heavier soil and nearby markets, like the North Platte River Valley in Morrill County and Garden County, Mirage Flats Irrigation District and the Niobrara River/Highway 20 corridor north of the Niobrara River in Sheridan County, Nebraska. These areas grow a variety of row crops, including corn, dry edible beans, beets, irrigated wheat, potatoes, and forage crops. The lighter the soil, the more likely small grains and forage for supplemental feed will be grown.

4. Both Morrill County, Nebraska and Sheridan County, Nebraska are in Natural Resource Districts (North Platte NRD and Upper Niobrara White NRD) which have limitations on the amount of water an irrigator may pump. This makes high water use forage crops like alfalfa hay impracticable for production as a cash crop where other row crop markets and storage exist.

5. There are no commercial grain storage facilities within 60 miles of Hyannis, Nebraska. Attached hereto as Exhibits 1 and 2 are the USDA and Nebraska Public Service Commission Website listings of licensed warehouses.

6. Communities near the comparable sale pivots provided by the property tax administrator with commercial storage include Rushville, Gordon, and Merriman for the northeastern Sheridan County comparable sales, Ainsworth and Long Pine, Nebraska for the extreme eastern Cherry County sales, Bridgeport and Bayard for the Morrill County comparable sales, and Oshkosh for the Garden County sales. All of these delivery points are much closer than a haul to commercial storage from Grant County, Nebraska.

7. Attached hereto as Exhibit 3 is a map showing average precipitation in eastern Cherry County is 2 to 4 inches more than Grant County.

8. The growing season is shorter in Grant County than similar counties to the east. Attached hereto as Exhibit 4 is a summary of data available on the National Climatic Data Service website for Grant, Hooker, Thomas, Arthur, McPherson, and Logan Counties. It reflects the longer growing season and greater precipitation the further east the measure is taken. The elevation drops significantly from northwestern Grant County to the east side of Thomas County. Comparison of climatological data in Cherry County, Sheridan County, Garden County, and Morrill County is not meaningful since the record keeping point is quite distant from Grant County (Valentine, Gordon, Oshkosh, and Bridgeport).

9. All of the foregoing make reliance on the "comparable" sales relied upon by the Property Tax Administrator's representative inappropriate. They are not similar to the irrigated real estate in Grant County, Nebraska.

FURTHER AFFIANT SAYETH NOT.

Terry Curtiss

Subscribed and sworn to before me this 28th day of April, 2014.

Johana M. Brost Wills
Notary Public

My commission expires: 8/7/14

Mean Annual Precipitation in Nebraska

SUMMARY OF CLIMATIC DATA

County	City	First Frost Data	Last Frost Data	Growing Season
Grant	Hyannis	9/23	5/15	131 days
Arthur	Arthur	9/25	5/10	138 days
Hooker	Mullen	9/22	5/14	131 days
McPherson	Tryon	9/25	5/10	138 days
Thomas	Theford	9/25	5/11	137 days
Logan	Stapleton	9/26	5/10	139 days

Decree Days

Averaging the last three years total degree days (tdd), yields the following:

1. Grant County (Hyannis) – 7083 tdd
2. Arthur County (Arthur) – 6594 tdd
3. Hooker County (Mullen) – 6880 tdd
4. McPherson County (Tryon) – 6908 tdd
5. Thomas County (Theford) – 6849 tdd
6. Logan County (Stapleton) – 6873 tdd
